The Man Who Stands Back of  
the "Knodig" Pitless Scale

## Let Me Send You a "Knodig" Pitless Scale on 30 Days' FREE TRIAL

No Money Down  
No Notes to Sign  
Nothing to Pay

**My Scale—the Knodig Pitless—is used by the  
U. S. Government, Which Proves its Quality.**

You can't afford to buy one of those inaccurate, poorly constructed Pitless Scales, which will do poor work and last only a year or two, nor a high priced, old style Pit Scale which makes big repair bills and cannot be moved about on your place.

What you need is a **KNODIG PITLESS**, which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run because it lasts a lifetime.

The "**KNODIG**" costs from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee. I make the "**KNODIG**." I know just how good it is, and I can afford to stand back of it.

You positively can't afford to buy a scale until you have seen my big illustrated catalog showing the brand new models A and B "**KNODIG**" PITLESS with Protected Bearings. Ready for instant use when you want them.

No ice or snow to cut away from the bearings in winter—no dirt or dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "**KNODIG**" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest factory prices. Costs about half the price of a Pit Scale and has no expensive pit with rotting timbers, rusting parts and big repair bills.

Can be moved anywhere on your land, wherever the work happens to be. It is personal property. Should

**H. C. Gumbel, Genl. Mgr. National Pitless Scale Company,**  
2011 Wyandotte Street, Kansas City, Missouri.

you sell your farm, the "**KNODIG**," unlike the Pit Scale, does not go with the land. Absolutely accurate, because tested according to U. S. Standard of weights. The U. S. Government has selected the "**KNODIG**" for use in the Kansas City Post Office.

My plan saves you all the middlemen's profits. Deal direct with me. No Agents, Salesmen, Jobbers or Dealers stand between you and my factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer? Does it make the scale you buy any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

I am willing to PROVE that the "**KNODIG**" Pitless is the scale you need. I will send a set to you, or to any responsible Farmer, Stockman, Elevator Man, or Grain Dealer, on a month's free trial.

You have nothing to pay until you're satisfied. No deposit, no notes to sign, nothing to do but give the "**KNODIG**" a fair, honest trial at MY risk. If it doesn't please you, send it back, and I will pay freight BOTH ways. And I will also pay the expense of setting the "**KNODIG**" upon your premises.

Write to me personally for the new **Knodig Pitless Scale Catalog**. It contains over 40 fine half-tone pictures that will interest you, and is chock full of practical scale wisdom from cover to cover. The book is free. You will want to see it. Write for it today, to

chute is the hinged doors on the rear end which make it possible to adjust the chute to any sized barn door. Where the width of the rear end of the chute is stationary and cannot be adjusted to the door as shown in the illustration, there is often a foot or two of space to be divided between the two sides. As our readers who have had experience in dehorning know, an animal will always choose to pass through this small opening rather than into the chute and thereby cause a constant aggravation. The

animal's head into position on the trough. As soon as this is accomplished the rope B is thrown over the neck of the animal and secures the head firmly to the trough, when the dehorning operation may be performed. As soon as the operation is concluded the animal is un-stanchioned and one of the sides of the chute is hinged so that it may be opened for the animal to escape from the chute, after which it is closed and another animal is driven in. The dimensions for this chute may be made to suit the size

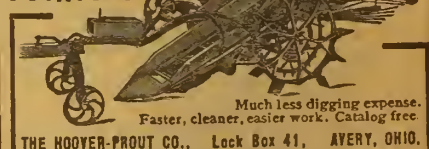

A DEHORNING CHUTE.

chute proper is mounted on two heavy timbers which may be 4x4's or 4x6's, while the uprights are generally 4x4's. The stanchion is made to open and close and secured in any way that suits. The convenient part of the chute is the trough-shaped part marked H. This is made of two-inch stuff and securely fastened to bottom cross pieces. After the animal is secured in the stanchion a halter is thrown over its head and the halter rope is passed through the hole just below the letter H. The letter A shows a continuation of this rope to the pole which is used as a lever to bring the

of animals to be dehorned. However, it is a good plan to make it large enough to accommodate large animals, as the chute comes very handy in performing any kind of an operation on an animal when it is necessary to secure him. The hinges and latch on the side door and on the swinging gates at the rear should be made extra strong and not less than three in number, as sometimes an animal will throw itself and place more or less strain on the sides of the chute. The width of the chute at the stanchion is commonly three feet, while at the rear end it is eight inches wider.

I HAVE MADE AND SUSTAINED  
MY REPUTATION BY CURING  
DIFFICULT EYE CASES.

I devote my entire time and study to the eye. My personal attention, even to the smallest detail is given to my patients. Though living in a commercial age money cannot give me the satisfaction that I receive from such letters as the one written a day or two ago by Mrs. F. L. Wintermute of 121 Second Street, Jackson, Mich., who wrote me that her case of cataract, which had been termed hopeless by others, was entirely cured by my knifeless home treatment. It is the hundreds of letters which I receive of this nature which makes me happy in the thought that I am benefiting humanity and giving vision and sight to those who otherwise would be blind and groping in darkness. I guarantee to cure cross eyes without knife or bandage. Whatever form of eye trouble you are suffering from, do not despair. I can convince you in my Palouse Absorption Method there is hope. IT WILL NOT COST YOU ONE CENT to get my professional opinion. Just sit down and write me the nature of your trouble and I will send you free my 80-page book illustrated in colors. It tells you who I am, what I have accomplished and describes in detail the more common eye troubles, their causes, effects, cures and many other things of value.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

ILLEGITIMATE CHILD.

An Oklahoma Subscriber.—A young woman gave birth to an illegitimate child. A short time before that happened, A, the father of the child, left the country. The child was adopted by a woman. (1) In case A returns to Oklahoma can he lawfully obtain custody of the child? (2) Can the young woman compel A to marry her, if he comes back?

Answer.—(1) He cannot. (2) She cannot.

DISTRIBUTING AN ESTATE.

A Subscriber, Bosworth, Mo.—How can a man make a deed or will so that at his death his property will be transferred to his wife, without the delay and expense of probate proceedings?

Answer.—It is a difficult thing to do. If a man wants to keep and hold his property while he lives and then have it at his death vest in his wife, he can hardly accomplish the purpose without having an administration of his estate. He might deed all his property to his wife, but then, she might die first and he would have to have probate proceedings to get his share.

ALL ABOUT JURORS.

A Subscriber, Lorimor, Iowa.—How are jurors, both grand and petit, chosen in Iowa?

Answer.—The answer to this question would fill a book, and we have not the time at present to write a book; anyhow, not a large book. We therefore refer our correspondent to the following portions of the code of Iowa, where he can find much valuable detailed information on the subject. The code can be found in the office of any justice of the peace, or lawyer, and nearly any of them would cheerfully permit an inspection of the book. See chapter 11, pages 201-207, also pages 1,415-1,418, also pages 2,043-2,047.

HUSBAND AND WIFE—WILL.

A Subscriber, Cowley County, Kansas.—(1) A and B are husband and wife living in Kansas, and each one has property there. They have no children. Suppose either one should die, without a will. What share of the deceased one's property would the survivor be entitled to by the laws of Kansas? (2) A and B are husband and wife and live in Oklahoma, but each owns real estate in Kansas. They have no children. Each one made a will, drawn up by a notary public and signed by two witnesses, by which their legal heirs were given one dollar each. Are the wills good under the laws of Kansas?

Answer.—(1) The survivor is entitled to the whole estate. (2) If the wills are properly prepared and signed by the testators and witnesses, they are valid and binding in Kansas, although the heirs got only \$1 each.

TRESPASS—DAMAGES.

A Subscriber, Battle Creek, Mich.—There is a lake covering about three acres in one corner of my farm, and with neither inlet nor outlet. The lake is stocked with fish. It is about twenty rods from the highway and is surveyed in my farm. The town people and others annoy me a great deal by taking fish from the lake without my consent. A notice forbidding them to do so has no effect whatever. How can I prevent them from so doing?

Answer.—We are very doubtful whether the trespasses committed upon your premises by the people of the town and others, constitute a criminal offense, but there is no doubt that you may bring suit against any or all of them for damages and put them to some expense and trouble, which might have the effect of stopping the practice. The damages you would recover in such cases would probably be light.

LAND DEAL IN WYOMING.

A Subscriber, Brush, Colo.—More than a year ago my brother and I went to Wyoming and bought eighty acres of irrigated land from a company there. The land was unimproved. The deal was made through an agent of the company. He said we would have to pay one-tenth of the price down, \$220, which we did. He said he had no contracts at the office, but would write them out when he returned to his office in Lincoln, and send them to us. When the contracts came they were so unsatisfactory and different from what we agreed to, that we refused to sign them. The company urged us to go before a notary and sign the contracts, but we refused, and the company asks us to pay taxes on the land and we refused. We still have the contracts, but would rather lose what we have paid than sign them. Is there any way to get our money back?

Answers.—We do not know, and could not tell without more knowledge of the understanding really was, and how

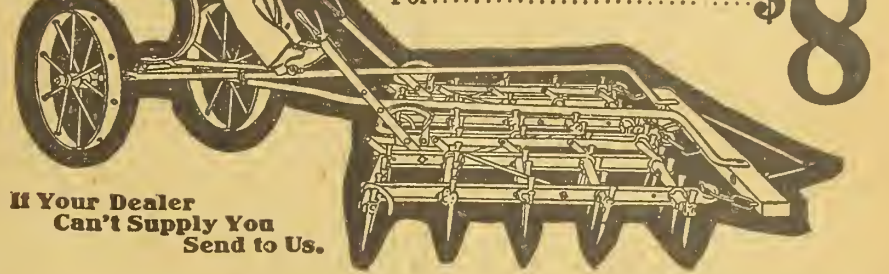

Why Don't You Ride  
When You Harrow?

REAL HARROW COMFORT

Plowing is about the easiest work on the farm, but how many successful Farmers to-day use *Walking* plows? You don't—do you? No; horses are too cheap and life too short to wear your legs out following a plow all day.

You ride when you plow; you ride when you plant; you ride when you cultivate.

Well, then, why don't you ride when you harrow?

Is there any reason on earth why you should continue to make this work the hardest kind of drudgery by *walking* over plowed ground,—

Or riding one of those crude carts that twist and turn and jerk you about until you wish you *had* walked?

No, Sir,—there is no longer any excuse for saying that "harrowing is the hardest work on the farm."

The new Rock Island Two-Wheel Cart has changed all that.

It offers you a pleasure you never enjoyed before—a ride behind a drag harrow that is just as comfortable as a ride on your Sulky or Gang Plow or your Cultivator.

LOOK at the man in the picture above. He's riding a Rock Island Cart, and he doesn't look a bit more comfortable and easy than he feels.

The feature that adds most to his comfort is the fact that he always faces the horses, no matter which way the wheels may be angled. Think what *that* means!

The swinging back and forth of the axle doesn't affect the driver a bit.

This is why: The platform for the seat is made of two circular plates, lower plate being bolted solidly to the axle.

Seat and foot-rest are both fastened to the upper plate which can turn on the lower plate.

An automatic locking device, similar to that used on the rear wheel of a Sulky Plow, holds the parts in position while the cart is being drawn straight ahead,—

But permits the wheels to angle either way while making a turn, or when either of them strikes an obstruction, without disturbing the driver in the least.

This feature is exclusive with the Rock Island Cart. No other harrow cart has it.

AN IMPORTANT IMPROVEMENT

One serious trouble with two-wheel carts is that in striking an obstruction which throws one wheel behind the other, the wheels do not quickly return to their correct position, but frequently slide along for quite a distance. This is why nothing of this kind can possibly happen with the Rock Island Cart:

The draw-bars are crossed and pivoted at the axle. While the axle can swing freely when one wheel of the cart strikes an obstruction, or when making a short turn, the axle and wheels are always perfectly controlled by the draw-bars in the same manner as the front wheels of a wagon are controlled by the tongue.

SAVES YOU HIRED HELP

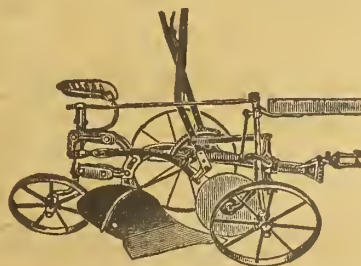

A boy at \$8.00 or \$10.00 a month with a Rock Island Two Wheel Cart will do as much harrowing as a man at \$25.00 or \$30.00 will do without the cart. You, therefore, actually save the price of this useful implement two or three times over in a single month.

And when you consider that the Rock Island Cart will last ten or fifteen years, you see that the price, \$8.00, means an investment of 50 to 75 cents a year. Can you point to any other labor saving implement on your farm that pays you as big a dividend as this? Think it over, Neighbor!

WE'LL DO THIS FOR YOU

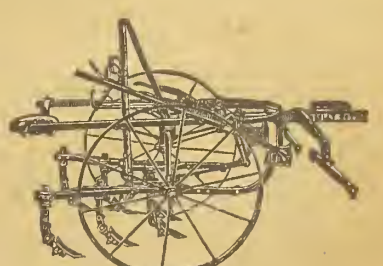

We are manufacturers of all kinds of Farm Implements, selling only through **Regular Implement Dealers**. But we want you to have a chance to buy this Harrow Cart, and if your dealer won't get one for you, just send us \$8.00 and we will ship you a cart. We will pay the freight on it to your nearest R. R. Station ourselves. Send the price, \$8.00 at once, or if you want to know more about the Rock Island Two-Wheel Harrow Cart, before you decide to buy, we will be glad to send to you a

DESCRIPTIVE BOOKLET FREE

HIGH-LOW SULKY

The only frameless plow in the world that lifts high with one lever. Circular sent free.

BULLY BOY CULTIVATOR

Frame all in one piece. Rigid or Pivot pole. Full description for the asking.

We are spending thousands of dollars telling the Farmers about the Rock Island Two-Wheel Cart, and we want every one of them to know just how good it is. Ask us questions. Let us hear from you. Write today, if your dealer can't show you the cart.

Full information about the cart is absolutely **FREE**. If, in addition to information about the cart, you would like to have a pretty watch charm, enclose 6 cents in stamps to pay postage and *always* mention this paper.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

FEEDING THE BEEF-BRED COW FOR MILK.

Good cows, no matter whether they are dairy-bred or beef-bred, must be given milk-producing foods if they are expected to yield anything like their maximum milk flow. However, in the case of the dairy cow there is not the same inclination or same tendency to convert assimilated food into body fat as there is in the case of the beef cow. For that reason men who handle the so-called dual-purpose cattle or the ordinary cattle of the country, which in the main are grade Short-horns, should emphasize the use of flesh-forming instead of fat-forming foods.

Corn is a fat-former and cows cannot do their best at the pail, though fed to their full capacity, on this grain. We have found from experience that there are two undesirable results that come from feeding cows heavily on corn, namely, that it cuts down the milk yield, and secondly, it shortens the lactation period. This being true, one cannot take his cows through the winter on corn alone and expect them to milk as well when turned to grass as would be the case if they were fed on flesh-forming foods.

Now we realize that the flesh-formers are more costly than the fattening foods, but bear in mind that dairy products are higher in price than meat products. For example, if you can make two pounds a day gain on a fattening steer it will be worth about six cents a pound, or twelve cents. Change the character of the food and give the same value to a good cow and she will make from it a pound of butter worth twenty-five cents. Let her have the same food that you would give the steer, that is a ration composed largely of corn, and her products would be worth in the neighborhood of twelve cents. The balance, of course, would be put on her back if she were inclined to beefiness; but where is one to get his profit out of the feed utilized in that way if he is in the dairy business?

# Why the Omega Cream Separator Will Give You the Best Results!

THE man who never heard of a horse, would think an ox-cart beat walking, a whole lot. Because he wouldn't know there was a better way.

Your great-grand-mother was perfectly content to spin flax by hand, because there wasn't any better way known at that time. But that's no reason why you should shut your eyes to the better way, is it?

Now, we say to you that the Omega Cream Separator is as far ahead of other separators as sunlight is ahead of darkness.

A pretty bold claim, we will admit. But you can't really know whether our claim is the honest truth or mere advertising clap-trap, unless you investigate.

We don't ask you to buy; we don't ask you to invest one cent. All we ask is the opportunity of proving to you the truth of our claims.

We are spending thousands and thousands of dollars in the farm papers of this country, inviting the farmers and dairymen of America to investigate our claims. And that's all we ask.

We would be pretty foolish to do it, if we couldn't "make good," wouldn't we?

Well, here's what we want to prove to you: We don't claim that the Omega, under ordinary conditions, will skim closer than all other separators.

We want to be fair and we admit that there are two or three machines that do as good work in this respect as the Omega.

But no separator ever built by man skims any closer. And no separator ever made produces so fine a quality of cream.

You can get more money for cream from an Omega Separator—you can make better butter with cream from an Omega Separator—

Because the Omega Separator is the only separator that doesn't break up the globules of butter fat and whip them into a putty-like mass.

We can prove that to you. Isn't it worth investigating?

Moreover, By actual test no separator made turns nearly so easily as the Omega.

You can prove that by simply turning the machine.

But here's the explanation: The Omega is the only separator that has a bearing at both the top and bottom of the bowl.

Other separators leave the top of the bowl—the place where the "wobble" is—without support.

Other separators are like your wheelbarrow would be if you tried to use it with the axle supported at only one end.

Look at them! Isn't it true?

The Omega is able to have a bearing at the top of the bowl because it delivers both its cream and skim milk from the bottom.

It's the only separator that does this. Others would imitate our method, but we hold the patent.

Moreover, again: The Omega is the simplest cream separator made.

Now, we know that every manufacturer who ever made a machine of any kind, no matter how complicated, it was, immediately got up and howled about its simplicity.

Sometimes, however, he was counting more on the simplicity of his hearers, than on the simplicity of his machine.

All we ask is that you investigate the Omega and compare it with any other under the sun.

You will find that others require as high as fourteen different tools, wrenches, punches, rods, etc., for their daily care, while you need nothing but

All We Ask Is the Chance To PROVE To You What the Omega Will Do.

THE OMEGA SEPARATOR CO., 35 Concord St., Lansing, Mich.

your ordinary, every-day bowl wrench for the Omega. And this simplicity, of course, saves in repairs and makes the Omega long-lived. That's why the first separators we ever made and sold, 25 years ago, are still in use, and giving good service.

But good gracious! It's costing us a lot of money to talk to you here. Let's cut out the talk and get together. Summed up, all we want to say is the one word

**INVESTIGATE.** You are just as anxious to get the best separator as we are to sell the Omega. We make stronger claims than any other manufacturer dare make and we stand ready to prove them. Make us prove them! It won't cost you a cent to investigate and it means dollars to you. Send us your name, tell how many cows you keep and get our free book, "More Milk Money," with Omega Catalogue and proofs—Address—

A simple and comparatively inexpensive ration is composed of equal parts corn-and-cob meal, wheat bran and ground oats. A cow that will not give a good milk flow on this ration and sustain it through a long period has no business to remain either in a dairy or dual-purpose herd.

Our most expert dairymen acquire the faculty of dropping their unprofitable cows very rapidly, and we suggest that those who handle dual-purpose cattle

send the loafers to the block. We want a cow that will do more than simply drop a calf. She ought to be able to feed it well and make it a bouncer by the time it is six months old, and then supply milk for the family for two or three months after that time.

## Developing the Cow.

As with men, the parentage is of great value and we look for and have good reason to expect cows to be better cows from a long line of productive ancestry; so this then is the stepping stone in the developing of a dairy cow.

A profitable cow in my estimation is one that can produce in a year, or still better a series of years, a good, maximum yield of butter at a cost that will yield a good profit to her owner and also produce a strong, healthy calf each year. This should be one of the requisites in securing a sire for the head of the herd; not only see that he is from a productive strain, but from a family of regular breeders, because he not only reproduces his good qualities, but often intensifies his weak points as well. See that he is as near perfect in conformation and dairy make-up as possible, for with all the care we may exercise in the mating of our animals, some faulty ones will develop that we had not figured on; so if we have looked well to this end, to see that the sire is right and that the dams we are to use for foundation are right, we have gone a long way toward their development.

Calves should be fed in such a way as not to impair either growth or digestion, for later on we are going to ask them to take care of a lot of feed so they may develop and be profitable animals, but if fed and cared for in a careless and harmful manner, their digestive faculties have been impaired, and they simply say, "We can't do it."

I am still a believer that heifers should not freshen too young. If allowed to drop their first calf at from twenty-eight to thirty months of age, they will get a little more growth and strength, and we believe their digestive capabilities are also strengthened.

There are many things that enter into the development of the dairy cow, and possibly, if any one was dropped out the best results could not be obtained. and the man who uses that part of his body above his ears the most freely usually succeeds best.

We have come to believe that a large part is due to the feed end of the question. The organs of digestion, like the other organs and muscles of the body, are developed best by constant use; the breeder who, through neglect, has not provided in some way for the emergencies that always come is short-sighted.

## A Very Lame Excuse

Is that offered by other Cream Separator concerns, when they tell you that even though they do not extract all the cream what they leave in is not wasted because it goes to fatten the pigs. This is a fallacy. Professor Haecker, of the Agricultural Department of the University of Minnesota, declares that there is as much food value in skim milk as in whole milk. Therefore, the cream remaining is wasted.

You prevent all this waste by using an

## Iowa Dairy Separator

What you want is every particle of the cream, and this is exactly what you get with the "IOWA." Write at once for catalog 25 and full information, which will come free by return mail. Address,

The Iowa Dairy Separator Co., Waterloo, Iowa.

# SHARPLES BUSINESS DAIRYING FREE

Contains all the money-making points of dairying. Among the subjects treated you will find How to Feed, What to Feed, When to Feed, What Foods Produce Most Milk, How to Take Care of Milk-Producing Foods, How to Feed Silage, the Care of the Milch Cow, and many other profitable and practical suggestions that help swell the profits of the dairyman. With the book we will send additional information telling you how and why you can get the most out of you milk by using the

## Sharples Tubular Cream Separator

We guarantee that with a Tubular you can get 50 per cent more cream over the old pan method of skimming, and 6 per cent over any other cream separator made. Sharples Separators get all the cream and the Tubular is the easiest running, easiest cared for, and easiest kept clean. There is just one tiny piece in the bowl, the milk can is low and handy, the bearings are self oiling. Write for the "Business Dairying" at once stating number of cows you keep. Ask for booklet D.121

Mr. S. L. Boyer, Venetia, Pa., says "The Tubular makes me \$255.00 yearly."

The Sharples Separator Co., WEST CHESTER, PA.

Toronto, Can.

Chicago, Ill.

best suited for milk production.—F. H. Scribner in Wisconsin Institute Annual.

### Compounding Rations.

To the Editor of The Homestead:

The components which are generally enumerated in feeds are water, ash materials, fat (ether extract), protein, crude fiber, and nitrogen free extract.

Ash or mineral matter is that part of feed remaining in the form of ashes after burning. It is of minor importance in the feed of the dairy cow, but very essential in the food of young and growing stock. Fat or ether extract is the portion of feeding stuff which is dissolved by ether or benzene. Protein or flesh-forming substances are considered of highest importance in feeding animals, especially milk cows because they supply the material required for building up the tissues of the body and maintaining them under the wear caused by the vital functions. Crude fiber is the framework of the plants and is valuable in a ration only when it lacks bulk. Nitrogen free extract is what is left after deducting all the constituents named above. It contains some very valuable materials. First in importance are starch, sugar and a number of less well-known substances.

We might say, in a general way, that protein furnishes materials for building up muscle, bone, hide, hair, horns, and a part of the milk, while nitrogen free extract (better known as carbohydrates) and fat furnish heat by being burned in the body and energy used in muscular action, as well as the production of fat in the body or in milk in case of milk cows giving milk.

Our chemists have analyzed the various feeds and tabulated them, and our experimenters have learned by using the various feeds in certain proportions and amounts just what is necessary to produce milk most economically. We are now ready to figure out a ration.

We will reproduce part of an American feeding table, which I have before me:

POUNDS OF FEEDS	Corn silage 1:14.8			Corn and cob meal 1:13.9			Linseed meal O. P. 1:1.5			Red Clover hay 1:5.2		
	Total dry matter	Protein	Carbohydrates and fat	Total dry matter	Protein	Carbohydrates and fat	Total dry matter	Protein	Carbohydrates and fat	Total dry matter	Protein	Carbohydrates and fat
1				0.9	0.05	0.7	0.9	0.31	0.5			
2				1.7	0.10	1.3	1.8	0.62	1.0			
3				2.6	0.14	2.0	2.7	0.92	1.4			
4				3.4	0.19	2.7	3.6	1.23	1.8			
5	1.3	0.06	0.8	4.3	0.24	3.4	4.9	1.54	2.3	4.2	0.36	2.1
10	2.6	0.12	1.8	8.5	0.48	6.7				8.5	0.71	4.2
15	3.9	0.18	2.7							12.7	1.07	6.3
20	5.3	0.24	3.6							16.9	1.42	8.3
25	6.6	0.30	4.5							21.2	1.78	10.5
30	7.9	0.36	5.3									

Room would not permit us showing the digestible nutrient content of the several feeds given. Now an ideal ration for this climate is about one part protein to five and three-fourths parts to six of the several other elements of a similar nature, which, for the use of the average dairyman, we will group under the names carbohydrates and fat. To get the balance we multiply fat

content of a given number of pounds of feed by 2.4 and add the product to the carbohydrates. Then divide this sum by the protein content. For the sake of simplicity we have prepared the above table with the process of multiplication and addition done, so all we have to do is to divide the sums of the carbohydrates by the protein content to find the balance.

For example, suppose we take the ration composed of thirty pounds silage, ten pounds clover hay, four pounds bran, five pounds corn-and-cob meal and three pounds old process oil meal. By referring to the table you will notice that in thirty pounds of silage you have 0.36 pounds protein and 5.3 carbohydrates and fat; ten pounds of clover hay, 0.71 and 4.2; four pounds bran (wheat bran), 0.48 and 1.8 (not given in table); corn-and-cob meal, 0.24 and 3.4; linseed meal (old process), 0.92 and 1.4. Add and divide and you have a nutritive ration of 1:5.9.

While we have not been able to show the digestible content of this ration by reference to the standard feeding table, I find the total ration given contains 17.66 pounds of digestible matter, which is about right for a large cow, perhaps a little heavy for a small one.

There are a great many feeds that one can use in figuring out and making up rations, and the dairymen should take prices into consideration and use the cheapest feeds that contain the ingredients he is after. I think with a little practice most anyone could take a feeding table and figure out a ration for his cows that will be suited to his needs and conditions. While I have made silage the base of the ration given, and while there is nothing better, yet it is not absolutely necessary. Use corn stover and a little more corn-and-cob meal or corn fodder to give the variety which will answer very well.

O. O. Brewbaker.

### Renshaw's Sow Sale.

The Duroc Jersey sow sale of Mr. Austin Renshaw at Blair, Neb., on February 4th

brought out a good crowd of breeders and farmers and an average of \$58.47 was made on the entire offering. No. 20, a daughter of Long Aik, topped the sale at \$210 and was purchased by Mr. Geo. I. Clark, St. Edwards, Neb. No. 21, a daughter of Glendale Critic, sold for \$180 and went to Messrs. M. S. Moats and Son and E. Z. Russell. The sale was a decided success. Colonel Gallahan and Luther cried the sale. Below is a list of buyers:

Lot. Price.  
1 C. W. Huff, Mondamin, Iowa. \$75.00

2	John Lyden, Beiden, Neb.	52.50

## WHO IS RIGHT ABOUT THE BEST CREAM SEPARATOR?

Every cream separator manufacturer, old and new alike, claims that his separator is better than any other. WHO IS RIGHT? Who can honestly make such a claim? We will leave the answer to you but wish to submit a few facts for your consideration. The DE LAVAL machine was the original separator and it has been manufactured for twenty-eight years, twice as long as any other machine. The world's best inventors and mechanics have been constantly working and trying to better it and thousands of dollars have been spent annually in this effort. The DE LAVAL has for many years been thoroughly tested, tried and used in every civilized country in the world and under every conceivable condition. Over 800,000 have been sold to date, several times all other makes combined. From these tests and experiences the DE LAVAL experts have learned what a cream separator must be to be called BEST. The DE LAVAL machine of today represents this knowledge. Every feature of its construction is the result of years of study and practical experience and the expenditure of vast sums of money. Nothing has been left undone that would help to make and keep the DE LAVAL the BEST of all separators. No separator built today contains any feature whatever, not used in the DE LAVAL, which has not at some time or other been tried out by the DE LAVAL experts and cast aside for something better in the present DE LAVAL construction. Consider these facts well, consult every experienced separator user you can, learn all that is possible about cream separators and then tell us WHO you think is RIGHT. Meanwhile send for a DE LAVAL catalog of separator facts and reasons, to be had for the asking.

### CROPS WITHOUT WEEDS.

There's no necessity for having poor seed and noxious weeds mixed with what we sow, any longer. Down in the heart of the grain district a concern in Winfield, Iowa, has studied out a contrivance which they call a "Combined Corn Sorter, Grain Grader and Grass Seed Cleaner," and it is certainly a daisy. It cleans, grades and separates any seed or mixture of any four similar seeds rapidly and thoroughly. It takes out all the weeds and thistles and separates the grain into different grades, according to size, more perfectly than you could do it by hand, and does it so fast that on a farm of average size it more than pays for itself every year. Recent improvements have been made which add to the efficiency and life of the machine, the crowning feature of which is the new corn sorter. Entire zinc riddles above and below, taking the grain over sixty inches from hopper to bucket, removing the butts at the rear of the machine, and the tips underneath, and simply doing a perfect job, no good kernels being found in the butts, and no desirable kernels being found in the tips. It is a marvel of simplicity and thoroughness in work and speed with which the sorting can be done. The work of the new corn sorter makes it no different; the result is the same, whether the farmer shells off the butts or tips or leaves them on. The corn sorter riddles take the corn as it comes from the corn sheller, removes the butts and tips, leaving two grades of perfect uniform size seed corn. The farmer can set his planter plates to drop size No. 1; complete that, and change his plates to fit size No. 2 and be sure of the exact number of grains he wishes in a hill, at every stroke of the planter lever. The only requirement is that the corn to be sorted be seed corn. One of these machines does the same work that formerly required three separate machines, but it costs no more than one, and every machine is guaranteed. It's something every farmer ought to have for his own use, and now is a good time to get it for cleaning the spring seed. Address the Hall Grain Grader Company, Winfield, Iowa, and they will send you full particulars.

## EASY TO OPERATE EASY TO CLEAN

THERE are two things it pays to watch out for when you buy a cream separator.

**I. H. C. CREAM HARVESTERS** are of simple construction; are very easily operated and easy to clean.

Notice the natural and easy position of the operator in the illustration. The handle is placed at just the right height to turn easily. No high reaching or stooping over. The machine is also geared just right to make it run easily.

Another important feature is the low supply can,—one that is filled easily and yet the milk and cream spouts are high enough to make possible the use of large receiving vessels. The skimmed milk will flow directly into a ten-gallon milk can.

In many separators, either the supply can is high or the milk and cream spouts are low.

And because of their simple construction, **I. H. C. CREAM HARVESTERS** are easily cleaned. All you need is a pan of hot water and the two brushes which go with the machine.

These are but two of the good points of the **I. H. C. CREAM HARVESTERS**, and before you buy a cream separator, you will do well to learn all about them.

They skim close under all conditions, whether the milk is warm, cold, rich, viscid or old—they get all the cream down

to a thousandth part.

They are made so strong and simple that in years of operation, they show no perceptible wear. We have given them a practical test that equals several years' work in the dairy. Every machine is tested before it leaves the factory.

The working parts are self-oiling, and neatly housed to prevent accident; yet all are readily accessible, which makes them easy to keep clean.

**I. H. C. CREAM HARVESTERS** are made in two styles, and various sizes; **Dairymaid**, a chain drive separator, and **Bluebell**, a gear drive separator.

Call on local agent and inspect these separators or write for catalog.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A.**

**The Rake that Lasts**

DID it ever occur to you that a rake ought to last for years and years? It is a simple tool. There's no clock-work about it. Just steel and wood—And if it is the right kind of steel—And the right kind of wood—And the steel and wood are put together right—There ought to be no wear out to it.

That describes all True Temper tools—of which a complete line of garden and lawn rakes is an important part. They are "the best tools you have ever bought at the same prices you have always paid!"

Because they are manufactured in strict accordance with a well defined standard process by the oldest and largest manufacturers of farm and garden Hand-Tools in the world.

### Ask Your Dealer For TRUE TEMPER Tools

And they must prove true in quality, construction, "hang," and temper under severe tests and inspections before they are permitted to wear the True Temper label. \* \* \*

True Temper tools are accurately constructed, special-purpose hand-tools for farming and gardening.

They help you to do your work with the least amount of time and labor and produce the best results.

In the production of crops their use means less expense and more profit. The line includes Forks, Hoes, Rakes, Hooks, Weeders, Cultivators, Beet Tools, Floral Tools, Garden Tools, Vegetable Scoop Forks, Potato Hooks, etc. Ask your dealer to show them to you. If he does not have just what you want, please write to us.

We have a book for you—"Tools and Their Uses," which tells all about special-purpose tools, and how they will save you time, labor and money. It is free. Write for it to-day.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### HORTICULTURAL NOTES.

If one lives on a farm where there is no fruit and one has but little time to spare for its production, we would recommend starting the first year with but three varieties, namely, apples, peaches and strawberries. Considering that several years will have passed before the first crop of apples is produced, an apple orchard should be started the first thing. For home use only, too many varieties of apples should not be planted. It is best to confine our choice to a few of the time-tested varieties and to have more winter than summer apples.

We have learned from experience that the seedling peach trees bear better than those that are budded. The budded trees produce large fruit of a fine quality and flavor, but the yield is not quite so heavy as that of the unbudded trees.

Strawberries are one of the best fruits grown and have an advantage over others, as fruit is borne in one year after planting. A hundred plants, if properly cared for, are sufficient for the average family. Self-fertilizing plants of a standard variety should be purchased. Do not go to your neighbor's garden and get plants deficient in vitality, but purchase of a dealer who uses scientific methods of production.

Orders for nursery stock should be sent in early in the season. When some nurserymen sell all of a certain variety they substitute others and one will very likely get something that is not wanted.

Apple trees should be pruned just before the sap rises in the spring. Many farmers have this done by some one experienced in pruning, but every farmer, by exercising a little judgment, can soon become an expert himself and save the cost of hiring. Where there are no large limbs a mallet and chisel are the best tools to use, especially if the orchard has not been pruned for several years. For water sprouts and small branches a pruning knife is all that is needed. The places where large limbs have been severed from the tree should be painted to prevent checking.

### GERMINATING CEDAR BERRIES.

A Nebraska subscriber asks for information relating to the treatment of cedar berries so that one can start a hedge from seed. He states that the cedar is growing in popularity and that a large number of farmers in his locality are interested in it for windbreak purposes.

Those who have had experience in germinating cedar berries, that is in starting a hedge from the seed, are requested to give, for the benefit of this subscriber and others who are interested in the same topic, the result of their experience.

The question of windbreaks, particularly around buildings and orchards, is a very important matter and one in which a good deal of interest is being taken at the present time. Let us hear from those who have had experience along this line.

### Plums for the Western States.

To the Editor of The Homestead:

The value of the plum for orchard culture does not seem to be very generally appreciated in the Trans-Mississippi region east of the Rocky Mountains. There are several apparent reasons for this indifference on the part of growers. One of these is probably the prevalence of thickets of native wild plums. Another is the seeming lack of adaptability of many of the cultivated varieties to local conditions. Few of the fruit growers of the central West have any conception of the importance of the plum in the horticultural world unless they have had an opportunity to see the prune orchards of the Pacific slope.

The European plum, or prune, has not been found adapted to successful culture in the states lying between the Mississippi and the Rocky Mountains, for the reason that the trees and fruit have been found more or less subject to attacks of fungous diseases which sap the vitality, destroy the productiveness and,

## BLIZZARD BELT

# FOUR HARDY EVERGREENS FREE

We grow our "Blizzard Belt" Evergreen in ten million lots. To advertise them and prove that they are healthy, well rooted and vigorous, we offer to send four fine sample trees 3 years old, free to a limited number of property owners. Mailing expense 5 cents, which send or not as you please. A postal will bring them. Last year we distributed 500,000 of these sample evergreens and gained thousands of new friends. This year we have

### Reserved 600,000 Trees

for this free advertising distribution and if you want your share of them write at once for they will go fast. W. H. Gibboney, Mandan, North Dakota writes: "Please accept thanks for the sample evergreens. They are doing fine." This is but a sample of thousands of letters.

Our catalogue containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens, etc., with a mine of valuable information for fruit growers, is free for the asking. Write to-day.

**THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.**

## There is Money in Stock-raising and Dairying

but it requires above all GOOD PASTURES AND MEADOWS. How these can be obtained you will find fully described in our large, illustrated catalog. Whoever sows our carefully selected Clover-Grass Mixtures will double the yield of his pastures and meadows and he can keep again as many cattle on the same acreage. The grass and hay will be of the most nourishing and milk-producing quality. No matter what the nature of your soil and location you will obtain luxuriant pasture or meadow same year you sow the mixture. We are located in the best clover and grass seed producing section of the U. S. Nowhere are seeds of such high quality produced as at Faribault, Minn. We have the most complete stock of choice, re-cleaned Clover, Timothy, Alfalfa, Bromus Intermis, and other valuable Grass Seeds. For only 10c. we will mail you ten samples of Grass and Clover Seed, Millet, Rape, etc. We are growers of new, improved and pedigreed varieties of Seed Grain, Seed Corn, Seed Potatoes and Vegetable Seeds. Also Fruit Trees, Ornamental Shrubs and Small Fruit Plants. Write for free catalog, English or German.

**FARMER SEED CO., Wm. Kueker, Mgr., Box 14, Faribault, Minn.**

# SEED CORN

The Iowa corn crop is worth more money than all the mines in the United States. Will it pay you to spend 50c per acre to increase your yield 25 bu.? It will.

We can furnish you seed corn that has breeding back of it. "Why?" "Because."

We have been breeding the best varieties for years.

We have a \$14,000 equipment for handling it. We have experts to grade it and select the best.

We have 1,200 acres of the best land in Page county devoted to its growth.

We have graduates of Agricultural Colleges in our employ who have conducted an Experiment Station.

We have made frequent shipments to the Department of Agriculture at Washington, D. C.; which proves our ability to produce the best type of seed; in fact, we have spared neither time nor money to make the seed the best that can be produced.

Send for our 1907 illustrated catalog which gives full information as to our method of handling seeds of all kinds. Send for it today. IT IS FREE.

**A. A. BERRY SEED CO., Box 52, CLARINDA, IA.**

# SEED CORN SOLD ON APPROVAL

Test it any way you please for ten days. If not perfectly satisfactory, return at our expense and money will be refunded. Best and largest yielding varieties: Sutton's Improved Boone Co. White; Sutton's Favorite White; Reid's Yellow Dent; Gold Standard; and Leaning and Premium Yellow Dent. All corn carefully selected, placed in our mammoth dry house and perfectly dried with steam pipes and air shafts. From 600 acres we selected 8000 bushels of fine seed ears. When sold we quit, so order now. We handle no outside corn. Shipped in the ear (Bushel boxes) or shelled. All shelled corn hulled at both ends and graded. Has highest germinating power, and stands cold spring rains better than common corn. Letters from Iowa, Missouri, Ohio and Illinois this year, state that our corn out-yielded all other, making from 85 to 125 bushels per acre. Send for catalog and read these letters signed by the parties raising the corn. The actual test is what talks. My seed corn may double your yield. Write for illustrated Seed Corn Book and samples. Free. Address: My ad will appear every other week. C. D. SUTTON, Dept. D., Mason City, Ill.

# We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

ultimately, shorten the life of the tree. Yet there are at least two good reasons why more extended efforts should be made in the way of endeavor to secure the successful introduction of one or more varieties, either acclimatized of exotic origin or developed locally from seedlings; namely, first, because of their superior quality and, second, because of their lateness in blooming.

Many of the varieties of plums which have been introduced during recent years have been of the Japanese species or hybrids between that and some of the native American species. All of these have one fatal defect from the viewpoint of the practical fruit growers of the region between the Mississippi and the Rockies, and that is their proneness to bloom too early in the season. The European plums and prunes, on the other

It is a pleasure to spray if our Prepared Spray Mixtures are used. No dirt nor bother in mixing—always ready for use. As you have no waste they are the cheapest. Catalogue describing our full line of Prepared Spray Mixtures mailed free.

QUINCY SPRAY MIXTURE CO., Box No. 103-Q QUINCY, ILL.

er hand are equally as uniform in blooming late. Seemingly all of the hybridizers who have attempted to develop new varieties of plums in recent years, have used the Japanese plum as one of the parents of proposed cross with one of the native American varieties. None of

It's free. Ask for it. This book  
should be in every household, as  
it contains complete information  
on all kinds of farm and garden  
seeds, plants, flowers,  
shrubs, bulbs, etc., and is a  
valuable guide to all who grow  
anything, either for profit or  
pleasure. We make a specialty of  
Northern grown seeds.

**CURRIE BROS. CO.,**  
Dept. 17 MILWAUKEE, WIS.

## SEED CORN

**Golden West**  
The latest novelty, and decidedly  
the best yellow corn in existence.  
It combines all the most desirable  
characteristics. It is the best rooted,  
the strongest growing and most  
productive. Ear large, bright gold-  
en yellow, solid and perfect shape.  
Notice in above cut that it is about  
the same size at both ends; see how nicely it is capped over  
at both tip and butt, and how closely the kernels wedge in;  
grain is deep and cob small. Per bu. \$2.00, 10 bu. \$17.50.  
**FREE** TO FARMERS—A small sample of this  
corn will be mailed free if you mention  
this paper. Also a copy of our large,  
illustrated catalogue describing the above and all the  
best varieties Seed Corn and Farm and Garden Seeds.  
**IOWA SEED COMPANY, DES MOINES, IOWA.**

## GREGORY'S SEEDS

**FREE**

Our catalog is rich with  
information for the  
guidance of farmers  
and gardeners. It has  
been a great help to  
thousands—has been the means of turning  
many a failure into success.  
The great variety of vegetable and flower  
seeds include the best of the old standard  
and such new kinds as have proved  
of value by actual test.

**J. J. H. GREGORY & SON,**  
Marblehead, Mass.

## Spraying Made Easy

By Using  
**STAHL'S  
Excelsior  
Spraying Outfits  
and Prepared Mixtures**

Save your trees, vines and plants  
from the ravages of scale, fungi  
and worms by spraying, and thus insure an increased  
yield. Every farmer, gardener, fruit or flower  
grower should write at once for our free catalog,  
describing Excelsior Spraying Outfits, and con-  
taining much information on how to spray fruit  
and vegetable crops.  
**WM. STAHL SPRAYER CO., Box 103-0, Quincy, Ill.**

## SEED CORN

THAT BEATS THEM ALL.

Pure Bred—Thoroughly matured and well dried; hand  
picked, sorted and selected; tested and best quality;  
yields 20 to 40 bu. more per acre than ordinary sorts,  
and has often made 100 bushels per acre.

**SEED OATS** Try some of our new im-  
proved varieties this year.  
They are bright, clean and  
pure stock; are hardier,  
more vigorous and yield better; strictly Iowa grown  
new crop, at low prices. Our big annual illustrated de-  
scriptive catalog of all Farm and Garden seeds mailed  
**FREE** if you mention this paper.

**RATEKINS' SEED HOUSE, . SHENANDOAH, IOWA.**

## 400 STRAWBERRY PLANTS \$1.00

In three choice sorts. Fruit Trees and  
Small Fruits at Fair Prices. Lists Free.  
**J. F. DAYTON, WAUKON, IA.**

**HEALTHY TREES HONEST IN QUALITY  
WE PAY FREIGHT**  
Grafted apple 4c, budded peach 4c, budded  
cherry 15c. Concord grapes \$2 per 100.  
Black Locust \$1 per 1000. Complete colored  
out. free. Galbraith Nurseries, Box 82, Fairbury, Neb.

these experimenters seem to have thought  
it worth while to attempt to secure a  
desirable cross between some of the na-  
tive American species and the late-  
blooming European species.

The blooming period of the plum fam-  
ily from first to last, is nearly thirty  
days in duration. Practically all of the  
Japanese and Japanese hybrid varieties  
put forth their blossoms during the first  
fifteen days of this period and, as a re-  
sult of late frosts, the grower secures  
perhaps one crop in three or four years.  
The trees of the European species of  
plum, on the other hand, do practically  
all of their blooming during the last fif-  
teen days of the thirty-day period.

The region bordering on the Great  
Plains frequently experiences warm days  
in winter which cause the fruit buds to  
swell. This region also experiences the  
descent of the spring "norther" in March  
or early April with a low temperature  
that is sure to prove disastrous to fruit  
on trees which have bloomed prema-  
turely. Here, then, is a splendid field  
of effort for the man who will do for  
plums what Prof. T. V. Munson has done  
for grapes.

Oklahoma ought to be a great plum  
country. Within its limits are to be  
found no less than six or seven distinct  
botanical species of indigenous plums  
and some of these exhibit a wide ten-  
dency to variation even in a wild state.  
The bounties of the state as well as the  
activities of experiment stations, horti-  
cultural societies and nurserymen's as-  
sociations should be invoked to encour-  
age such a line of development.

Oklahoma. J. B. Thoburn.

### An Experience in Potato Growing.

To the Editor of The Homestead:

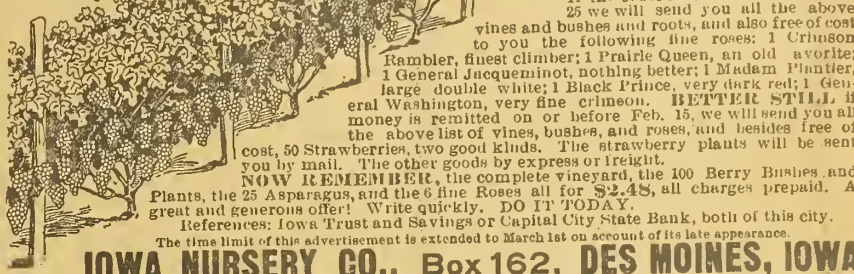

The average crop of potatoes in the  
Mississippi Valley is not more than fifty  
bushels per acre. The average potato  
patch looks as if its owner were making  
a very successful effort to grow a fine  
crop of weeds among which a few  
sprawny potato vines had succeeded in  
maintaining an uncertain existence. It  
is quite evident that these facts are re-  
lated in some way and in their light and  
experience in potato growing which I  
observed last year may prove interesting  
and instructive.

The soil was a fairly rich black loam,  
quite high for the most part, rolling  
gently, but not rough or broken. Dur-  
ing the winter horse manure was hauled  
and applied at the rate of about fifteen  
tons per acre. The middle of April the  
ground was plowed to a depth of about  
seven inches. It was then harrowed un-  
til all the clods were broken and the  
surface was in a finely pulverized con-  
dition. Just before planting the soil  
was disked and again harrowed. This  
was the 10th of May.

The seed potatoes were cut partly by  
hand and partly by the use of a simple  
home-made potato cutter which consist-  
ed of a plank long enough to reach  
across a barrel, having a hole four or  
five inches in diameter, across which  
were two blades, and another across  
which was a single blade. By the use  
of the cutter the work of preparing the  
seed could be carried on quite rapidly,  
the size of the pieces regulated so that  
by first cutting crosswise and then split-  
ting lengthwise a large potato could be  
cut into eight pieces while a smaller  
one could be cut into two or four as oc-  
casion seemed to require. It was the aim  
to have at least two eyes in each piece,

## A COMPLETE HOME VINEYARD FOR \$2.48

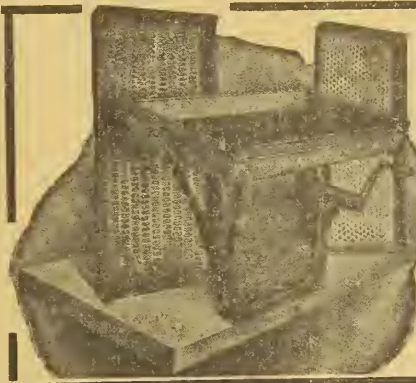

We grow and sell good trees. You do not know this, and we cannot convince you unless we can  
get a trial order. In order to get started we will offer you 75 First Class Grape Vines of the  
following varieties; 50 Concord, the old reliable; 10 Moore's Early, large and early;  
5 Agawam, the best red; 5 Niagara, the best white; 5 Catawba, old, but  
good. These vines are extra good, and it is because they are sure to  
please you that we want to put them in your hands. This selec-  
tion will make you a nice home vineyard. The vines alone are  
well worth the price asked, but we will add free to you 24 Rasp-  
berries (12 Gregg, black; 12 Cuthbert, red) 24  
Blackberries (12 Snyder, black; 12 Ancient  
Briton) 25 Asparagus, Conover's  
Colossal. We will deliver  
these free of all transpor-  
tation charges if  
you live in

### A PREMIUM FOR QUICK ACTION.

If the order is sent on or before Feb.  
25 we will send you all the above  
vines and bushes and roots, and also free of cost  
to you the following fine roses: 1 Crusino;  
Rambler, finest climber; 1 Prairie Queen, an old favorite;  
1 General Jacqueminot, nothing better; 1 Madam Plantier,  
large double white; 1 Black Prince, very dark red; 1 Gen-  
eral Washington, very fine crimson. **BETTER STILL**, if  
money is remitted on or before Feb. 15, we will send you all  
the above list of vines, bushes, and roses, and besides free of  
cost, 50 Strawberries, two good kinds. The strawberry plants will be sent  
you by mail. The other goods by express or freight.  
**DO NOT FORGET**, the complete vineyard, the 100 Berry Bushes and  
Plants, the 25 Asparagus, and the 6 fine Roses all for \$2.48, all charges prepaid. A  
great and generous offer! Write quickly. **DO IT TODAY.**

The time limit of this advertisement is extended to March 1st on account of its late appearance.

**IOWA NURSERY CO., Box 162, DES MOINES, IOWA**

## GOOD CORN LAND TOO VAL- UABLE TO WASTE.

Delany's Seed Corn Sorter enables the planter to  
do its best work. Thus the land ordinarily wasted  
in a poor stand is utilized and the yield correspond-  
ingly increased.  
It also removes all dirt and chaff and irregular  
shaped kernels which clog the planter.  
The time saved in planting alone will more than  
pay for the device.  
The corn is held until the grade is established  
and good seed cannot fall over as in continuous  
flow machines.  
The device is cheap, will last a lifetime, is easy  
to operate and has large capacity.  
Hundreds in successful operation.  
Send for free Seed Corn Booklet C showing our  
line of Sorters.

**J. F. DELANY, COLONA, ILLINOIS**

## The New Ideal Seed Corn Tester.

No more cigar box, tin plate and blotting paper seed corn testing. The New Ideal Corn Tester solves the  
whole problem. It is endorsed by Professor Holden and every other corn expert in the Central West.  
It tests thoroughly enough corn for forty acres each time. The season for testing is at hand. Write at  
once for catalog to

**ULBRICH SEED CORN TESTER COMPANY,**

424 Walnut Street,

Atlantic, Iowa

## PLANT ALFALFA

It's a money-maker—"King of All Grasses." Our

and the pieces ranging about the size  
of an English walnut. The seed was  
then treated by soaking for two hours  
in a solution composed of four ounces  
of corrosive sublimate to fifty gallons  
of water, the object being to destroy the  
germs of scab and rot.

The planting was done by means of a  
potato planter, which was so adjusted  
that one piece would be dropped every  
fourteen inches and the rows were made  
three feet apart.

Immediately after planting the ground  
was again harrowed and this was re-  
peated one week later. No further cul-  
tivation was given until the vines were  
about two inches high, when the ground  
was thoroughly stirred with a small  
shovel cultivator, after which the harrow  
was again used. This treatment was

a few large weeds which had escaped the cultivator.

The vines made a fine growth and almost completely shaded the ground, keeping it loose and mellow and giving the weeds a very poor chance to grow. The potatoes were mostly of late varieties and were dug by means of a two-horse potato digger about November 1st. All the different varieties made a very fine yield, the Rural New Yorker easily taking the lead, making close to three hundred bushels per acre.

It was found that there was more or less scab, notwithstanding the treatment of the seed just before planting. This was undoubtedly due to the recent application of manure which was no doubt an error. Had the manure been applied the preceding season and one crop grown upon the soil before the potatoes this difficulty would have been avoided.

It will be observed that the points which rendered this experiment a success, though small, are very important, but are usually overlooked. The first is treating the seed for fungous diseases after which comes thorough preparation of the soil. More seed was planted than is the common practice. This made possible an extra large yield and also aided in keeping down the weeds. The frequent cultivations conserved the moisture and made it available to the plants during the important time when the tubers were being formed. They also kept the patch clean and really reduced the cost of cultivation as it is usually necessary to do more or less hoeing under ordinary methods of cultivation. Under the method practiced the question of weeds was very satisfactorily disposed of and this, after all, is the most important, for as indicated in the beginning, weeds are the greatest enemies of successful potato growing.

#### Strawberries for the Farmer

To the Editor of The Homestead:

Taking the country over, the farmer's strawberry bed cannot be called a success. It is true that in many cases the farmer has not even attempted to raise that most delicious of fruit, but even where he has, the result has generally been disastrous. I have given some attention to these causes of failure and to the remedy, and will try to make a few suggestions that may be of help in growing this fruit. The usual cause of failure appears to be that, after the first crop which generally succeeds so well that the whole family are enthusiastic over the returns, weeds and grass spring up among the plants, there appears no way to remove them except by laborious hand labor, and the consequence is that when the next year comes and the berries are few and small and poor-flavored, the farmer in disgust takes his plow, turns the whole bed under, and that is the last of strawberries on that farm.

It has seemed to me that the easiest way to avoid this difficulty is for the farmer to grow the plants by the hill system. This does not mean that the plants are to be hilled up as I find some think, but that the runners are all to be kept off with the exception of one. Put the plants twelve inches apart in the row. Do not let them bear the same season you set them out. Cut all blossoms and runners off. The next year these plants will bear and also send out runners. Make the earliest runner take root just half way between the old plants, and as soon as the berries are gone, cut the old plants out and there will be left a row of young plants the same distance apart the old ones were. By fertilizing liberally this course may be pursued for several years or until the plants seem to be losing in vigor, when it is best to change the bed.

The value of this plan is that it does almost entirely away with hand weeding. With the plants in single hills, they can be hoed as easily as a hill of potatoes, but it should not be forgotten that the plants must never be hilled up with earth so as to cover the crowns or hearts or else they will die. This is the easiest and simplest way of raising strawberries that I can think of and can be followed by any farmer who has as much time to give to the strawberry bed as to a potato patch of the same size.

Missouri. L. R. Johnson.

**HIGHLAND PARK COLLEGE, DES MOINES, IOWA.**

## I Make Harness and Sell It Direct to You

This Heavy Team Harness Would Cost You \$35 at Your Dealers'. I Sell It For \$24

All Shipments on Approval.

The way to get a dollar's worth of harness for every dollar you pay is to buy direct from the makers. A \$35 harness at your dealers' is no better than it was when the manufacturer sold it to the wholesaler for \$24. Because the wholesaler's profit and the retailer's profit bring the price up to \$35 to you, doesn't make the harness one bit better.

It's the long way around that costs so much. If you went from Omaha to Chicago by way of St. Louis, it would cost you more than if you went direct, wouldn't it?

Why buy harness in the round-about way? Even the big mail-order houses charge you one profit more than I do. I make my harness and am satisfied with a fair profit. Big sales and small profits are better for me than small sales and big profits because every new sale means a new friend and then I sell to his friends. Those who buy my harness say I save them about a third—sometimes a half.

I make 50 styles of good harness. My line is complete. Each set that leaves my shop is the product of workmen highly skilled in harness making, and is guaranteed to be from the best oak tanned leather—the only kind that ever gets into my factory.

I save you 30 to 50%, because I sell direct,—no agents, salesmen, dealers nor middlemen of any kind stand between

you and my goods; you get better harness, greater selection, and the maker's guarantee of perfect satisfaction or your money back.

And you take no risk dealing with me, because my word is good, and the Company of which I am President, is responsible for any promise I make; look them up in the Commercial Agency books, or ask any bank or express company where we are best known here in our home town.

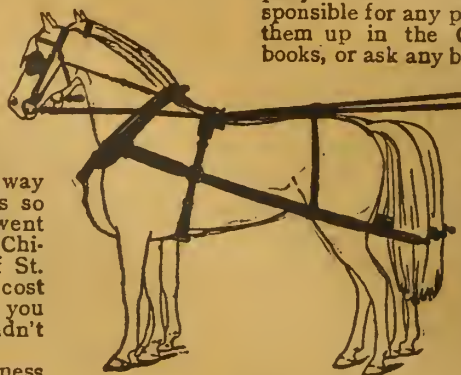

Now, about my "leader,"—the \$35 set for \$24. The cut gives you a fair idea of it. This is a genuine bargain—a splendidly made 1½-in. team harness, strong, stylish in appearance, and made of the very best grade oak tanned leather.

And it is actually worth more today than it was when we made it up, because leather is advancing in price, as you know.

So, if you want this special harness value, please order promptly, as I shall probably not be able to advertise the set again at \$24. Just send me the money and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways if you are not perfectly satisfied.

My big, free Harness book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address, R. M. Knox, Pres., Western Harness & Supply Co.,

613 Main St., Waterloo, Iowa.

## IOWA CLOVER

AGENTS wanted to introduce Burbank's wonderful stoneless plum—Miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. **Oregon Nursery Co.,** Detroit, Michigan.

## An Open Secret

It is an open secret among poultry raisers who have been successful that food is not all that makes hens lay. Often times even the greatest care and attention to proper feeding will not produce eggs at this season of the year. Such a condition is invariably due to digestive difficulties and sometimes disease. Dr. Hess Poultry Pan-a-ce-a meets this condition. It is a tonic, increasing the powers of digestion, supplying iron for the blood, cleansing the liver, arousing the egg-producing organs, reddening the comb and brightening the feathers.

## DR. HESS Poultry PAN-A-CE-A

Is the prescription of Dr. Hess (M. D., D. V. S.). In addition to increasing egg production it cures and prevents poultry diseases. Besides being a tonic it has a special property peculiar to itself—that of destroying infection, the source of so many poultry diseases. It bears the indorsement of leading poultry associations in the United States and Canada. Costs but a penny a day for about thirty fowls, and is sold on a written guarantee

11.2 lbs. 25c  
mail or express 40c  
5 lbs. 60c  
12 lbs. \$1.25  
25 lbs. pair \$2.50

Except in Canada and extreme West and South.

Hatch Chickens by Steam with the EXCELSIOR INCUBATOR Or WOODEN HEN

Simple, perfect, self-regulating. Hatch every fertile egg. Lowest priced first-class hatchers made. GEO. H. STAHL, Quincy, Ill.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### LICE KILLING.

A subscriber to The Homestead asks for a remedy for the big head lice that kill chicks even after their heads have been greased. Now it is certain that grease is sure death to lice. They simply cannot live after coming into contact with it. If the greasing is not most thoroughly done, the pests may crawl around to some spot not touched with the fatal application, but if once touched, Master louse is a "goner." If the grease is not put elsewhere than on the head, the lice will gleefully skip to an ungreased spot, and proceed with their destructive work. If you must grease, do not forget to put it under the wee chin and under the wings, and around the vent.

But such eminent authorities as John Robinson, editor of Boston "Farm-Journal," and Dr. P. T. Woods, protest against greasing the small birdlings. Grease will kill lice every time, but too often kills the chick also. These gentlemen, and many others of wide experience recommend the use of insect powder instead. Care must be taken in the selection of the powder, for some of those offered for sale are dangerous. One good way to powder chicks is to put about half a dozen in a ten-pound bag, sprinkle some powder in upon them, close the mouth of the bag, and shake it for a minute or so. This distributes the powder well into every part of the body, and is very effective. Better wait till the chick is ten days or two weeks old before subjecting it to such heroic treatment. By this time it can stand it all right. It is hard work to keep ahead of the lice in our poultry yards, but we have plenty of good tools, and victory is assured to the diligent and faithful.

### Hatching Leghorn Eggs.

To the Editor of The Homestead:

I made a number of incubator hatching tests one time that demonstrated some points in artificial incubation that I have never seen in print, viz., that Leghorn eggs will make a good hatch on a lower temperature than it takes to hatch Plymouth Rock or Brahma eggs. I know exactly what I am talking about in this instance. My tests proved it beyond my expectations. My expectations were gathered from the nature of the fowls and the difference in the size of eggs, also from little points gathered through observing the results in making hatches on mixed eggs.

My test was made with six 100-egg incubators. They were made exactly alike and all run alike in the same room and under exactly the same conditions. Before starting, I tested the thermometers to make sure there were no fractions in differences. I set three machines with Brown Leghorn eggs and three with Black Plymouth Rock eggs. I set each machine three times. The test was made in the months of May, June and July. Ran the temperature on the Leghorn eggs in one machine between 101 and 103, on another at 102 to 104 and on the other 103 to 105. I duplicated the plan on the three machines filled with Plymouth Rock eggs.

The lower temperature made the best hatch on Leghorn eggs while the higher temperature made the best hatch on Plymouth Rock eggs. For the second test I reversed the machines, that is I took the one that had been run on the higher temperature and run it on the lower temperature, made this reverse with both sets of incubators. The results came out as before. The higher temperature made the best hatch on Plymouth Rock eggs while the lower temperature made the best hatch on Leghorn eggs. With the Plymouth Rock eggs there was only a small per cent in favor of the higher temperature over the middle temperature, but with the Leghorn eggs the lower temperature made a greater gain over the middle temperature.

The third trial emphasized the results. This is the first time I have ever spoken of these particular experiments. I made the experiments to test an idea formed while watching incubator results on dif-

## A Free Book About Incubators

For your own sake don't buy an incubator until you read our book. It is written by the man who knows most about incubating—a man who devoted 25 years to the problem. It tells vital facts that you must know to buy wisely—facts you would not think of. It tells of Racine Incubators and Brooders, of course, but whether you buy ours or another, the facts are important. The man who writes the book made the Racine Incubator. When you learn what he knows you will want his machine, we think. The book is free—write today for it. Remember, We Pay the Freight. Address

Racine Hatcher Co., Box 135, Racine, Wis.  
Warehouses: Buffalo, Detroit, Kansas City, St. Paul.

## Why So Sure? FINE POULTRY

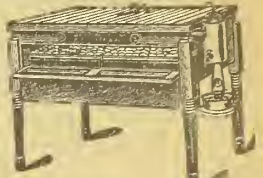

It's made on the right plan, it works right. It brings best results to the beginner as well as the experienced poultry raiser.

## POULTRY PAYS

Our Book, "Poultry for Profit" showing 35 best paying varieties mailed for 10 cents. Delavan Poultry Farm, F. E. R. Goetz, Manager, Box 35, Delavan, Wis.

ferent kinds of eggs and through studying the nature of the sitting and non-sitting varieties of poultry. I am thoroughly convinced that there is fully one degree difference between the right temperature for Leghorn eggs and the right temperature for Plymouth Rock or Brahma eggs. My convictions are that

two degrees difference between Leghorn eggs and Brahma eggs is about correct.

It is the experience of all incubator operators that Leghorn eggs hatch a day earlier than Plymouth Rock eggs in the same incubator. The same thing invariably happens in a hen's nest, yet a Leghorn that will set on her own eggs will hatch in twenty-one days and the same

of the Plymouth Rock. On first thought the difference in temperature seems queer, but if we extend the thinking and reasoning, it is not so queer after all.

It is a fever that makes hens broody. The larger varieties are more inclined to broodiness, the fever is higher. With the larger body, the heat is greater in proportion to the feathers. It is a hard matter to find opportunities to take the temperature under a sitting Leghorn. Only once have I ever been able to do so on account of the wilder nature and the sensitiveness in having things other than eggs under her, but in the one good test, the temperature showed 102 on the eighth day. On the other hand I have known the thermometer to show as high as 106 on the twelfth day under a Plymouth Rock hen. In dozens of tests the thermometer has shown 104 after a week's incubation under the larger varieties. Let me further say that as a general rule, the best results are obtained with incubators with a degree higher temperature in a cold room than in a warm room. This difference is due to the bottom of machine being cooler in a cold room. M. M. Johnson.

#### WILD WITH ITCHING HUMOR.

Eruption Broke Out in Spots All Over Body—Cured at Expense of Only \$1.25—Thanks Cuticura.

"The Cuticura Remedies cured me of my skin disease, and I am very thankful to you. My trouble was eruption of the skin, which broke out in spots all over my body, and caused a continual itching which nearly drove me wild at times. I got medicine of a doctor, but it did not cure me, and when I saw in a paper your ad., I sent to you for the Cuticura book and I studied my case in it. I then went to the drug store and bought the cake of Cuticura Soap, one box of Cuticura Ointment, and one vial of Cuticura Pills. From the first application I received relief. I used the first set and two extra cakes of Cuticura Soap, and was completely cured. I had suffered for two years, and I again thank Cuticura for my cure. Claude N. Johnson, Maple Grove Farm, R. F. D. No. 2, Walnut, Kan., June 15, 1905."

—Mr. John W. Budd, of Des Moines, has a twenty-four acre farm which he is desirous of leasing to a poultryman or dairyman. His advertisement appears on page 24.

#### Why Not Visit California

this winter? There will be an especially low rate during March and April—colonists' second-class one-way tickets \$33 from Chicago. A corresponding reduction in rates will be made from all points on the North-western Line.

Our daily and personally conducted tours offer many advantages to the traveler, among which is our service of Pullman tourist sleeping cars, through without change Chicago to San Francisco, Los Angeles or Portland, in which a double berth costs only \$7.

First-class round-trip tickets with very liberal return limits are sold daily. Consult the nearest agent of the North-Western Line for full information regarding rates, routes, etc.

#### HOMESEEKERS' EXCURSIONS.

On the first and third Tuesdays of each month, the Iowa Central Railway will sell round trip excursion tickets to points in the North, Northwest, South, Southwest and Southeast. The rate is only one fare plus \$2 and less, with liberal stop-over privileges. Tickets sold to points in the following states: Minnesota, South Dakota, North Dakota, Arizona, Arkansas, Colorado, Idaho, Indian Territory, Iowa, Kansas, Louisiana, Mexico, Missouri, Nebraska, Montana, New Mexico, Oklahoma, Texas, Utah, Wisconsin, northern Michigan, Wyoming, etc. For rates and full particulars call on agents or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

#### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

#### SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Minneapolis & St. Louis R. R. will place on sale special second-class settlers' tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

## Let Me Quote You a Price on a CHATHAM Before You Buy an Incubator

It will take one penny for a postal, and a minute of your time, to write for Special Prices on 1907 Chatham Incubators and Brooders. No matter what kind of a machine you have in mind—no matter where you intended buying, or when—TODAY you should send me a postal and get my catalog and prices.

My book will tell you how good Incubators are made—will tell you what you ought to know about poultry business—will tell you about brooders—will post you on the best way to make money out of poultry—and my prices on Chatham Incubators and Brooders will show you how to start in the poultry business for a small amount of money.

## Chatham Incubators Sold on 84 Days FREE Trial

freight prepaid—guaranteed 5 years. That's the story of the celebrated Chatham Incubator. We sell them on trial, pay the freight, and guarantee them for 5 years. With proper care, they last a lifetime. I am going after the incubator business of the country this season, and I intend to get it on great, big value in the machine and a very low price. Chatham Incubators are the best possible to make. They are tested, and known to produce the largest percentage of strong, healthy chickens. We have two immense factories—one in Canada and one in the United States—and run our own experimental station where a battery of Chatham machines are in operation every day in the year, under the care of expert poultry men. If you are most ready to buy a machine now, put it off for a day or two, until you can get my prices and catalog—then decide on what to buy.

We have warehouses in all the leading trade centers—where Chatham Incubators and Brooders are kept in stock—insuring prompt delivery. Depend on this:—With the immense amount of money—\$500,000—that we have invested in the incubator manufacturing business, we are sure to give our customers every improvement worth having in the Chatham Incubator. We can afford it, because that is what brings us the largest business in the world. That is all I can say in an advertisement. I invite you to write for my prices and book. Address me personally.

Manson Campbell, Pres., Manson Campbell Co., Ltd.  
241 Wasco Avenue, DETROIT, MICH.  
If you live west of the Mississippi River, address me Box 241, Topeka, Kan. If in the East, Box 241, Harrisburg, Penn.

Guaranteed Five Years

## HATCH ALL Incubators Will Hatch Your Eggs

It heats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

HEBRON INCUBATOR CO., Box 8, HEBRON, NEBRASKA

writer, not necessarily for publication, but as a mat-  
ter of good faith. All communications intended for  
this department should be addressed to Postoffice  
Box 727, Kansas City, Mo.

**WITH THE EDITOR.**

As I have made reports, in other years,  
after visiting the Kansas Woman's Press  
Associations, some of our readers know  
something of this body of women jour-  
nalists which meets yearly for confer-  
ence and a good time. It is the boast  
of its charter members that there is  
nowhere a more harmonious, congenial  
and altogether delightful association and  
I incline to agree with them. In the four  
years during which I have worn the sil-  
ver pen, which is the K. W. P. A.'s  
badge, I have known of no tiniest ripple  
of jealousy and I have found the gather-  
ing enjoyable and helpful to an unusual  
degree.

There are usually three sessions of  
the K. W. P. A.—morning, afternoon and  
evening. I was unfortunately not able  
to attend during the earlier part of the  
morning, but I arrived in time to hear  
the paper on Garden Cities and the dis-  
cussion which followed. Earlier in the  
session a paper had been presented on  
forestry, discussion of which had been  
postponed owing to its kinship to the  
topic of the thought of the Garden City.  
It might be thought that people living  
on farms have little or no interest in  
these subjects, but as was clearly shown,  
the matter is one that affects us all  
wherever we live. During the year 1906  
there arrived at Ellis Island immigrants  
to the number of 1,198,434. Think of  
it! And this is nothing new. Enormous  
immigration has been going on for years.  
Silently, and with a rapidity that is stag-  
gering, our cities are being taken posses-  
sion of by masses of foreigners. They  
make our slums. They also make, or  
help make, our laws. It is this which  
should make the Garden City movement  
—"Every family in a house, every house  
in a garden" a matter of moment to  
every one of us whether we live in town  
or country. Because I believe this more  
thoroughly than ever since the meeting  
of the K. W. P. A., I mean to devote  
an entire editorial to this topic some  
time soon. Meantime I hope our read-  
ers will inform themselves and so be in  
a position to strengthen the hands of  
their representatives who make laws for  
the preservation of our forests.

The program of the afternoon session  
gave promise of great interest. Not  
only were we to hear two of the ablest  
women of the Press Association discuss  
the pro and con of government owner-  
ship of the railroads, but the governor  
of the state and one of the most promi-  
nent journalists of the country were  
billed for discussion of socialism, one  
of them to treat it as "a menace to the na-  
tional life," the other as "a bar to prog-  
ress." These are big questions, but as  
they are daily becoming of increasing  
public moment and current interest it  
was wise and right that they should be  
presented to the attention of the press  
women of the state.

Probably no one present that day  
changed her mind because of anything  
said on the question of government own-  
ership of the railways, but that we were  
all given food for thought no one could  
deny. The paper arguing for govern-  
ment ownership was a masterly presen-  
tation of theories backed by facts  
connected with various countries where  
government ownership is in operation.  
It carried me quite off my feet. But  
after the second woman's logic and legal  
acumen I somewhat recovered them. The  
question is too big to be settled in a  
hurry, but I am very glad to have had  
my interest in it stimulated and made  
more intelligent.

William Allan White disappointed us,  
but Governor Hoch gave us his views  
upon socialism and then Mrs. Annie L.  
Diggs, president of the association, was  
requested to give hers which were, as  
we all knew, directly the opposite of  
those advanced by the governor. The  
discussion which followed was most in-  
teresting and illuminating, and while  
those taking part differed vigorously  
from each other the best of feeling pre-  
vailed. One of the delightful things  
about public life for women is that it  
teaches them tolerance and respect for  
the opinions of those with whom they  
cannot agree. The women present that  
afternoon gave each other some sharp  
raps in the course of the debate, but the

**Ellwood Fence**

Not a new thing. Just the old reliable Ellwood, the plain, strong, tight,  
heavily galvanized, long-lived fence for all stock, that has been in use so  
many years.  
When strength and lasting qualities are combined with the fine appearance  
you get in Ellwood fence, you have all there is in the fence question.  
It speaks for itself. Look at the picture! Then look at some of the Ellwood  
fences of long standing around you, and talk to the owners.

**Every Rod Guaranteed**

Farmers continue to buy more and more Ellwood fence because

- it is made of toughest steel wire;
- it is made on the right principle;
- it adjusts itself in extremes of temperature;
- its heavy galvanizing prevents rusting;
- it is an all-purpose fence;
- its handsome appearance adds value to the land.

You can buy Ellwood fence from 18 to 36 inches high, meshed to turn  
the little pigs and chicks, and with the strength to hold the most un-  
ruly animal. Numerous styles, but all of the superior Ellwood  
weave. Reliable dealers everywhere can supply you with  
Ellwood fence.

Drop  
me a postal—  
say "Send me  
an Ellwood key-  
ring" and tell me  
how much fence you  
will need this year.  
I'll write you a personal  
letter about Ellwood Fence  
and send you this combination  
key-ring, screw-driver and bottle-opener.

**Frank Baackes,**  
Vice-President and General Sales Manager  
**American Steel & Wire Co.,**  
Chicago, U. S. A.

Note—  
I want  
to send  
you the  
combination  
key-ring shown  
in the corner, with  
our compliments, as  
a continual reminder  
of Ellwood Fence. We  
register your name and  
number on our books, and  
return keys, without cost, if  
found and sent to us.

**INVESTIGATE ADVANCE FENCE**

It's different from all others—in construction. We don't cut the wires into short pieces in  
order to enable us to make fences a little faster. We have stuck to the good old way in which  
we made fence seventeen years ago and while it's not the fastest way it's absolutely the best way.  
Our stay wire is continuous—not cut at the top or bottom or anywhere else. That makes our  
fence twice as strong as cut stay fences.

Sold on approval. We offer to ship you all the  
fence etc. you need on approval. After examining it  
carefully and comparing it with others, if you don't  
want it return it at our expense and get your money  
back. Isn't that a fair offer? We prepay freight  
and guarantee safe delivery. Get our Fence Book  
and prices.

debate over, the utmost harmony pre-  
vailed. I am free to confess that I was  
proud of my sex and sorry that press  
of duties prevented the governor re-  
maining for the discussion.

Usually men are not invited to any  
session of the K. W. P. A. This year  
an exception was made. Not only were  
men on the afternoon program, but a  
few men were honored with an invita-  
tion to the banquet in the evening. This  
banquet which is the social feature of  
the gathering is always enjoyable. This  
year it was unusually so. The women  
looked charming in their pretty evening  
frocks, the tables were bright with  
shaded candles and fragrant with flowers.  
The menu was both dainty and satisfy-  
ing and the speeches were all such  
speeches should be. I had a fit of trem-  
bling when my turn came, but if Home

compliments showered upon me as we  
left the dining room they would, I think,  
feel that I had not altogether dishon-  
ored them.

**HOME AND HOMEMAKING.**

**LITTLE HELPS BY THE WAY.**

If words  
Were birds  
And swiftly flew

From tips  
Of lips  
Owned, dear, by you;  
Would they  
Today  
Be hawks or crows;  
Or blue  
And true  
And sweet? Who knows?

Let's play  
To-day—  
We choose the best;  
Birds blue  
And true  
With dove-like breast!  
'Tis queer,  
My dear,  
We never knew  
That words  
Like birds  
Had wings and flew!

#### AMERICAN WIVES.

It is said the English women have carefully studied the attitude of American men toward their wives, and they had to acknowledge they were the most chivalrous men on earth, though they say it with a "Will it last?" and a doubtful smile. It will last! We do not have any rules in our country which says, "A woman, a dog, and a walnut tree, the more you whip them the better they'll be." American mothers are raising American sons to make good husbands, and there is, more courtesy, kindness and gallantry among American men than people fully realize or appreciate.

#### MONUMENTAL.

Many years ago Josiah N. settled on a farm in Connecticut near the sound. After the death of his wife he erected a square white marble tombstone, on which was inscribed: "Amelia, wife of"

Not long afterward he married again, but his second wife did not long survive, and to save expense he divided the original stone and the slab recorded the name of "Harriet, the second wife of"

And yet again did he take unto himself a wife who lived but a few years and was laid away with the others. And yet again was Amelia relieved of some of the weight of marble that pressed the sod above her, to make a tablet for "Sarah, third beloved wife."

Not long afterward he proposed to a dress-

maker who had been accustomed to fashion garments at his house during his three domestic dynasties. She requested a little time to consider. A week later when he called for her answer, she said:  
"Well, I guess I'll hev to decline, Josiah, for I've been up to the cemetery and there ain't one of them stones thet'll split."—Boston Herald.

#### FOR CHAPPED HANDS.

With the chilly winds and frosty air come the chapped and red hands which every woman dislikes, but she will have them unless the proper precaution is taken. Careful washing in tepid water is far better than cold, a soap free from alkali, thorough rinsing and above all perfect drying. If you have occasion to wash the hands many times during the day, have in a convenient spot a bottle containing this lotion: Honey, one-half ounce; lemon juice, one ounce; rose water, one ounce; rub it well into the hands. It will prevent that grimy look which is sure to follow this constant being in water.

If you are willing to go to the trouble and endure the disagreeable feeling of gloves, for the sake of the improvement it will make in your hands, the following you will find most excellent for softening and whitening and I think well worth the discomfort: Myrrh, one ounce; honey, four ounces; yellow wax, two ounces; rosewater, six ounces; melt the wax in a double boiler over a slow fire, add the myrrh, which should be powdered, while the wax is hot, beat thoroughly, then stir in the rosewater and honey, then add glycerine little by little to make a soft paste. Spread this mixture on the hands then draw on a pair of loose white cotton gloves, with the tips of the fingers cut off, and a small air space made in the palms.

#### FOR A COLD—FLAXSEED LEMONADE.

Pick over and wash one tablespoonful of whole flaxseed, add one pint of boiling water, and cook, covered, for two hours in a double boiler or in an enameled pan placed on an asbestos mat. Keep just below the boiling point. Strain, add the juice of one large lemon or two small ones and from four to six teaspoonfuls of sugar. Heat as required.

#### TESTED RECIPES.

Stuffed Mutton—Wipe a shoulder of mutton and remove blade. Fill space thus made with stuffing and skewer meat into shape. Sprinkle with salt, dredge with flour, and put on rack in dripping pan. Roast in a hot oven, allowing fifteen minutes to the pound, basting every twelve minutes. It may be necessary to put a small quantity of water in pan during the cooking. Serve with currant jelly.

#### CARROTS CREAMED.

Scrape and boil one dozen carrots until tender. Drain off the water and season with one cupful sweet milk or cream, a lump of butter the size of an egg, one teaspoonful sugar, a little salt and flour to thicken the whole.

Corn Meal Mush—First place the kettle over the fire, drop in a small piece of butter, turning the kettle so the bottom is well greased, which almost prevents its sticking. Then put in about three pints of half milk and half water; also one tablespoon sugar and one of salt. When boiling, add corn meal slowly with one hand, stirring constantly with the other. When rather thick set back on the stove and cook about three hours, stirring occasionally to prevent burning. When ready to take up add one teaspoon of baking powder and beat thoroughly. Pour into a dish to cool. Slice, dip each piece in flour and fry in hot lard or butter until brown.

Potatoes Cakes—Take a tablespoonful of butter, three of water and one cupful of maple sugar; boil until it is ready to candy, and then add three quarts of nicely-popped corn. Stir briskly until the mixture is evenly distributed over the corn. Keep up the stirring until it cools, when each kernel will be separately coated. Close and undivided attention may be necessary to the success of this kind of candy. Nuts are delicious prepared by this method.

#### AMONG OURSELVES.

There are those who think that all the people of this great continent should rally under one flag. Perhaps they will some day, but if ever they do it will probably be found that the incoming and outgoing of Canadians who settle here, and of Americans who settle in Canada has had no little to do with bringing about the change. This thought is suggested by the presence with us today of Mrs. G. A. Dodge, who belongs to the army of Americans who have taken up land in the Canadian Northwest.

Several months ago an invitation was extended to Canadian sisters of Among Ourselves to write something in regard to life and conditions in Saskatchewan. I have watched the Home Department pages with a good deal of interest since, but so far no response from this "north country." My residence in Saskatchewan only dates from last April and opportunities for investigating have been limited. This is an ideal farming country, all the small grains yielding abundantly; vegetables of all kinds also grow with very little care, and are of the finest quality. But there are so many acres that have not been cultivated that in the summer-time the prairie looks like one vast ocean of—well, yellow daisies; above all other colors yellow predominates. It must be the favorite color of nature, and, come to think of it, what a variety of plants there are in the list and what variety and range of beauty there is in its shade! The days in summer are long, the longest about eighteen hours; the sun pours down over the shadeless level with a hot, burning power, but its oppressiveness is broken by a cool breeze, and the nights are always quite cool. The mirage is to be seen here nearly every day; it cuts some fantastic capers, turns the bachelor's shack into a palace, a straw stack into a castle and creates towns on the prairie quicker than the wildest dreams of the most ambitious land syndicate. I have

## Simpson-Eddystone Black & Whites

The cost of making a dress often exceeds the cost of material. Simpson-Eddystone Prints outwear the cost of making. Substantial quality. Fast color. Some designs with a new silk finish.

Ask your dealer for Simpson-Eddystone Black-and-Whites. Three generations of Simpsons have made Simpson Prints.

been told to see the mirage in the morning denotes fair weather and at evening, storms. The atmosphere is so pure that distant objects appear near and the horizon unbounded far away, the sky line often undistinguishable. I took a little trip in the early fall to what the people living here call "The Bad Lands." It is a great gorge, a lost river bed. As I stood on the height and looked away to the right and left as far as the eye could see, I could not think of anything to compare it to but the gorge of the Niagara River perfectly dry and treeless. In the valley are rocks of all descriptions, from huge boulders to tiny specimens, presenting every variety of form and color; and charred and petrified wood and curious formations. I am sure in the ages gone this has been a great river with trees growing near, while now it is a treeless and nearly waterless plain. I must not give the impression, however, that trees will not grow on these prairies, because they will; but for best results in tree planting the land should be cultivated three or four years to get the ground properly settled. The system of cultivating trees is somewhat different than in countries where there is more moisture, but that is another story. There is a beautiful park at Regina, the capital city of this province, also at the experimental farm at Indian Head. They have every variety of trees, shrubs and hardy flowers that grow in the northern states. The farm is laid out with beautiful drives, avenues and shady lanes, and is to be the home of the agricultural college of Saskatchewan some time in the near future. I am well pleased with leisure for reading and sewing; none of the hurry and worry and noise that goes with stock farming in the states. Winter sets in here about the 20th of November with a drizzling rain. Farmers were still plowing when the wind whirled around to the north, a sudden drop in temperature and a terrible snow storm which called to mind the lines of Whittier, "He comes, he comes, the frost spirit comes from the frozen Sabidor," so winter came on with a rush and it has been real wintry weather ever since.

What matter how the night behaved? What matter how the north wind raved? Blow high, blow low, not all its snow Could quench our hearth-fire's ruddy glow. The bunch of yellow daisies which

Mrs. Dodge very kindly sent me I wish the friends might see. It would perhaps enable them to picture the prairie carpeted as she describes it, in every shade of glowing yellow. It must surely be a gorgeous sight to see. Just hearing about it from one who has such gifts as our friend is quite worth while.

Mrs. Dodge speaks of leisure for reading. Nebraska is given over to stock farming, but Mrs. Custer County finds time, not only to read, but to come and tell us about her reading:

Mark Twain's Connecticut Yankee in King Arthur's Court I enjoyed very much. He gives such unique ideas about the customs of those days and his description of wearing an armor is worth the price of the book. If you wish to become better acquainted with the leading personages of the world read "Great Books as Life Teachers," by Hillis. "A Woman Tenderfoot," by Seton Thompson, will be greatly enjoyed by anyone loving an out-door life. "Montezuma," by Seelye, is a concise and interesting description of the conquering of Old Mexico, but does not contain the full research that the "Conquest of Mexico," by Prescott, does. Every farmer and his wife should read "The Woman Who Toils," by Van Vorst. The two women who wrote the book are gentlewomen who disguised themselves in order to work in the mills and factories of the United States, which they did for a year, to learn existing conditions. "The Missionary Sheriff," by Octave Thanet, is fine. I do not care much for fiction, but enjoyed "Fenwick's Career," by Mrs. Ward; "The Virginian," by Wister; "Jan Vedder's Wife," by Mrs. Barr, and "Rockhaven." Would like to suggest a book review in which each person should send in a description (of not more than 100 words) of a book which interested them.

That is a capital suggestion of Mrs. Custer County. Do take it up, friends, and let us have a "book review" day. The sooner the better. Some of the books mentioned are known to me as very good indeed. It would be nice if

## Wouldn't You Like

to have us show you the wonderful opportunities existing in the South, and how you could improve your present condition?

### THE 'Seaboard Magazine'

Devoted to the agricultural and industrial development of the South, will point out the many advantages of a location in our mild climate, where life would be a greater pleasure as well as profit by reason of being able to carry on work throughout the entire year. Why battle against the elements? If you want a stock or grain farm, a fruit farm, truck farm, where lands are fertile and productive, in fact, anything, and want it in Virginia, the Carolinas, Georgia, Alabama or Florida, the magazine will assist you. Sent FREE on request, together with other handsomely illustrated literature descriptive of the South and its wonderful resources and progress.

Special low round-trip rates for homeseekers, prospectors and investors.

we could hear something of them. I move that Mrs. Custer County herself talk about "Fenwick's Career," which is one of the three great novels of last year.

Missouri Mother will act as spokeswoman for those who come in reply to the question propounded by "A Young Wife" a few weeks ago:

I think as "Young Wife" gets older she will not wonder at the sisters' views of human life so much. When she has been a wife for thirty years she will feel differently for instance, about women like Cousin Hardmaster's wife. Does she think that Young Wife's home is what that wife makes it? There are plenty of men who never show their real character to a woman until after marriage. If a man is bad at heart, then the wife has to suffer. Heaven help all such, is my prayer. Some wives do their very best to make home happy, raise their children as they ought and are still miserable, dragged down by hard work or by one who drinks or one who is jealous, some one way, some another. Happy is the wife of a good husband.

None of the men undertook to answer Young Wife's question. I wish some of them had. Perhaps they will yet. We will hope so, as it is a matter on which the opinion of men ought to be heard before coming to a decision.

Cousin Hardmaster created quite a ripple on his first appearance, but his second produced a storm which has not yet subsided. Both men and women in considerable numbers have been moved to speech. We cannot hear all; some are too excited to speak coherently, anyhow, but we shall give the privilege of the floor to Mrs. S. E. O. and then to Mr. Edson:

I beg pardon for coming so soon again, but my only excuse is the drawing qualities of our Home Department. After reading Cousin Hardmaster's second letter I said to myself, "What ails him and his kin, anyway?" They must have been born a century or so behind time. When our country was new, and homes had to be made from the raw material with the rudest kind of tools to do it with, there could not be much attention given to the children's education. Perhaps three or four months in the winter for the boys, but times have changed. With school houses convenient to all, and well-improved farms, taking the place of prairies and forests, there is but little excuse for

ignorance in the growing generation. Cousin Hardmaster speaks of the younger children properly hating to go to school, preferring to stay out and pay their indebtedness to their pa. Who owes the greatest debt, the parents or children? They are brought into the world through no fault of theirs. How, then, shall we equip them for life? Make them believe that if they know as much as their pa that is plenty? Of course not. If any of us were prevented getting a college education, let us make the best of it, and see to it that our children shall have one. Teach them that it is the trained and developed brain that counts. That is their stock in trade, which will be of more value to them than money or anything else, and if we deprive them of this, nothing can make it up to them. I will just say I have quite an admiration for Bill's wife and daughter, Ann, and I do not consider the girl at all in debt to her father for her education.

Cousin Hardmaster, you can surely expect nothing but a storm of contempt in this department. The father or mother who would deny their children the opportunity of a good education, where circumstances will permit, is no better than a brute in my estimation. I think boys should be taught to work when it is necessary between school hours, and girls should learn to do all kinds of housework. They may bring in small bundles of securities for their parents, but I do not believe in making slaves of the boys and girls.

Sometimes people are misunderstood; possibly Mrs. S. E. O. and Mr. Edson are too hard upon Cousin Hardmaster. Pussy Willow and Justice Sincere put a different interpretation upon his remarks:

Do any of the friends "Among Ourselves" ever read Dickens? And do you remember Jerry Cruncher in "Tale of Two Cities," with his wrathful antipathy to seeing his wife "dop"? Now, this isn't a book talk at all, but a Hardmaster talk. When Cousin Hardmaster's first letter came to us my indignation knew no bounds. I read the dreadful epistle to "The Only Man" and then "orated" upon it at length. "Think of that poor little woman with a young babe in arms eating her heart out in her desire to be some help to her husband, and he—Hardmaster in all truth—hasn't mental capacity to estimate her worth to him—even if she does not do one single thing but hear and nourish his children." It is impossible to say how much more I would have said had I not discovered "The Only Man" laughing; whereupon I ceased to speak and courted meditation. And so in due time I arrived at peculiar conclusions concerning Cousin Hardmaster. I do not believe he is near so closely related to Jerry Cruncher as he would have us believe. Cousin Hardmaster, I challenge you to deny that you are a make believe—a fraud, so to speak. I warrant that you and your wife, if you have one, have taken great pleasure in writing the letters for the stirring up of the Home Department. Maybe I am wrong, but if so may the Hardmaster tribe decrease—and rapidly. Such men as "Cousin Bill" may exist, but they merit and receive not only contempt of outsiders, but what is worse, the contempt of those a loving Father has given them to protect and cherish, and they must certainly give an account of their stewardship. "Sweet Humility" or "Womanly Pride," both minus an eighty acres of good corn land, are worthy as wives and mothers all the tender chivalry bestowed upon them in the days of courtship.

I seem to see behind the curtain of the one signing himself "Cousin Hardmaster." He does not tell us what he thinks, but just cites his observation, which shows the baser side of human nature, just how narrow some human beings actually are to whom their gain and greed of the silver dollar means the loss of everything else that makes life worth the effort put forth. I believe it should be every parent's desire in life to give their children the best they can, and their special privilege and pride to give them an education. If they are the parents they ought to be their pay will come in fast enough. A great deal depends on the kind of seed sown as to what the harvest will be. It may come in dollars and cents, if money happens to be needed, or perhaps in seeing them grow up honorable men and women, of whom their country may be justly proud. Much heartache and strife could be prevented if parents only would agree on the discipline or welfare of their children. I think this was a case where the wife was willing to be led as long as it affected only herself or there was any justice, but to see their children's nature warped and shrunken, or see them driven like cattle—never! And aren't such things as these enough to arouse the righteous wrath of almost anyone, no matter how meek they may have been? No doubt Bill will reap as good as he has sown, which is all he deserves, isn't it?

All this is very interesting. I wonder would we find out the truth about Cousin Hardmaster if we could have watched him during the remarks we have just heard. How would it be if we were to invite him to come again? Perhaps another time he might be less enigmatical.

Sunny Jim's Wife comes in reply to June Bug. I advise the young women to listen well to what she has to say:

Following "June Bug's" letter you ask the question, "Is ten years too much difference between the ages of husband and wife?" It altogether depends on circumstances. If a girl loves a man ten, or even twenty years her senior, she should marry him, in my judgment. The average man has not money or sense enough to take care of a woman until he is about thirty years old; and as most girls wed at from sixteen to twenty years old they would have to marry men ten or fifteen years their senior in order to get a man able to take proper care of them. My advice to my daughters and all other girls is, "Be sure that you really love the man you are to wed. Love is the first and

# Moline Wagon Tires

are set  
**RED HOT**  
Most Others  
Are Set Cold

## Hot Set Tires Hold Moline Wheels in the Firm Grip of Steel

WE set Moline tires Red Hot in the good old way of the wheelwright. It costs more to do it, but it pays in wheel durability.

The "latest thing" in wagon making is the "cold tire-upsetter."

This "modern" method is in almost universal use. It's much quicker and cheaper.

Incidentally it ruins the wheels. Did you ever see a "tire-upsetter" work?

The cold tire is placed around the rim and a powerful pressure applied that must be sufficient to spring the wheel to a point where it shows twice the dish wanted in the finished wheel. This is necessary because there is a come-back with this device and method of setting tires. What's the result?

Such a wheel looks all right, but it's really all wrong. There isn't a perfect joint in the wheel. The bad effects of such rough usage will manifest themselves in time by loosening of spokes in hub, loosening of tire and a general breakdown of the wheel, the most important part of a wagon.

We like the honest old way best.

How We Set Moline Tires Hot

We have simply improved on the old-time wheelwright's way.

After a Moline wheel is thoroughly dried from its bath of hot linseed oil, it goes to the tire setter. He fits a

tire to each wheel by actual and accurate measurement.

After being welded, the tire is uniformly heated in a furnace. Next he slips it over the wheel. Then he trues it up on the wheel plane and immerses it in water that is not too cold.

The tire gradually contracts, bringing the wheel to a proper dish without straining its parts.

The man who does this work in the Moline Works has been doing the same thing for over 20 years.

That's his picture up at the top.

It's warm work, but he enjoys it. He is the most expert tire setter in the United States.

### Added Durability of Hot Set Tires

There's from ten to fifteen years more durability in a wheel with a tire set hot than in a wheel with a cold-set tire.

The reason the better class of wagon dealers sell the Moline Ironclad is that they KNOW it is "built on honor"—that every one they sell builds up their reputation for reliability.

### Our Free Book

### "How the Moline is Made Ironclad"

tells other reasons why the Moline is the best wagon for the dealer to sell and for you to buy.

MOLINE WAGON COMPANY, Moline, Illinois

## 5 to 18 More Bushels of Corn to Every Acre

Sorts Seed Corn so Planter Drops Same Number EVERY TIME

When you set your corn planter to drop three kernels you want it to drop three, not two, four, five or any other number but three every time.

Why?

Because you know that the amount of ground that you allow for each hill will nourish that number of kernels and give the best possible results.

A uniform stand can only be secured by having good seed, hills the right distance apart and the right number of kernels in every hill every time.

If some of the hills have too many kernels the result is too many stalks for the ground to properly nourish; therefore stunted stalks and stunted corn. If there are too few kernels in some of the hills the stalks will bear good ears but you lose the yield of the missing stalks.

And all because your planter does not drop the same number of kernels in every hill. Don't blame the planter.

Planter plates are made to fit kernels of uniform size and if they are, any good planter will drop the number it is set for every time.

Seems a little thing doesn't it, but it means from five to eighteen more bushels of corn to every acre.

Worth considering, isn't it?

### THE MORECORN SORTER

sorts seed corn for length, width and thickness. One thirty-second of an inch makes a difference to this wonderful machine.

If your planter is set to drop three kernels it will drop three, 100 times out of every 100. If the Morecorn Sorter will increase your corn yield only five bushels per acre, isn't it worthy of your investigation?

Your increase in yield will pay for the sorter twice over, the first year. Many farmers make considerable extra money by sorting their neighbors' corn.

But—send for the literature today.

main thing to be considered." But, girls, remember that you can't live on love alone. Therefore, if you are wise you will get a man who has enough of this world's goods to keep you from being a slave to poverty. You cannot judge much of a man's character or of his ability to support a family until he is thirty years old. It sounds more poetic to a young, thoughtless girl to speak of "love in a cottage" than it does to a woman who has had experience in rearing a family on cornbread and ignorance.

Sunny Jim's Wife has more to say, but our time is up, so she will finish her talk at next meeting.

### Dressmaking and Millinery, No. 556.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.] Among the advance suggestions for spring fashions trimmings are given a very prominent place, and while these are along the same lines with which we have been familiar throughout the past season, there will be some digressions. Velvet ribbon will be much used on waists and skirts, but while fashion has heretofore favored the use of this in the color of the material on which it was applied, the favor for black on a color is growing, and we find it employed now on both the deep and the paler tints. For red there is no more effective trimming,

## POSITIONS

485 young men and women, ages 18 to 35, ARE WANTED to do office work in their own or other States. Experience NOT necessary if training is taken. GOOD SALARIES. Write H. CO., Drawer 177, Nashville, Tenn.

**AGENTS PORTRAITS 85c, FRAMES 15c**, sheet pictures 1c, stereoscopes 25c, views 1c. 30 days credit. Samples & Catalog Free. Consolidated Portrait Co., 290-126 W. Adams St., Chicago.

**LADIES** to work on piecework \$3 per dozen. All materials furnished; no canvassing; steady work. Stamped envelope. Best Mfg. Co., Champlain Bldg., Chicago, Ill.

and we have seen it used to quite an extent the past season. We will also see much of it on the deep pink that will be one of the prevailing colors, and its effect on this color is very pleasing. Another trimming feature that has marked the winter modes and that will find increased favor in the early spring is the use of buttons, and these are still to be to a great extent of the covered variety. The dealers are getting ready to supply the probable demand by putting in stock silk buttons that match or harmonize with the choice fabrics in their stocks. Fancy buttons will still be used, among these being carved wood buttons.

Perhaps the prices of the latter may put them beyond the reach of many of us. Embroidery done on the material will be very much in vogue, and it is not too early for those of us who like to do this work for ourselves to set about it. But lacking the time or the inclination for this we may find motifs and appliques ready to be put upon the garment, and by looking over the spring stocks we may find the required suggestions that are easy to copy or imitate fairly well. The designs shown with this number are

[5521 Fancy Pleated Waist, 32 to 40 Bust.]

typical of many of the spring modes, as seen in the advance showings already on display. Before passing to a description of these designs let me again call your attention to this—that they are two separate patterns, as you will note by the numbers. They may be used together in making up a costume, and they combine thus very attractively, but also they may be used separately, the waist making a charming separate waist of any chosen material, or the skirt may be made of something entirely different from the fabric used for the waist. No. 5521 is a fancy pleated waist in quite

a novel design. It is made over a fitted lining on which the chemisette is faced at front and back, but if one prefers to omit the lining these portions may be arranged to be joined to the waist at its overlapping edges. The tucks at the back extend full length of the waist, but those at the front terminate at yoke depth. The over portions consist of three straps at each side that overlap one another, giving a pleated effect, these being arranged over the waist meeting at the back. The novel sleeves conform in style, and may be cut full length, retaining the mode of finish as shown. The belt con-

[5520 Fancy Pleated Skirt, 22 to 30 Waist.]

sists of the foundation and turn-over portions joined together. No. 5521 is cut in sizes for 32, 34, 36, 38 and 40 inch bust measure.

In the skirt No. 5520 the same arrangement of pleats and applied strappings is followed, these straps being graduated in length. It is a nine-gored pleated skirt, cut in sweep length, but perforated for walking length. Stitching and buttons provide the trimming for both garments. No. 5520 is cut in sizes for a 22, 24, 26, 28 and 30 inch waist measure.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## PLEASANT FIELDS OF HOLY WRIT

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

First Quarter. Lesson VII. Genesis xiii, 1-13. February 17, 1907.

#### Lot's Choice.

Abram probably followed the great desert highway which still exists between the East and Damascus, the very same, probably, that his grandson Jacob took in his flight from his angry brother. To all outward appearances, Abram's company probably exactly resembled the caravan which the traveler in the East sees today. There were the camels, "ships of the desert," bearing their precious freight of women and children, besides provisions and merchandise. There were the flocks and herds and their attendants, besides the armed guard. The oak or oak grove of Moreh

in Sichem is the first-mentioned camping-place of the patriarch within the bounds of the promised land. Abram's first recorded act is significant. Columbus, standing on the shore of the New World, unfurled the standard of Ferdinand. Abram, coming into Canaan, built an altar to God. So it became his custom. "Where Abraham had a tent, God had an altar." These became a series of "sermons in stone" to the idol-worshipping Canaanites.

The first mention made of Abraham on his return from his enforced sojourn in Egypt is concerning his wealth. The statement of the artless narrative is simply, "Abraham was very rich in cattle, in silver, and in gold." God's promises of temporal blessings had an early fulfillment. Kittó's computations are curious rather than reliable. On the data of the possessions of Jacob and Job he estimates Abraham as having between eight and nine thousand head. Of course, such immense herds and flocks would imply a correspondingly large number of attendants. From the incident of the equipment of three hundred and eighteen men for war it may be figured that there were something over a thousand men in the camp, not to mention women and children.

Up to this time Abraham and Lot had shared the pleasures and hardships of their pilgrim life. But now the herds of both had increased "so that the land was not able to bear them that they might dwell together." So, as sometimes occurs to this day, the herdsmen became rivals, and strove for pasture and water. In this incident Abraham's character shines resplendent. Two thousand years before Christ he showed the Christian spirit when he said to Lot, "Let there be no strife between me and thee and between my herdsmen and thy herdsmen; for we be brethren." Nor are these mere words. Abraham backs them up. He waives his right. The land was his. It was all his. Yet in noble magnanimity he said to Lot: "Is not the whole land before thee? Separate thyself, I pray thee, from me. If thou wilt take the left hand, then I will go to the right; or if thou depart to the right hand, then I will go to the left."

# Increase Your Corn Crop

THIS BOOK FREE

Will You  
Write Me a  
Postal for a 50c  
Corn Book?

Do it NOW—while they last.

The book is from the pen of Professor A. D. Shamel of the Illinois Experiment Station—recognized everywhere as "the man who knows"—about corn. It's full of photographic illustrations, and explains fully about selection—modern corn breeding and cultural methods. The American Corn Expert, Professor Holden, demonstrates his Seed-Testing Machine on page 17 of this book. The book should be in the hands of every up-to-date corn-raising farmer—it will help him double his corn crop.

All I ask you for this 50c Book

is that you will give, on a postal, the names and addresses of three of your farmer neighbors whom you understand will be in the market for a riding plow this season. It will take only a few minutes of your time, and a postal, and I will send you the book prepaid by return mail.

See that little girl lift her father with one foot?

He weighs 196 lbs., and she is only 6 years old—yet she can lift him with only one foot.

WHY—and what does the "WHY" mean to you? Simply this—it means that the Emerson Foot Lift Plows are the easiest handled in the field of any plow made.—FOOT-CONTROL ALWAYS—in or out of the hardest soil. Manage the Plow with your Feet—your Horses with your Hands.

The name EMERSON means easiest to handle—lightest draft—and most durable.

Every EMERSON Gang Plow is equipped with 2000-mile magazine box and axle. When you buy an EMERSON you buy for a lifetime, not for a few years, because an EMERSON will last as long as you live. I will send you, FREE, our Implement Literature, and the Corn Book if you act promptly and write the postal TODAY. I gave away 100,000 of these books—then the supply ran out. They went like wildfire. I've only a limited number this year, so don't wait till they're all gone.

Putting off may mean I won't have a single copy to send to you.

Write TODAY—Now—while you think of it.

S. H. Emerson,  
Emerson Mfg. Co.  
Rockford,  
Ill.

## LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 6 p. m. Sundays, 10 to 1. Address or call on

J. BOYD, M. D., 505 Locust Street, Marquardt Block, Corner Fifth and Locust Streets, DES MOINES, IOWA

Lot's selfishness crops out. He took advantage of Abraham's generosity. He cast his eye on the well-watered plain of Jordan, and chose it. He journeyed east. It was not long before he exchanged pastoral life for urban. He attempted the impossible. A double service—God and riches—met the inveterate and historic outcome.

Another incident in the career of Lot is the occasion of the display of new traits in the admirable character of Abraham: decision, bravery, military skill. Lot is in trouble. The very wealth he coveted and the richness of the land he chose was the cause of it. A rumor brings tidings of a predatory incursion and of Lot's captivity. Abraham determines his course instantly. Lot must be rescued. Three companies of trained servants, born in his camp, are armed; and Abraham takes command in person. Strategy gains a victory. Generosity declines the spoils.

#### Analysis and Key.

1. Abraham's, a caravan extraordinary. Route and appearance. Significance of first act. An altar on arrival.
2. Abraham's wealth. Estimates.
3. Abraham and Lot. Relations. Effect of increased clans and herds.
4. Abraham's magnanimity and generosity. How shown.
5. Lot's selfishness. How shown.
6. Lot's danger. Abraham's rescue.

#### The Teacher's Lantern.

Biography composes a large part of Scripture. God's Book has a deal by man in it. It is well it is so. Men of the Bible stand for ideas: Abel, innocence; Noah, obedience; Jacob, persistence;

Moses, law; Aaron, worship; Joshua, courage; David, praise; Solomon, wisdom; Jeremiah, patriotism; Paul, zeal; John, love. Thus God teaches by example. Example is better than precept.

Want a boy to love his country, give him the life of a patriot; to be successful in business, give him the life of one of the "Captains of Industry." So God deals with His larger children: gives us examples. Good for imitation, bad for avoidance.

So, in studying Bible characters we are not to entertain ourselves with trivial incident, but find what they stand for, the virtue or the vice they incarnate.

Biography of the Bible reaches its highest note in the life of Jesus. Christianity, in final analysis, is the religion of a Person; not of a dogma, creed, or system of theology or ecclesiasticism. At heart of it is the Person. Truth is so shrouded in Him that He could say, "I am Truth."

There is one little passage in the account of Abram's entrance to the promised land. It might escape the superficial reader, but is worthy of attention. "And the Canaanite was then in the land." The patriarch came into the land the Lord had indicated to him, only to find it preoccupied. He might have reasoned, "How can I ever, with my paltry band, drive out these warlike nations?" The incident seems not to have given him any concern. Fact is, he was not reasoning. He was trusting.

Again there was something besides Canaanites. "There was a famine." What, in the land which was to flow in milk and honey! Abraham did not fret. He did the wise thing. He went to Egypt on a visit.

## Try this Harrow FREE

RETURN AT OUR EXPENSE  
IF IT DOESN'T PLEASE YOU.

Here is a harrow that looks very different from the old pike or spring toothed harrow.

It is different. Every point of difference is a point of big improvement. It is as much better than the old fashioned harrow as a modern plow is better than the Indians' crooked stick.

ACME

Sizes  
3 to  
17 ft.

The coulters or teeth of the "Acme" work as a gang plow. They turn over the pulverized ground and give the crop all the soil's benefit. Farmers will tell you that bigger crops grow after an Acme harrowing.

Box 44, Millington, N. J.

# \$1.50 FOR 100 SQUARE FEET STEEL ROOFING

**Over a Million Square Feet at One-Third Reduction. Buy Your Roofing and Building Covering Direct from Us. We Save You Big Money**

Our Steel Roofing is cheapest in price of all steel roofings. It is the most economical in the long run. It is the most durable. It withstands the elements better than any other kind. It is superior in every respect. Stronger, lasts longer, does not become soft in hot weather. Does not crack, dry or rot. Withstands winter storms. Does not soak up. Drains your roof perfectly. Makes it fire proof, lightning proof, water proof. Much cheaper than shingles. Lasts three times as long. Away ahead of slate. Does not break or crack. No tar or patented compounds. It is the ideal roof covering. Prepared roofings are expensive and not satisfactory. Steel roofing does not taint rain water. Makes your building cooler in summer and warmer in winter. Thousands of squares sold every month. Farmers everywhere using it for covering houses, barns, outbuildings of all kinds, storm sheds, poultry houses, hog sheds, etc. Just the thing for elevator siding, stores, churches and buildings of every sort. Easily laid. No special tools required. Hammer and nails, that's all. Absolutely new, fresh from our factory. All ready to put on when received. Can be laid over old roofs.

## ADVERTISING NOTES.

The Northern Iowa Land Company, of Independence, Iowa, advertise on page 25 a number of farms in Iowa, Missouri, Kansas, Minnesota, Wisconsin, which they have to rent.

Messrs. Nielander & Co., of Lansing, Iowa, have a 240-acre farm they will sell at the price named in their advertisement which appears on page 25. They consider this a rare bargain.

The Homestead wishes to call the attention of those of its readers interested in buying a farm at a bargain, to the advertisement of Mr. J. C. Dempster, of 1511 Center St., Des Moines, Iowa, which appears on page 24 of this issue.

Mr. Theodore Kerndt, of Lansing, Iowa, has a 360-acre farm located four miles from the city, on which there is good improvements and which he will sell at a snap. The advertisement giving price appears on page 25 of this issue.

We desire to call attention to the advertisement of Mr. J. F. Dayton, nurseryman of Waukon, Iowa, appearing on page 13 of this issue. Mr. Dayton is well known to our readers, having been for twenty-seven years engaged in selling nursery stock directly to customers, saving them agents' commissions. Write for his price list, it's free.

We desire to call the attention of our readers to the new advertisement appearing on page 14 of this issue, of the Smith-Rauch Grain & Seed Co., of Lsmont, Iowa. They are offering 1906 home-grown, re-cleaned Prime Medium red clover, Prime German millet and Prime timothy seeds for sale at prices which will prove attractive to those of our readers who wish to purchase any of these seeds.

An advertisement of interest to our farmer readers who are wanting to buy a farm either in Minnesota, South Dakota, North Dakota or Canada, appears on page 25 of this issue. Messrs. Gilliland Bros., of 354 Temple Court, Minneapolis, Minn., can sell farms in any of the above states for either cash or on the crop payment plan. They can also furnish information to those of our readers who are thinking of buying land, as to how they can get a free ticket to see it. For further information, read the advertisement.

The advertisement of the Delany Seed Corn Sorter appears on page 13 of this issue of The Homestead. Mr. J. F. Delany, of Kalona, Ill., has issued a free seed corn booklet showing their line of sorters, and the advertisement gives further particulars in regard to it. The illustration published herewith gives a correct idea of this sorter. Mr. H. J. Rompf, of Goldfield, Iowa, writes: "I am well pleased with the Delany Seed Corn Sorter. I used the No. 2 last year and it is the first time I ever had a perfect stand of corn with an edge drop planter. My corn will run over sixty bushels to the acre. I would advise every farmer to buy one."

## NAVY DEPARTMENT ADVERTISEMENT.

On page 3 will be found the advertisement of the navy department calling for healthy young men to join the navy. Any young man can obtain all the information wanted by simply addressing a letter to any one of the addresses given in the advertisement. Life in the navy nowadays is an education. A man can learn a trade at no cost to himself and all the time he is learning it he is receiving good pay with no expenses for food, lodging or medicines. A goodly number of young men have been enlisted this winter and they are almost unanimous in their replies to the inquiries as to how they like it. They say, "It's simply fine! Makes a man out of you whether you want to be one or not. Any man who goes

in with the idea of behaving himself will find that it is one of the best places in the world."

## GOOD LAND CHEAP.

To those who would like to own a home or buy land for speculation in the Panhandle of Texas the advertisement of Messrs. Boyer & Peterson, of Kansas City, Mo., on page 24 of this issue, will be interesting. This firm have some splendid land in Swisher county, Texas, that they are offering at very low prices. Swisher county is in the "shallow water" district and this is a big advantage. Read this firm's announcement and write them. They are reliable.

## A BIG SALE OF PANHANDLE LANDS.

Messrs. J. C. Mehan & Co., 328-29-30 Utica Building, Des Moines, Iowa, have at last put their body of farming land in the Panhandle of Texas on the market. This particular tract is one of the choicest tracts in the Panhandle and the company have refused to sell any part of it for years. The opportunity is now open to buyers. The tract comprises nearly 30,000 acres, with nearly every acre first-class agricultural land of exceptional quality. The company's advertisement appears on page 24 of this issue.

## A USEFUL MAP.

The Union Pacific Railroad Company has just published a large map of the United States, which is the first of its kind ever printed. The map is in colors and shows all the government irrigation enterprises, and by a system of figures and circles gives the location of projects under investigation. It also shows areas within which public lands have been reserved under the terms of the reclamation act of June 17, 1902. These areas indicate in a general way the location of irrigable lands. The map is very attractive and is a useful addition to the helpful literature distributed by that company. Sent free on receipt of twenty-five cents postage. Address E. L. Lomax, G. P. A., Omaha, Neb.

## JUST LIKE A CITY WATER SYSTEM.

Regular "city" water systems are being installed for irrigation purposes at Lewiston-Clarkston, at the head of navigation in the Columbia-Snake Valley. Lewiston-Clarkston is practically one city, the metropolis of a rich tributary territory of 40,000 square miles in Idaho, Washington and Oregon. Lewiston is on the Idaho side of the Snake River, at its confluence with the beautiful Clearwater, and Clarkston is on the Washington side. The two are connected by an immense steel bridge, said to be the longest steel bridge on the Pacific coast. This bridge is nearly one-third of a mile long. Pressing close around Lewiston-Clarkston on both sides of the river are the lands which are being irrigated. Part of these lands are actually within the corporate limits of the sister cities. The water is brought from neighboring rivers, creeks and reservoirs, and is piped through large mains. On the Clarkston side, nearly ten miles of these great mains have been laid and about six miles on the Lewiston side. There are three large reservoirs at an altitude which furnishes the water under pressure to the irrigated tracts. The water is to be piped to different parts of each tract to be used in whatever quantity is needed, simply by turning a hydrant off or on. The water is to be carried into the houses and used for domestic purposes. As it is mountain water, better water than

## A Big Success In Selling Manure Spreaders From Factory To Farmer.

Within recent years there have been many notable instances of large manufacturers changing from selling through the dealer to the direct-from-factory-to-farmer plan, but among the most remarkable was the complete change made last year by the American Harrow Company, of Detroit, Mich., manufacturers of the celebrated American Manure Spreader.

This large organization had been in the manufacturing business for twenty-five years, and up to last year had been selling through

**\$1.50 Per Square** is price for 100 square feet of our No. 15 grade Flat Semi-hardened Steel Roofing. Each sheet 24 inches wide and 24 inches long. Corrugated roofing like illustration, sheets 22 inches wide and 24 inches long, \$1.75. At 25 cents per square additional we will furnish sheets 6 and 8 feet long. We are headquarters for metal roofing, selling more direct to farmers than all others combined. We have built up an enormous business on steel roofing and siding because we have given prompt and correct service. Thousands of our steel roofs in constant use for years all over the country. Absolutely the longest lived and most practical roof covering made. Inexpensive. Sold in quantities to suit. We can fill your order promptly. Satisfaction guaranteed or money refunded. Dealers get from \$2.25 to \$3.00 per square. Factories add their profits. So do jobbers. You pay all. Save this per cent. Order direct from us. Send us estimate of material of any kind needed in the construction or improvement of your buildings. We can surely help you economize. We make shipments promptly and carefully. No shipments delayed from our end. We have the largest farmers' trade on roofing, siding and building materials in America. We quote lowest prices on roofing, siding eave troughs, down spoutings, etc. **SHREWD BUYERS SEND US YOUR ORDERS.**

## Brick Siding, \$2.00

Just the right thing for stores, houses, churches, barns, hotels, etc. Why not fit up your old building by covering it with bright, fresh brick siding? Easily put on. Made of semi-hardened steel. Looks like brick. No special tools required. Prevents decay. Decreases fire liability. Improves appearance of premises. Adaptable for buildings of all kinds. We sell immense quantities. Gives thorough satisfaction. Comes in sheets 24x28 inches. Has all good points of steel roofing. Remember, you buy direct from our own mill. We are headquarters for brick siding.

## Metal Ceilings, \$2.00

Fine steel beaded ceiling, \$2.00 per 100 square feet. Ideal ceiling for stores, offices, kitchens, restaurants, etc. No falling plaster. Always neat and attractive. Economical and lasting. Furnished ready to put up. No special tools required. Comes in sheets 24 inches by six and eight feet long. Also used for siding.

## We Pay the Freight

to all points east of Colo., except Okla., Texas and Ind. Ter. To these points we pay the freight at 15c per square additional. To all points west of Kansas, we pay the freight at 50c per square additional. Satisfaction guaranteed or money refunded. We will send roofing, siding, ceiling, etc. to anyone answering this ad and mentioning this paper, O. O. D., with privilege of examination, if you will send us 25% of the amount of your order in cash, balance to be paid after material reaches your station. If not found as represented you do not have to take the shipment, and your deposit will be cheerfully refunded.

## Send for Catalog

Ask for our 500-page Catalog No. W. B. 500 free. Full of bargains from cover to cover. Quotes lowest prices on everything needed on the farm and in the home. Contains special bargains on lumber, building supplies, pipes, paints, fencing, doors, windows, sash, heating apparatus, wire nails, tanks, household supplies of all kinds, machinery, furniture of all kinds, waterworks systems, in short, thousands of articles in every day use on the farm and in the home. can be obtained anywhere in a non-mountainous country, the pleasure of having it always in the house in unlimited quantity may be imagined. The irrigation systems of which this water distribution is but a part have been pronounced by engineers the most modern and best equipped in the country. Nearly two million dollars have been expended by private enterprise in perfect-

ing the two vast irrigation projects. The older project is on the Clarkston side of the river, in the irrigated area known as Vineland. The name Vineland is delightfully appropriate. Some of the orchards and vineyards there are ten years old, having been bearing successfully for seven years. No inconsiderable part of the high-priced fancy fruit, peaches, apples and grapes, which have made such a hit in the markets of the East in the last few years, has come from the Lewiston-Clarkston district. The soil conditions there are peculiarly favorable and as a consequence of having plenty of water, the fruit grower there is able to make \$250 to \$1,000 an acre clear on his land each year. In addition to this profit, there are the advantages of suburban life so the residents of the Lewiston-Clarkston district have a pretty good time and are very enthusiastic over their home.

## NEW WAY TO CURE MEAT.

The old-fashioned way of curing meat by hanging it up in some out-house and burning chips or wood in an old iron kettle of some kind, is past. The new way is much easier and far better. Those who put up meat will be interested in Wright's Condensed Smoke, which is advertised in this issue on page 19. The following letter from an Iowa woman proves the merit of this splendid article: "Williamsburg, Iowa, Feb. 11, 1904. Gentlemen—I have used your condensed smoke the last two years and it is far superior to the old way. I used two bottles last year and will use three bottles this year. Respectfully yours, Mrs. John J. Yates." Do not fail to read the advertisement, and if interested in the best and most convenient method of curing meat, write to the E. H. Wright Company, Kansas City, Mo.

## MAKING MONEY ON THE FARM.

The money-making farmer is the one who knows where to get good seeds; seeds from which he can get big crops. The John A. Salzer Seed Company, of La Crosse, Wis., always has something new, something attractive, something valuable to offer in the seed line that no wide-awake money-making farmer can afford to be without. Here's something to think about: 310 bushels Salzer's New National oats per acre, 1,000 bushels Pedigree potatoes per acre, fourteen tons Billion Dollar grass and Teosinte per acre, 300 bushels Home Builder corn per acre. These are not extravagant statements, but sober, solid facts about what can be grown from Salzer's seeds "that never fail," that you, Mr. Farmer, ought to think seriously about before planting time. These seeds, as well as every kind of seed for the garden or farm, are listed in "Salzer's Seed

## Free Book For Men

A handsome illustrated book which explains all about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urinary Disorders, Piles, Kidney and Bladder Troubles, etc. This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. Those interested should write for the book today. Same will be sent free in plain sealed envelope. Address:

**DRS. FELLOWS & FELLOWS CO.,**  
323 Rollins Bldg., Des Moines, Iowa

the old method of the jobber and local dealer. Speaking of this radical change of policy, W. W. Collier, general manager of the company, in a recent interview, said:

"One of the principal reasons why we decided to discontinue selling our factory output to jobbers and dealers was because we wished our machine to have more attention and consideration than it was possible to induce a local dealer to give it.

"We have absolute faith in the reliability and quality of the American Manure Spreader, and we felt that we were better able to demonstrate this to the farmer by communicating with him direct than through the agency of the dealer.

"The ordinary dealer handles too many different lines to give any special attention to any one, and is not particularly interested in any machine beyond making the sale.

"Then, too, we have given the fertilization question a great deal of study for nearly a generation, and we felt that we

price, giving him a spreader of standard quality for less than he would have to pay the dealer for an ordinary machine.

In addition to this price saving, this company also sell their spreaders on time and on trial, allowing any responsible party thirty days in which to test the machine on his own farm.

We believe that every farmer who is interested should write to the American Harrow Company and get their Big Free Book and full description of their complete line of spreaders.

We understand that they manufacture a greater variety of machines than any other manufacturer in the country. With their catalog they send other printed matter of value to every farmer, and quote direct delivered prices on their big line of spreaders.

We suggest that every one of our readers who are interested write to the American Harrow Company for this literature. Their address is

American Harrow Company,  
150 Hastings Street, Detroit, Mich.

Book," and the farmer who has any desire to be a money-maker will not miss the opportunity to secure a copy of this book free of charge and learn for himself about the wonderful bargains Salzer has to offer in Northern Grown Pedigree seeds. Don't fall to write today to the John A. Salzer Company, La Crosse, Wis.

#### FIFTY PRIZES TO OWNERS OF COWS.

On page 10 we print an advertisement of the Omega Cream Separator. The manufacturers of this great machine want to know what our readers think of this advertisement and the argument it makes in favor of the Omega Separator. They offer three prizes: First prize, \$25; second prize, \$15; third prize \$10, for the best letters from owners of cows, telling how and why this advertisement appeals to them. Just read the advertisement carefully and then write your impressions of it. Is its argument good? Does it make you want an Omega? Send your letter before March 1st to Prize Dept., Omega Separator Company, Lansing, Mich. Be sure you mention this paper and tell how many cows you keep.

#### A GOOD HARROW CART.

By turning to page 5 of this issue you will notice in the advertisement of Mr. Wm. Galloway, of Waterloo, Iowa, that a first-class harrow cart may be purchased for \$5.95 with the freight prepaid. Horse labor is cheaper than man labor, and these days no one can afford to wear himself or his hired man out walking all day after the harrow. This cart is sold directly to farmers from the factory; hence its low price. The time will soon be here when implements will have to be taken out of the shed for another season's work, so that it is not too early to order this cart now, or at least to send for booklet which gives a full description of it. Address Mr. Wm. Galloway, 105 Commercial St., Waterloo, Iowa, and please mention this paper when you write.

#### A KANSAS JUDGE TESTIFIES.

Those who are afflicted with piles and other diseases of such a nature will be much interested in knowing that there is an institution in Kansas City that has cured thousands of cases of this kind. The Drs. Thornton & Minor institution, of Kansas City, Mo., has been established thirty years and makes a specialty of such cases. Read the testimony following. Judge R. T. Thompson, of Minneapolis, Kan., says: "I was treated by Drs. Thornton & Minor in 1898 for piles. The tumors were so large that they caused constipation and severe nervous headaches. I am fully satisfied that the cure in my case is complete and effective, and I am no longer troubled with constipation and headaches." Write Drs. Thornton & Minor and mention this paper. They will gladly send you more evidence.

#### A GOOD FARMER'S FORGE.

A good forge saves its cost price several times over every year on any farm. Much work ordinarily sent to the blacksmith shop can be done at home if one has a forge. It not only saves what would otherwise be paid to the blacksmith, but saves the time going and coming, often worth more than the work itself. Especially is this true in a busy season. The C. A. S. Forge Works, of Saranac, Mich., have an advertisement on page 2 of this issue. Their combination offer of forge, anvil and vise and one pair of tongs for \$5.25 is a bargain. This liberal offer is only good for a short time, and our readers should take advantage of it. Ask the company for catalog No. 23, which will be furnished free. Address C. A. S. Forge Works, Saranac, Mich., and please mention The Homestead when writing.

#### BUYERS OF NURSERY STOCK

will find something worth looking over in the twelfth annual descriptive catalog of the Bristow Nursery Company, located at Hampton, Iowa. This concern have been doing business since 1869 and have always made it their policy to grow and sell only the recognized varieties of nursery goods that can be depended upon to grow for their customers. Every shipment which they make is furnished with a clean certificate of health by the state entomologist. We are quite certain that this company can interest you in the proposition they are now putting out. You will find their prices right and they guarantee the goods to be right. The catalog tells all about their stock and you had better secure it before placing your spring order. A postal will bring it. When writing kindly mention The Homestead. See advertisement on page 14.

#### THE MAULE SEED BOOK.

Mr. Henry Maule, of Philadelphia, Pa., is well in the front as a grower and seller of reliable seeds, plants and bulbs that grow, and produce results true to name and claim. And he has not hesitated at expense in putting his annual announcement in the most beautiful garb possible. His 1907 seed book

is a marvel of artistic proficiency. Mr. Maule has always been noted for his novelties. Many of the leading strains of vegetable and flower varieties have been introduced by him to American farmers and gardeners and are today producing wealth and beauty on thousands of farms and gardens. His reputation for new and valuable varieties is so well known that progressive farmers and gardeners wait for his seed books to know what new things in seeds and plants are worth trying. His 1907 seed book will not disappoint them in this respect. The book contains 152 pages of handsome letter press and illustrations, and two beautiful colored cover pages. It will be sent free to all applicants by Mr. Wm. Henry Maule, seedsman, of Philadelphia, Pa., provided they mention this paper.

#### G. W. Fink's Angus Sale.

Mr. G. W. Fink's dispersion of the Glenmar herd of Aberdeen Angus cattle on February 4th, at Maryville, Mo., was not largely attended. The storm and cold weather caused several who had written that they were coming to remain at home. No high prices were paid and every man who bought should get good returns on his investment. On the entire offering of bulls, cows and calves, some of which had been recently weaned, a general average of \$123.82 was obtained. Mr. Fink's bull sold well, indicating a strong demand. In the list of sales Lots 2 and 5 appear as sold to Jasper Aldrich, of Pattonsburg, Mo. The two were resold to Mr. M. H. Donohoe, of Holbrook, Iowa. Messrs. Donohoe, Robinson & Chapple, of Maryville, Mo., and W. W. Andrews, of Maryville, Mo., were the best bidders on the top females. Col. Geo. P. Bellows conducted the sale and was assisted in the ring by Colonel Hosmer. Following is a list of all sales over \$100:

#### FEMALES.

Blackbird Eclipse, nine years, Jasper Aldrich, Pattonsburg, Mo.	\$295
Home Dale Erica 2d, two years, W. W. Andrews, Maryville, Mo.	280
Pride of Heatherton 12th, four years, M. H. Donohoe, Holbrook, Iowa.	255
Pride of Homedale, four years, Jasper Aldrich	195
Miss Pride, six months, W. W. Andrews	115
Orleans Queen, five years, Robinson & Chapple, Maryville, Mo.	250
Queen Ida of Midnight, nine years, M. H. Donohoe	120
Beauty of Glenmar, two years, Orren Wikle, Ackworth, Iowa.	100
Queen of Glenmar, two years, same.	145
Rowena Glenmar, one year, same.	100

#### BULLS.

Black Monarchist, two years, Allen Bros., New Sharon, Iowa.	240
Blackbird Ento, one year, A. L. Winekoop, Benda, Kan.	240
First Choice F., one year, J. G. Hayes, Skidmore, Mo.	150
Eddy Pride, one year, A. Turner, Lenox, Iowa	100
Home Dale King 2d, one year, W. F. Eccles, Queen City, Mo.	175
Directly, two years, Orren Wikle	200

#### SUMMARY.

26 females	\$3,005.00; average	\$115.39
8 bulls	1,207.50; average	150.93
34 head	4,212.50; average	123.82

#### The Russell Sale.

The Duroc Jersey brood sow sale of Mr. E. Z. Russell, at Blair, Neb., on February 6th, again brought out a good attendance of both farmers and breeders. Mr. Russell's offering was not in high condition, owing to the fact that they had received a set back last fall, but they were in the condition that always is best for the buyer. The Russell sale has never been noted for any sensational high prices, but it has been noted for an evenness that is seldom seen in other sales. The top was \$180 for Elinor R. IV., and she went to Messrs. Holmes Bros., of Homer, Neb. Sows bred to Glendale Critic were in good demand and Glendale Critic gilts were also picked up at good prices. An average of \$76.70 was made on the entire offering. Colonel Callahan and Luther cried the sale. Below is a list of buyers:

Lot.	Buyer	Price.
1.	Holmes Bros., Osmond, Neb.	\$180.00
2.	Elsie King, Blair, Neb.	52.50
3.	John Lydon, Belden, Neb.	160.00
4.	Elsie King	50.00

32.	Paul Posepie, Ponca, Neb.	50.00
33.	J. Stoke, Herman, Neb.	45.00
34.	H. Zohn, Pierce, Neb.	53.00
35.	Carl Hansen, Herman, Neb.	100.00
36.	O. W. Marshall, Tekamah, Neb.	57.50
37.	Robert Pritchard, Carroll, Neb.	80.00

#### Smith Brown's Sale.

The Duroc Jersey sow sale of Mr. Smith Brown at Waterloo, Neb., on February 7th, made an average of \$44.35. Glendale Queen, a daughter of old Gold Dust Jim, topped the sale at \$172.50, and went to Mr. R. R. Steele, Cedar Rapids, Neb. A number of breeders from Iowa and Nebraska were present.

## Tools That "Handle" Easy

You want tools that give best service and longest wear. Finish is all right—but first, last, and all the time, you want strength, endurance, and proper balance for easiest and most effective use. There is just one way to get such tools—see that every hand implement you buy bears the name

# KEEN KUTTER

The Sign of QUALITY.

Take for example a Keen Kutter fork. Test it any way you choose it's the best—tines and tang are drawn and forged from solid crucible steel *without a weld*, spring-tempered in oil, and individually tested.

All Keen Kutter Tools—Forks, Hoes, Shovels, Garden-trowels, Grass-shears, Rakes, Manure-hooks, Axes and a full line of Carpenter Tools—stand the *hardest tests*, and are easier to handle than any other tools.

Every Keen Kutter farm tool has a well-seasoned, straight-grained ash handle. If your dealer does not have them, write us. Tool Book Free.

**SIMMONS**  
**HARDWARE COMPANY.**  
St. Louis and New York, U. S. A.

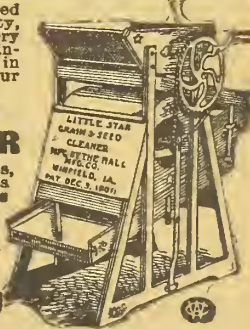

## CROPS WITHOUT WEEDS

The way to get them is to clean and grade your seed. Clean, graded seed yields 5 to 15 bushels more per acre, the grain is better quality, less liable to rust and smut and sells for a much higher price. Every 20 acres of land cultivated will pay for a grader every year; the increase in value and crop yield will net you a handsome increase in profits and pay the rent for the grader besides ridding your farm of weeds and noxious plants. Our Little Star

### COMBINED CORN SORTER, GRAIN GRADER AND GRASS SEED CLEANER

is the most efficient and economical machine of its kind made. Cleans, grades and separates any seed or mixture of any four similar seeds at the same time—does the work of three machines but costs only the price of one. Has double the screen surface of any machine of its kind—7 complete riddles and 4 double wire screens. Our "Corn Grader" Screens No. 8 and No. 9, provide an absolutely uniform "drop" from the "Corn Planter," edge drop or otherwise. Every machine guaranteed. Will do all grain and seed work for 160 acres. Price \$19.98. Freight paid. Write today.

**HALL GRAIN GRADER CO.,** 224 Locust St., Winfield, Iowa.

## '32.50 Complete 2 BIG REASONS WHY WE SHOULD HAVE YOUR ORDER

If You are Going to Buy a SULKY or GANG PLOW  
First—We absolutely guarantee this plow equal in every respect to any plow on earth, and refund your money if not entirely satisfactory to you.  
Second—We save you the middleman's profit of from \$10 to \$20 as we are the only Plow Factory in the world selling its goods direct to the consumer at wholesale prices.

These plows are made of iron and steel throughout, are perfect in construction, ingenious in design, simplicity in handling, perfection in work and light draft. Every part is backed by our thirty-six years' of successful experience in this business. Write us before buying. Secure our big free catalogue of implements, Burries, Harness, Steel Range, etc.  
14 inch Double Shm Plows, \$8.65; 12-16 Champion Disc Harrows only \$14.95. Tell us what you want when you write. Address  
**Hagood Plow Company, 1266 Front Street, Alton, Ill.**  
The only Plow Factory in the United States selling direct to the consumer at wholesale prices.

## "A YARD OF ROSES" FREE

"Yard of Roses" is one of the grandest flower pictures ever offered; 1 yard long, on heavy copper-plate paper, in 10 beautiful colors; over 300,000 sold in last 20 days; a handsome ornament for any home that you will always be proud of. To introduce our splendid farm journal which has a half million readers, we mail this grand work of art, all charges paid, to anyone who sends 10c (stamps or silver) for trial subscription to THE VALLEY FARMER. Send at once before they are gone. Address THE VALLEY FARMER PICTURE DEPT., 576 Jackson St., Topeka, Kansas.

ent. The farmer crowd was light, owing to a big farm sale in the same vicinity. Col. T. C. Callahan cried the sale. Below is a report of those selling for \$25 and over:

Lot.	Buyer	Price.
1.	R. R. Steele, Cedar Rapids, Neb.	\$172.50
2.	J. P. Fleck, Millard, Neb.	51.00
3.	Same	41.00
4.	A. L. Lynch, Mt. Airy, Iowa.	46.00
5.	J. P. Fleck	38.00

#### The Los Angeles Limited.

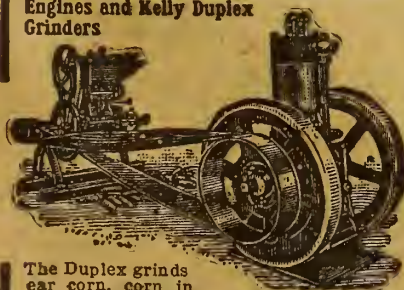

Electric-lighted train, Chicago to Los Angeles every day in the year, less than three days en route, via Chicago & North-Western, Union Pacific and Salt Lake Route. Splendid equipment of the most modern and complete character, accommodating all classes of travel.

Pullman drawing room and private compartment sleeping cars, Pullman tourist sleeping cars and composite observation cars. Double berth in tourist cars only \$7 from Chicago. Close connection with trains of the North-Western Line from Wisconsin points.

For full information apply to nearest agent of the North-Western Line.

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

**The O. S. KELLY WESTERN MFG. CO.**  
DEPT. H, IOWA CITY, IOWA.

## E. R. Wood's Duroc Sow Sale.

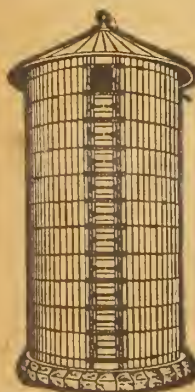

A great many congratulations were passed out to Mr. Wood at the close of his first cataloged sale, February 8, 1907, when it was announced that on thirty-four head an average of \$46.35 had been made. This is certainly a fine record and speaks well for this herd. The tent was crowded with farmers and breeders from far and near. Col. C. E. Luther found the bidding was especially strong on some of the best numbers, as will be seen by the attached list. Those who missed this sale missed seeing some good hogs and a good time with the breeding fraternity of central Iowa and adjacent territory.

Lot.	Price.
Extra, W. R. Bennethum, Madrid, Ia.	\$205.00
5. Roy E. West, Churdan, Iowa.	130.00
4. W. A. Staples, Glidden, Iowa.	100.00

37. E. H. Jackson, Jefferson, Iowa.	40.00
38. I. C. Weaver.	40.00
Extra, A. J. Cochran.	50.00

## W. R. Bennethum's Duroc Sow Sale.

The fourth annual sale of Cedar Lawn Duroc Jersey sows was a success in every way. The collection was a choice one from a standpoint of individual excellence, as well as from breeding. A good crowd bid on the offering and showed their appreciation of the good will and treatment extended by Mr. Bennethum by piling up a good average. On forty head this amounted to \$48.50, which is certainly a high recommendation for the work of this breeder and for the auctioneer, Col. C. E. Luther. Mr. B. W. Hale, of Laddonia, Mo., topped the sale by bidding off Miss Advance, a yearling sired by Proud Advance, at \$125, even. Several others sold around this figure as the appended list will show:

3. H. J. Dibbern, Madrid, Iowa.	\$120
2. Same.	95
20. Johnston Bros. & Newkirk, Brooklyn, Iowa.	101
5. Same.	55
6. G. W. Huffman, Ogden, Iowa.	60
7. J. A. White, Madrid, Iowa.	40
8. C. A. Sundburg, Madrid, Iowa.	41
9. Roy West, Bondurant, Iowa.	60
10. H. J. Dibbern.	43
11. A. D. Freed, Boone, Iowa.	46
12. F. E. Burkett, Dallas Center, Ia.	49
15. J. A. White.	41
18. F. E. Burkett.	40
19. E. R. Wood, Jefferson, Iowa.	46
21. Johnston Bros. & Newkirk.	50
22. Roy West.	51
24. O. Olson, Madrid.	60
25. E. E. Cartwright, Pilot Mound.	56
36. W. A. Johnson, Prairie City, Ia.	51
40. O. A. Anderson, Madrid.	41

## HOW TO Save Money.

Last summer I advised the farmers to build Silos, giving as ONE reason, the fact that feed would be high and scarce this winter. You would no doubt appreciate a lot of good silage at this time with hay at \$12 per ton. Now is the time to consider a silo for 1907. Better write for our book, "The Modern Way of Saving Money on the Farm." It is well worth a postal card and your time writing it. Address,

H. G. HARGROVE,  
316 E. Walnut St.  
Des Moines, Iowa

## SHEEP.

## Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Ghandler Bros., Kellerton, Ia.

## Ewes for Sale

THE Iowa State College is offering twenty Shropshire, Oxford and Southdown ewes for sale at very moderate prices. Address,

DIVISION OF AGRICULTURE,  
AMES, IOWA.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

Registered Shropshire Rams and Ewes  
OF the best breeding, Willard Miller, R. F. D.  
No. 2, Alta, Iowa.

15 Registered Shropshire ewes, bred to imported 150 Milton rams. W. C. Frazier, Atlantic, Cass county, Iowa.

## LANDS AND HOMES FOR SALE

Farms That Grow  
"No. 1 HARD" WHEAT

(Sixty-three Pounds to the Bushel)

are situated in the Canadian West, where Homesteads of 160 acres can be obtained FREE by every settler willing and able to comply with the Homestead Regulations. During the present year a large portion of

## New Wheat-Growing Territory

has been made accessible to markets by the railway construction that has been pushed forward so vigorously by the three great Railway Companies. Grain-growing, mixed farming and dairying are the great specialties.

For literature and information address Superintendent of Immigration, Ottawa, Canada or the following authorized Canadian Government Agent.

W. V. Bennett, 801 N. Y. Life Bldg., Omaha, Neb.  
E. T. Holmes, 315 Jackson St., St. Paul, Minn.

Mention this Paper.

## TEXAS LANDS!

BUY A HOME IN THE GREAT

PAN HANDLE  
OF TEXAS

AND get a slice of the rich, fertile soil while the prices are within the reach of all. We have for sale 40,000 acres of the finest agricultural land in Swisher Co., Texas, that we are selling at a very low price, in tracts to suit, from 1/2 section to 1 or 2 sections, on terms to suit. The advantage of buying lands in this part of the country is the shallow water which can be found at a depth of 25 to 50 feet. For further information send for booklet.

HOYER, PETERSON & CO.,  
408-10 Gumbel Bldg., Kansas City, Mo.

## Will Exchange 560 Acres

## FOR IOWA FARM

I HAVE listed from the owner a 560 acre farm within 10 miles of Crookston, Minn., and 2 1/2 and 3 miles from railroad stations, 1/2 cultivated, no buildings, deep black soil, no stones, no gravel, rented for 1/2 of crop delivered, which I can exchange for a good Iowa farm. Price \$22.56 per acre. Write me for particulars, S. K. Noland, Watrous Bldg., Des Moines, Iowa.

1018 ACRES in the Garden Spot of southeast Mo., in 1/2 mile of station on Frisco railroad. Not one foot of waste land and as rich corn, wheat and alfalfa land as there is in the world. If bought by March 10th can be had for \$22.50 per acre. It's a tremendous bargain, in a country where we always raise crops, and owing to our short winters and long seasons, two crops in one year. See S. E. Newhouse, 617 Frisco Building, St. Louis, Missouri.

## Choice Farm, 640 Acres

JUST south of LaMoore on the James river, North Dakota, 335 acres under cultivation, two good springs of living water, will sell half or quarter. Address the owner, J. C. Dempster, 1511 Center St., Des Moines, Iowa.

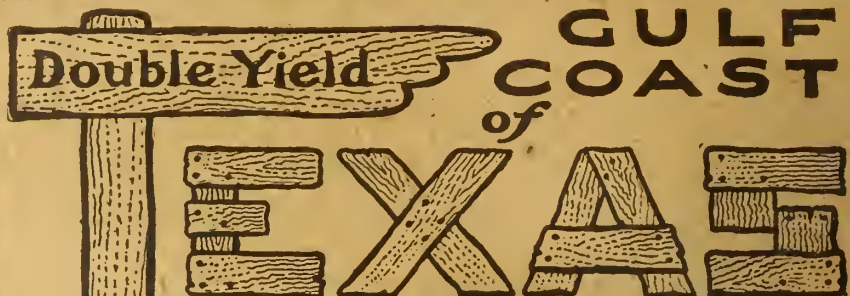

430 ACRE Brown Co., Kan. farm, five miles from market. Can be divided into two tracts. E. C. Gordon, 650 Minnesota Ave., Kansas City, Kansas.

POULTRYMAN or Dairyman can lease or buy 24 acres at Britt, Iowa. Splendid opportunity. John W. Budd, 607 Youngerman, Des Moines, Ia.

FOR SALE—120 acres, Phelps county, Mo., with stock, tools and household goods, \$1,800. Mrs. L. F. Huntley, Lecom, Missouri.

The above is a good likeness of Mr. A. E. Poush, of Charlton, Iowa, who opens the southern Iowa sale circuit on February 18th. Mr. Poush is fortunate enough to own more Proud Advance sows than any other man outside the company, and he is putting ten head of these in his sale the 18th, and every one a good one. Write for catalog early and find out about this good offering.

## Two Crops Per Year!

That's the program in the Texas Gulf Coast Country. It's easy there, because the land works and produces every month in the twelve!

Think of it: \$500 per acre in cabbage—\$600 per acre in onions—\$3.30 a bushel for new potatoes—cucumbers bring \$3.00 a bushel in May at the Eastern markets. These and many actual, every-day results in fruit culture also, can be proved to you. I can give you names and addresses of the people who are doing these things while you are reading this advertisement and the snow and cold weather are keeping you idle.

## The WARM, DRY CLIMATE

of the Texas Gulf Coast is the healthiest in the country. The irrigated land which you can buy now at \$25 per acre—is the richest in productiveness.

The railroad facilities will place your products in the markets ahead of every other section of the country. You get fancy prices—you save in freight rates—you make money and enjoy good health.

Let me send you a 75-page illustrated book full of actual facts about that wonderful country. Read it.

Let me send you names of people who own some of this land and are doing these things. Write to them.

Buy a round-trip investigator's ticket to any point on the St. Louis, Brownsville & Mexico Ry.—go down and look the country over. Rate is but \$25.00 from Chicago, \$20.00 from St. Louis, for the round trip, on first and third Tuesday monthly. Sixteen carloads of people went down on our excursion of January 15th!

Do not the arguments sound reasonable? Wouldn't you like to learn more about the country? Then write me to-day. Address

JOHN SEBASTIAN, Passenger Traffic Manager,  
Room 14 La Salle Station, or Room 14 Frisco Building  
CHICAGO ST. LOUIS  
ROCK ISLAND-FRISCO LINES

## 10,000 Acres of Land for Sale

In the vicinity of the famous potato and sugar beet growing section near Greeley, Colorado. No finer land in the world. Good soil, smooth surface, a new railroad surveyed into the very heart of this beautiful land. Perfectly adapted to farming, through the plan of Prof. Campbell's scientific agriculture. Under the survey of new ditches, if farming by irrigation is preferred. Prices \$7.50 to \$12.50 per acre. Shown by automobile from Greeley, Colorado. Railroad fare refunded to purchasers. Map and full information sent on application. Address:

J. S. Grable, Greeley, Colo.,

OR

M. L. Parrotte, Gen. Agt., N. Y. Life Bldg.  
OMAHA.

Agents wanted for the sale of these lands.

## ASK ME

We are selling the finest body of

## Texas Panhandle Lands

ever put on the market

Best in location and best in quality and price, on very easy terms. Our location, Dallam county. Write us for full information and maps.

NEXT EXCURSION FEBRUARY 19th.

### WANT A FARM HOME?

NOW is the time to get it. Investigate Meadowslands Settlement, 45 miles from Duluth, in Saint Louis Co., Minn. Prices right. Terms, \$1 per acre down and balances in fifteen years' time. Good soil, water, etc., railroad. For full information write

LAND COMMISSIONER D. & I. R. R. CO.,  
525 Wolvin Bldg., Duluth, Minn.

### WE SELL THE EARTH.

YES, we sell the earth. If you don't believe it, please send for our new price list of Central and Western Nebraska Lands. We have the best land for the money in the West, located in Buffalo, Dawson, Custer, Lincoln and Keith counties, from \$2.50 to \$60 per acre. Don't forget to write us for our list of Nebraska Lands.

W. F. Smith Realty Co., Kearney, Neb.

WANTED to sell or exchange, well improved, splendid 236 acre eastern Kansas farm that adjoins town with graded school, for a smaller farm in Iowa. Address: James E. Seaton, Vernon, Kan.

## It is Easy to Make Money in the Southwest

Land as good as that in the older states can be bought in the Southwest for a fraction of what similar land costs in your state. This land will raise bigger crops and the crops will bring bigger prices. Now is the time to buy land in the Southwest. It will double in value in a year or two. You will be healthy in the Southwest. The climate is delightful. No long, hard winters—no blizzards.

A letter addressed to the Southwestern Colonization Bureau, St. Louis, will bring you free copies of complete and authentic pamphlets covering all sections of the Southwest—Missouri, Kansas, Arkansas, Oklahoma, Indian Territory, Texas, New Mexico and Louisiana.

A letter to any of the following members of the Bureau will bring reliable detailed information about the particular section represented by the member addressed. Write to-day while it is on your mind.

Southwestern Colonization Bureau,

223 Kinloch Bldg., St. Louis, Mo.

### The Land of Cheap Homes.

The Cimarron Valley, Blaine County, Okla., contains the largest body of fine land of any county of the new state. Few farms are for sale. By hard work we have been able to list a very few of the choicest. One special bargain, 160 acres two miles from Okene, a town of 1,000 people, price \$5,000. For further information address The K. J. Russum Real Estate Co., Okene, Blaine County, Oklahoma.

### Fine Farms Cheap

We have some of the finest farms that lie out doors in the richest section of Oklahoma. Railroads, schools, churches. Land will produce two and three crops a year of corn, wheat, broom corn, cotton, vegetables, etc. Fine fruit section. We can sell it cheaper than any land you ever saw of equal value. Write us.

Vandegriff & Clark, Hobart, Okla.

BUY IN the Great Artesian Belt, south of San Antonio, Texas. The land of cotton, corn, alfalfa, early vegetables and fruits.

### Natural Gas Belt

Buy a farm where growth and progress are the order of the day. Great industrial development. Mild climate, rich soil, good water. Farmers use natural gas for light and fuel. Improved farms \$20.00 to \$40.00 per acre. Write for folder.

HILL & SUTTER  
Sellers of Real Estate  
Independence, Montgomery Co., Kan.

### Rice Lands Yield 100 per cent

We can sell improved rice farms at \$30 to \$50 per acre, on your own terms, which will raise crops worth \$40 to \$60. Some 1906 crops yielded \$80. An average crop is more profitable than "bumper crop" of oats, corn or wheat at top-notch prices. Hundreds (now rich) came from the North with almost nothing. No special experience necessary. New railroads will double value of lands in two years. Write us today.

W. W. DUSON & BRO. Crowley, La.

### IMPROVED FARMS CHEAP

We have a select list of improved farms in Robertson County, Texas, ready to live on and cultivate, which we can sell for the price asked in other localities for unimproved land. Corn, fruit, vegetables, dairying, poultry, hogs, mules, etc. Write us and let us tell you how to get a real home in Texas.

W. W. HILTON, Franklin, Texas.

Stevens and Morton Counties, Kansas,  
and Beaver County, Oklahoma

Plenty of bargains in choice lands here, where wheat, barley, alfalfa, maize, Kaffir corn, forage crops and cattle are raised successfully. No better place to get good, cheap homes, or lands for investment.

Moore & Falls, Hooker and Tyrone, Okla.

## MILD WINTER

Protected by great hills and warmed by almost perpetual sunshine, Lewiston-Clarkston Basin has the ideal climate for profit and comfort. No blizzards. No cyclones. No floods. No malaria. No consumption. No asthma. No serious thunderstorms. At the head of river navigation from Pacific ocean, Lewiston-Clarkston [pop. 12,000] is the commercial and transportation center for an immensely productive fruit, grain, timber & mining territory. Write today for detailed and authentic information about new fruit and vine lands just being brought under irrigation, within mile of city limits. Tracts close to and same lake-bed soil as fruit lands now paying \$250 to \$1000 per acre. Easy terms. Land pays for itself while orchard is growing. Why live amid dreary surroundings, far from neighbors, when a few acres in delightful Lewiston-Clarkston make you independent and prosperous, with all advantages of fine schools, churches, libraries, daily papers, neighborly city activity? Address DEVELOPMENT LEAGUE, AT EITHER LEWISTON, IDAHO OR CLARKSTON, WASH. Send list of neighbors who may move west. Write names and addresses very plainly and kindly mention this paper.

well located, to exchange for  
registered cattle or stallions. Write giving descrip-  
tion and prices. Box 81, Independence, Iowa.

\$25.00 PER ACRE Iowa land. 240 acres with good  
improvements. Is a rare opportunity.  
If interested write, Nielander & Co., Lansing, Ia.

FOR Sale, two well improved farms near town,  
church and school. Bargains for homes or in-  
vestment. E. Jay Roberts, Chester, Iowa.

WRITE J. H. McCOWN, Emporia, Kan., for  
special Bargain List, farms and ranches.

# Bog Spavin

Cure the lameness and remove the bunch without scarring the horse—have the part looking just as it did before the blemish came.

**Fleming's Spavin Cure (Liquid)** is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be limited. Easy to use, only a little required, and your money back if it ever fails.

**Fleming's Vest-Pocket Veterinary Adviser** describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.

FLEMING BROS., Chemists,  
210 Union Stock Yards, Chicago, Ill.

MADISON, WIS.,  
Veterinary Editor The Homestead.

CONSULTING VETERINARIAN. Advice and prescription by mail, \$1.00.

FOR SALE OR EXCHANGE—General merchandise stock in Iowa, about seven thousand. For sale or exchange for farm. Give full description first letter, location, improvements and number of acres under cultivation last year. Address owner, C. H. M., care of Homestead.

### It will be interesting to follow the explanation made in the Litchfield Spread-

or argument on page 5 of this issue, showing the difference between "Changes" and "Improvements."

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### EYE DISEASE OF CATTLE.

I should like some information in regard to cattle having the "pink eye." I wish you would let me know whether or not it can be cured and how to cure it. Should also like to know whether it is catching.

So-called "pink-eye"—properly termed "contagious ophthalmia"—presents the following symptoms. Adult, young cattle and calves first show swelling of the eyelids accompanied by weeping. Redness of membranes of eyelids and "haw" becomes apparent, creamy discharge follows and in three or four days a clouded spot shows in center of eye and gradually spreads until "sight" of eye becomes milk-colored. Changing from milk-color to pearl tint eye may become yellow, bulge, show blood-shot streaks, form an abscess and burst leaving a ragged ulcer, or commence to clear up and finally recover. Slight ulcers may heal by granulation, but extensive ruptures and ulcers often lead to loss of sight. Fever and some loss of appetite is present, especially in young cattle, for a week or more from time of first attack and dairy cows may shrink in milk production.

Treatment: The disease being "catching," and doubtless due to a germ which leads to its spread from one animal to another; affected cattle should be separated from unaffected; eyes of latter should be washed once or twice a week with a solution of two drams of boracic acid in a pint of water as a possible preventive and pastures bordering on rivers, ponds and sloughs should be abandoned as the disease seems most liable to attack cattle grazing on such low, wet ground. Place affected cattle in a darkened shed or stable. Give each adult animal a one-pound dose of epsom salts with one ounce of saltpeter and one ounce of ground ginger root in two quarts of warm water as one dose and follow with a tablespoonful of saltpeter twice daily in drinking water or soft food. Younger cattle should have the same medicine in smaller doses according to age and size. While under treatment do not feed grain, but give soft and green food; allow all the cold water animals will take. At the commencement of an attack puff between eyelids by means of a clean, insect powder below a mixture of equal parts of finely powdered calomel and boracic acid; or cover eyes with soft cloth to be kept wet

No matter how good your lamp, a MACBETH chimney makes it better.

They are made to fit, and do not break from heat.

My lamp-chimneys offer the only practical remedy for all lamp-ills—good glass properly made. That's why they make good lamps better.

My Index is free.

Address, MACBETH, Pittsburgh.

## A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge to edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs; look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.

## Break Loose from the Creamery Trust

ORGANIZE, CO-OPERATE AND CONTROL YOUR PRODUCT

You do the hard work of dairying and you ought to reap the profits.

You won't get them so long as you are at the mercy of combinations and trusts.

Join with 2000 Iowa Farmers to manufacture and market your own product.

Cut out the gamblers and speculators who are standing between you and the consumer.

Our association has already in eight months forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa.

Membership growing rapidly and the trust is on the run. Won't you join us at once for fair treatment now and future protection? Write today for prospectus and full particulars. Ship us a can of cream and get our test and prices.

**FARMERS' CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.**

Ship Us  
Your Next  
Can of Cream  
and  
Get Our Prices

We save our members and patrons from 25 per cent to 50 per cent on farm supplies, by buying for them direct from the factory at factory prices, cutting out all dealers' and middlemen's profit. For example the

#### Farmer's Friend Separator

Capacity 450 to 500 pounds, made for our members in this factory in the world, fully guaranteed to excel any \$50 standard separator ever made, for only \$55.

In efficiency of skimming, mechanical construction, easy running and durability, it has never been equalled. Send for our co-operative catalog of separators, washing machines, windmills, feed grinders, barrow carts, corn cobs, etc. We give the best that money can buy direct to the user at factory prices.

with a 1-2000 solution of bichlorid of mercury (corrosive sublimate). This treatment may prove sufficient in a majority of cases, but should the disease persist and aggravate, substitute for above lotion one, consisting of a dram each of sulphate of zinc and fluid extract of belladonna leaves with twenty drops of carbolic acid in a quart of clean, soft water with which to keep cloth over eyes continually wet. When inflammation subsides should eye remain milky-appearing paint once daily with 1-1000 solution of bichlorid of mercury or 3 per cent solution of boracic acid. In bad cases which are tardy in responding to treatment give—except to pregnant cows—one dram of iodid of potash twice daily for adult animal and from ten to twenty grains for calves and yearlings, continuing its use for one week. Ragged ulcers may with benefit be painted with a solution of three grains of nitrate of silver in an ounce of distilled water two or three times a week. Lastly, quarantine animals bought at stockyards shipped in or from infected herds.

#### SWELLING—LICE—CRIBBING.

(1) I have a yearling colt that got cut above the fetlock on a wire fence, the cut extending down to the hoof. It is nearly healed up and the colt is not lame, but the foot is enlarged. Is there any remedy for it? The colt is in good condition otherwise. (2) Please describe the hog louse and how to exterminate them. (3) Is there any cure for a cribbing colt?

(1) Clip the hair from swollen parts and blister with a mixture of one dram of biniodid of mercury and an ounce of cerate of cantharides rubbed in for fifteen minutes, washed off in forty-eight hours and followed by daily application of a little lard. (2) The hog louse (haematopinus uris) is a fourth of an

inch or more in length when fully grown, gray in color with margins of the head, throat and most of the abdomen, black. Any one of the coal tar disinfectants or dips, if used according to directions furnished by the manufacturers, will kill lice on hogs, but the spraying has to be repeated several times and is useless unless the quarters occupied by hogs are perfectly cleaned, disinfected and whitewashed for destruction of the vermin and their eggs. (3) Cribbing is practically incurable when fully established as a habit. Put horse in box stall from which every object has been removed upon which teeth could be rested or fixed.

Duluth, Minn., Feb. 2, 1907.

Mr. Editor:—The land department of the Duluth & Iron Range Railroad Company reports that while this winter has given an unusual amount of snow and cold weather, settlers in all colonies in northern Minnesota report plenty of fuel and perfect comfort; no scarcity of food, and plenty of employment at good wages. The reports of extreme suffering on account of scarcity of fuel and supplies in the prairie districts of the United States and Canada cause us to believe that you will be pleased to learn of the very satisfactory conditions in the timber districts of Minnesota. I am,

Yours very truly,  
L. B. Arnold,  
Asst. Land Com.

#### CHEAP RATES TO THE PACIFIC COAST.

Commencing March 1st and continuing until April 30th the Minneapolis & St. Louis R. R. will have on sale reduced rate one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los Angeles and San Francisco are run via Kansas City and the popular Santa Fe System.

Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

#### PRACTICAL TEST ON GRINDING FEED.

The persons whose names are given below are the owners of the Anti-Friction Four-Burr Mogul Mills No. 1 and No. 2, manufactured by the Bovee Grinder & Furnace Works, of Waterloo, Iowa. And in reply to an inquiry as to the amount of grain they could grind on their respective mills, sent in the following amounts that each ground in one-half hour: B. F. Rebman, Frederick, Ill., ground on Mogul No. 2, 22½ bushels ear corn; A. O. Mechem, Clarion, Iowa, ground on Mogul No. 1, 44½ bushels ear corn; Thos. Giblin, Mt. Pleasant, Iowa, ground on Mogul No. 1, 47 bushels ear corn; W. J. Barron, Ward, S. D., ground on Mogul No. 1, 38 bushels ear corn; J. D. Johnson, Palmer, Iowa, ground on Mogul No. 1, 78½ bushels ear corn; G. G. Amos, Indianola, Iowa, ground on Mogul No. 2, 32 bushels; J. B. Brandt, Council Bluffs, Iowa, ground on Mogul No. 1, 41½ bushels cob meal; J. E. McCoy, Morrison, Iowa, ground on Mogul No. 1, 96 half-bushels; E. J. Lindstrom, Bishop Hill, Ill., ground on Mogul No. 2, 20 bushels ear corn; Henry L. Kroeger, Davenport, Iowa, ground on Mogul No. 2, 28½ bushels ear corn; 27½ bushels shelled corn; Walter H. Patton, Savanna, Ill., ground on Mogul No. 1, 30 bushels ear corn; R. Turnbull, Jr., Spur, Ill., ground on Mogul No. 1, 1,035 pounds shelled corn; Willie Kugel, Luna, Iowa, ground on Mogul No. 2, 32 bushels ear corn; Henry Masteller, Mansfield, S. D., ground on Mogul No. 2, 26 bushels ear corn. See advertisement on page 4.

The Fagan, Browning & McCabe Duroc Jersey Sale.

One of the largest gatherings of breeders which have been present at Illinois sales this year, assembled at the Fagan, Browning & McCabe sale on Tuesday, February 5th. It was certainly a compliment to these breeders to have some of the best men in the Duroc business, present at their sale, and all expressed themselves highly pleased with the offering. Six states were represented by those present, and there was a large number of mail bids from others states. Only one incident kept down the average, and that was the fact that a number of the best sows were bred a little late, otherwise the average would have been much higher. Messrs. E. H. Deal & Son, of Elwood, Ill., topped the sale, paying \$605 for the twice champion sow, Foust's Pride, a daughter of Kant's Be Beat. They afterward sold this sow to Mr. Geo. W. Seckman, of Ripley, Ill., at \$630. Mr. John Weighton, of Audubon, Iowa, secured S. E.'s Model VIII, a litter mate to S. E. Model IX, at \$600. Not one sow in the entire offering sold for less than \$50, yet there were many bargains in the sale. Col. Judd McGowan opened the sale and was assisted in a most satisfactory manner by Colonels Reppert and Kell. A list of sales follows:

Foust's Pride 71088 four years, E. H. Deal & Son, Elwood, Ill.	\$605.00

SUMMARY.

52 head	\$5,290.00; average...\$101.73
---------	--------------------------------

Henry Dorr's Poland Sale.

One of the successful sales of the season was held at Remsen, Iowa, on February 5th. It was handled by Colonel Woods, so that it is needless to say that everything passed off smoothly. The blood of Dorr's Tecumseh and Hands Down was in great demand on the date mentioned, and as a result prices averaged well throughout. At the close of the sale disappointment was expressed that there were not fifteen or twenty more head, as there were a number present who wanted a little more of Mr. Dorr's kind of Polands. Following is a list of the sales made:

Lot.	Price.
1. Held Bros., Hinton, Iowa	\$60.00
2. Ralph Meecham, Larabee, Iowa	60.00
3. A. J. Brower, Sioux City, Iowa	55.00
4. A. F. Bolin, Quimby, Iowa	50.00
5. F. C. Wirt, Marcus, Iowa	50.00
6. Elmer Warner, Kingsley, Iowa	49.00
7. Henry Bros., Le Mars, Iowa	29.00
8. Fred Tangeman, Peterson, Iowa	56.00
9. Andrew Nelson, Meriden, Iowa	36.00
10. J. C. Milburn, Truman, Minn.	35.00
11. Joe Jackson, Meriden, Iowa	35.00
12. Matt Lanners, Remsen, Iowa	50.00
13. D. S. Needham, Woodward, Iowa	51.00
14. M. McKeever, Marcus, Iowa	27.00

# Marlin

The Marlin Model '92, .32 caliber, uses .32 short and long rim-fire, also .32 short and long center-fire cartridges all in one rifle. These cartridges are satisfactory in every way but much lower in price than other .32's.

This Marlin is the only repeater made for these sizes. It is much more effective than a .22 caliber on such game as hawks, owls, foxes, woodchucks, squirrels, geese, etc.

Described in detail in our complete 136-page catalogue, mailed free for six cents postage.

**The Marlin Firearms Co.,**  
135 Willow Street, New Haven, Conn.

16. Martin Letshe, Remsen, Iowa	26.00

Arch Brown's Sow Sale.

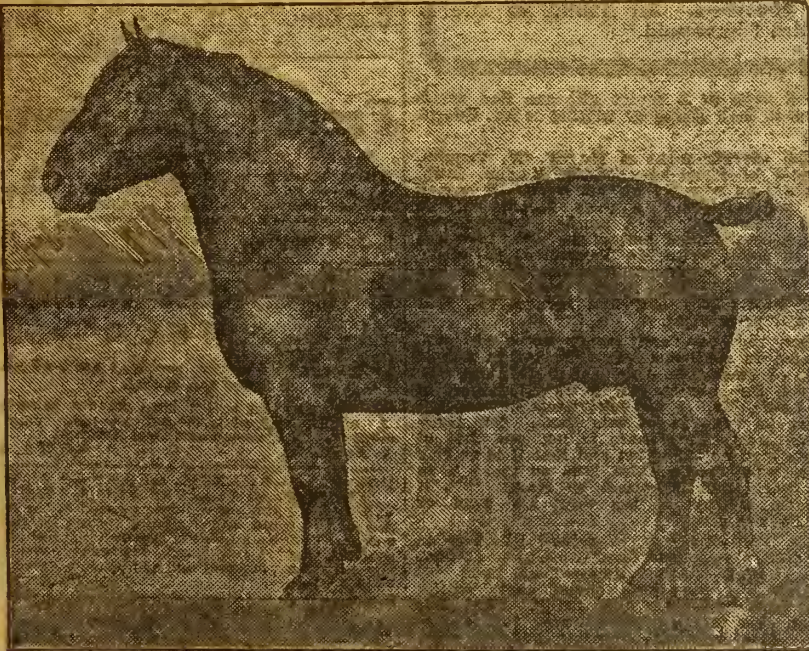

One of the best Duroc Jersey sow sales of the season was made by Messrs. Arch Brown & Sons, of Waterloo, Neb., on February 8th. A most representative lot of breeders were present, as well as a good farmer attendance, and the sale was snappy from start to finish. The offering was in excellent condition and an average of \$63.08 was made on forty-two head. The great brood sow, Beatrice Queen, topped the sale at \$450, and was purchased by Mr. O. E. Osborn, of Weston, Iowa. She is one of the greatest Duroc Jersey brood sows, and if ever a sow was worth the money, she is. Mr. Osborn has never purchased a sow that

has a better right to put him and his herd in the front rank than has this great sow. She is worth a great deal more than he paid for her, and he will mate her with the great Ohio Chief. Colonel Tom Callahan cried the sale. Below is a list of buyers:

Lot.	Price.
1. O. E. Osborn, Weston, Iowa	\$450.00
2. Von Seggern Bros., Wisner, Neb.	86.00
3. J. T. Armstrong, Clarks, Neb.	51.00

Steele's Duroc Jersey Sow Sale.

One of the good sales of the season was that of Mr. R. R. Steele, at Wolback, Neb., on February 1st. He is one of the enthusiastic breeders in Nebraska, and he will be one of the foremost breeders in course of a few years. He has recently purchased some of the best of foundation stock and another year will see him coming to the front with flying colors. He sold thirty-one head at an average of \$49.10, and it was the best sale ever held in that country. Col. J. P. Spearman, of Papillion, Neb., did the selling to the entire satisfaction of those present.

Castallian 62236, foaled April 4, 1904.

This is a 1,900-pound black two-year-old, one of the best bred and biggest Percheron stallions in America.

Nailstone Red Lynch 23528.

This is one of the thickest two-year-olds that we have in the barn. He will weigh close to 1,900 pounds.

The above Stallions will be sold at Watson, Woods Bros. & Kelly Company's public auction, February 26th and 27th.

## FIELD NOTES.

Mr. J. B. McAllister, of Palo, Iowa, breeder of Poland China swine, writes he is all sold out of boar pigs, but that he still has a very fine yearling for sale.

The announcement is made in our date claim columns this issue of a closing out sale of Aberdeen Angus cattle by Messrs. White Bros., of Perry, Iowa, on March 19th.

Mr. Geo. S. Prine, of Oskaloosa, Iowa, is offering some Berkshire sows safe in pig to state fair prize-winning boars, for sale in his advertisement that appears on this page of this issue.

Mr. H. D. Clore, of Lucas, Iowa, is offering choice re-cleaned Medium red clover seed for sale of his own raising. Write him for prices and sample as per advertisement on page 14 of this issue.

Mr. A. Bailey, of Anita, Iowa, is offering three Clydesdale stallions for sale; two are three-year-olds, one a two-year-old. In his advertisement that appears on this page he states that these stallions are of the best of

## POULTRY ADVERTISERS REPORT SPLENDID RESULTS FROM HOMESTEAD ADVERTISING.

INQUIRIES RECEIVED "FROM INDIANA TO WASHINGTON"—SATISFACTORY SALES OF POULTRY AND INCUBATORS RESULT FROM USING HOMESTEAD SPACE.

Mr. S. N. Allen, of Bethany, Mo., writes:

"Our advertisement in The Homestead has brought us inquiries from Indiana to Washington. We have sold all our hen turkeys, but still have a nice lot of young M. B. toms that are descendants of that 52-pound tom and from some of our largest hen turkeys."

Mr. W. H. Wagner, of Hebron, Neb., manager of the Hebron Incubator Co., manufacturers of Hatch All incubators and brooders, writes:

"The Homestead is proving a great puller for us."

Mrs. L. M. Estes, of Audubon, Iowa, writes:

"Please change my advertisement as per enclosed copy. I have sold all my hens and pullets and all the scored cockerels. All thanks to The Homestead, for it has sold for me every bird I have sold."

blood, their sires being full of Top Gallant blood and the dams were by Gleathan by the celebrated Lord Erskine.

Mr. E. B. Piper, of Corning, Iowa, is advertising a fine spotted Iceland stud for sale in his announcement that appears on this page of this issue of The Homestead. This animal is three years old and Mr. Piper desires to sell him at once.

Mr. V. A. Lathrop, of Marion, Iowa, has a good, growthy, well-bred White Rose Short-horn bull which he is offering for sale in his advertisement on page 40. This bull has three Scotch tops, is all red, thirteen months old and will be priced very low if taken soon.

Mr. W. W. Vaughn, of Marion, Iowa, breeder of Chester White hogs, writes that he still has a number of strong-boned, well-formed gilts bred to high-class matured herd boars, which will farrow in April and May. He is offering them for sale at reasonable prices. Write him for particulars after reading his advertisement on page 44.

Mr. A. Latimer Wilson, of Creston, Iowa, has sold his reserved three-year-old imported Percheron stallion Viena-Y 54602, to Messrs. Rogers & McElroy, of Percival, Iowa. Mr. Wilson writes that this colt only lacked twenty pounds of a ton; black as a raven, the best stallion he has imported for two years, and nothing but the price tempted him to sell this horse out of his stud. He also writes that all of his last importation of Percheron stallions are in good condition and all arrived safely and not a particle of

## PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illus. book for women; both sent free and postpaid.

DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

sows. Also some spring and early summer gilts, bred, and early fall pigs."

Mr. F. A. Ham, of Saronville, Neb., in sending in change for his advertisement of Duroc Jersey bred sows, found on page 44 of this issue, advises us that he has several

## DON'T BUY GASOLINE ENGINES

UNTIL YOU INVESTIGATE "THE MASTER WORKMAN," a two-cylinder gasoline, kerosene or alcohol engine, superior to any one-cylinder engine; revolutionizing power. Its weight and bulk are half that of single cylinder engines, with greater durability. Costs less to buy—less to run. Quickly, easily started. Vibration practically overcome. Cheaply mounted on any wagon. It is a combination portable, stationary or traction engine. SEND FOR CATALOGUE. THE TEMPLE PUMP CO., Mrs. Meagher and 16th Sts., Chicago. THIS IS OUR FIFTY-THIRD YEAR.

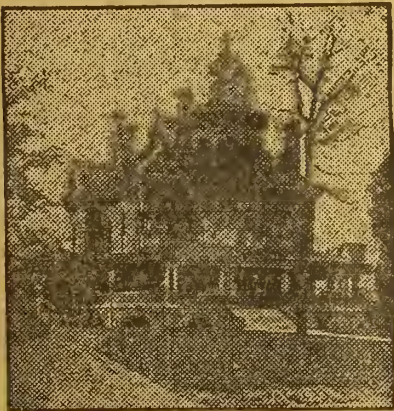

sows bred to Chief Knight and Imp. King yet for sale. He also has a few extra good September male pigs which he will close out at a reasonable price. These pigs are sired by Ham's Challenger 31277. They have good length, are extra broad, with good bone and feet. The reason that Mr. Ham wishes to sell these now is to make room for his spring pigs.

Mr. A. H. Brett, of Mason City, Iowa, in furnishing copy for advertisement on page 46, writes: "The sale catalog which we are offering the public comprises a list of the registered Percheron and Clydesdale stallions and mares, also of the Short-horn cattle that we have for sale. They represent some of the best breeding there is at the present time, and we are offering to sell these horses and cattle at private treaty, or in companies, as one desires. Our Percheron stallions at the present time number about five head. They are all young and are the low-down, blocky kind, with good bone. We also have a number of very choice colts, one being a very nice Clydesdale colt that is coming two years old, that will make an exceptionally good horse. His breeding is of the very best, coming from the imported mare, Princess of Airds, and out of the imported horse, Heir of Fame, which was the champion winner in the queen's herd of England. We have a number of very choice Clydesdale mares and colts, also, to sell, and are pricing them where the farmer can afford to buy them, and they will grow into more money than we are asking for them. Should be glad to quote prices on any or all of these horses, as desired. We are out for the business and are not asking enormous prices like a great many are doing. Our Short-horn cattle comprise some of the best imported and home-bred Scotch cattle, headed by the noted bull, Hampton's Marshall. We have a choice lot of young cows and heifers, also young bulls, ranging in age from yearlings to five-year-olds. We can spare a few straight Scotch cows and heifers of the most fashionable Cruickshank breeding. Our stock is only a short distance from the city,

## Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned in Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

### Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5386, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

and the horses are kept in the city, just a few blocks from the center of town. Do not be afraid to write for prices on anything you may desire, as we are offering our cattle and horses at private treaty on a basis that will make a man good money in the future, over and above the purchase price. We are making a specialty of companies, and can place horses at prices that will be an inducement for farmers to take hold of. Write for catalog at once.

We insert an advertisement in The Homestead this week for Mr. Joseph Lyons, breeder of Poland China swine, Herman, Neb. Mr. Lyons has for sale some spring gilts, fall yearlings and mature sows bred to Dear Grove Chief and Matchless Keep On, for March and April farrow. He also has some fall pigs of both sexes that he wishes to dispose of. Dear Grove Chief is by Chief Tecumseh 3d and out of Columbia 2d. He is an 800-pound hog, with an eight-inch bone and seventy-two inch heart girth; length, seventy inches. Matchless Keep On is a fall yearling and a prize winner at the Minnesota State and Sioux City Fairs. His sire is Matchless Jr., tracing to Chief Perfection 2d, dam by the noted Keep On. He is an extra fine hog, big and lengthy, with heavy bone, fancy head and ham. See advertisement on page 46.

On page 45 of this issue will be found the announcement of Mrs. A. Alexander, of Morning Sun, Iowa, advertising for sale eight Scotch bulls. Four of these bulls are out of imported cows of the following families: Two Kilbean Beauties, two Secrets, one Victoria, one Orange Blossom, one Braith Bud, and one Augusta. Mrs. Alexander is pricing these bulls at the bargain counter price of \$150 for choice. This is certainly a rare opportunity to secure not only well-bred Scotch bulls, but those of the most aristocratic breeding. Bulls of the breeding above mentioned at the more recent sales of Short-horns have been at from \$250 to \$325 each. It would be a pleasure to Mrs. A. Alexander, the manager, to write a complete description of any one of these bulls to any prospective purchaser. When writing, kindly mention The Homestead.

### REGISTERED FRENCH DRAFT MARES.

On page 28 of this week's Homestead will be found the advertisement of Mr. F. J. Svoboda, of Snyder, Neb., who offers registered French draft mares and fillies for sale. They are good ones and he is pricing them right.

### LAST CALL FOR CARL HANSEN'S SOW SALE.

On February 15th, Mr. Carl Hansen will make his first annual Duroc Jersey sow sale at Herman, Neb., and will put forty head through the sale ring. It is a splendid lot of sows and he deserves a good sale. You will not have time to write for a catalog. The thing to do is to go to the sale.

### LAST CALL FOR HULL & THOMPSON'S POLAND SALE AT MAXWELL, IOWA.

For the last time we desire to call the attention of Poland China breeders to the coming sale of Messrs. J. E. Hull and J. O. Thompson, at Maxwell, Story county, Iowa. This collection will consist of forty head of carefully selected individuals from the two herds. There will be something there for everybody whether they want anything fancy or real large, growthy stuff. Write for a catalog at once and plan to attend. You will find the offering first-class in every respect.

### PERCHERON MARES FOR SALE.

Anyone wanting some good Percheron mares should write or go and see Messrs. Rhea Bros., Arlington, Neb. They have a number of good mares for sale, and the best lot of Percheron stallions that they have ever owned. They have a lot of black two, three and four-year-olds, some of which will weigh a ton. They sell their own horses, and therefore save the buyer the middleman's profit. It will pay anyone wanting Percheron stallions or mares to go and see Messrs. Rhea. Write them at once about what they are offering and mention The Homestead.

### ERSCHEN'S DUROC SALE.

Mr. F. M. Erschen, of Odell, Ill., offers to Homestead readers one of the good offerings of Duroc sows to be sold this season. He has been a good buyer from the best herds throughout the east and west. Stock from this herd has gone out and done well for other breeders. This is what men may expect if they secure good sows from this herd. The catalogs are out and will be sent to all who write for it as per the advertisement on page 42 of this issue. Bids sent to Mr. D. M. Pierce in care of Mr. Erschen will be properly handled. Kindly mention this paper when writing.

### A POLAND AND CHESTER OFFERING.

Mr. F. G. Paul will hold a public sale at Laurel, Iowa, on Thursday, February 28th, at which time he will sell twenty-five head of richly-bred Poland Chinas and the same number of Chester Whites. The offering in both breeds consists of tried sows and gilts. Prince Donald 101473 has been Mr. Paul's Poland herd boar and has left a valuable impression on the herd. The Chester herd boar is Laurel Winner, an extra good one and a great breeder. The sale will be held in the Exchange Pavilion, so that the character of the weather will not affect the event in the least. Send for catalog to Mr. F. G. Paul, Laurel, Iowa, and please mention The Homestead when you write.

### TAYLOR-MORRIS-SCHROTBERGER DUROC SALE.

The second day of the "Only Way" Duroc circuit is taken by three of the good breeders of Illinois, Messrs. W. J. Taylor, C. P. Morris and John Schroetberger & Sons, of Dwight, Ill. These gentlemen have been among the best breeders of Durocs in their community and have gone out and bought the best to be had. Forty head have been selected from these herds and the breeders who are in the market for well-bred Durocs should plan to be present at this sale. We have for the past few months called attention to the various herds in this circuit, but we wish to recommend this offering in point of breeding and individuality. The catalogs are now ready and will be sent to all who write for same as per the advertisement on page 42. Bids sent to Mr. D. M. Pierce, in care of any of these consignors, will be prop-

Scotch and Scotch topped

# Short-horn Cattle

AND

## Duroc Jersey Bred Sows

TO BE SOLD AT

Herman, Neb., February 25, 1907

18 Females and Young Bulls.

I am selling some splendid Scotch and Scotch topped young bulls, and some excellent Scotch and Scotch topped young heifers. These will be sired by such well known Scotch bulls as Imp. Victoria's Count 195220, Chief Lavender, Scottish Count, Red Bud, Lochinvar and Royal Fancy.

### 36 HEAD DUROC JERSEY BRED SOWS

These are all gilts of March farrow and are sired by West's Duroc 43017, Russell's Choice 43019, and Gold Dust Model 44291. These gilts are bred in the blood of the most noted sires of the breed. They have plenty of size, and are nearly all bred for early farrow. I am offering a high-class lot of sows in this sale. Write for catalog and kindly mention Iowa Homestead. Address.

## CAREY CAMERON, HERMAN, NEB.

Cols. Geo. P. Bellows, Brass and Jensen, Auctioneers.

## PUBLIC SALE OF Poland Chinas and Chester Whites

BY F. G. PAUL

Exchange Pavilion, Laurel, Iowa, Thursday, Feb. 28th.

The offering will consist of twenty-five head of bred Poland China sows and gilts and one two-year-old herd boar. The herd boar is Prince Donald 101473. The sows are principally of Nemo L. Dude and Perfection breeding. There will also be twenty-five head of Chester White bred sows and gilts and one yearling herd boar, Laurel Winner. For further particulars, address,

F. G. PAUL, - - LAUREL, IOWA.

## Custer's Duroc Jersey Sow Sale

at the Park Livery Barn,

Moville, Iowa, February 28, 1907

40 HEAD, including some of my very best brood sows, yearlings and spring gilts. These are sired by Jumbo Giant, a son of the noted boar, Jumbo Red, Royal Triumph, Phil Clark 2d, Iowa Model and King James. They are bred to Jumbo Giant, Royal Triumph, Rockefeller and Square Deal. I am selling a grand lot of sows, particularly strong on feet and all carrying a heavy bone and good length. Write me at once for catalog and come to my sale. Address,

GEO. W. CUSTER, Moville, Iowa

COL. PAT MCGUIRE, Auctioneer.

erly handled. Look up the advertisement and mention The Homestead when writing.

### CUSTER'S DUROC JERSEY SOW SALE.

On February 28th, at the Park livery barn, Moville, Iowa, Mr. Geo. W. Custer will make his annual Duroc Jersey sow sale, and will put forty head through the ring. This is the best offering that Mr. Custer has ever sold, and they will be in splendid condition. They are mostly sired by Jumbo Giant, a son of old Jumbo Red; Royal Triumph by Royal Plummer; Phil Clark 2d, Iowa Model and King James. They will be bred to Jumbo Giant, Royal Triumph and Square Deal, a son of Tokio by Oom Paul, out of an American Royal dam. He is putting in a splendid Orion sow in this sale, also granddaughters of the great American Royal, Jumbo Red, Royal Plummer and other good boars. One of Mr. Custer's hobbies, and a good

bobby it is, and more will have to pay attention to it later on, is a good, lengthy sow with a strong back, a good big bone and standing square on its toes. He is putting in a good bunch of this kind. He has selected his best gilts from among 200 head, and he only sells the best. His yearlings and matured sows, which make up about half the offering, are the pick of the herd. You will not go wrong if you attend the Geo. W. Custer sale. If you want sows you will be sure to buy if you are with him on sale day. Write at once for catalog and mention The Homestead.

### MOATS & SONS' SOW SALE.

On February 19th, Messrs. M. S. Moats & Sons will make their annual Duroc Jersey brood sow sale and it promises to be the best they have ever held. The three grand show sows that attracted so much fa-

# IF YOU WANT THE BEST BRED SOWS OF THE BREED, THEN WAIT FOR THE ... LOGAN VALLEY DUROC JERSEY SALE CIRCUIT ...

Daughters of the world's most famous sires in the sale, such as Proud Advance, Orion, Dandelion, Reed's Banker, Glendale Chief, Col. Roberts, Long John, Trone's Oom Paul, Belle's Chief and others.

## Feb. 26th--Homer, Neb.--From The Herd of George C. Blessing 40 HEAD--MOSTLY FALL AND SPRING YEARLINGS AND AGED SOWS

Twenty head of these are daughters of the noted boar, REED'S BANKER, a full brother to Proud Advance. Others are sired by Mammoth John, a son of old Long John, and other good boars. The most of these are bred to the famous sire and show boar, MISSOURI GOLD FINCH, first-prize boar at the Missouri State Fair and at the American Royal. Catalog now ready. Write for it. Address, Col. J. L. Luther, Auct.

GEORGE C. BLESSING, HOMER, NEB.

## FEB. 28, LYONS, NEB.--THE TOPS OF THE W. J. STONE HERD--40 HEAD, 10 AGED SOWS, REST SPRING GILTS.

I am selling Proud Ady, by Proud Advance, out of the Iowa State Fair sweepstakes sow, Royal Blossom 5th, that recently sold for \$600. This sow topped the Shade sale last year. Also selling some good daughters of Onimode, by Red Chief, Barton 40597, by Belle's Chief and Davy 40599. I am selling my very best gilts in this sale. Write at once for catalog. Address, COL. J. L. LUTHER, AUCTIONEER.

W. J. STONE, LYONS, NEBRASKA.

## March 1st--Lyons, Neb.--The Tops of the Herds of E. F. La Rue 40 Head--8 Matured Sows, the rest gilts

The matured sows are sired by Col. Roberts, a son of the great boar, Owen, and Glendale Chief. The gilts are sired by Monarch L. and Alix. I am selling four good granddaughters of Jumbo Red. They are bred to Radiator, the boar that Professor Burnett used at the Nebraska Agricultural College; Prince Regent and R. Gold Dust by Gold Dust Jim. You will find my offering an extra good one in every way. Write for catalog. Address, Col. J. L. Luther, Auct.

E. F. LA RUE, LYONS, NEB.

## March 2d, Lyons, Nebraska--A Great Offering from the Herd of W. A. Peterson

35 of the Tops--10 yearlings and aged sows, the rest spring gilts. Sired by old Dandelion, Long Orion, Acme and Dandy Orion, and bred to Jumbo John 53403 and a son of Top Pride. I have culled all my gilts and nothing but the very best will be offered. The blood of Orion, Proud Advance and Long John makes up my herd. Write me for catalog. Address, Col. J. L. Luther, Auct.

W. A. PETERSON, LYONS, NEB.

Send for Catalogs to any of the above Breeders and mention Iowa Homestead.

avorable attention and comment at the fairs this season are to be sold, cataloged only as attractions, and they certainly ought to attract the attention of the best breeders in the land. Challenger's Lady, too, will not be overlooked, she by the great Duroc Challenger, her dam by Duroc King Jr. Talk about your brood sows and the brood sow type, here is where you can get it, and surely this breeding will please you. There is also a half sister to Junior Jim, the sensational boar, about whom so much is being said at this time. Nona Roberts, by Lord Roberts, is another grand sow, something that you would be pleased to point to in your herd at any time. We could go on and fill a page about the good things in this sale, but it hardly seems necessary, as the catalog will tell all of that. But here is just one more, a gilt out of Rosella, a half sister to Junior Jim, the second dam by Improver II. The gilt is sired by Duroc Challenger's Wonder and is now safely bred for an early litter to Chimes Advance. Here is a combination of blood lines that must command your attention. If you want Duroc Jersey brood sows and you want to buy them from a reliable firm, then be sure to attend the M. S. Moats & Sons sale at Randolph, Neb., on February 19th.

## THE DEAL-SCHWEIZER-NORTON DUROC SALE.

We wish to call the attention of our readers to the advertisement of Messrs. E. H. Deal & Son, J. G. Norton and Fred Schweizer, of Elwood, Ill., whose Duroc Jersey brood sow sale occurs on Tuesday, February 15th. These gentlemen have been breeding Duroc Jerseys for a number of years and have been liberal purchasers from the best herds. Those of our readers who have attended the public sales held by these gentlemen are familiar with the offerings which they have made. The offering is superior this year to any which these gentlemen have heretofore made, and we wish to recommend this sale to our readers who are in the market for well-bred Durocs. In our issue of last week we called attention to the boars in use in this herd. We wish again to call attention to one of the boars in particular. He is one of the best, if not the best son of Proud Advance the writer has ever seen. His dam was by Orion, and since both the sire of his dam and his sire are dead, the sows which go into this sale bred to him should find ready place in the good herds of the central West. This boar has been recorded as What You Say. We wish this week to call attention to some of the females found in the offering which we are sure will please the most discriminating buyers. Iola is an April gilt sired by Golden Hero and out of Hillie's Model. This gilt is a litter mate to Auditor D., the second-prize boar pig under six months at the Illinois State Fair, 1906, and there were many present at the ringside who would have placed him in first position. A litter mate to Iola goes into this sale bred to What You Say. Two very good April gilts are listed out of the same dam as Red Carnation and Red Lady, sows which have done much for Mr. N. B. Cutler, of Carthage, Ill., and Mr. Ed A. Baxter, of Pawnee, Ill. These two gilts go into the sale bred to Auditor D. and Double Track. One of the best gilts in the sale is a daughter of Advance Col., one of the good boars in use in the herd of Messrs. T. W. Stoner & Son, of Henry, Ill. She combines the blood of Proud Advance, Orion, Stoner's Improver, Echo King, Seusation and None Such. Mr. Breeder, how many have you had the opportunity of bidding on, during the past season, that have combined the blood of such noted sires? This gilt is safe in pig to the service of Auditor D. Mr. J. G. Norton sends forward a fine lot of sows sired by King Ely, he by Ely's Improver; Double Track, he by Echo King, and out of Belle Nebraska, one of the good daughters of Nebraska Belle. These gilts are large and smooth, and have been mated to good boars. Mr. Fred Schweizer in making up his consignment was particular to get the good ones, and we feel sure that the offering throughout is a good one. A very fine gilt is called Belle Odell. She topped Mr. Frank Erschen's sale last fall and is a daughter of Tip Top Mober, and out of Rose O'Grady, a sow

which did much good in the herd of Mr. Geo. W. Seckman. This gilt goes into the sale bred to Auditor D. Jewell's Pride, by Fashion Boy, is a litter mate to Switzer Case, the sow which went to Mr. Ed A. Baxter's herd last spring. Two daughters of Champion Paul, and out of Topsy Topsy by Tip Top Notcher, go into this sale, one bred to Fashion Boy and the other to What You Say. Look up this sale and plan to be present at the entire "Only Way" circuit, which begins with this sale. Kindly mention The Homestead when writing for catalog. Bids sent to Mr. D. M. Pierce, Homestead representative, will be properly handled. See advertisement on page 42.

WATSON'S DUROC JERSEY SALE. Mr. H. E. Watson, of Edinburg, Ind., will hold a brood sow sale on Saturday, February 23d, in which are included sows that will do well in the best herds of this country. The writer has carefully inspected the offering and is pleased to assure readers of The Homestead that they will not be disappointed in the offering. The sows which have been selected include many which Mr. Watson had intended to keep for his own use. This sale was not planned early in the season, and it was only after a number of breeders had asked Mr. Watson to hold a brood sow sale that he decided to give the public an opportunity to secure good breeding stock from his noted herd at their own figures. Mr. Watson is one of the foremost breeders of Indiana, and has at the head of his herd the great show and breeding boar, High Chief, one of the best sons of Ohio Chief. A number of the offerings are either sired by this noted boar or are bred to him. Others are sired by Ed's Colonel, Top Notcher Chief Ohio King, Baker's Bred Right, Sure Winner, Uncle Ned, E. K.'s Colonel, High Ohio Chief, John's Ohio Chief, Sir Radiant II., Perfect Lad, Day's Star, Perfect, American Chief, Duckworth Col. and others of equal note. Western breeders may not be familiar with some of these boars and we wish to state that they represent the blood lines which have placed some of the very best herds of Indiana and Ohio at the top round of the ladder. The boars to which these sows are bred are as follows: Fourteen bred to High Chief, said by Mr. S. E. Morton to be the best son of Ohio Chief; eight bred to Colonel Scott by Carl's Col., and full brother in blood to Prince of Colonels. Eight head are bred to Watson's King by Perfect King by King of Kings. There are several bred to other boars of equal note. Plan to be present at this noted sale, as it can easily be reached from the sale of Messrs. Amos W. Harris & Sons, at Louisville, Ky., the day before, and western breeders can reach their homes on Sunday. Bids sent to Mr. D. M. Pierce, Homestead representative, in care of Mr. Watson, will be properly handled. Plan to be present at this sale. Further information may be had from catalog, which will be sent promptly, as per the advertisement on page 31 of this issue. Kindly mention The Homestead when writing.

## D. J. Pollock's Duroc Sale.

The sale of Mr. D. J. Pollock held February 1st at Thayer, Iowa, resulted in uniformly good prices throughout, though the offering itself was an exceptional one and each individual merited the brisk bidding that it commanded. Mr. A. L. Mossman, of Radcliffe, Iowa, topped the sale, paying \$130 for Fantless 12314. Among the buyers were: W. T. Jones, Independence, Mo.; F. Fowler, Menlo, Iowa; Geo. R. Manifold, Shannon City, Iowa; A. W. H. Orr, Lormor, Iowa; J. M. Hoskinsou, Corning, Iowa; L. V. Imes, Peru, Iowa; M. F. Buchanan, Lamoni, Iowa; E. P. Blaisdell, Afton, Iowa; Frank Sherr, Afton, Iowa; E. Schumacher, Afton, Iowa; F. M. Iluff, Afton, Iowa, and H. M. Moore, Orient, Iowa.

## SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

**Lake City, Iowa, Tuesday, Feb. 26, '07**

I will offer at my farm near town

**35 Head of strictly choice Brood Sows 16**

gilts, rest yearlings and matured sows.

I am offering nine granddaughters of the great Nebraska Belle in my sale, three choice gilts by Ohio Chief and a great many granddaughters of old Orion. The blood of Nebraska Belle is to be found in my offering, also of June Choice Again by the great Tientsin, the sire of Ruberta, the highest-priced Duroc Jersey sow ever sold, and a first-prize Iowa State Fair winner. I am selling some choice Ohio Chief gilts out of a Belle's Echo, a son of Nebraska Belle. There will also be some good gilts in the sale by old Orion, Young Advance, Goldie O.'s Top Notcher, King James and Orion II. These will be bred to Pittman's Ohio Chief and Clear the Way. The sows I am putting in are an excellent lot and some of them I hate to part with, but I am going to sell the best and I want the breeders to attend my sale, whether they buy or not. I will also sell twenty head of high-grade Shire horses and mares, and two good driving teams. Write me for catalog.

Col. F. F. Luther, Auct. **W. D. PITMAN, Lake City, Ia.****February 27, 1907****40 Head Yearlings, Matured Sows 40**  
and some Choice Spring Gilts

Three of these are sired by Orion; a litter sister to one of them sold in my last March sale for \$205; two by Crimson Wonder I am; three by Proud Advance; one by American Royal; others by Peerless Orion, Young John, West Side, and Tientsin, the sire of the \$1,500 sow, Ruberta. These will be bred to my great young breeding boar, Young Advance by Proud Advance, Orion Jr. by Orion, and W. D.'s Ohio Chief. Come one; come all, and see a fine lot of massive sows go through the ring.

I will also sell 1 Queen Mother and 3 Easter Tulloch Duchess Aberdeen-Angus bulls in my sale. Send for catalog.

**SPECIAL REQUEST****High Chief Brood Sow Sale!**

HELD BY

**H. E. WATSON, EDINBURG, INDIANA**

ON

**SATURDAY, : FEBRUARY : 23, : 1907**

Following the Harris & Sons' Commodore Sale at Louisville, Ky. These boars are sired by Ed's Colonel, High Chief, Top Notcher Chief, Ohio King, Baker's Bred Right, Sure Winner, Uncle Ned, E. K.'s Colonel, High Ohio Chief, John's Ohio Chief, Sir Radiant II., Perfect Lad, Day's Star, Perfect, American Chief, Duckworth Col. and others, and safe in pig to the following boars: 14 bred to the great High Chief, by Carl's Colonel, said by S. E. Morton to be the best son of old Ohio Chief; 8 bred to Colonel Scott by Carl's Colonel, and full brother in blood to Prince of Colonels. He is one of the best boars in the United States today. Come and see him. Eight bred to Watson's King, by Perfect King by King of Kings. The boar, Perfect King, sold at a long price to head one of the best herds in Iowa. Will also sell six head of topky fall boars sired by High Chief. Sale to be held in sale barn in Edinburg. Send bids to Mr. D. M. Pierce, representing this paper.

**Will Also Sell Six Head of Topky Fall Boars Sired by High Chief.**Auctioneers, **TOM VINNEDGE and assistants****H. E. WATSON, Edinburg, Ind.****The Logan Valley Duroc Jersey Sale Circuit.**

One of the remaining sow sale circuits that will yet be held in northeast Nebraska is the Logan Valley sale circuit, beginning with the sale of Mr. George C. Blessing, of Homer, Neb., February 26th, and ending with that of Mr. W. A. Peterson, of Lyons, Neb., on March 2d. In this circuit of sales there will be a grand lot of brood sows, the equal of anything yet sold in Nebraska this year.

**GEO. C. BLESSING, FEBRUARY 26TH.**

The opening sale will be that of Mr. Geo. C. Blessing, at Homer, Neb., on February 26th, when he will sell forty head, mostly spring and fall yearlings and aged sows. Mr. Blessing is one of the good breeders in his section of the state. His foundation stock was secured from the very best herds and he now has a good offering to sell himself. At the head of his herd today stands the noted boar, Missouri Gold Finch, a first prize winner at the Missouri State Fair, and also at the American Royal in a hotly-contested show. His sire is old Gold Finch II., a grand champion at the American Royal, and his dam, Mary Windsor, stood fifth at the World's Fair. This hog has a rich color, a good head and ear, nice spring of rib, a good, deep ham and is right up on his feet. A sow bred to him will go well in any herd. Mr. Blessing is also using Duroc Banker, a son of old Reed's Banker, on these sows. He will put twenty daughters of Reed's Banker in this sale. They are all fall sows, except four, and the entire bunch is bred to Missouri Gold Finch. One of the best things that he will sell is Springdale Beauty by Mammoth John, a son of old Long John. Her dam is Princess by old Gold Dust Jim. She is a cracking good sow all over and is bred to Missouri Gold Finch. There are a number of splendid Reed's Banker sows in this offering. One of these is Lady Banker 1st out of Lady Long by Dandelion, and a litter sister of hers also goes in. It is a good offering all through and our best breeders should go after some of these Reed's Banker sows bred to Missouri Gold Finch. Write at once for catalog and mention The Homestead.

**JOHN H. TRYON & SONS.**

On February 27th, Messrs. John H. Tryon & Sons will make their second annual Duroc Jersey sow sale at Lyons, Neb. There are few herds in the West that are up to the standard of the Tryon herd, and we doubt if such another offering of sows will be sold this year as will go through the ring on this occasion. No breeders in the West have bought more of the good things than have this firm, and they certainly have the goods to offer the boys when they come to their sale. They will sell fifty head in this

sale. Four of these are by the great Orion, and one of these is as good an Orion sow as has ever been sold. They also sell three good Proud Advance sows and they are also very good. Most of these are bred to the \$5,000 boar, Junior Jim. There will be some good sows in the sale sired by Trone's Oom Paul, Carroll Boy and a son of old Long John. These sows will be bred to Junior Jim, West's Compromise and a son of Trone's Oom Paul. It is a grand offering from both the point of breeding and individual merit. You cannot afford to not be at this sale. Write for catalog at once and mention The Homestead.

**W. J. STONE, FEBRUARY 28TH.**

The third day of the circuit will be the sale of Mr. W. J. Stone, at Lyons, Neb. Mr. Stone is one of the well-known breeders who has bought liberally of the best foundation stock, and he is selling forty head in this sale. The gilts will be sired by Davy 40599, a grandson of Proud Advance, and Barton 40597 by Belle's Chief. One of the best sows that he will sell in this sale is Adelaide 2d, a three-year-old daughter of Onimode by Red Chief out of a granddaughter of old Jumbo Red. She is a large sow and a wonderfully smooth sow. She is well hammed down and is bred to a son of Top Pride. Mr. Stone also sells Proud Addy, a two-year-old daughter of Proud Advance, and out of the great sweepstakes sow, Royal Blossom 5th, that sold in the Shade sale for \$600. This sow topped the Shade sale last year at \$132.50. She is bred to Orion's Redeemer, a son of old Orion. Mr. Stone sells two good daughters of Onimode out of an Orion dam, bred to a son of Top Pride. He has saved only the best things for this sale. Write for catalog and mention The Homestead.

**E. F. LA RUE, MARCH 1ST.**

On the above date Mr. E. F. La Rue will sell forty head of decidedly high-class brood sows in the sale barn at Lyons, Neb., and it is an offering that any breeder could well feel proud of. This offering is not only well bred, but it is a particularly good one from the standpoint of individual merit. He is selling eight matured sows, and no breeder is offering a better lot. These are mostly sired by Col. Roberts, a son of the great boar, Owen. Mr. La Rue sells a particularly good sow sired by old Glendale Chief, and she is bred to Prince Regent, a son of Belle's King, a son of the great sweepstakes sow, Nebraska Belle. Another good two-year-old sow is Pride by Col. Roberts, and her litter sister, Gladys. One of these is bred to Radiator, the other to Prince Regent. Another good two-year-old sow is Lucy J. by Col. Roberts out of Lucy R. by Glendale Chief. She is a great big cherry red sow, of splendid conformation, and is bred to

Prince Regent. He also sells a two-year-old daughter of the sweepstakes boar, Gold Dust Jim, and she is bred to Radiator. The gilts are mostly sired by Monarch L. by Red Chief W. C. and by a boar called Alix. They are bred to Radiator and Prince Regent. Mr. La Rue is selling a most excellent lot of sows. They are good in color, have been well grown out and it is a strictly high-class offering. He deserves a good sale because he is offering a splendid lot of sows. Write for his catalog and mention The Homestead.

**W. A. PETERSON, MARCH 2D.**

The last sale of the circuit will be that of Mr. W. A. Peterson, at Lyons, Neb., on March 2d. Mr. Peterson is one of our best young breeders and his herd is founded on a line of breeding that has won its way to the front in the best show rings in the West. He is selling thirty-five head in his sale. Ten of these are yearling sows and the remainder are spring gilts. They will be sired by the noted boar, Dandelion, that was formerly owned and shown by Messrs. Manley &

Co., and many of the best things that they won on were descendants of this old boar. He has been at the head of the Peterson herd, and many of his daughters will be found in the sale. Others will be sired by Royal Red, Acme, Onimode, Long Orion, Dandy Orion and Baxton, a son of Belle's Chief. No. 1 of catalog is a daughter of Royal Red by Jumbo Red, and out of a Peerless dam. She is a large, heavy-boned sow and is bred to Jumbo John, a son of Young John. Mr. Peterson sells one of his best old sows, called Darkie, and she has possibly made him more money than any other sow on the farm. He sells two spring gilts out of her by Dandy Orion, and a fall sow by a son of Surprise. He is selling a nice bunch of Dandelion gilts in this sale, also a good bunch by Dandy Orion. These will be bred to Jumbo John 22375, a son of Young John, and to a son of the great sow, Royal Blossom 5th. You cannot afford to miss the Peterson sale. Write for his catalog and mention The Homestead.

## Stallions, Kentucky Mammoth Jacks, Standard Bred Mares and Road Horses

AT

### Salisbury, Mo., Saturday, Feb. 23d

**I** AM the second largest Jack breeder in Kentucky. You buy from first hands--no middleman's profit. This sale will be held at my new large sale barn and will take place rain or shine. If you are looking for something extra, be sure and attend this sale. I just returned from Kentucky last week with a carload of Stallions and Jacks and they are the best that could be found. The offerings of this sale consist of Standard Bred Trotters, Imported English Shires and Percherons, and they are as good as can be found anywhere. The jacks run from 14 1-2 to 16 hands high (mule measure). The noted 16-hand jack, JUMBO, of Kentucky, is in this sale. All stock guaranteed breeders. Terms, CASH. Sale will begin promptly at 10:30 a. m.

AUCTIONEER**

**J. P. HAMMETT**

#### The Central Iowa Duroc Jersey Sale Circuit.

It is with pleasure that we call our readers' attention to the central Iowa Duroc Jersey sale circuit, which begins with the sale of Messrs. W. A. Staples & Son, of Glidden, Iowa, on February 25th, and ends with the sale of Mr. J. W. Pittman, of Lohrville, Iowa, on February 27th. Mr. W. D. Pittman, of Lake City, Iowa, will sell on February 26th, and these three herds are as good as there are in the state. Certainly no one has any better breeding, and no other breeders have been purchasers of better stock than has gone into these three herds. It is therefore a pleasure for us to call our readers' attention to these three sales.

#### W. A. STAPLES, FEBRUARY 25TH.

The sale of Messrs. W. A. Staples & Son, at Glidden, Iowa, on February 25th, promises to be one of the best sales that will be held this season. They are offering a most excellent lot of sows in their sale and no firm deserves a better attendance from breeders than does this one. They have cataloged fifty head, among which are five daughters of the immortal Orion, two gilts by Junior Jim, one by Ohio Chief, two by Critic's Echo, a prize winner himself and a son of the great show boar and sire of prize winners, Glendale Critic. One of the good yearling sows that they will sell is Beatrice, a daughter of Orion out of Kruger's Maid, the noted brood sow. This sow belongs to the \$960 litter in the Pete Alsin herd, and she is bred to Proud Advance Again, a son of old Proud Advance. This sow is therefore a full sister to Arlon Orion J. out of the great sow, Alix. They are selling their great sow, Williamette, in this sale. She is a daughter of Indicator out of Nancy 4th, and few breeders have a better brood sow proposition than she is. She farrowed fourteen spring pigs and also fourteen in the fall, and three of these will be in the sale. This sow is a most excellent brood sow, having great length of body, a good back and a deep ham, and when in condition is not far from a show sow. Proud Nancy, a March 14th gilt out of Williamette and sired by O. Pig, a son of old Orion, is one of the good things in the sale. She is bred to Proud Advance Again. Two of her litter sisters also go in. They also sell a daughter of their noted sow, Nancy VII., in this sale. This gilt is sired by Orion and she is a good one, and she is bred to Proud Advance Again. Nancy VII., the dam of this gilt, was a show sow in the Manley herd and a leading winner. She topped the Manley sale a year ago at \$600, and was one of the best purchases he has ever made. This sow was shown as Nancy VIII., but she is recorded as Nancy VII. This was a mistake in entering her and she was since called Nancy VIII. They sold a litter brother to this gilt for \$232.50, and another for \$140 in their fall sale. About ten sows in the sale are bred to Clear the Way, a litter brother to this sow. There will be an Ohio Chief gilt in the sale out of Nancy 1st, and she will be bred to Baxter's Buddy 3d. Messrs. Staples & Son sell two daughters of Junior Jim bred to Nancy's Orion and

one to O. Pig. They also sell the dam of these, Queen of Blair, bred to O. Pig. A granddaughter of Kan't Be Beat goes in bred to Proud Advance Again, and a daughter of Clovercroft Promoter bred to Waveland Ohio Chief 10th will also be sold. Write for their catalog. It makes most interesting reading. Kindly mention The Homestead when writing.

#### W. D. PITTMAN, FEBRUARY 26TH.

On Tuesday, February 26th, Mr. W. D. Pittman will make his annual Duroc Jersey sow sale at his farm near Lake City, Iowa. He is putting up an offering that breeders and farmers cannot afford to pass by. No breeder in Iowa has bought better foundation stock than has Mr. W. D. Pittman, and he has the blood of the most noted winners in his herd. In his offering you will find the blood of the great Nebraska Belle and June Choice Again by Tientsin, the boar that sired the first-prize Iowa State Fair winner and the highest priced sow ever sold, she bringing the record price of \$1,500 in the F. E. Garrett sale. He also puts in a daughter of Tientsin in this offering. He also sells three good gilts sired by Ohio Chief and out of Fancy Ceres by Belle's Echo, a son of the great Nebraska Belle. He will sell some choice gilts by Young Advance out of Zoo V. Orion, and a few by that old hero, Orion, out of Nancy Orion. Nebraska Belle III. has three gilts in the sale sired by Goldie O's Tip Top Notcher, and they are good ones. There are a few very good gilts in the sale sired by Orion II. out of Graceful W. by King James. There are nine granddaughters of Nebraska Belle in the sale and quite a number of granddaughters of old Orion. These are bred to Pittman's Ohio Chief, a son of the great Ohio Chief, and Clear the Way, the best son of the prize-winning sow, Nancy VII., and sired by old Orion. He has also used Crimson Wonder Jr. and Zoo V. Best by Young Advance. The sows that go into this sale are an excellent lot and some he regrets to part with, and he puts them in simply as an attraction to buyers. No man has a better bred herd than Mr. W. D. Pittman and buyers will be pleased with his offering. He will also sell eighteen or twenty high-grade Shire mares and horses and a couple of good driving teams, and we can say to our readers that they are strictly high class. Mr. Pittman wants you to come to his sale whether you want to buy or not. Write him at once for catalog and mention The Homestead.

#### J. W. PITTMAN, FEBRUARY 27TH.

The last of these three sales and one of the best of the bunch will be that of Mr. J. W. Pittman, at Lohrville, Iowa, on February 27th. He will sell forty head, all yearlings and a few aged sows, and ten head of spring gilts. We want to say to Homestead readers that they cannot afford to not attend this sale, as he is putting up a good offering, and it is bred in the blood of the greatest winners known to the breed. For years we have been along the line where Mr. Pittman has purchased his foundation sows and boars, and it was only the good ones he bought. If you look over his catalog this will be very plain to be seen. He is selling three daughters of Orion, and

## 36 Richly Bred Durocs 36 At Auction

At My Farm Near Seward, Nebraska

### FEBRUARY 20, 1907

Twenty good, growthy fall yearlings, five aged sows and eleven spring gilts, bred to such boars as Fashion Improver, one of the best living sons of Improver II. Jr., champion first prize pig at Ohio and New York State Fairs last fall. My sows represent the best blood known to the breed. Write for catalog and come to the sale. Send bids to Ray Page, who will represent this paper.

**S. P. BRIGGS, Seward, Neb.**

two of these are out of Mr. Manley's show sows. A litter sister to one of these sold in his last sale for \$205, and these are far better than she was. He sells two daughters of the Iowa State Fair sweepstakes boar, Crimson Wonder I Am and they are out of a granddaughter of the great Kan't Be Beat. He also sells a daughter of American Royal, dam a litter sister to the dam of Royal Blossom 4th, the Iowa State Fair sweepstakes show sow. He will put in three daughters of the great Proud Advance, four by Young John, a few by Peerless Orion by Orion, West Side, litter brother to Crimson Wonder, and Tientsin, the sire of the great sow, Ruberta, that recently sold in the Garrett sale for \$1,500. Mr. Pittman will offer Lady Sweepstakes, the sow that won sweepstakes at the Manson fair. These will be bred to W. D.'s Ohio Chief, a son of Ohio Chief, Orion Jr. by Orion, and Young Advance by Proud Advance. Gilts sired by the last named hog have sold in three sales from \$70 to \$105, and those in attendance on sale day will like his get. The sale will be held at the farm, two miles west of Lohrville, Iowa. He is putting in a high-class lot of sows that deserve the attention of our best breeders and farmers. Write for the catalog and please mention The Homestead.

Remember S. R. Murphy Sells Durocs  
Saturday, February 23d.

Are you going to be with Mr. S. R. Murphy, at Savannah, Mo., Saturday, February 23d, at which time that great young sow, Ohio Belle, sells to the highest bidder? The man who wants tops should not miss this event. What will a litter by the Iowa champion of 1906, Crimson Wonder I Am, be worth? Then remember that Ohio Chief Again, her litter brother, has been used on many sows, among which are daughters of Proud Advance, now dead; Radiant, Perfection Chief, and other good sires. Mr. Murphy has spared neither time nor pains to make this a great event. He has the goods and it is now up to the breeders. Do you

### Good Literature on the Silo.

Mr. H. C. Hargrove, of Des Moines, Iowa, has prepared a book recently, the title of which is "The Modern Way of Saving Money on the Farm." This book takes up feeding questions in detail and among other things discusses the value of the silo. It is a matter of record that every silo that was properly constructed in 1906 has given most excellent satisfaction to the men who built them, and there are many instances already reported to Mr. Hargrove where the owner considers that the silo has paid for itself already. Hay is running in price anywhere from \$10 to \$14 a ton, and those who were wise enough to store away ten or fifteen acres of good ensilage last fall are able to feed dairy cows and steers at a very much lower cost than those who are obliged to feed hay. Mr. Hargrove has had charge of building some of the best silos that have been erected in the corn belt and his prices are reasonable. We suggest to our readers that a request be sent at once for the booklet entitled "The Modern Way of Saving Money on the Farm." Address Mr. H. C. Hargrove, 316 East Walnut St., Des Moines, Iowa, and please mention The Homestead when you write.

### Last Call for the Bergren Sale.

On February 22d, Mr. E. N. Bergren, one of the best breeders of Poland Chinas in

southern Iowa, will make a public sale of brood sows at Stanton, Iowa. He is selling a grand lot of sows in this sale, daughters of G.'s Perfection, Big Perfection, Big Chief Perfection 2d, U. S. Chief 2d, Prospector, Shamrock, Big Klever and Long Wonder. Fifteen of these are fall yearlings and aged sows, and the rest are spring gilts. He is putting in some extra good daughters of Big Perfection, a boar that formerly headed the Moats herd, and was considered one of the best sires ever used in southern Iowa. Model U. S. by U. S. Chief 2d and bred to his prize-winning boar, Stunner, is one of the best things in the sale. The gilts are sired by Prospector, Big Klever, Long Wonder and Shamrock. Some of these are bred to Stunner and some to Cantrall's Corrector, a son of old Corrector. The dam of this pig is Wine On by the great Keep On. Mr. Bergren is putting up a good offering of Poland China sows and you will find both size and quality in what he has to sell. Write him at once for catalog and then attend the sale.

### High-Grade Shire Mares at Public Sale.

On February 26th, at his farm near Lake City, Iowa, Mr. W. D. Pittman, one of the best breeders in the state, will sell twenty head of high-grade Shire mares and horses and two fine driving teams. The mares are bred to imported horses, one of which has been a prize winner across the water. They

are in nice condition and are an exceptionally good bunch. The driving teams are also a splendid lot, and it will be an excellent place for buyers of good horses. If interested write Mr. W. D. Pittman, Lake City, Iowa, about them and mention The Homestead.

### Last Call for Podendorf's Iowa Sunshine Sale.

At Logan, Iowa, on February 23d, Mr. A. J. Podendorf, one of the foremost Poland China breeders in the state, will make a sale of thirty bred sows and ten head of fall pigs. The offering will be mostly sired by his great boar, Iowa Sunshine, a boar that has sired as many prize winners as any other hog in the state. He also sells daughters of Perfection E. L., Proud Perfection and the great Mischief Maker. Included in the sale will be U. S. Lady, a daughter of U. S. Perfection, a litter brother to Happy Perfection, the sire of Thickset, and she is bred to Iowa Sunshine. This sow has been the dam of all of Mr. Podendorf's great show stuff and she is a proven brood sow of great worth. He sells a good two-year-old daughter of Proud Perfection out of the great sow, Lady Oakwood, and she is bred to Iowa Sunshine. He also sells a sow by Perfection Style, an Iowa State Fair winner two years in succession, dam Logan Queen 2d, and she is bred to Iowa Sunshine.

He is selling twenty head of gilts, including those that won at the Iowa and Nebraska State Fairs. These will be bred to Mischief Lad, a son of Mischief Maker. He was the boar that headed the prize-winning herd at the fairs last fall. A few are bred to Western E. L. by Perfection E. L. Mr. Podendorf is selling a fall litter by Mischief Lad out of an Iowa Sunshine dam that are show material. There is a boar pig and a sow pig in this litter that are hard to beat for their age. It is a high-class lot of sows and a good place to buy. Write at once for catalog and mention The Homestead.

### Schneider's Poland China.

Mr. John Schneider, breeder of Poland China swine, Remsen, Iowa, in furnishing copy for his advertisement on page 46 of this issue, writes: "I have twenty-five grand large gilts for sale. They will weigh from 250 to 300 pounds, bred to Large Dude. He weighs 365 pounds at nine months. Some are bred to All Dude, weighing 340 pounds at nine months. He has an eight-inch bone and is a grand hog. He is a good herd header and I will sell him worth the money. Several gilts are bred to Winning Perfection. These are good, heavy-boned gilts with lots of finish, and are hard to beat. I will sell them at \$30 a head. This is a good chance to get a bargain."

## Last Call for Crow's Big Polands.

On February 20th Mr. W. J. Crow, of Webb, Iowa, will make his annual Poland China brood sow sale at his farm near MacLay, Iowa, when he will sell forty-five head of the great, big, stretchy kind of sows. This is the kind of Poland Chinas that has made Mr. Crow known throughout the Northwest, and they are the kind that always give satisfaction. They are the get of such great boars as Crow's Model, the 1,000-pound hog with a ten-inch bone, and Up-to-Date, the hog that weighed 800 pounds at twenty-four months of age, also Chief Tecumseh 4th and Look Here. They are bred to farrow in March and April to such great boars as Crow's Model, Up-to-Date and Corrector 2d, a son of old Corrector. Mr. Crow has been a breeder of Poland China hogs for fifteen years and has always bred for both size and quality. He certainly has the Peter Mouw kind—the large, long, stretchy type, with good spring of ribs, good head and ears and with best of bone. He believes in raising hogs for early maturity and invariably has the kind that weighs down the scales and fills the pork barrel. He had a sale last fall, at which time he sold forty-one head of male pigs that averaged \$36 per head, and this offering of gilts are the full sisters to the male pigs sold at that time, together with a few tried sows. Mr. Crow does his own mating, keeps his own records and his integrity is beyond reproach. His guarantee is absolutely good and all defects will be righted. All hogs purchased by men from a distance will be crated and shipped free of charge. Anyone who cannot attend the sale should send their bids to Mr. W. R. Ritchie in care of Mr. Crow, and they will be duly cared for. This sale will be held in a heated tent, a free lunch served at noon and free transportation afforded all foreign visitors. Attend this sale, as it will afford you a good opportunity to buy some of the best Poland China bred sows and gilts to be offered this year. Write at once for a catalog, mentioning The Homestead.

## Walker's Sow Sale.

On February 26th, Mr. Jas. E. Walker, of Anita, Iowa, will make a public sale of Poland China brood sows at Atlantic, Iowa, when he will sell thirty head of yearlings, matured sows and spring gilts. Quite a number of his offering will be sired by Perfect Chief 2d 83091, and they will be bred to Corrected 100201, a son of old Corrector, or Timekeeper 115587, a son of the great Keep On. Among the older sows that go in is Willow Twig by Perfect Chief 2d and out of Sunshine Queen. She is a good sow and a good breeder and is bred to Corrected. Sunshine Queen by Dale Perfection is a most excellent deep-bodied sow, has always been a good breeder and is also bred to Corrected. One of the best things is a fall yearling called Gold Crums. She has the size, the depth and length of body, and a great bone, and with all her size she has a lot of finish. Bred to Corrected she is one of the choice things in the sale, and those who want size with finish should buy this sow. He also sells a full sister to her in this sale. Another good sow is Silver Lining, bred by Messrs. John Francis & Son, and sired by their noted boar, Commodore. She was in first-prize aged herd at Des Moines and her sire was first-prize hog at the Iowa and Illinois State Fairs. She was in Mr. Walker's sweepstakes herd at Atlantic. She is bred to Timekeeper for an early litter. There will be some good young gilts in the sale and the catalog will tell you all about them. Write for it and mention The Homestead.

## Finley's Jack and Jennet Sale.

At his barns in North Marshall, Mr. W. J. Finley, of Marshall, Mo., will, on Saturday, March 2d, sell forty head of high-class registered Mammoth Jacks and Jennets and ten stallions. Mr. Finley's jacks range in age from two to eight years of age and are all broken and acclimated. Twenty head of these are listed for the sale and there are \$1,000 jacks in the offering. Ten Jennets are listed. Five of these have jack colts at foot and the other five are due to foal this spring. The jack colts are by such sires as Limestone Mammoth and A. J. Anderson's Black Sam. Among the stallions Mr. Finley sells is the four-year-old Morgan stallion, Benzo. Benzo is a beautiful sorrel of great style, fine action and a remarkably fine built animal free from blemishes. The man wanting a high-class Morgan, well broke, should look after him. The trotting-bred stallion, Senator Anderson, with a trial of 2:25 with only two months' work, should go to some man who will develop him. He was got by Electioneer Jr., he by Electioneer, and traces ten times to Hambletonian 10. Mr. Finley also sells one registered German Coach stallion, one registered Percheron and six grade Percheron stallions. These run from two to six years of age. Catalogs are being mailed to all who write for one and Mr. Finley invites you to be with him sale day. See this page for advertisement and when writing him kindly mention this paper.

## A Letter from Colonel Woods.

In regard to Watson, Woods Bros. & Kelly Co.'s annual public sale of imported stallions and mares, which will be held at Lincoln, Neb., February 26th and 27th. Col. F. M. Woods writes the following letter: "To whom it may concern: I, this morning (January 21st), carefully examined thirty of the stallions to go into this sale, and if I were disposed to exaggerate regarding their merits, I could not do so. I never in my life, not even at the Chicago International, saw thirty horses their equal. Young, sound, clean of bone, short legs, wide, glossy-coated; all hugging a ton, and one, \$2,000. There are one-half of them that most importers would ask \$3,000 for, and they will go to the highest bidder, without protection. Some think that kind of a sale cannot be made. This firm did it last year and averaged \$1,140, and were satisfied. McMillan does it every year and makes good sales. That's the only kind of sale that will win." The firm wish to add that while the mare offering will only be twelve or fifteen head, there will be some of the best mares ever put under the auctioneer's hammer. This sale will be the biggest and best offering of such

stock ever held in America. See advertisement on page 48.

## Lyndale Poland Chinas at Auction.

On Thursday, February 28th, at his Lyndale Farm, near King City, Mo., Mr. A. F. Graves will sell fifty head of choice sows bred to his leading herd boars. Among these boars is Grand Model 42551, a phenomenal son of the \$3,000 Grand Chief sold by Mr. F. M. Lall to Mr. F. A. Dawley. Mr. Graves secured this pig at a long price and his individuality is such that he should be a bargain at even a longer price. Twenty of Mr. Graves' best sows are bred to this boar and are included in the sale. Fourteen sows are bred to Tormentor 29273, a son of the World's Fair champion, Meddler. Others are bred to Maple Lawn's Top, a grandson of Chief Perfection 2d; T's Perfection, a son of Chief Perfection 2d, and Sunshine King, a boar that has done good service at Lyndale. Mr. Graves includes sows in this sale that should not leave the farm, but feels that he must offer as good as he owns in order to make an attractive offering. See page 33 for Mr. Graves' advertisement and write him today for catalog.

## The Burgess &amp; Son Horse Sale at Wichita.

Readers of this paper are offered an unexcelled opportunity to secure prize-winning stallions at their own figures in the forthcoming public sale of Messrs. Robert Burgess & Son, at Wichita, Kan., on Friday, February 22d. Fifty head of Percheron, Belgian, Shire and Hackney stallions are included, both imported and American bred, and the offering includes many prize winners at the leading shows of the past year. All of the stallions will be sold with the regular guarantee of 60 per cent and will be sold so that payment will not be due till the buyers have made two seasons with the horse and one collection has been made. In addition to this, the terms are most liberal. The notes will be one year and six months from date with interest at 6 per cent from date or six per cent discount for cash. There are few auctions in which the terms made are as liberal as is the case in this one. The person who is interested in draft horses should plan to be present at this noted sale. Full particulars can be had by addressing Messrs. Burgess & Son, as per the advertisement on page 48 of this issue. Plan to be present sale day and mention this paper when writing.

## The Perfection Chief Stock Company's Sale of Duroc Sows.

The Perfection Chief Stock Company, of Maryville, Mo., will sell Duroc sows on Monday, February 25th, and will be pleased to entertain all who will stay over Sunday from the Addy and Murphy sales, which are held on Friday and Saturday. There are attractions enough in this sale to hold breeders who want tops. In last week's field notes we mentioned several of these, among which were those daughters of the great Proud Advance—the Radiant gilts, the yearling sows got by Fairview Chief, and the Nodaway sisters from Mr. McMurray's herd. These Nodaway sisters are great brood sow prospects and safe thing to buy. Few more growthy gilts will be found. Perfection Chief has been used on a majority of the sows that these gentlemen sell and this will be an opportunity not easily excelled. Radiant, a breeding boar of much merit, has been used on a number and these should be sought after, as Radiant pigs are quick sellers and are desirable. The members of the Perfection Chief Stock Company ask you to be their guest sale day. See this page for last advertisement of their sale.

## Novinger &amp; Sons Call Their Short-horn Sale Off.

The sale of Short-horns advertised by Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., in last week's issue is off, as Mr. Novinger has sold his bulls at private treaty. A car load went to one party at such a good price that Mr. Novinger could not afford to hold them for sale. Two Cruickshank bulls, one a son of Lavender Viscount 2d and out of Imp. Lavender Thyme, and a Butterfly got by Hampton's Choice, a half brother to Hampton's Best, were not included in the car load. The man hunting a herd header of the right stamp should look to these. Mr. Novinger writes that he would price some females in keeping with the times. These are all in calf to or have calves by Lavender Viscount 2d, the sire of the bulls sold. See page 45 for Mr. Novinger's advertisement, and should you write him, kindly mention this paper.

## W. L. Addy &amp; Son's Sale of Durocs.

The last announcement of Messrs. W. L. Addy & Son's sale of Duroc Jersey bred sows will be found on page 40. Friday, February 22d, is the day they sell, and the man who wants a litter of Duroc pigs that have for their sire the richest-bred boar known to the breed should be on hand. Messrs. Addy have drawn heavily on their brood sows for this sale, as they are making this the best offering that has ever gone through a sale ring at their farm. They have as richly-bred a herd as is found and the man who is out to buy good ones will not be disappointed. Remember the date and arrange to be on hand.

## Taylor &amp; Jones.

As evidence of the manner in which Messrs. Taylor & Jones, of Williamsville, Ill., treat their patrons, we are pleased to quote the following letter recently received from Messrs. Mapple & Welch, of Knightstown, Ind.: "We wish to say through your valuable paper that no one else as they can with Messrs. Taylor & Jones, of Williamsville, Ill. On December 13, 1905, we bought of these gentlemen a draft stallion, for which we paid \$2,000, and December 23, 1906, we lost him. We called on the gentlemen and told them our loss and they stood \$900 of the amount."

## The Perfection Chief Stock Co.'s

Annual Sale of

## DUROC = SOWS

— AT —

Maryville, Mo., Monday, Feb. 25th

50 head bred to the great Perfection Chief, Pilot Kruger, Radiant and Gladstone. . . . 50

For this sale we are putting in as good as we own. Special attention is called to the Proud Advance yearlings and spring gilts bred to Perfection Chief. There are five of these: two yearling sows got by Fairview Chief, the fall yearling got by Long Model, a Prince Lad fall sow, the Radiant gilts, Belle Topper, a Top Notcher sow and the Nodaway sisters got by Iowa King. We know we can please the most exacting and sows bred to the great show and breeding boar, Perfection Chief, will give results. Write either of us for catalog.

Ten stallions (3 standard and registered trotting-bred, 4 to 7 years old), one registered Coach stallion, one registered Shire stallion, one registered Percheron stallion, five grade Percheron stallions from 2 to 6 years old. Sale will be at Finley's home in North Marshall. Sale will begin at 12:30. Sale will be held under cover. No postponement. Nothing for sale privately after cataloged. Auctioneers: Sparks, Harriman, Snyder, Hieronymous, Ross, Hudson, Logsdon, Irvine. Write for catalog.

TERMS: W. J. FINLEY, Marshall, Mo.

## J. O. James' Big Poland China, Sow Sale.

The Biggest of the Breed

Braddyville, Iowa, February 23, 1907

40 Head 20 spring and fall yearlings, 3 matured sows, 17 spring gilts.

Fifteen sows in the sale are sired by my noted big boar, Pawnee Lad, considered one of the greatest big boars, and sire of the big kind, in southern Iowa. There will also be twelve Big Prospect sows in the sale out of Pawnee Lad sows. Others are sired by Proud Monarch, Nemo L's Dude, P. W. Perfection and other well known boars. They are bred to Pawnee Lad, Big Giant and Nebraska Chief. If you want the large sized Poland Chinas with big bone and out of prolific strains come to my sale. I have made a specialty of the big kind and that is the only kind I breed. Write for catalog, mentioning Iowa Homestead. Address,

H. C. Duncan, Auct.

J. O. JAMES, Braddyville, Ia.

### Last Call for the Four Great Southern Iowa Duroc Sales—A. E. Poush, Chariton, Iowa.

The first day of three of the greatest Duroc sales of the season will be held at Chariton, Iowa, February 18th, in comfortable quarters by Mr. A. E. Poush. This young breeder deserves the support of the breeders, for he has always been a bidder on the very highest class of stock in every sale that he attends. One thing about this young man which is to be admired is that he buys nothing but animals of the very finest breeding and individuality, so we feel no hesitation in recommending the offering for this sale. The attractions of the sale are ten Proud Advance gilts. There are very few breeders of a lifetime of experience who ever placed so good an offering in a sale. Among them are five daughters of Daisy Orion, which is a daughter of the greatest breeding boar, Orion Dandelion. Also, we wish to add that she was the top in the White & Dewey sale last spring. You will find this a very even litter, and any one of them will be a good thing to buy. Also they are bred to the splendid son of Ohio Chief and Savannah Belle which was the highest priced sow of the breed when she sold. This combination of breeding will produce the good kind. Another of the good ones is the daughter of Madrid Belle by Wauneta Hub. This gilt is bred just about the right time. Do not pass this one up. You will also notice that the sow, Madrid Belle, is included. A Proud Advance gilt which is one of the good ones is No. 9 of the catalog. She is a daughter of Nan Orion and will have a litter sired by Nidlinger's Improver by sale day. One of the best individuals in the sale is No. 1 of the catalog. She is one of those massive kind which everyone likes to have in their herds. We think she is one of the good ones to be sold this spring. She is also bred for a March litter to the Ohio Chief boar. The offering as a whole is a good one and no breeder in the state deserves a better sale. He has been one of the pushers, a buyer of the good things and now has the same kind to sell. If you cannot attend his sale, send your bid to the auctioneer or to Mr. M. T. White, Homestead representative, in care of the above breeder.

Sheldon Bros., February 19th.

The second day of the three great sales will be with Messrs. Sheldon Bros. at their farm near Shannon City, Iowa. This herd needs no introduction to our readers, as it is well known as the herd owned by Messrs. H. C. Sheldon & Sons. Perhaps many of our readers think we have the custom of referring to each offering as a better one than that breeder ever offered. We do not consider a firm worthy of the name of breeder if each year they are not capable of offering to the public a better lot of stock than the previous season. We are positive that this is the case at the Sheldon farm. In this sale they are selling twenty daughters of the great Proud Advance. Most of them are out of the very best sows which are rich in blood of the most prominent families and are the ones which have in many instances produced the good ones for their sales. There is one thing about this herd which is very noticeable to everyone who visits it, and that is the amount of scale which is retained and at the same time they have so much quality. Of the twenty daughters of Proud Advance in the sale, most of them are of fall farrow, which insures that they have the age and are matured to such a degree that you can almost tell the kind of an animal into which they will mature. One which we think deserves special notice is the daughter of Queen Ann 2d, which is rich in the blood of old Allison. She is a litter sister of the gilt which sold last fall for \$500, the highest price ever paid for an open gilt. This sow carries an unusual amount of finish, as does every one of the Proud Advance sows. They are a strong-backed lot from start to finish, with the very best of feet and legs. You need not decide on any one in particular, as the entire offering is so even and good that no special one is of much more value or special individual to own. They are all bred to Ohio Chief 2d, the great son of Ohio Chief, which has many admirers as a close rival to his notorious sire. He is of the deep kind, with an excellent rib, is large and has proven a great breeder in the East, from where he was brought this season. Other attractions of the sale are such ones as Lady Alix, which is a litter sister of Alix 2d, and one of the very best daughters of Proud Advance with the Orion cross. She is also bred to Ohio Chief 2d. This should be an attraction to anyone wanting something strictly first class. If you can't get there, send your bid to Mr. M. T. White, who will represent The Homestead at the sale.

White & Dewey, February 20th.

The third day of the great Duroc sale in southern Iowa will be with Messrs. White & Dewey near Shannon City, Iowa. It is a pleasure for us to refer our readers to this sale, as the gentlemen who are making this offering are in every way reliable, so you are insured of the square deal system if you attend. This offering of forty head are the good ones from their herds. You will notice in their catalog that they are selling a nice string of gilts sired by Proud Advance and a few are also bred to him. As the old king is dead here is the last chance to get a sow bred to him. As they have always had good ones to sell—sired by this boar—in their past sales, they are retaining their reputation of past seasons by selling a nice lot of them this spring. One of the best ones is out of a dam by Ohio Banner by Ohio Chief. She is one of the attractions of the sale. There is also one out of Queen Ann 2d which is the dam of the gilt sold to Mr. Ed Baxter for the longest price ever paid for an open gilt. The others have dams which are equally as good and, as they are all bred to Ohio Chief 2d, you will make a good choice when you buy one of them. Others in the sale represent the blood of Proud Advance. Perhaps the greatest attractions of the sale will be Queen Ann 2d, which has to her credit the highest priced open gilt ever sold. She is an exceptionally good individual, having all the re-

quirements for a great brood sow and is bred to the great Proud Advance for an early litter. Place this sow in your herd and take good care of her litter and next fall she will prove to you that she is the greatest investment you ever made. Do not forget the gilt which is a full sister of the sweepstakes boar, Crimson Wonder Again. She is also bred to Proud Advance for a March farrow. Another good one in the sale is a daughter of Model Chief by Ohio Chief. She is bred to Proud Advance and is of the thick kind. The daughter of Buddy K. 4th, bred to Proud Advance, would be a good line of blood to put into the western herds, as the family is not very numerous in the West and the demand will be larger next season than the supply. A half-sister of the sow which topped Mr. R. J. Harding's last sale is included, and she is one of the very best of the entire offering, as she stands on good feet, has neat head, with a deep body. This sow is bred to Ohio Chief 2d. This will be a good thing to buy. A sow which has many daughters is Reliance Lulu by a son of King Orion and out of a daughter of Kan't Be Beat. She is bred to Ohio Chief 2d. Send your bid to Mr. M. T. White, Homestead representative, in care of the above breeders, if you cannot be there in person.

A. L. & U. S. G. Lynch, February 21st.

The fourth day of the southern Iowa and northern Missouri sale circuit will be held at Mt. Airy, Iowa, on February 21st, when Messrs. A. L. & U. S. G. Lynch will sell thirty-five head of the most richly-bred Duroc Jersey sows. At the head of their herd stands Orion Chief I Am by old Orion and out of a Red Chief I Am sow, and Brilliant Advance by Proud Advance, dam Brilliant Genevieve. These are two good yearling boars and have been bred to the most of the sows in the sale. The boys have put their best things in this sale and there will be four daughters of old Proud Advance, two daughters of Ohio Chief, one Orion Dandelion sow, one by Buddy K. IV, and one by the great Hanley. Besides these there are many others that are as good as you will find anywhere. They are selling Will's Pride in this sale. This is one of their best sows and was purchased by Mr. R. J. Harding, of Macedonia, Iowa, last year for \$350, bred to Ohio Chief. Two of her gilts by Ohio Chief go in this sale, and one of these is an especially good one. She is bred to Brilliant Advance. The gilts are bred to Orion Chief I Am and Brilliant Advance. Another good two-year-old sow is Proud Lily out of Brilliant Genevieve by Brilliant. Here is one of the great sows in this circuit, and barring the fact that she is bred a little late, she should be sought after and deserves a good price. There are a few fall gilts by Proud Advance in the sale, also two fall yearlings by Buddy K. IV. Fannie Orion is an Orion Dandelion sow and this line of breeding has done wonders for some of our best breeders. Three granddaughters of Orion go in, also six spring gilts by old Corncracker. Ten of the young things will be sired by Iowa Lad, a grandson of old Higgins' Model. The boys are putting up a good offering and deserve a good sale. Write for a copy of their catalog and if you cannot attend in person send a bid to Colonel Luther or to Mr. M. T. White, Homestead representative, in care of the above breeders.

Short-horn Sale at Rock Falls, Illinois.

On page 31 will be found the announcement of the Short-horn sale of Messrs. L. A. & H. L. Church, to be held on their farm, five miles south of Rock Falls, Ill., on Tuesday, February 26, 1907. Catalogs are now out and those not yet supplied should see to it that they have one in hand, as this offering undoubtedly will contain some good numbers. The thirty-four head of cows and heifers are principally of Scotch breeding and they should give excellent satisfaction to those who are looking for Short-horns for the general purposes for which they are bred. All females of suitable age will have calves at foot or will be in calf to Matchless or Beaufort's Victor's Pride. Matchless is considered one of the best of bulls by Messrs. Church and his get are mostly reds and are great flesh carriers. The Pride bull is sired by Imp. Beaufort Victor 211984, which was one of the best bulls owned by Lord Lovat. His dam, Beaufort Pride 2d, is a sister to the champion at the Highland Society Show, 1901. Matchless will be sold along with six young bulls ranging in age from yearlings upward, and mostly sired by him. Two two-year-olds are by Red Count 231264 and should be worth looking after by those who will be in need of a good herd bull. Those coming from a distance will be well cared for and will find a conveyance ready to take them to the farm. Write for this catalog if you are wanting some good Short-horns. Kindly mention The Homestead when so doing.

The Last Call for the J. O. James Sale.

On February 23d, Mr. J. O. James and his big Poland China sows will be the center of attraction at Braddyville, Iowa. The name of J. O. James, old Pawnee Lad and big Polands has been a combination hard to beat in southern Iowa, and lovers of big hogs never pass him by when they want breeding stock. Pawnee Lad has been known to all breeders of big hogs and in this sale will be fifteen of his gilts, also fifteen gilts by Mr. James' former herd boar, Big Prospect, Pawnee Lad is also bred to a number of the sows in the sale. He is selling Rose Perfection by Proud Monarch, dam Rose Allerton by Allerton's Tecumseh, and she is bred to Pawnee Lad for early farrow. He also sells a good Nemo L's Dude sow and his old sow, May Price, bred to Pawnee Lad goes in. Anna Price 7th and Anna Price 8th are two of the good things bred to Big Giant. A good Pawnee Lad out of Lady Giantess will be sold in the sale. It is a cracking good offering of big, stretchy Poland Chinas and should demand attention from breeders. Write for catalog and go to the sale. Kindly mention The Homestead when writing.

OFFERING

**At Mt. Sterling, Ill., Wednesday, February 27, 1907**

Sired by Tip Top Notcher, Ohio Chief II, Champion Paul, Fancy Orion Chief, Double Track, Best of Top Notchers and others

Bred to Masterpiece Chief, The Commodore, Speculation, Hanley, Tip Top Notcher and King Hanley. These sows have been selected with great care, properly fitted, and all will be safely bred by sale day and carry their own guarantee. Taken as a whole we believe this offering to be as good a lot, both in breeding and individuality, as ever were offered at public sale. Send bids to Cols. Fred Reppert, Judd McGowan, James Riley or to Mr. D. M. Pierce, representing this paper. For additional information and catalogs address Geo. W. Seckman or Fred Allen, Ripley, Ill. A very cordial invitation to all Duroc Jersey breeders in America to attend this sale.

### The Commodore Duroc Sale.

When Messrs. Amos W. Harris & Sons, of Waverly, Ky., secured the noted breeding and show boar, Commodore, they were fortunate enough to be able to show him at the leading state fairs east of the Mississippi river, and breeders were present from several states when Commodore was shown at Springfield, and all were of the opinion that this noted hog was the best aged boar that had been shown in years. This encouraged Messrs. Harris very much and they secured some of the best females that could be purchased last fall and bred the same to him. The offering, which will be sold at Louisville, Ky., on Friday, February 22d, is made up of sows of unusual breeding and individuality that will please the most discriminating buyers. These gentlemen have united their forces with a number of the very best breeders in the South and East, and from their herds upward of fifty head have been selected for this occasion. We wish this week to call attention to some of the females which have been listed. Anna Belle is a two-year-old daughter of Sure Winner and out of Top Notcher Queen, by Top Notcher. She is safe in pig to Commodore, and will certainly do well for some breeder in the market for top breeding stock. Anna Wonder is a spring gilt by Sensation, a boar which has done much toward making history for the Duroc breed. She is the daughter of the sow just mentioned and is safe in pig to Commodore. Another daughter of this good sow, Anna Wonder II., is also included in the auction, bred to Commodore. Two daughters of the noted Commodore are placed in the sale, one of which is bred to Top Notcher 10th, and the other to Kentucky Col. II., for early March farrow. Two more daughters of Commodore that will please those present sale day are bred to Ed's Col., a boar which now heads the good herd of Col. H. L. Iglehart, of Morganfield, Ky., and one of the most noted boars of the breed. Kentucky Variety X., is a daughter of Ohio Chief, and her dam, Kentucky Variety, by S. E.'s Col. This noted sow is safe in pig to the service of Commodore and will please the most discriminating buyer. A daughter of Top Notcher and out of Useful Queen, she out of Cedarvale Queen II., the dam of Mr. R. C. Watt's noted show herd at the World's Fair, 1904, is included in this offering purely as an attraction. The writer wishes to state that he has carefully inspected this offering, and the one thing which most impressed him was the fact that nothing but first-class stock has been listed. Messrs. Harris are making their first public sale and it is their aim to offer the public breeding stock that represents the best blood lines to be found anywhere and at the same time combines the individuality which the best breeders demand. Orion Miss is one of the best sows which the writer has seen put through a sale ring this year. Her sire was Orion, and her dam was Golden Beauty by Red Chief I Am, a boar which needs no introduction to western breeders. Orion Miss is a fall yearling and comes from the good herd of Messrs. Manley & Co. She is safe in pig to Commodore for an early litter, and is strictly of the first class as an individual, being in the show herd of Messrs. Manley at the Illinois State Fair this past season. The breeder who wishes to improve his herd will not go wrong on this sow. A daughter of Junior Jim, is included in this offering and is safe in pig to Commodore for early litter. There are a number of very good sows in this sale and we wish to urge our readers to secure catalogs at once and plan to be present at Louisville, Ky., on Friday, February 22d. Mr. D. M. Pierce, representing this paper will be present at this sale, and bids sent to him, care Hotel Willard, Louisville, Ky., will be carefully and properly handled. See announcement on page 40 of this issue and mention this paper when writing.

### Seckman & Allen's Duroc Sale.

Attention is called to the advertisement of Messrs. Seckman & Allen, of Ripley, Ill., which appears on page 35. This firm will offer for sale on Wednesday, February 27th, at Mt. Sterling, Ill., in heated sale pavilion, forty head of richly-bred Duroc sows. The writer representing this paper has carefully inspected this offering and is pleased to recommend it to our readers who wish to get useful breeding stock. We wish this week to call attention to the boars now in use in these herds. The offering is sired by such noted boars as Tip Top Notcher, Ohio Chief II., Champion Paul, Fancy Orion Chief, Double Track, Best of Top Notchers and others of equal merit. They are bred to Masterpiece Chief, The Commodore (one of the best sons of the noted breeding and show boar, Commodore, first in aged class and champion at Illinois State Fair, 1906). Speculation, Hanley, Tip Top Notcher and King Hanley. A word about these boars. Masterpiece Chief is a son of Model Chief, the sire of the first-prize boar pig under six months, and first prize produce of sow at the Iowa State Fair in 1906. This young boar is one of the best of his age the writer has seen anywhere and there are a number of good sows in the sale bred to him. They should find ready sale to breeders who wish to add good blood to their herds. The Commodore is a son of the noted Commodore, as mentioned above. This pig which Mr. Seckman is using in his herd, is the one son of Commodore which Uncle Tom Bennett refused to price to anyone until he was through breeding his sows, and it was only after much effort that Mr. Seckman was able to secure him. This son of Commodore bids fair to make a larger hog than his sire and stands on the best of feet and legs. There are a number of very good sows in the sale bred to this boar. Speculation is a son of Orion Chief, the boar in use at the head of the good herd of Mr. Ira Jackson, of Tippecanoe City, Ohio. This pig was third in class at the Illinois State Fair with a ring of sixty boars driven out. We wish to go on record in this connection and want to say to breeders who are in the market for strictly choice stock, that a sow bred to this boar will certainly prove a valuable addition to their herds. In our next issue we will call particular attention to the females included in the offering, and would advise our readers to write for catalogs at once, kindly mentioning this paper. Bids sent to

Mr. D. M. Pierce, representing this paper, will be properly cared for. Kindly mention this paper when writing for catalog.

### J. P. Hammett's Sale of Stallions and Kentucky Mammoth Jacks.

The sale of stallions and Kentucky Mammoth Jacks to be held at Salisbury, Mo., on Saturday, February 23d, by Mr. J. P. Hammett, should attract the horsemen of the entire corn belt. The man hunting a Mammoth Jack should also be interested, as Mr. Hammett is the second largest breeder of Jacks in Kentucky (the home of the Mammoth Jack). Mr. Hammett has bred Jacks all his life and raises the big-boned, strong-constitutioned kind. In this sale he is including the noted Kentucky prize winner, "Jumbo of Kentucky," a Jack that stands sixteen hands and has never been defeated in the best Kentucky show rings. Jumbo is one of the best-boned Jacks to be found and is credited as being one of the best breeding Jacks that has ever left the Blue Grass state. He is a six-year-old, well broke and works as good as any stallion. Mr. Hammett would not sell him at public auction were it not for the fact that he is making this sale as attractive as possible. The man looking for an absolutely high-class Jack should be on hand when Jumbo sells. There are other Jacks of great merit in the sale, all standing from fourteen and one-half to sixteen hands high—mule measure. They are fresh from Kentucky, are sold by a breeder, and the middle man's profits will not govern the selling price. Several imported English Shires and Percherons, as good as can be found anywhere, are included in the sale. Some standard bred trotters and road horses are cataloged. They are absolutely high-class stallions and mares. Mr. Hammett announces in his advertising that he sells all stock under a guarantee to be a breeding animal. This insures a square deal to all. The sale will be held in Mr. Hammett's new sale barn in Salisbury, Mo., and will commence at 10:30 a. m. Salisbury is on the main line of the Wabash, direct line from Omaha, Neb., Des Moines, Iowa, Kansas City, Mo., St. Louis and Chicago. Col. Bob Harriman, America's great horse and mule auctioneer, does the selling. See the half-page advertisement of Mr. Hammett and write at once for a catalog, kindly mentioning this paper when doing so.

### Limestone Valley Farm's Thirtieth Semi-Annual Sale of Jacks and Jennets.

Twice each year Messrs. L. M. Monsees & Sons, of Smithton, Mo., hold public sales. In the fall these gentlemen sell a general line of live stock, including many high-class mules. On the first Tuesday in March a sale of breeding stock—jacks and jennets—is made. To these spring sales Messrs. Monsees & Sons invite those who are in search of the Jack or the female mule. They do not say come sale day, but instead ask you to come one, two or three days preceding the sale, examine the stock at your leisure, become acquainted with the business methods at the Limestone Valley Farm, and if satisfied buy on sale day. By following this method Messrs. Monsees & Sons have made an enviable reputation for open dealings and parties who have bought at former sales do not hesitate to return. In these times of the high-priced mule there is no question but that it pays to produce mules from high-class sires. Some may say that these prices cannot last, but if the rate of production and consumption is balanced one cannot see where there is any danger in the immediate future. The demand today for weanlings was never so strong, and \$85, \$100 and as high as \$150 is paid for mules of this age, so why not raise some, as it will be years, at least, before the mule is a drug on the market. Messrs. Monsees & Sons won every possible first prize on Jacks and jennets at the St. Louis World's Fair but three, and they also won many prizes on mules, and their farm is today headquarters for first-class breeding stock. For their sale on March 5th, Messrs. Monsees & Sons have listed by far the best lot of Jacks and jennets they have ever listed for sale. Mr. Monsees, Sr., thinks the offering superior to the World's Fair offering. The ages are the very best, mostly threes and fours. The man or the parties looking for something extra will not be disappointed. The twenty jennets are bred and several will sell with Jack colts at foot. In order to please all classes of buyers Messrs. Monsees & Sons will sell seven yearling Jack colts, so that buyers can get most any age desired. Those of our readers who are interested should write Messrs. Monsees & Sons now for a catalog. See page 43 for advertisement.

### Another Big Horse Sale in Lincoln.

The selling of imported draft stallions to the highest bidder at public auction was a business of questionable results until one year ago, when the firm of Watson, Woods Bros. & Kelly Company made a two-days sale of imported stallions and sold \$25,000 worth of stallions at prices profitable to them, but more profitable to the buyers. Now, why could this firm go out and make a sale of this magnitude and undivided success in view of the almost universal dissension of opinion regarding the possibility of doing such a thing? Conservative men thought they could not make it. Some competitive dealers hoped they could not make it. But they did, and to those who know this firm as well as the writer does the reason is amply evident: They are reliable; they import only such horses as that well-known judge, Mr. Joe Watson, thinks will make money for buyers. They had the moral stability to absolutely prohibit the least tendency toward by-bidding; they were able to stand it if the horses did not sell for their worth. And they stand ready to do the same thing again this year in making their sale of draft stallions February 26th and 27th. Mr. Watson has recently imported a most excellent lot of useful horses and doubtless no such string of stuff as is offered in this sale has ever been brought under the auctioneer's hammer on American soil. They are getting out a nicely illustrated catalog and we would advise that you write for one of these, mentioning this paper. See page 48.

## Grand Three Days' Sale

FEBRUARY 19-20-21 AT

Grand Junction, Greene County, Iowa

### 140 CHOICE POLAND CHINA SOWS and GILTS

Carefully selected from the herds of Geo. F. Freie, Ogden; C. C. Healy, Dana; and C. M. Howard, J. L. Hudson and G. W. Wampler of Grand Junction.

You will find a strong collection of mature sows in this sale. They have proved to be regular and prolific producers. There are some of the great rooky kind and others of a more showy type. The breeding is standard and represents all the leading lines of blood. Here is a splendid opportunity to secure some reliable foundation stock.

The gilts are from March and April litters and many are from sows to be sold in the sale. They are a nice growthy bunch and contain a great many of the great deep-bodied, strong-boned type. They are sired by Tecumseh Meddler, Nemo L. Dude, Keep On and Black Chief boars. They will contain some choice members.

Send for catalog to C. C. Healy, Dana, Iowa. Post up, brother breeders, we have something worth your money and attention. C. E. Luther, Auct.

### McWILLIAMS'

## DUROC-JERSEY SOW SALE

Wall Lake, Ia., February 22, 1907

40 HEAD, 5 FALL YEARLINGS, 9 AGED SOWS, 26 SPRING GILTS 40

**J. C. BAILEY, Proprietor,**

Col. Menzie, White and Essinger, Auctioneers.

**MARSHALLTOWN, IA.**

### Carey Cameron's Short-horns and Duroc Jerseys.

It is with considerable pleasure that we call the attention of Homestead readers to the Short-horn and Duroc Jersey sale advertisement of Mr. Carey Cameron, at Herman, Neb., on Monday, February 25th. Mr. Cameron's reputation as a breeder ranks among the very best in the West, both as a Short-horn and a Duroc Jersey breeder. Whenever he makes a sale he puts in his best stuff, and he always puts them in the sale ring in good condition. It is not out of place at this time to call the attention of our readers to his Short-horn sale at South Omaha a few years ago, when he averaged \$171 per head at a time when cattle were not selling high. The best breeders in Iowa and Nebraska were there and bought liberally and were more than pleased with his cattle. In his coming sale he will sell eighteen head of Short-horns, among which will be seven young bulls, nine young heifers and two cows. There will be a number of good Scotch heifers in the sale and some Scotch and Scotch-topped bulls. There will be several well-bred Cruickshank Butterfly heifers in the sale and one young Cruickshank Butterfly bull. All the young bulls and heifers are sired by Imp. Victoria's Count, 195220, his present herd bull, and one of the best bred ones in the state of Nebraska; Chief Lavender, Red Bird, Scottish Count and Royal Fancy; all well bred Scotch bulls. Imp. Victoria's Count was bred by Mr. J. Dean Willis and was imported by Mr. W. D. Platt and afterwards bought by Mr. Cameron and has been used with much success in his herd. He is a Cruickshank Victoria and no bull has ever crossed the water that had a better pedigree or is a better breeder. His get in this sale will show what a breeder he is, as he is the sire of a bunch of heifers that are good enough to go into any herd. There are seven young bulls in the sale. No. 4 is a Cruickshank Butterfly, and will be two years old next March. His sire is Imp. Victoria's Count, and his dam is Rosedale Butterfly 3d by Red Bud, and she is one of the best cows in the herd. Here is a good young Scotch bull for someone wanting a herd header. No. 5 is another good bull sired by Imp. Victoria's Count. He is also out of a daughter of Red Bud, and belongs to the Frantic family that produced so many of the Robbins show cattle, and another good one is No. 2, sired by the same bull and out of a daughter of the Harris-bred bull, Lochinvar. He is a yearling and is one of the best in the sale. Rosedale Butterfly 4th and Rosedale Butterfly 5th are two of the best bred Scotch heifers in the sale. Both of these are sired by Scottish Count, and one is out of a Red Bud and the other is out of a Chief Lavender cow. The Cruickshank Butterflies have been one of the most popular and one of the most sought after of the Scotch tribes and here are two good representatives. No. 10 is a two-year-old heifer, a daughter of Scottish Count, and out of Fanny Weldon by the Knight of Weldon. She is one of the choice things in the sale. The dam of this heifer is a red cow, weighing 1,700 pounds, and the best one in the Cameron herd. She is a strictly A 1 heifer and she is bred to Imp. Victoria's Count. Another richly-bred heifer is Roan Lady, got by Royal Fancy out of a daughter of Scotsman. This is a Canadian bred heifer, and a splendid individual. She is bred to Butterfly Duke 2d, a richly-bred Scotch bull. She is one of the best heifers in the offering. Mr. Cameron is also selling a daughter of Lochinvar bred to Imp. Victoria's Count, and a daughter of Chief Lavender with a bull calf at foot by Imp. Victoria's Count and rebred to the same bull. He will also sell thirty-six head of very choice Duroc Jersey gilts, and no breeder in the West has sold a better bunch. They are sired by West's Duroc 43017, a son of Noble King; Russell's Choice 43019, a son of Crimson Wonder; Gold Dust Model, a son of Malcolm's Model; Diamond Jim, a son of Gold Dust Jim. Mr. Cameron is also putting in a litter by the great Glendale Critic. They are bred to these same boars and it makes a combination of blood lines and individual merit that is hard to beat. The offering as a whole is away beyond the average. They have been well grown out; have lots of length, with great bone development, and are just the kind the boys are looking for. We will call the attention to a few of the best in the offering. Nos. 12 and 13 are March gilts, and are daughters of Gold Dust Model out of Rose O'Grady by Surprise. Tracing back this pedigree you will find the blood of old Orion, Top Notcher, Liberty Jim, Ohio Chief and other great sires. These gilts have plenty of size, extra good bone and great length of body. One of them is bred to Russell's Choice and West's Duroc. No. 14 is bred along the same line and is one of the best sows in the sale. Another nice gilt is No. 33, a daughter of Gold Dust Model out of an L's Choice dam. The offering is so uniform throughout that it is difficult to pick out any great number that excel the others, but we want to say to Homestead readers that they are not going to be disappointed in them when they see them. If you want Short-horn cattle or Duroc Jersey sows it will certainly pay you to attend the sale of Mr. Carey Cameron. Write for his catalog at once and mention The Homestead.

#### McWilliams' Sow Sale.

At Wall Lake, Iowa, on February 22d, Mr. M. A. McWilliams will hold his annual Duroc Jersey brood sow sale, and he is selling a splendid lot of sows. There will be forty-five head in the sale, and twenty of these are sired by his noted boar, Orion J., a full brother to Orion. Orion J. was sired by old Orion and his dam is the great brood sow, Kruger Maid. He is a hog of great length and wonderful bone and has been a good breeder. Many of the sows in the sale are bred to him and one of these would not be a bad thing to have. A great many of the sows in the sale bred to Orion J. are sired by Gilbert's King, a former herd boar. The dams of these are sired by Tolstoy, Ohio King, Mill Bank's Boy, Duroc Challenger and other well-known boars. You will find good length, good color and heavy bone in the McWilliams offering, and it will be what the buyers all want. One of the attractions is a yearling daughter of Tolstoy's Queen, bred to Orion J. Tol-

stoy's Queen is a very fine sow, sired by Tolstoy. Then there are three lengthy, growthy Gilbert King gilts out of May Cherry 2d by Ohio King, a prize winner at the Interstate Fair. Some of the best gilts in the offering are sired by Orion J. and out of Nellie's Pride, she being the dam of the very toppy gilt that topped Mr. McWilliams' sale a year ago. Other good ones by Orion J. include a toppy, smooth one out of Fanny E. by the show hog, Challenger's Model. Among the older sows are some special attractions, of which the catalog gives full particulars. Those interested in buying should write for it, mention The Homestead, and arrange to attend the sale.

#### Last Call for the Wheeler Mastodon Poland Chinas.

In the sale of Mastodon Poland Chinas to be made by Mr. W. W. Wheeler, of Harlan, Iowa, there will be nine aged sows of the type that this term most nearly describes, sows weighing from 600 to 750 pounds. The herd boar to which much of this stuff is bred is Columbia Chief 2d by Columbia Chief by Chief Tecumseh 3d, his dam by L's Chief Rival. Almost every breeder is familiar with the record of that grand sire, Chief Tecumseh 3d, and it will be seen that this boar comes from that great boar through one of his best sons. On the other hand, older breeders will remember that some years ago L's Chief Rival was a state fair winner and that he was an immense boar. We do not remember his weight, but we can see him as distinctly now as though it were but yesterday—a grand wide back, deep, right on the ground, with lots of length and yet his back up strong, just such a boar as might be expected to sire stuff to found a new branch of Poland Chinas—the Mastodons. Not only has Columbia Chief 2d great size, but he has exceptional quality as well; is a mellow, smooth fellow, that will please even the man who breeds the little fellows. He has a ten-inch bone and measures seventy-three inches in all his measurements. If that does not seem large to you, suppose you go out and run a tape line around one of your "big" ones, run it out to seventy-three inches and see if another pig couldn't jump through it. Seventy-three inches is going some. Longfellow B., one of the assistants, measures seventy-two inches. He was sired by Sunrise Chief and his dam by old Longfellow. Mastodon, the young fellow that may take a leading place some day, is of breeding not so well known here. He was farrowed March 2d, has a nine-inch bone and measures fifty-eight inches. How is that for a pig? Most of the gilts in this sale are bred to him. Note that the gilts will weigh up to 400 pounds and that only three of them are as early as March farrow, and that well on in the month. The gilt that attracted our attention most was one of three going in from one litter by Surprise Wonder 5th, their dam of Chief Tecumseh 3d breeding. Very showy gilts these, with size to please. There are five from one litter, a litter of twelve, all raised, that ought to be lined up in a row, just to see how much pork there is—just think of what this sow has produced in one season. She farrowed her litter in April and has produced another since then. The first litter now weighs probably not far from 4,200 pounds, more than two tons of pork from one sow in only a few months, and another litter just like them coming right along. Even at a pork valuation her spring litter is worth \$277.20, taking today's Sioux City market as a basis—top hogs \$6.60. What is the value of such a sow? Can you estimate her value? Is it any wonder that farmers are tumbling over themselves to buy sows of that sort? Mr. Breeder, is this not an object lesson to you? The farmers demand this stuff and will have it. Breeders must produce it. Why not go to headquarters and secure some of it? Get in on the ground floor and have some of it in your herd. It is money-making stuff. Write to Mr. W. W. Wheeler for a copy of his illustrated catalog, and please mention The Homestead. Remember the date, Feb. 27th.

#### Lone Retreat Stock Farm's Jacks, Jennets and Stallions to Be Sold at Auction.

On March 15th, the entire stud of jacks, jennets and stallions owned by the late Mr. J. C. Ray, of Lawson, Mo., will be dispersed at public auction. Mr. Ray was killed in a runaway accident on January 16th and the sale is made necessary in order that his estate may be settled. Lone Retreat is unquestionably the oldest farm of the kind in the United States. Mr. Manley Ray, father of the late Mr. J. C. Ray, named "Lone Retreat" in 1859 and since that time the fame of Lone Retreat has spread from ocean to ocean. Mr. J. C. Ray, succeeded his father in the breeding of jacks and jennets and some of the best jacks ever raised claim Lone Retreat as their birth place. Mr. Ray was proud of the record made at Lone Retreat, yet he was never known to boast, or claim more than was justly due the class of stock that was sent out from Lone Retreat. As high as seventy jacks were sold within a year and all was done in such a quiet and business-like manner that the outside world hardly realized the volume of business done by Mr. Ray. No law suits were ever had over any deal, as Mr. Ray's business dealings were as an open book. No stale stock was allowed to accumulate at Lone Retreat, and at the time of Mr. Ray's death there was on hand as clean a lot of jacks and jennets as were ever owned at the farm. These, with the stallions will be sold at public auction on March 15th. The jacks run from yearlings to nine-year-olds; they stand from fourteen and one-quarter to sixteen hands high and weigh from 750 to 1,200 pounds. The jennets are from three to seven years of age and are in foal. Mr. Ray always owned a few first-class stallions, and there will be four in the sale. One a high-class saddle stallion, one Wilkes-bred trotter and two draft colts—Percherons. The sale will be held at the farm near Lawson on the C., M. & St. P. and Santa Fe railways and Holt on the C., B. & Q. and C., R. I. & P. railways. Colonels Harriman and Sparks will do the selling. For catalogs write either Mrs. Lena M. Ray or Mr. C. F. Chamberlain, Mgr., Lawson, Mo. See page 33 for advertisement.

## ANNUAL SALE

# DUROC JERSEYS

40

BRED SOWS

AGED--YEARLINGS--GILTS

40

AT OSCEOLA, NEBRASKA, FEB. 21, 1907.

I WILL sell on the above date forty head of select brood sows that are the best I have ever offered. Eight daughters of the great Red Knight 25199, first and sweepstakes boar Nebraska State Fair, 1905. Eight granddaughters of Crimson Wonder and out of Red Knight dams. Fourteen Belle's Echo gilts. Scale and bone are my specialties. My sows are the large, roomy kind that make good mothers. They are bred to three as good boars as I am able to get together. Write for catalog. Mail bids may be sent to Ray Page of The Homestead.

E. J. Brown, Prop., Osceola, Neb.

COLONEL CALLAHAN, AUCT.

## Great Dispersion Duroc Sale

TO BE HELD AT

Osceola, Nebraska, February 22d, 1907.

50

head of grandly bred brood  
: : : sows and gilts : : :

50

On the above date I will offer my entire herd of Duroc Jersey hogs and among them are sows that money could not buy otherwise. If you are looking for big ones, come to this sale; I have them. I have bred some noted prize winners, including Middle Rose Lady, the sweepstakes sow of 1906. My two herd boars will also go. Write for catalog.

Callanan,  
Auct.AXEL F. JOHNSON,  
Osceola, Neb.

Send bids to Ray Page of The Homestead.

## Dispersion Sale of Duroc Jersey Bred Gilts

will sell at Lilac Hill Farm, near Clarion, Ia., Tuesday, Feb. 26, '07

### 60 Head of Choice Duroc Jersey Gilts, Bred

They are the long-bodied, heavy-boned, growthy sort that have from 8 to 14 pigs at a litter and raise them. In other words, they are the Farmers' Ideal Mortgage Lifter. They are of March and April farrow and contain some of the best blood lines that has assisted in making the Duroc Jersey the most popular of all breeds. About 60 gilts were selected for this sale and the remainder fattened and sold on the general market. The dams of these pigs averaged 600 pounds each in November. These gilts were sired by Togo 37421, a 1,000-pound boar, and they are bred to Golden Chief and Gold Bud.

Address for catalogs G. J. MACK, Clarion, Wright County, Iowa  
Send bids to Col. M. K. Uhr, or Col. J. A. Haley, in my care.

## Dispersion Short-horn Sale.

Short-horn breeders will be interested in the dispersion Short-horn sale of the late Mr. Patrick Gleeson, at Oakland, Neb., on February 28th. Few breeders in the state of Nebraska were better or more favorably known than was Mr. Patrick Gleeson, and few breeders in the West bought better cattle, or were more discriminating when it came to buy foundation stock. The entire herd will now be dispersed at public auction in order to settle up the estate, and it will include two herd bulls, thirteen young ones and all the breeding cows, heifers and calves. There will be about sixty-two head in the sale. The well-known herd bull, Count Waterloo 151016, the bull that Mr. Gleeson paid \$1,000 for at the Martin Flynn sale at Des Moines a few years ago will be sold, and he is in excellent condition. This bull formerly did service in the Flynn herd, and was the sire of some of the highest-priced things that they have sold. He has been used in the Gleeson herd with marked success, and many of the young heifers and young bulls are sired by him, and he will be bred to many of the cows. He is a solid red in color, a well-lined bull and a good breeder. Clover Lawn Sultan, a son of Imp. Craibstone, will also be sold, and he is a straight Scotch bull and will be bred to the Count Waterloo heifers. There will be a number of richly-bred Queen of Beauties in the sale and also a few Orange Blossoms. One of these Queen of Beauty heifers will be bred to the great show and breeding bull, Choice Goods, and should prove attractive to breeders. There will be about thirteen young bulls in the sale, and a lot of well-bred heifers. The plainer families will be represented by some good Rose of Sharons, Wild Eyes, Oxfords, Nonpareils and other well-known families. Most of the cows will be safe in calf and some with calf at foot. It being a dispersion sale, there will be some good bargains offered, and those wanting Short-horn cattle should not overlook this opportunity to get cattle at their own prices. Write Messrs. Gleeson Bros., Oakland, Neb., for catalog and mention The Homestead.

## G. J. Mack's Dispersion Sale of Duroc Jersey Bred Sows.

On page 37 of this issue will be found the announcement of Mr. G. J. Mack, of Clarion, Iowa, of a dispersion sale of sixty large, growthy Duroc Jersey gilts, all safe in pig. Mr. Mack, it will be remembered, dispersed his herd of Short-horn cattle last fall. Owing to the loss of his companion during the past summer he feels forced to leave the farm, hence this dispersion sale, where everything goes to the highest bidder. A Homestead representative has recently inspected these sixty gilts and can truthfully say that they are the large, roomy type, heavy-boned and well calculated to fill any farmer's barn yard with cherry blonde pigs galore. Mr. Mack has carefully selected these sixty hogs from a large number of March and April gilts; all inferior ones were put into a fattening pen and fattened for the general market. In order that a proper conception can be had by our readers of the growth and immense size of these gilts, we relate the fact that the dams of these pigs were weighed in November and averaged 600 pounds each. A large per cent of these gilts will now weigh 300 pounds. They are choicely bred and by tracing their pedigrees we find that they contain the blood of that great boar, Orion, bred by Mr. N. P. Clarke, and sold to Mr. Wm. Roberts, of Paton, Iowa, from which nearly all present modern Duroc Jerseys descend. Through Raycroft Sensation 31213, one of the boars used by Mr. Mack, we find some of the same blood that produced the sensational Crimson Wonder. Other lines of breeding days will be found prominent in the earlier days of the building up of this herd were animals of Messrs. Cantine Bros. & Stephenson's breeding. Mr. Mack will hold his sale on the farm and in a tent, where all will be made as comfortable as possible. In writing him for catalog, kindly mention The Homestead.

## Dispersion Sale Short-horns and Poland Chinas.

Mr. E. O. Walcott, of Gilmore City, Iowa, has decided to sell out his holding of pure-bred Short-horn cattle and has chosen February 27th for that event, which will be held in comfortable quarters on the farm three miles north of the above-named town. Mr. Walcott finds that it is impossible to carry on his extensive feeding operations and at the same time maintain a pure-bred herd on account of lack of help, and consequently takes this manner of disposing of his collection of registered stock, which includes forty head in all, consisting of mature cows, heifers and young bulls. Among the females will be seven head of three and four-year-olds, principally of Scotch breeding and purchased at Mr. H. G. McMillan's sale last fall at Cedar Rapids, Iowa. Some of these have calves at foot; others are due to calf in March. There are also some of the offering that originated from the herd of Mr. N. A. Lind, of Rolfe, Iowa. The heifers are principally sired by a Scotch bull, Victor Lad 18226, by Headlight, as well as the three young bulls which are about ten months old and vigorous, desirable types for prospective herd bulls. Among this collection farmers as well as breeders should be able to find something to suit their pocketbooks and tastes. The stock has been properly cared for and will be in nice breeding shape. The catalog also includes the Poland China offering, which consists of fifteen head of brood sows and gilts principally of Perfection lines of breeding. They are of good size and bone and probably will offer some splendid chances for investment. Write for this catalog and plan to be at the sale with your neighbor farmers and breeders. Kindly mention The Homestead when writing. The advertisement appears on page 38.

## A Buena Vista County Breeder Sells.

Mr. J. A. Penn, of Alta, Iowa, will sell at his farm just north of the fair grounds near town his complete herd of Short-horn cattle and also thirty head of pure-bred Poland China sows and gilts. As Mr. Penn has his farm too crowded with hogs and cattle he has decided to close out the cat-

tle and continue in the hog breeding business. The swine offering represents the results of his breeding and is made partly to make the sale especially attractive. The herd of cattle consists of twenty-eight head, which includes fourteen cows, four of which have young bull calves at foot sired by Duke of Orange 2d 192733, a Scotch bull from the herd of Mr. Andy Stewart, of Newton, Iowa. This bull is by Canute 106716 and his breeding speaks for itself. There will be four young bulls by this sire ready for service in May, also one fall yearling bull, Major Richmond 263398, by Wild Eyes Count 200659. The offering of cows includes some of both English and Scotch blood lines and will undoubtedly prove useful in the hands of those who secure them. The swine offering represents thirty head of sows and gilts of recognized lines of breeding and bred to a grandson of Perfect I Am 88267 and a son of Jumbo 104677. Here is a good opportunity to secure some pure-bred hogs and cattle. Write for catalog. Kindly mention The Homestead.

## McLemore Sells Short-horns at Lyons, Neb., February 18th.

On February 18th, Mr. W. M. McLemore, of Kearney, Neb., will sell a draft of Short-horns at Lyons, Neb., and among them will be animals of the choicest Scotch breeding. Forty head will be offered—fifteen bulls from ten to eighteen months old, and twenty-five good, useful cows and heifers. These cows have all breeders, every one of breeding age having raised a calf this year, and some of them will have calves at side on sale day. They are of good milking strains, a point that is very essential in the buying of good Short-horn cattle. These cows have plenty of size, are of the blocky, heavy type and are mostly all reds. The bulls are good, both in breeding and individuality. Two of them are straight Scotch, and the balance have from three to seven Scotch tops. One of the good bulls of the sale is Nick Longworth 255575, a two-year-old Cruickshank Orange Blossom bull, and was considered the best of fifteen good bulls raised by Messrs. C. S. Barclay & Sons in 1904. He is a broad-backed fellow, very deep; has good lines; is low down and is of the good beefy type. In Prince Victor we have a Scotch yearling that is one of the good calves we have had the pleasure of looking at this year. He is by Victor Royal and is an extra good individual. Look him up on sale day if you are in the market for a good yearling Scotch bull. Catalogs are now ready and can be had by dropping a card to Mr. W. M. McLemore, Kearney, Neb. Get a catalog and then attend the sale. If you cannot attend, send a bid to Mr. T. C. Callahan, the auctioneer, and it will be properly handled. When writing, please mention The Homestead.

## W. J. Wendt's Sow Sale.

One of the Duroc Jersey sow sales to which we always like to call the attention of Homestead readers is that of Mr. W. J. Wendt, which will be held at Marcus, Iowa, on Wednesday, February 27th. We say we like to call our readers attention to his sale because we know he breeds good hogs and always deals fairly with his customers. He is selling thirty-eight head in this sale and they are sired by old Albinus, Royal Plummer, Wendt M. Wonder C. (a son of Crimston Wonder), Wendt's King, and a few by other boars. The most of the offering will be sired by Wonder C., Wendt M. and Wendt's King and they are bred to these same boars and also to Lottie's Top Notcher, a son of Top Notcher Again, and to Grand King, a son of Wendt's King. These Wonder C. sows bred to Lottie's Top Notcher have turned out well and a number in this sale are bred accordingly. There is not a herd in the Northwest that has a better line of blood than will be found in the Wendt herd, and he is offering a nice class of sows in this sale. If there is any man on earth that will treat you right, Mr. W. J. Wendt will, and if you want Duroc Jersey sows it will pay you to attend his sale. Write for his catalog and mention The Homestead.

## Podendorf's Great Iowa Sunshine Poland China Sale

Logan, Iowa, February 23, 1907

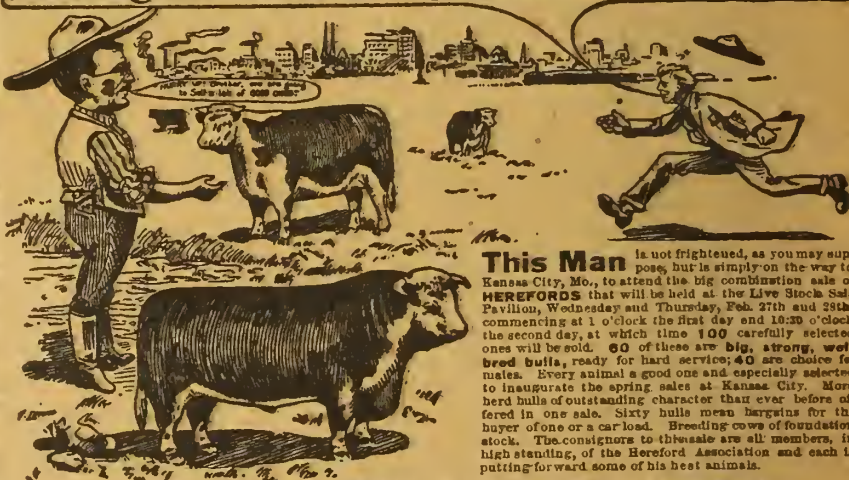

40 Head, 30 bred sows, 40  
10 fall pigs

I am selling some of my best show sows and some of the best daughters of old Iowa Sunshine, the greatest sire of prize winners in the state of Iowa. There will be daughters of Perfection E. L., Iowa Sunshine, Proud Perfection and the great Mischief Maker in the sale. I am also selling some great fall pigs by Iowa Sunshine that will make show material. One of these is the best prospect I know of for a show boar next year. Also a gilt that is a show prospect. Write me at once for catalog. Address,

A. J. Podendorf, Logan, Ia.  
Col. Jensen, Auctioneer

Send bids to M. T. White, Homestead representative, in care of Mr. Podendorf.

"I'm in a hurry to get to Kansas City to buy some of those good Registered Hereford Cattle that are to be sold in the Live Stock Sale Pavilion, February 27 & 28."

**This Man** is not frightened, as you may suppose, but is simply on the way to Kansas City, Mo., to attend the big combination sale of **HEREFORDS** that will be held at the Live Stock Sale Pavilion, Wednesday and Thursday, Feb. 27th and 28th, commencing at 1 o'clock the first day and 10:30 o'clock the second day, at which time 100 carefully selected ones will be sold. 60 of these are big, strong, well bred bulls, ready for hard service; 40 are choice females. Every animal a good one and especially selected to inaugurate the spring sales at Kansas City. More herd bulls of outstanding character than ever before offered in one sale. Sixty bulls mean bargains for the buyer of one or a carload. Breeding cows of foundation stock. The consignors to this sale are all members, in high standing, of the Hereford Association and each is putting forward some of his best animals.

Send now for catalog to C. R. THOMAS, Sec'y., 221 West 12th St., Kansas City, Mo.

# IOWA'S FOUR GREATEST Duroc Jersey Sow Sales!

Never before in the history of the breed has such an offering been made as will be sold in these four sales

## A. E. Poush, Chariton, Iowa, Feb. 18

### 40 HEAD OF ROYAL PURPLE TOPS

Of his herd and the tops of several herds. Included in the offering is Lady Pride, one of the greatest yearlings to be sold this season. Five great gilts by Proud Advance and Daisy Orion. Several gilts by Ben Davis, Hanley, Buddy K. IV., Improver King. The offering will be bred to Savannah Belle's Chief, by Ohio Chief, and out of Savannah Belle. Others to Daisy's Advance, the greatest boar Proud Advance ever sired. Others to Orion Advance, by Orion, dam Proud Lady, the \$1,275 sow. If you cannot come send your bids, as I have the greatest lot of sows that has ever been sold, all things considered.

## THE LAST CHANCE TO GET A SOW BRED TO PROUD ADVANCE.

### SHELDON BROS.

Shannon City, Ia., Feb. 19th

PROUD ADVANCE DIED FEBRUARY 2

This is the last chance to get a sow bred to him.

### Thirty Fall Yearling and Matured Sows and Ten Gilts

In the offering will be about twenty-five head sired by the great Proud Advance 23549, and bred to Ohio Chief II.; the rest of them will be bred to Proud Advance. Twenty head of fall yearlings the equal of which has never been put in one sale before. Write for catalog.

### WHITE & DEWEY

Shannon City, Ia., Feb. 20th

PROUD ADVANCE DIED FEBRUARY 2

The last chance to get a sow bred to Proud Advance.

In this offering will be fall yearlings and gilts sired by Proud Advance and several head of yearlings and gilts sired by Crimson Wonder I Am, two of them being full sisters to Crimson Wonder I Am Again. We have by far the best offering we have ever had. Have also used Proud Wonder I Am, one of the best sons of Crimson Wonder I Am, on some of the sows. Write for catalog.

## Feb. 21 A. L. & U. G. Lynch, Mt. Ayr, Ia. 40 HEAD

Fifteen Yearlings and Matured Sows and Twenty-Five Gilts. 2 Buddy K. 4th Sows, 4 Daughters of Proud Advance, 1 Daughter of Ohio Chief.

Our boars in service are of the most fashionable breeding and best individuals money could buy. Brilliant Advance, a great, massive yearling by Proud Advance, and dam, Brilliant Genevieve, a hog with lots of quality and as smooth as velvet. Then we have Orion Chief I Am, a yearling by the Old Orion, that is the best we ever saw. There will be several gilts by Proud Advance bred to Orion Chief, also sows by Buddy K. IV. and Hanley and many others equally as well bred, all safe in pig to those boars. See field notes and write us for catalog, which is now ready to mail.

Send bids to M. T. White, Homestead representative, or to Col. F. F. Luther, in care of the above breeders and they will be properly attended to.

### Sanstead Sells Durocs February 25th.

On February 25th, the first day of the Southwestern Nebraska Duroc Jersey Sale Circuit, Mr. Wm. Sanstead, of Holdrege, Neb., will offer a draft of Duroc bred sows from his herd, which he considers the very best he has ever owned. They are in fine breeding condition, not overfat, but just right to do good for the man who gets them. They are mostly the get of Munger's Ideal, he by Ideal Perfection, dam Myrtle by Sen-sation Jr. This grand young hog has quite a show record, having won first-prize under six months at Wisconsin, second at Minnesota State Fair, first at Beloit, Elkhorn and La Crosse Interstate Fairs.; was bred by Mr. A. A. Munger, of Janesville, Wis., and purchased by Mr. Sanstead at a good long price. He is the sire of most of the younger stuff in this sale and those not related to him will be bred to him. In buying a sire to cross on the Munger Ideal gilts Mr. Sanstead after carefully inspecting several good herds purchased a son of Red Chief I Am from the herd of Messrs. Geo. Briggs & Son. This pig is a very good individual; is backed by good breeding and should prove a profitable animal in this herd. The sows are of good breeding and among them are some choice individuals. Write for a catalog and then arrange to attend this sale circuit, as you will be well pleased with this and all the other offerings. Col. T. C. Callahan will do the selling and bids sent to him or to Mr. Ray Page, of The Homestead, will be properly handled. Write for a catalog at once and arrange to attend this sale. Parties coming on the main line had better get off the trains at Funk, Neb., and you will be conveyed to the sale free of charge, otherwise go to Wilcox and you will be taken to the sale from there.

### Sellers & Son Hold Sale of Duroc Bred Sows February 26th.

Messrs. M. A. Sellers & Son, of Huntley, Neb., will hold their annual sale on February 26th, which is the second day of the Southwestern Nebraska Duroc Jersey Sale Circuit. They have been breeding good Durocs for some years, and in that time have produced some extra good hogs. Their offering this year is what they consider the very best they have ever been able to produce. They are in the pink of breeding condition, having been fed on a ration of food which produces bone and muscle and very little fat. They are of the choicest blood lines known to this breed and among

them are some choice individuals. They are bred to such noted boars as Seller's Duroc by Cole's Duroc, first-prize yearling at Nebraska State Fair, 1903. His dam was Pauline by Paul Finch by Gold Finch. He is a yearling of much quality, good size and has proven a good sire. Others are bred to Crimson Pat by Crimson Wonder, dam Lady Kirk. They also have a son of the great Ohio Chief that much is expected from and we can say that he is one of the best sons of Ohio Chief we have had the pleasure of seeing this year. Some of the gilts are bred to a son, Dandy Top Notcher, by Tip Top Notcher. He is a very growthy, broad-backed fellow that will make a very large hog and should cross well on some of these good gilts. Write for a catalog; look over the breeding, and then arrange to attend this sale. Colonel Callahan will do the selling and bids sent to him or to Mr. Ray Page of this paper, will be properly handled. When writing, please mention The Homestead.

### Tillman's Sale of Big Ones Comes February 27th.

We wish to say to those who are lovers of the large type of Duroc that in the sale of Messrs. S. J. Tillman & Son, of Ragan, Neb., February 27th, they can be found in abundance. Mr. Tillman is the oldest breeder in this section of Nebraska, and has made the hog business a study, as you can plainly see by looking over the animals that he has been able to produce. Mating hogs for proper results is a science in which few men make any development in a life-time of breeding. We can say for Mr. Tillman that he has a good knowledge of mating hogs and has produced some choice individuals in the time he has been breeding. The offering that he has to put before the public this year is very choice in every respect. They are extra growthy; have much quality and are backed up with as good breeding as this breed of hogs affords. We wish to make special mention in this issue of the herd boars used on the sows included in this sale. In Jumbo's Ideal we have a boar of great scale, much quality and an all-round individual that is hard to duplicate. He is a son of Jumbo's Perfection, the first-prize boar at Nebraska two years in succession and bids fair to make as good a breeding boar as his sire. He was used on most of the older stuff in this sale and you will do well to get a sow bred to this hog. He is assisted in service by a son of Nebraska Wonder, he by Crimson Wonder,

and he is a pig that would look well in most any herd. He is very broad, has a wonderful back and side line, good head and ear and a ham that would be a credit to any hog. We look for something extra good in their cross of this pig on Jumbo's Ideal gilts. We will make special mention of the sows in our next issue. In the meanwhile write for a catalog and make arrangements to attend this sale. Colonel Callahan will do the selling and bids sent to him or Mr. Ray Page will be properly handled. When writing, please mention this paper.

### Geo. Karschner Sells Durocs Feb. 28th.

The sale of Duroc Jersey bred sows offered by Mr. Geo. Karschner, of Wilcox, Neb., on February 28th, is one that should attract the attention of the breeder and farmer who are in the market for good breeding stock. In getting this offering together he has selected only the very tops and has mated them to males that are the very best that money can buy. His offering is not large, but the quality shown in them, backed up by the good blood lines that are represented, makes them worthy of the attention of the leading Duroc Jersey hog men. They represent the blood of Jumbo's Perfection, first prize boar at Nebraska State Fair two years in succession; Higgins' Model, the hog that has produced so many prize winners, including the great sow, Nebraska Belle; Improver II., the sweepstakes boar of three state fairs; Hambletonian, first-prize yearling at Nebraska in 1904; Crimson Wonder, second-prize hog same year, and the hog whose produce won more ribbons at the Iowa State Fair last fall than any other two boars that were represented there. With this great combination of prize-winning blood and bred to the boars they are, the produce should be something very choice. Most of the best sows are bred to Journal II., the first-prize pig at the Kansas State Fair and was only four months and two days old the day that he won this prize, competing with boars much his senior in age. He is a grand specimen of the breed and sows bred to him should be in good demand. Most of the gilts are bred to Can't Be Beat Notcher, a grandson of Kan't Be Beat. This hog has a combination of Kan't Be Beat and Tip Top Notcher blood which makes him as well bred as any boar doing service today. Come and look over this offering, as we are sure it will please you. Write for a catalog, look over the breeding and then plan to attend this sale and the whole circuit. If you cannot attend, send a bid to Mr. Ray Page, of this

paper, and it will be properly handled. When writing please mention this paper.

### Wassen's Duroc Bred Sow Sale, Mar. 1st.

On March 1st Mr. C. C. Wassen, of Wilcox, Neb., will offer a draft of Duroc bred sows from his well-known herd, and among them are some very choice breeding animals. This sale is the fifth day of the southwestern Nebraska Duroc Jersey bred sow circuit and to the man who is looking for something with plenty of size and bone this will be a grand opportunity. They are mostly good, big, strong fall yearlings, just the kind that make good, profitable brood sows. These sows are in the pink of breeding condition, not overloaded with fat, but in proper condition to do the purchaser a lot of good. They represent the most fashionable blood lines and are bred to Jumbo's Wonder, a son of Jumbo's Perfection, the hog that won first at the Nebraska State Fair two years in succession and is now at the head of Messrs. H. B. Loudon & Son's herd at Clay Center, Neb. This hog is a broad-backed fellow with good side lines, good ham and the best of bone and feet. Others are bred to Cole's Duroc II., a son of Cole's Duroc, and a hog that has proven a good sire, as his produce will show on sale day. There will be forty head offered, all bred to these two sires, which should produce something extra good. Catalogs are now ready and should be in the hands of every Duroc breeder. Col. T. C. Callahan will do the selling and mail bids sent to him or to Mr. Ray Page, of this paper, will be properly handled. When writing for catalog please mention this paper.

### A. A. & W. G. Karschner Sell Durocs March 2d.

On March 2d, the last day of the Southwestern Nebraska Duroc Jersey Sale Circuit, Mr. A. A. & W. G. Karschner, of Wilcox, Neb., will offer a draft of Duroc bred sows from their well-known herds, among which will be sows of much quality, and good enough to be of usefulness in the best of herds. They raise their hogs on large alfalfa fields where they can have the exercise that is so much needed in developing the brood sow and the litter she is carrying. They have selected nothing but the very tops of both herds for this sale, and while the offering is not extra large there will be individuals among them that should be sold to breeders. Most of the older sows in this sale are bred to L...

# MASTODON POLAND CHINA BRED SOW SALE

In Heated Sale Pavilion, Harlan, Ia.

WEDNESDAY, FEB. 27, 1907.

# POLAND CHINA BROOD SOW SALE.

I WILL SELL ON FEBRUARY 21, 1907, AT MY FARM, 15 CHOICELY BRED POLAND CHINA SOWS AND 35 GILTS, ALL BRED.

The fifteen old sows are all bred to Superior Sunshine and the thirty-five gilts are all by Superior Sunshine and bred to Pike Timber Perfection and Pike Timber Meddler. Will also sell Superior Sunshine in the sale. At the same time and place I will sell seven registered Short-horn bulls, two of them straight Scotch. Sale will be held on the farm five miles from Belmont and eight miles from Clarion. Free hotel accommodations to my guests at either Clarion or Belmont, also free conveyance to and from the farm. Address for catalogs.

COL. J. A. BENSON, AUCTIONEER.

T. A. DAVENPORT, BELMOND, IOWA.

Gold Finch, a prize winner in many leading shows and a son of the great Gold Finch. His dam was Dotie, the grand champion sow of the World at St. Louis Fair in 1904. This hog has a show record that is a good one and crossing him on the good sows in this herd should produce animals of much demand. He is assisted by Nebraska Wonder, one of the best of Crimmon Wonders and a hog that has proven a good breeder as his produce will show on sale day. They are also using a son of Morrison's Bell Top on some of the best gilts. Catalogs are now ready and should be in the hands of every Duroc breeder. Colonel Callahan will do the selling and bids sent to him or to Mr. Ray Page, of this paper, will be properly handled. When writing please mention this paper.

Last Call for the Three-day Poland China Sale at Grand Junction, Ia.

One of the sales of Poland Chinas which is coming soon and which deserves the close and careful attention of swine breeders and farmers, is the three-day sale to be held at Grand Junction, Greene county, Iowa, on February 19th, 20th and 21st. One hundred and twenty head of sows, old and young, are being offered and comprise a combined offering from five breeders, namely, Messrs. Geo. F.

Freie, of Ogden; C. M. Howard, J. L. Hudson and J. W. Wampler, of Grand Junction, and C. C. Healy, of Dana. The sale will be held under a large tent and parties from a distance will be entertained. Auctioneers W. W. Stewart, C. E. Luther and W. F. Metzger will open the sale promptly at one o'clock each day. In general the offering is thoroughly representative of the best in the breed. Everyone is cordially invited. There will be mature sows, yearlings and gilts, and they will be bred to fifteen high-class boars representing popular lines of the breed. There will be a number of mature sows and gilts bred to F.'s Dude 121055 and Iowa Boy 94501. Mayflower 3d 267024, out of a litter of nine and a prolific breeder herself, is one of these. She will be three in May and will make a fine addition to any herd. Another part of this consignment is four March gilts sired by Iowa Boy 94501. Anyone can put a good bid on these, for they are from stock that for five generations on the dam's side have proven great breeders for Mr. Freie. They are large, growthy and are a choice bunch. Those looking for something aristocratic will probably find it in the offering of Mr. Howard. This will include grand individuals of Perfection and Dude breeding and bred to E. L. Perfection Jr. 120557. This is a great boar from both the standpoint of breeding and individual

merit. Mr. C. C. Healy will make a good showing with some good breeding sows and choice gilts. Those who see the boars to which his consignment is bred will surely want one of the sows. One of these is Nemo's Chief 162457, a large, strong-boned fellow, well-made and finished. A sow bred to him should prove a very profitable investment. Impudence 2d 115981 is another boar used on this offering. He is from the Winn herd and has received a lion's share of admiration from all those who have seen him. His sire was sweepstakes at the Iowa State Fair, 1905. Some choice gilts bred to him. Look them up. Mr. J. L. Hudson has taken special care to keep up his end of the consignment with a very strong bunch. One number is a fancy sow, Lady Kerington 273850, Perfection bred, and will be worth anyone's attention. Her ability to produce something good will be demonstrated by a quartet of her gilts sired by Bill Boy 115581, and bred to M. Sensation 118623 for early litters. This sow was bred November 27th to Bill Boy. A part of this offering is bred to a Meddler boar, and suffice it to say the produce of this union will be well sired. Some very toppy gilts of March and later litter will conclude the offering. Last, but not least, Mr. Wampler will show some fine goods for your inspection and bred to a Meddler boar. Catalogs are out and it will

pay you to have one on hand, for surely there will be something in this consignment well worth your money and attention. Come out and see some good hogs, visit with brother breeders and lend your influence to make these breeders feel that their efforts have been substantially appreciated. Grand Junction is on the Northwestern and M. & St. L. railroads. Write for catalog to Mr. C. C. Healy, of Dana, Iowa, and kindly mention The Homestead. On page 36 appears the formal notice of the sale.

Thompson's Jack and Jennet Sale.

On Wednesday, March 6th, at the Davless County Jack Farm, near Kidder, Mo., Mr. J. D. Thompson will hold his seventh annual sale of jacks and jennets. For this sale Mr. Thompson has listed fifteen big, black, registered jacks and twenty-five jennets. Mr. Thompson's jacks are of desirable ages and are the big-boned fellows so much in demand. The twenty-five jennets are the best he has ever owned. The matured jennets are big and strong and are in foal to good jacks. Mr. Thompson has issued a catalog that is full of cuts made from original photographs of every animal that sells. He would like to send you one. Write him today and say you saw his advertisement in The Homestead.

240 DUROC JERSEY BRED SOWS AT PUBLIC AUCTION

# GREAT SOUTHWESTERN NEB. SALE CIRCUIT

## Six Days Sale---Feb. 5th to March 2d Inclusive---The Tops of Six Grandly Bred Herds

February 25, 1907

**Wm. Sanstead, Holdrege, Neb.**

Will offer forty head richly-bred, tried sows, yearlings and gilts of most noted prize-winning families. They are bred to such boars as Munger's Ideal, first-prize pig under six months at Wisconsin State Fair, first at Beloit, Elkhorn, La Crosse Interstate Fairs. He is assisted by a good son of Red Chief I am. This combination of blood should produce good ones. A guarantee with every animal. Write for catalog. T. C. Callahan, auctioneer; Ray Page, assistant.

February 26, 1907

**M. A. Sellers & Son, Huntley, Neb.**

Will sell forty head from their well-known herd and they are right in every respect. The blood of such boars as Crimmon Wonder, Cole's Duroc, Improver II., and other prominent sires represented in this herd. Most of them are bred to Seller's Duroc by Cole's Duroc; others to Crimmon Pat by Crimmon Wonder, Dandy Top Notcher by Tip Top Notcher, and a son of the great Ohio Chief. Sale right in town in heated quarters. Come and look over a good bunch of sows. Catalog now ready. T. C. Callahan, auctioneer; Ray Page, assistant.

February 27, 1907

**S. J. Tillman - Ragan, Neb.**

Will sell at his place right in town forty head of tried sows and gilts that are hard to duplicate. If you are looking for size, with quality, come to this sale. I have sows of most noted strains and the individuals to back the breeding. They are bred to such boars as Jumbo's Ideal, one of the best sons of Jumbo's Perfection, and a son of Nebraska Wonder by Crimmon Wonder. Come to this sale. I can please you. Write for a catalog at once. T. C. Callahan, auctioneer; Ray Page, assistant.

February 28, 1907

**Geo. Karschner, Wilcox, Neb.**

Will offer at his farm near Wilcox, Neb., a draft of forty head, consisting of tried sows and good, growthy, spring gilts. They represent the blood of Jumbo's Perfection, Improver II., Hambletonian, Crimmon Wonder, Red Chief and others of equal note. They are bred to such boars as Journal II., first-prize pig at Kansas State Fair, 1905, in under six months class; others are bred to Kan't Beat Top Notcher, a grandson of Kan't Be Beat. Every sow in prime breeding condition. Write for a catalog and arrange to attend the sale. T. C. Callahan, auctioneer; Ray Page, assistant.

March 1, 1907

**C. G. Wassen, - Wilcox, Neb.**

Will sell forty head, including three tried sows, nine spring gilts and the balance big, growthy, fall yearlings. They are in the pink of condition; represent the best blood lines and are bred to such boars as Jumbo's Wonder by Jumbo's Perfection; others to Cole's Duroc II. by Cole's Duroc. Come and look them over; they are extra good, both in breeding and individuality. Write for catalog and arrange to attend the sale. T. C. Callahan, auctioneer; Ray Page, assistant.

March 2, 1907

**A. A. & W. G. Karschner, Wilcox, Neb.**

Will offer forty head of top sows from their herds, and they have selected nothing but the very best. They are very growthy, being raised on alfalfa and fed to do the purchaser good. They are bred to such boars as Lord Gold Finch, a noted prize winner; Nebraska Wonder, a good son of Crimmon Wonder, and a good son of Morrison's Bell Top. Come and spend the day with us. Catalog now ready. T. C. Callahan, auctioneer; Ray Page, assistant.

Mail bids can be sent to Ray Page, of The Homestead, in care of the above gentlemen, and they will be properly handled.

### Last Call for T. A. Davenport's Poland China Brood Sow Sale.

The Homestead once more reminds its readers that Mr. T. A. Davenport, of Belmond, Iowa, will hold his bred Poland China brood sow sale at his Pike Timber Farm, February 21st. Mr. Davenport is offering a choice lot of Poland Chinas, not only from the standpoint of individual excellence, but from the standpoint of rich blood lines as well. At this time he will offer the public fifteen of his choicest matured brood sows, some of them weighing as much as 600 pounds or more; these are a splendid lot of sows, good bone, exceedingly good hams and backs. These are two of the qualifications necessary to satisfy the critical eye of Mr. Davenport. The thirty-five gilts that he is offering are out of these same sows and are sired by Superior Sunshine, a splendid, growthy boar of good type, possessed of an exceedingly heavy bone, and a boar that is close to the ground. We wish to say in this connection that Mr. Davenport has recently had Mr. John W. Hill, of Delaware, Ohio, the one live stock artist who will make the picture of a hog and make it exactly as the animal really is, at his farm, photographing and making sketches of some of the animals to be sold in this sale. We have inspected the animals and the pictures as well, and will vouch for the truthfulness of the statement that any Homestead reader can take Mr. Davenport's catalog, turn to any of the pictures upon his arrival at the farm, and without any assistance readily find the animal that this picture represents. In order to do this the animals have been shown just in their natural flesh, such as they will be found carrying on sale day. They have not been loaded down with the artist's paint brush until they simply look like bags of mush with four pins stuck under them to represent legs. It will be a treat for the lovers of Poland Chinas who really enjoy looking at a life-like animal, to send for this catalog, study the portraits therein contained as well as the breeding, and we vouch for it that the real critical judge of Poland Chinas will recognize the truth and force of the above statement. Mr. Davenport will offer seven good Short-horn bulls at the same time and place that the Poland China brood sows will be sold. He regrets to have to sell Short-horns on the same day, but owing to the fact that his fall sale of Short-horn cattle, fell on the rainiest day of the entire season, he was forced to close the sale and find himself with these seven bulls in hand; they are all reds and range from thirteen to sixteen months old, two of them being straight Scotch bulls. Owing to a sort of sandwich sale, as this will be, the chances are altogether likely that the wise buyer can pick up a Short-horn bull at a very modest price. The announcement will be found on page 40 of this issue of The Homestead. Mr. Davenport earnestly requests all lovers of Poland Chinas to write him at once for a catalog, mentioning The Homestead. Free conveyance and free hotel accommodations will be accorded all of his guests at either Belmond or Clarion.

### Johnson's Dispersion Sale of Durocs and Short-horns.

On February 22d, Mr. Axel Johnson, of Osceola, Neb., will disperse his entire herd of Durocs and Short-horn cattle. He is

one of the oldest Duroc breeders in this section of the state and has bred some of the good show animals of the breed. Mr. Johnson has always raised the big ones, the kind that bear down hard on the scales, and if this is the kind you like, just make a visit to Osceola and attend this sale. There will be fifteen tried brood sows and thirty-five fall and spring gilts, the tops of 150 head. They are bred mostly to Improver II. Jr., a son of Improver II., that has produced some mighty good stuff in this herd. He is assisted by Kirk's Crimmon, a son of Crimmon Wonder, that Mr. Johnson thinks will make a wonderful breeding boar. Among the good brood sows to be offered is Improver's Jewel, a daughter of Improver II. and out of Ideal Jewel. This is a very mellow sow, with great length and depth, good back and ham, and has been one of the most profitable sows ever owned on this place. She is bred to Kirk's Crimmon for an early litter. Improver Jewel II. is another good one. She is by Paul F. and has produced some of the good things to be sold in this sale. Model A is a crackerjack of a fall yearling, one of the very best we have looked at this year. She is by Improver II. Jr., and is an extra good individual. She has a wonderful back, extra good side lines, good head and ear, good bone and feet. Look her up sale day, as she is an extra good one. In Crystal we have another extra good yearling, very much like the one mentioned, and will no doubt make as good a sow. Come and look over this offering, as you can surely find what you want in this sale. I will also offer my small herd of Short-horn cattle, including my bull, Roan Fame, a son of Imp. Scottish Fame, one of the greatest bulls of the breed. I will offer some cows that are hard to equal; they are the dual-purpose kind that are great milkers, have lots of scale and are regular breeders. Write for my catalog and come to this sale. If you cannot attend send a bid to Mr. Ray Page, of The Homestead, and it will be properly handled. When writing please mention this paper.

### H. C. Neal Sells Poland Chinas Feb. 20th.

On February 20th, at his farm near Houston, Neb., Mr. H. C. Neal will disperse his entire herd of Poland China hogs. Mr. Neal has been breeding good Poland China hogs for a number of years and has produced many animals that have made great reputations for themselves in leading shows. His entire herd will be sold, and among them are sows that money could not buy if it were not for the fact that he is quitting the business. Two good herd boars will be offered, and they are proven sires and producers of extra good stuff. As we made special mention of these two sires in our former field note, we will now speak especially of some of the good sows that will be sold. One of the great matrons to be sold in this sale is Black Madge. She is by Neal's Sec., and out of Lady York 2d. She is a sow of much scale; has good back, extra good ham and even side lines, good bone and feet, and has been one of the most profitable animals on the farm. Something more neat and of the easy-maturing kind we have in Iowa Lass 2d. She is by Pease's Perfection by Perfection E. L., dam Iowa Lass by King Herod. She is a show sow in every respect and should find a home in some good herd. Among the good things

is a trio of fall gilts by Cedar Lawn Chief that are hard to beat. They are of the large, roomy type, are smooth as three apples and would look well in any good herd. The gilts to be offered are a growthy, smooth lot, well bred and bred to two extra good males. Come to the sale and look them over and we are sure you can find what you want. Catalogs are now ready and should be in the hands of every good Poland China breeder. Parties coming to York, Neb., can find free conveyance to the farm. Those who cannot attend, send bids to Mr. John Blaine, in care of Mr. Neal and they will be properly handled. When writing, please mention The Homestead.

### Combination Duroc Sale at David City, February 23d.

The combination sale of Durocs to be held at David City on February 23d should attract breeders from all parts of the state. The offering is selected from three good herds, the consignors putting in nothing but the very tops of what they have raised this year. Mr. Henry Bock, of David City, will consign twenty head, ten of which are matured sows and the balance good, growthy spring gilts. They are in just nice breeding condition not overfat, but in proper condition to do the purchaser a lot of good, having been raised mostly on oats and alfalfa. The blood lines are extra good, as the catalog will show you, and they are mated to two extra good males. Mr. Hilger will offer seven good matured sows and thirteen gilts, and among them are some very choice individuals. They trace to most prominent sires of this breed and are bred to a grandson of Higgins' Model that is a hard pig to beat. This youngster is a very smooth pig; has a wonderful back, ham, and side line; also good bone and right up on his toes. He is a good prospect for any man to grow out and will be included in this sale. Mr. Tillman, of David City, will offer ten head of growthy spring gilts that are as even a bunch as we have looked at this year. They will weigh over 300 pounds; are of the most fashionable blood lines and a better bunch of sows individually would be hard to find. Write for a catalog of this sale and look over the breeding of every animal and we feel confident that you will be pleased with the offering when you see them. Those who cannot attend can send a bid to Mr. Ray Page, of this paper, and it will be properly handled. When writing, please mention The Homestead.

### S. P. Briggs Sells Duroc Bred Sows February 20th.

A young breeder who has gained quite a reputation among the Duroc men is Mr. S. P. Briggs, of Seward, Neb. He will hold his second annual sale on February 20th at his farm near town and among them are some very choice individuals. They are also of the choicest breeding known to the Duroc Jersey hog. We wish to invite every breeder who wishes to make a few good additions to his herd to attend this sale. The animals to be sold are those that have been raised by Mr. Briggs and some of them are good prospects for next year's show. Only thirty-six head will be offered and parties can feel safe in sending a bid on most any animal in the sale, as they are a very choice lot. Twenty of them are big, growthy, fall yearlings, very smooth, broad backs and of

the good brood sow type. Gillilan's Choice 116602 by Proud Advance is one of the top things of the sale, and she is bred to Junior Champion, the prize-winning pig Mr. Briggs purchased from the firm of Watt & Foust last fall. Banner 1st by Improver II. is another of the good ones and is worthy of your attention on sale day. She is bred to Junior Champion. Little Lee by Dandelion is a good brood sow to be sold and will be bred to Fashion's Improver. Among the best fall yearlings is Caroline Belle by Fashion's Improver, and, bred to Junior Champion, should produce something extra good. These sows are extra good individuals and we can recommend them to anyone wishing to add a few good ones to their herd. They are bred to two as good boars as you will see in one herd. It will pay you to attend this sale. Catalogs are now ready and can be had by dropping a postal card to Mr. S. P. Briggs, Seward, Neb. Those who cannot attend, send a bid to Mr. Ray Page, of this paper, and it will be properly cared for. When writing, please mention The Homestead.

### Look for the Man in a Hurry.

On page 38 of this issue appears an advertisement of the usual spring combination sale of Herefords at Kansas City, Mo. For the past six years a sale has been made on the last two days in February and this year the dates are February 27th and 28th. The animals to be sold were selected some five or six months ago, especially for this most important sale, and if it is your good fortune to be on hand, you will see one of the best lots ever offered at any sale. The offering consists of 100 head, sixty of which are big, strong bulls ready for service. This is an unusual number of bulls to offer at one time, but as turning out time will be near at hand, they were selected with the view of being able to accommodate any buyer, whether he wanted one to head his herd or a car load to go to the range. The breeding and individuality of these bulls are as good as there is to be found. When a breeder starts out to buy a bull, he sometimes spends several days traveling from farm to farm and many dollars before he succeeds in getting what he wants. There will be bulls at this sale to fill the wants of the most fastidious, so you can leave home, go to Kansas City, get what you want and right back, spending little time and money for traveling, and get your bull or bulls at your own bidding. The females offered are as good every way as the bulls and all will be in fine fix. Good colors, good coats, good heads and horns, good all over. The consignors are: R. C. Wilson, Belton, Mo.; Miss Lou Goodwin, Blue Rapids, Kan.; R. H. Hazlett, El Dorado, Kan.; W. B. Waddell, Lexington, Mo.; Dr. James E. Logan, Kansas City, Mo.; W. A. Dallmeyer, Jefferson City, Mo.; R. T. Thornton, Kansas City, Mo.; Jones Bros., Council Grove, Kan.; Judge Sam'l Hudson, Sibley, Mo.; Gudegg & Simpson, Independence, Mo.; Mrs. K. W. Cross, Emporia, Kan.; C. A. Stannard, Emporia, Kan.; Steele Bros., Richland, Kan.; and J. W. Lenox, Independence, Mo. Sec. C. R. Thomas, at 221 West Twelfth St., Kansas City, Mo., is managing the sale for them. If you have not already received a catalog, write him and he will take pleasure in sending one.

# "ONLY WAY" SALE CIRCUIT

## Three Days, Feb. 19-20-21, '07

These sales are  
all easy of access,  
being on the main  
line of the C. & A.

## ..... 120 HEAD OF BRED SOWS .....

Attend the whole  
Circuit.  
Tops of three  
herds.

### TUESDAY, FEB. 19, 1907

DWIGHT, ILLINOIS

**40 HEAD-1 Yearling-5 Fall Gilts- 34 Spring Gilts**

bred to Illinois Notcher by Tip Top Notcher and Archer by Ambition. These sows are sired by Perfection J. K., by Allison Jr. Perfection; Sport by Big King. Five gilts out of Lady Alice by Proud Advance, her dam being Amy M. by Orion. Five litter mates to "What You Say"; two spring gilts by Buddy T's Best by Buddy T. Sale held at W. J. Taylor's, three miles northwest of Dwight, in heated tent. Col. Reppert, Auctioneer.

### THURSDAY, FEBRUARY 21, 1907

**F. M. Erschen,**

**35---Head of Choicely Bred Sows---35**

**Odell, Illinois**

Three two-year-old sows; seven yearlings and twenty-five young gilts bred to Hanley II 50433, Indiana Boy 50435, Long Duke 44289 and Frank's Choice 35801. Sows sired by Comet, a good son of Gold Finch; One Such by None Such and out of Decatur Belle IV; Odell Boy he by King Wonder 14131; Dumont by Conodo C.; Choice Goods, he by Echo King and out of Decatur Belle II. The gilts are sired by Ohio Boy 10711A, I. J's Chief 12445, Corrector Boy and other good boars. Sale to be held three and one-half miles north of Odell. Everybody will be made comfortable. Cols. Reppert and McGowan, Auctioneers.

#### Lefebure's Scotch and Scotch-Topped Short-horns.

On Thursday, February 21st, on the same day of Mr. John Lefebure's great Chester White brood sow sale, will occur the sale of eighteen head of select Short-horns, including several good bulls and a bunch of cows and heifers. Among the bulls to be sold is Mr. Lefebure's Scotch herd bull, Iowa Chief of Scotts. This is a Cookson-bred bull, six years old, and belongs to the Cookshank's famous Brawith Bud tribe. His sire is Perfection 2d, a bull bred by the Cookson Bros., while his dam is Golden Princess 2d, a daughter of Norman Knight, a bull bred by Mr. Amos Cruickshank. This is as well bred a Scotch bull as anyone could desire, and he has proven himself a great breeder for Mr. Lefebure. He is a great bull, with splendid head and horn, denoting ideal breed character. In fact, he is a gem of the first water, but Mr. Lefebure has used him as long as is possible, owing to the fact that he has so many of his daughters in the herd, and they are so good that he now finds himself in the position of having to resort to the use of another bull. A young Cruickshank Victoria bull is offered in Lot 14 of the sale catalog, called Victoria's King; he was calved July 20, 1905, and was sired by the herd bull previously described, while his dam is a Cruickshank Victoria tracing to Imp. Victoria 71st by Roan Gaiet. These are the two Scotch bulls that are for sale. There are several other good Scotch-topped bulls of the Booth Rosebud family; in fact, the preponderance of blood coursing the veins of these other bulls is Scotch, and it is doubtful if eastern Iowa has ever had a family of cattle that was more productive of good, practical, useful cattle than this same Rosebud family of which we speak. Lot 2 of the catalog is a splendid Scotch cow, Missie Secret Second; she was calved July 18, 1900, sired by that splendid Cruickshank bull, Scottish King; she is only four removes from that splendid imported cow, Splenwort by Royal Victor. This cow was bred by Mr. Amos Cruickshank and imported by Mr. J. L. Davidson. At Mr. T. J. Wornall's sale at Kansas City in March, 1901, a bull calf descending from Imp. Splenwort sold to Messrs. Forbes and Prather for \$800. This splendid cow, Missie Secret Second, has a nice bull calf at foot dropped January 12th. Lots 3 and 4 are both Butterflies, tracing to Imp. Miss Butterfly by Master Butterfly. These Butterflies were handed down to Mr. Cruickshank by Colonel Townley. Lot 3 was calved June 13, 1903; has a beautiful calf at foot dropped December 21st. She was sired by Iowa Chief of Scotts, which certainly detracts nothing from her royal breeding. Lot 4, Butterfly Daisy, is a year younger and was sired by the Duchess of Gloster bull, Highland Chief. This cow was bred January 5th to Scottish Hilton. Lot 6, Oxford Butterfly 14th, Mr. Lefebure considers as good a heifer as he ever owned of this family; she was bred December 3d to Scottish Hilton. The remainder of the offering is principally of the Rosebud family and are all good, practical, useful cattle. Inasmuch as the sale is to be held

the same day with the Chester White hogs it is altogether likely that some good bargains are in store for the wise farmer or breeder who will attend this sale and take advantage of the situation. Besides, if he should not get what Short-horns he desired, he could do no better than buy one or more of the exceptionally well-bred, large and well-balanced Chester White sows that will be sold at the same time and place. Free conveyance from Fairfax or from the Iowa City and Cedar Rapids Interurban Railway to and from the farm. Apply to Mr. John Lefebure, Fairfax, Iowa, for his catalog.

#### Prominent Sale of Chester White Brood Sows and Short-horn Cattle.

This will be our last opportunity to call attention to the very prominent sale of Chester White brood sows and Short-horn cattle to be offered by Mr. John Lefebure, at Fairfax, Iowa, February 21st. It is an unusual offering of strictly first-class and up-to-date stock. At no time in the history of Chester Whites has the writer ever seen a better bunch of bred Chester White sows offered the public by one man. There are forty-two of these sows, principally March and April farrowed gilts, that are weighing at this writing right at the 300-pound mark. A large per cent of them are by Perfection and Nero, and are bred to that splendid boar, Enterprise and Perfection Model. The first named was sired by Louis and he by Napoleon. The dam of Enterprise was Pride of Pine Lawn and she by Hoosier Frank. Perfection model was sired by Counselor, he by Teddy R. and out of Emma L. Perfection Model's dam was Fancy Flower and her dam Reece's Choice. Any person purchasing one of these sows bred to either of the above boars will certainly be in position to reasonably expect some splendid pigs. Mr. Lefebure points with pride to the fact that there has been no disease on his farm nor in his community for ten years among the swine herds. We know something of the ration that these brood sows have received, which is conducive to the proper growing of bone and muscle. Here is Mr. Lefebure's recipe for growing the ideal Chester White swine: First, select the proper type and of the right blood line, then let them have the run of the pasture, not less than twenty acres, feeding wheat, oats, bran and shorts, oil meal and some corn, but not a heavy feed of corn. Mr. Lefebure is certainly placing on the market forty-two Chester White gilts that it would be hard to duplicate anywhere in the United States, and The Homestead certainly believes that it is doing its readers a kindness to urge them to attend this sale in person and see for themselves the high character of these Chester Whites. The splendid, typical and ideal heads and ears will be found on each and every one of the forty-two cataloged. The methods of feeding have produced splendid bone and they are all squarely up on their toes and very active for gilts of this size and growth. Their bodies are of the ideal conformation necessary to the typical pork hog. The catalogs are now out and will be ready to mail to all our readers

who apply to Mr. John Lefebure, Fairfax, Iowa, mentioning this paper. Fairfax is but seven miles from Cedar Rapids and both the Chicago & North-Western and Milwaukee railroads reach Fairfax. The farm is located two and a half miles from Fairfax and three miles from the Iowa City and Cedar Rapids Interurban Railway. Free conveyance on day of sale will meet the trains on all three of these lines. Interurban cars leave Iowa City and Cedar Rapids in both directions each and every hour, so that anyone who might miss their railway connection can still get to the sale on the Interurban.

#### Great Sale of Poland China Bred Sows.

On February 26th, at the fair grounds at Marshalltown, Iowa, Mr. J. C. Bailey will sell about thirty strictly choice Poland China sows bred, more than two-thirds of which are March and April gilts and the choicest bunch that our representative has seen. They are sired by five different boars, which will give a variety of blood that is unusual; these sows are sired by such boars as Perfection Star 107291, Nemo Boy 82765, Long Price 102707, Ohio Perfection 2d, Lookout Tecumseh 37766. These gilts have more length and development than we have found in any bunch of like number for years. We wish to say a word in this connection concerning Mr. J. C. Bailey. The writer of this article has been familiar with his breeding operations for some fifteen years, and considers Mr. Bailey not only one of the good judges of Poland Chinas, but one of the best breeders and developers in the business. He has never fed his hogs with the idea of putting on flesh alone; extra growth, plenty of bone and muscle have been the points most observed in his development. Mr. Bailey founded his herd some fifteen or sixteen years ago by purchasing brood sows from that old-time breeder, Mr. A. C. Diller, whose reputation at that time was made on one family, known as the famous Susie family; this was an exceptional strain of Poland Chinas, the sows of which were exceptional mothers, prolific breeders and great sucklers. Their pigs were always in demand at good prices by the most critical buyers in the land. Some of this same old reliable strain of blood is still to be found in Mr. Bailey's herd. In fact, four among the best gilts of this superb offering are Susies. We wish to emphasize the fact that any Poland China breeder who is looking for more size in his herd, heavier bone and yet preserving finish and proper Poland China conformation, can find just what he is looking for in this forthcoming sale. Inasmuch as Mr. Bailey has been a modest man, he is not as widely known as many others who are breeding Poland Chinas far inferior to his own. For this reason we would admonish Homestead readers who want a really high-class article in the way of useful, practical Poland Chinas, to bear this sale date in mind, and if they cannot possibly be present at this sale, any bids entrusted to Mr. J. C. Bailey will be placed in the hands of his auctioneers and handled as carefully as if the owner were there. Mr. Bailey will be

placed in the hands of his auctioneers and handled as carefully as if the owner were there. Mr. Bailey is a thoroughly reliable and honorable gentleman, as we can vouch for from coming in personal contact with him for years in a business way. Address him at Marshalltown, Iowa, for catalog.

#### E. J. Brown Sells Duroc Bred Sows February 21st.

On February 21st, Mr. E. J. Brown, of Osceola, Neb., will offer a draft of Durocs from his well-known herd and among them are some very choice individuals. The offering consists of forty head, the breeding of which would be hard to duplicate in any one herd in the state of Nebraska. Nearly every animal to be included in this sale was bred and raised on the Brown farm and some of them have won laurels in the hottest shows in the West. There will be eight daughters of the great Red Knight, first and sweepstakes boar at the Nebraska State Fair, 1905, and also the sire of many prize winners. As a prominent and well-known breeding boar, Red Knight needs no introduction to the 100,000 readers of The Homestead, as he has made a record among Duroc Jersey sires that will be prominent in Duroc pedigrees for years to come. Fourteen daughters of Belle's Echo will be offered and some of them bred to Red Knight, others to Brown's Chief, a son of Belle's Chief, and one of the most promising young sires doing service today. Among the prize-winning sows to be offered is Fancy Maid, a daughter of Van's Perfection, and a winner of second prize at Nebraska State Fair in 1905 and 1906. She is a full sister to Daisy Maid, first-prize sow at Nebraska in 1903, and will be sold safe in pig to Red Knight for a March 2d farrow. She is in the pink of condition, not fat, but just right to do some man a world of good. Another of the good ones is No. 2, a daughter of King of Crimsons, and, bred to Red Knight for a March 14th litter, should make her in great demand. No. 7 is a granddaughter of Beatrice Queen, a good brood sow of the right type and bred to Brown's Chief for March farrow. Among the good gilts of this sale are Nos. 26, 27, 28 and 29. They are full sisters to Beauty Wilkes, the sire of the second-prize boar pig under six months at the Iowa State Fair last fall. They are a rich red color, growthy, broad-backed sows, and three of them are mated to Brown's Chief for early farrow and the other is bred to Red Knight. In Nos. 23 and 24 we have two gilts of the massive, heavy-boned kind, very growthy and the kind that make great brood sows. They are both bred to Brown's Chief. A representative of The Homestead, after carefully inspecting this herd, pronounced it one of the best offerings, as a whole, to be sold anywhere in the state this year. Mr. Brown has a nice catalog prepared and will be pleased to mail one to anyone who will drop him a card asking for same. Mr. Ray Page will represent this paper at the sale and anyone sending a bid to him in Mr. Brown's care will be properly treated. When writing, please mention The Homestead.

**HORSES.**  
**Rhea Bros., Arlington, Neb.**  
Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

HORSES.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 150 Percherons, Belgians and Coachers 150

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

KEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holer." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His 1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. ## ST. PAUL, - NEBRASKA

## TAYLOR & JONES,

IMPORTERS AND BREEDERS OF  
PERCHERON, SHIRE, HACKNEY AND  
BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

## TAYLOR & JONES,

WILLIAMSVILLE, BOX 68, ILLINOIS.

## PERCHERONS AND PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see ONE Percheron before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder

## PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (86577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

## PETERSON'S BLACK PERCHERONS.

FOR \$700 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot.

H. E. PETERSON,

LYONS, NEBRASKA

## HORSES.

This picture is from life, these horses to be sold in the sale. On receipt of ten cents to pay postage we will mail this picture, 15x20 inches.

## Annual Public Sale

### IMPORTED

# STALLIONS

60 EVERY ONE IMPORTED HEAD EVERY ONE IMPORTED 60

WATSON, WOODS BROS. & KELLY CO., of Lincoln, Nebraska, announce their Annual Public Sale will be held at the State Fair grounds, Lincoln, Nebraska, TUESDAY and WEDNESDAY, FEBRUARY 26th and 27th.

30 PERCHERONS 20 ENGLISH SHIRES  
10 BELGIANS and COACHERS

Every one imported by our firm and every horse fully guaranteed.  
Also a few imported

### PERCHERON MARES

THE mares to be offered in our sale will include four of the biggest and best Imported Percheron mares in America. Two of them will walk on the scales and weigh over 4,000 lbs. They are a pair of dark grays and show mares in any country in the world. There will also be two teams of matched black mares, weighing between 3,600 and 3,800 lbs., that are very fancy. Also some fine yearlings and two-year-olds that will please the most critical buyer. If you are in quest of mares you should certainly attend this sale on the 26th and 27th.

No other firm in America put this class of stock under the auctioneer's hammer. No reserve, by-bid or protection, but an honest sale.

Write for illustrated catalog.

# Public Sale

The Largest Sale of Draft Stallions Ever Held in the West will be at Wichita, Kansas, Friday, February 22d, Starting at 8:30 A. M. Sharp

50 Head Percherons, Belgians, Shires and Hackneys. 50 Head

This sale will consist of some of the choicest stallions of our stud, both imported and American bred. As we won every prize in the stallion class at the great State Fair of Kansas, it gives the public the grandest opportunity to purchase a prize winner at their own prices.

### PRIZES WON IN 1906

Champion Percheron stallion at the Kansas State Fair.	First—Best five Percheron stallions, Kansas State Fair.
Champion Belgian stallion at the Kansas State Fair.	First—Best five Belgian stallions, Kansas State Fair.
Champion Shire stallion at the Illinois State Fair.	First—Best five Shire stallions, Illinois State Fair.
Champion Shire stallion at the American Royal, Kansas City.	First—Best five Shire stallions, International, Chicago.
Champion American-bred Percheron stallion at the American Royal.	Second—Best five Belgian stallions, International, Chicago.
Champion Shire stallion at International, Chicago.	Second—Best five Belgian stallions, Illinois State Fair.
Reserve champion Belgian stallion, International, Chicago.	Second—Best five Belgian stallions, American Royal, Kansas City.
First—Best five Shire stallions, American Royal, Kansas City.	Second—Best five Percheron stallions, American Royal, Kansas City.

His Majesty King Edward VII. of England and Lord Rothschild's exhibit of stallions were purchased by us at the Great International Exposition at Chicago, 1906. These Grand Stallions, Girton Charmer and Premvictor, will be on exhibition at this sale. Do not fail to see the Highest Priced Draft Stallions ever imported to this country.

As we are now located at Wichita, we intend holding an annual sale in this city, this being our first. Our AIM is to surprise the PUBLIC with such Stallions as were never before placed at auction. All Stallions will be sold with our regular guarantee of 60 per cent and will be sold so that all payments will not become due until you have made two seasons and one collection from your HORSE.

This sale will not affect our business in any way, as we will have over 250 head left after the sale for our Spring trade, not including our New Importation which will arrive soon.

TERMS—Will be one year and six months from date with interest at 6 per cent from date, or six per cent discount for cash. All credit must be bankable. Send for catalog and calendar.

**Robt. Burgess & Son, - Wenona, Ill.**

## THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props.  
Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 champion-ships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equaled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH & SON.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percheron and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsamt O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produce. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## Registered Percheron Stallions For Sale

GOOD colors, large size, three and four-year-olds. Priced so they will pay for themselves the first season. Also several span high-grade Percheron and Shire mares in bond to registered horses, ages five to nine years old. Address, M. D. WOLCOTT, Gilmore City, Iowa

## 21 IMPORTED STALLIONS 21

FOR SALE—I have recently landed from Belgium, (everything considered) the choicest bunch of imported Belgian stallions and mares that I have ever owned. They range from two to five years old. They are blacks, bays and rouss.

Address, E. H. KNICKERBOCKER, Fairfax, Iowa

## 80 STALLIONS

THE BEST IMPORTED STALLIONS

ONE THOUSAND DOLLARS each. Home bred registered draft stallions \$250 to \$750 at my stable door. Address,

A. LATIMER WILSON, CRESTON, IOWA

20 IMPORTED Percheron stallions arrived Jan. 4, 1907. Your choice, but one, for \$1,000. Also home-bred stallions. Frank L. Stream, Creston, Ia.

When writing to advertisers please mention this paper.

PERCHERON STALLIONS AND MARES FOR SALE. Blacks and grays. Nady Brothers, Fairfield, Iowa.

When writing to advertisers please mention this paper.

## PINE RIDGE STOCK FARM

Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of Percheron and French Horses.

Best chance to obtain a colt by SAMSON. These fast colts are now yearlings. Over 150 head of horses showing more bone, size and quality than any similar number in America. TAVERNIER P. 33719 and F. D. 12610 now at head of the stud. Prices below competition. Barn at Moose Jaw, Sask., Can., in charge of E. F. Maxey.

L. M. HARTLEY, SALEM, IOWA.

### PERCHERONS FOR SALE.

IMPORTED and home bred stallions and mares one to seven years old; several match teams of mares. All stock registered in Percheron Society of America record. New Importation arrived Oct. 10. Hueslum & Wheeler, Fairfield, Iowa

### Percheron Registered Stallion.

FOR SALE—American bred, coming five years old. Coal black, 17½ hands and sound. If you want a stallion, come and see me or write. CHAS. BOLAND, Route 3, Williamsburg, Iowa

### THE OUTPUT OF GOLD AND THE LEVEL OF PRICES.

The farmer who keeps himself informed with regard to the larger relations of the nations to one another respecting industrial and financial questions is sometimes at a loss to interpret the many new signs of the times which now protrude themselves upon his attention. He sees larger and larger markets opening for his products, and witnesses the development of old and new sources of production with growing wonder at the ability of the world to absorb and digest the increased output of farm, mine and forest. He has been taught by all the economists that prices ebb and flow, and that reaction is always equal to the effect of the original stimulus to speculation or industrial activity of a more normal kind; but now he sees broader and broader fields of activity opening throughout the world, and without the expected cessation. Every year is pronounced a better one than its predecessor, and the wise ones say, again and again, "At last, we have reached the climax;" but the next year sees new records of production in agriculture and manufactures, larger totals in the volume of commerce, and still a complete ability of the world to absorb the enormous results of human labor in its manifold channels of employment. Why is this? What new conditions have entered into the problem?

It is not a local question. The prosperity which the United States is enjoying is not peculiar to this country. The entire civilized world, with perhaps the single exception of Russia, is moving forward at a tremendous pace. Factories are everywhere busy; railroad building is maintained at a high rate; the demand for iron and steel—products fundamental to all the heavy industries—is beyond the ability of the manufacturers to supply; and such exceptions to the general rule as we find in revolutionary Russia manifestly explain themselves. This world-wide effect must have a world-wide cause. The problem is by no means simple. Too many elements enter into it to admit of an off-hand solution. The most learned and best informed experts and specialists acknowledge that there are some features of the situation which cannot yet be explained; but there is a strong

drift of opinion toward the conclusion that the present unprecedented forward movement of the world's industries is due to a permanent change of the level of prices, caused by the recent vast increase in the production of gold.

That results of importance to agriculture and all other industries must inevitably result from the flooding of the money markets of the world with gold will impress any one who is at all familiar with modern conditions and who will examine the statistics of the world's gold production for the past century. The average gold production from 1800 to 1850 was only \$16,000,000; from 1851 to 1890, it was \$120,000,000; from 1891 to 1900, \$210,000,000; from 1901 to 1905, \$320,000,000; and for the year 1905, partly estimated, \$379,000,000. Since 1890, the production of the United States and the world have fluctuated, but the tendency has been toward a rapid increase. The following table is from official sources:

GOLD PRODUCTION.		
Calendar Year.	United States.	The World.
1890	\$32,845,000	\$118,848,700
1891	33,175,000	130,650,000
1892	33,000,000	146,651,500
1893	35,955,000	157,494,800
1894	39,500,000	181,567,800
1895	46,610,000	200,406,000
1896	52,022,000	202,251,600
1897	57,363,000	236,073,700
1898	64,463,000	286,879,700
1899	71,053,000	307,168,800
1900	79,171,000	255,634,500
1901	78,667,000	262,492,900
1902	80,000,000	296,737,600
1903	73,592,000	325,961,500
1904	80,465,000	346,892,200
1905a	86,338,000	379,000,000

aEstimated.

Much of this vast increase is, of

course, absorbed in the arts, but a vast portion of it goes to the mints of the nations and finds its way into monetary channels. The increase, as is generally known, is due, in a measure, to improved methods of reducing ores, resulting in making gold mining on a large scale practically a manufacturing business. But whatever its source, it cannot but have great influence upon the general level of prices of agricultural and other products; upon rates of interest, and upon the general course of business.

It seems inevitable that, if this increased output of gold is maintained and further increased, as appears entirely likely, prices are destined to go still higher and agriculture to attain to still more attractive possibilities; but, as before stated, there are so many elements of uncertainty in the problem that caution is advisable in adopting and acting upon final conclusions.

### PREPARING THE SEED BED FOR OATS

Elsewhere in this issue will be found a communication, entitled "Facts About Oat Growing," by Mr. J. O. Winship, of Putnam county, Ill. The principles there enunciated by Mr. Winship are undoubtedly correct. As a general rule, the seed bed for small grains is not properly prepared, and it is not at all difficult to find instances where one square foot produces one hundred plants and the next square foot not a single plant, as pointed out by Mr. Winship.

Many of our readers will take exception to his advice about plowing the soil in the fall; that is, cutting the corn and plowing the corn stalk ground.

Under certain circumstances this plan answers the purpose satisfactorily, but we believe that throughout the greater portion of the corn belt it is advisable to keep the seed bed a little firmer than will be the case when it is plowed in the fall. The danger is when the seed bed is loose that the crop will lodge, and this, of course, greatly interferes with the yield and also impairs the quality of the grain.

However, we doubt if anyone is in a position to say that this plan or that plan or any other plan is always the best under all circumstances, even in the corn belt.

The method of preparing the seed bed, which we have found satisfactory and which has led to a yield of over sixty bushels per acre for many years, is as follows: Break the stalks some time in February or March. Just as soon as the work can be done, rake them up and burn them. When the soil will work in the spring without puddling, double disk by lapping half the disk each time. Then harrow once or twice and sow the seed. So much the better if a drill is at hand, but if it is not available, sow broadcast. Then double disk lightly in the opposite direction and harrow once or twice. Bear in mind that the diskings must be light, otherwise there is danger of working up the soil to too great a depth. We have found that ordinarily this is work that can be done with two horses, because the disk will not be more than half set. It will even then thoroughly break all the surface and a fine seed bed will result.

Of course we realize that it takes labor, and yet it is labor that one is generally well paid for in the increased yield. This is especially true if the crop is to be put in broadcast, because the covering will be much more uniform and the crop will grow more uniformly than if the seed is scattered on the ground and the soil disked once and harrowed once and the work allowed to stop there. It is doubtful if the oat crop is profitable in many parts of the corn belt even at a yield of sixty bushels per acre, but an examination of statistics will show that the average yield is less than forty bushels; indeed, in some cases it is less than thirty-five bushels per acre. When this low point is reached there is certainly a loss in growing the oat crop, though it is almost impossible to drop

Imported Percheron stallion, Ventrose, foaled 1903. Sire and dam both Brilliant bred. Imported, owned and for sale by Messrs. Taylor & Jones, Williamsville, Ill. Cash price on this stallion, \$1,200.

it out of the rotation because so many depend upon it for seeding down clover and timothy.

### THE GOVERNMENT'S REPORTS ON HOGS.

According to statistics recently published by the national department of agriculture the hog population of the United States has increased to the extent of eight million head during the last four years. The number of hogs as enumerated by the government are as follows:

January 1, 1907.....	54,794,000
January 1, 1906.....	52,102,847
January 1, 1905.....	47,302,511
January 1, 1904.....	47,009,367
January 1, 1903.....	46,922,624
Gain in four years.....	8,000,000

These figures have a strange look to the swine raisers of the great central West. Go where you will and make inquiry concerning the hog situation as you desire and you will find everywhere that the supply of hogs is reported short instead of long.

Of course the data from which the estimate on Jan. 1, 1907, was taken was being accumulated during the entire year of 1906, and so many factors enter into the equation that it is doubtful if the department of agriculture with its experts is able to get within a few million of the actual number of living hogs on a given date.

Prices have not indicated during the last few months that there was any increase of hogs in the country, and these prices are based not only on the number coming to market, but the number that are still in the feed lots. Disease carried away a considerable percentage of hogs during the last year, and it is a matter of history in trade circles that a great many sows that should have been kept over for breeding purposes in 1906 were sent to market the previous fall. Hogs multiply rapidly, it is true, but prices for some time have been such as to tempt men to send in their heavy breeding stuff. When this is the case it is a much more difficult matter to catch up with the supply than it is for the department of agriculture to figure out the number.

The first day that the statistics of the department were published the hog market was noticeably affected. What the final result will be is hard to say, though the natural effect is to bear prices.

### A SPECIAL OAT INSTRUCTION TRAIN.

The following communication has been received from Mr. Geo. A. Wells, secretary of the Iowa Grain Dealers' Association:

You are no doubt well aware of the important part taken in the agitation for the improvement of corn in this state by the Iowa Grain Dealers' Association, and the work that we have done in connection with the Iowa State Agricultural College, by the general organization of seed corn special train programs, etc., that enabled Professor Holden and his assistants to give lectures to upwards of 150,000 farmers within a period of a few months, that would otherwise have taken several years to accomplish.

In December, the officers of the Iowa Grain Dealers' Association invited the representatives of the Ames College to meet with them at Des Moines and discuss the question of improvement of the oats crop in this state, and as a result of that meeting, the work has been started along the same lines as was done with the corn.

Three days were given at the short course to a class in the study of oats. The upper part of the stock pavilion was fitted up especially for this work, pertinent statistics being prepared on charts and a large supply of each Chicago grade kept on hand for the use of the students in their work.

At the conference at Des Moines it was decided that there were three slogans that might be used to advantage in this work for the improvement of oats:

(1) Selecting and cleaning of the seed.

(2) Formalin treatment to prevent smut.

(3) Preparation of the seed bed.

As an association we have started out to arouse an interest in this question by every means possible, and I enclose herewith copy of a circular letter that was addressed to the secretary of each county institute in this state, and we have found that the suggestions therein resulted in considerable interest being taken at farmers' institutes and letters that we received from the secretaries indicate that the work will be taken up more vigorously next year.

The C. M. & St. P. railway have consented to operate a seed oats special train on a portion of their line during the month of March. This will be a starter only of the seed oats special train program that will undoubtedly follow during the following year, and we believe that this will give an impetus to the work and have the same practical results that were accomplished by the seed corn special. The enclosed blanks and letters are sent to the station agent and grain buyers at each station where the seed oats special train is proposed to stop. These are self-explanatory and give an outline of our method of conducting this work.

The Homestead heartily endorses a movement of this character. The oat crop may not be now and may never be

a profitable crop in the state of Iowa, and yet it is doubtful if the present large acreage will materially decrease. In the first place, timothy and clover can be most satisfactorily seeded with the oat crop, while secondly, there is need for a supply of straw on the average farm and the demand for this is well satisfied by the oat crop.

The three plans suggested for increasing the yield of the oat crop are exceedingly practicable. Treatment of seed for smut requires practically no cash outlay and involves only a small amount of labor. The grading of grain means the use of a fanning mill, but it has been demonstrated over and over again by successful men and by the stations that there is profit in the grading of grain. As to the preparation of a seed bed much may be learned on this point by the average man who sows his crop on corn stalk ground.

We hope that this campaign in behalf of improving oats will be as far-reaching before the matter is ended as was the educational campaign in behalf of corn improvement. The opportunities are just as great in one field as in another.

### THE FEEDING OF ALFALFA MEAL.

A Missouri subscriber, W. E. Marrs, desires to get some information on the feeding of alfalfa meal. He wants to know how to feed it, the quantity to use and what other feeds it should be mixed with.

We submit Mr. Marrs' inquiry to those of our readers who have had experience in feeding alfalfa meal. This food is now being used extensively in many parts of the corn belt to take the place of other protein foods during the winter, and it will no doubt be used more extensively in the future than in the past.

The plan of feeding alfalfa meal to hogs suggested at a recent convention by Mr. A. J. Lovejoy, of Roscoe, Ill., was to mix together ground alfalfa, ground barley or oats and ground corn; steam the mixture until it was thoroughly softened and then feed while warm. Mr. Lovejoy claimed that this gave excellent results when such a mixture was fed to growing stock or to brood sows.

### THE COOKING OF FEED.

The following communication has been received from one of our subscribers, Mr. Arthur Colley of Clinton county, Mo.:

I would like a little advice, through the columns of your paper, on the subject of cooking feed for hogs during the winter, and especially on the value of cooking corn. I use a feed cooker and cook my corn whole. Some people tell me that in doing this a great deal of the feeding value is lost. What is your opinion on this subject? Would you advise cooking whole oats and feeding them warm or grinding them and just warm the ground grain in the form of a slop? Do you regard oats as a good grain for pigs? It has always been my opinion that oats contribute to the making of bone and muscle.

We have never advocated the practice of cooking all grain that is fed to any class of farm animals. Indeed, experiments show that there is nothing to be gained, but, on the other hand, sometimes loss results from the cooking of grain.

This does not mean that there is no place for cooked grain. There is scarcely a successful swine breeder in the corn belt but who makes a practice of using a certain amount of cooked feed.

In the case of a bunch of fattening hogs one can make larger gains during the winter if he will give them one meal a day of well-cooked slop. This may be composed of whole corn, whole oats, with the possible addition of a little oil meal. Not that these foods are rendered more digestible by the cooking process, but rather that they become exceedingly palatable and for that reason they add zest to a fattening animal's appetite, and it has always appeared to us that the dry foods consumed morning and night were put to better use when a meal of this kind was given at noon.

The above relates especially to a bunch of fattening hogs in winter, and it is also applicable in the case of brood sows. A meal of cooked feed once a day during the winter seems to get brood sows into the very pink of health, and where this practice has been kept up we have never seen a sow have trouble at farrowing time. It has the effect of keeping the bowels laxative and this is not by any means an unimportant matter in handling any kind of hogs in winter.

As to the feeding value of oats, it

## Will You Just Try a Pair of RUBBERHIDE BOOTS

At Our Risk

The Rubber Boot With a Sewed Leather Sole

You want a boot that will keep your feet perfectly dry that will keep your feet comfortable that will give you long and durable service, and that will be genuinely economical. Then try the Rubberhide Boot at our risk. It lasts longer; is more comfortable and gives better service than any other rubber boot in the world. It is the only rubber boot with a sewed leather sole. Made of the purest rubber, with heavy leather outsole, and leather innersole, with a rubber welt and middle sole, all joined together (without pegs or nails), and joined to the upper so securely that a team of horses can't pull them apart. And not a drop of water can find its way in. The heavy leather sole protects your feet from stones and rough surfaces, and does not cut or snag when you step on a nail or a sharp stick.

### It can be easily resoled

Any cobbler can "tap" or half-sole the Rubberhide. The uppers are so good that they will outwear two or three pairs of soles. The inner sole of leather prevents excessive perspiration which makes the ordinary rubber boots such a nuisance. The Rubberhide is the only absolutely water-tight boot made; It will last longer than two or three pairs of rubber boots; It will keep your feet comfortable all the time; It is the most economical boot made.

### Will you just try a pair at our risk?

#### NOTE THIS GUARANTY:-

If you buy a pair of Rubberhide boots and find that they do not outwear two pairs of best quality rubber boots, we will refund to you the money you paid for them.

(We say two pairs but in reality experience has proved that usually the Rubberhide outwears three and even four pairs of ordinary rubber boots.)

If your dealer cannot supply you, and will not order for you,

#### SEND TODAY FOR CATALOG

and get a pair on our money back guaranty. We prepay express charges.

**RUBBERHIDE CO., 712 Essex Bldg., Boston, Mass.**

must be frankly acknowledged that there is an important place for this grain in the hog ration, either fed cooked or dry. Many successful swine men make a practice of allowing their brood sows to have access to whole oats at all times. When this is the case very little corn is needed—just enough so that they are brought into a reasonable condition of fatness before farrowing time. Bear in mind, however, that oats contain considerable fat and that this grain alone will bring sows through in good shape.

### Facts About Oat Growing.

To the Editor of The Homestead:

In answer to Mr. Houtz, will say that there are several reasons for the decreasing yield of oats, namely, the poor quality of seed sown even of good varieties, the uneven distribution of the seed, the uneven depth of planting and the poor preparation of the seed bed. It is as necessary to sow only the best grains of oats as it is to select the best ears of corn for seed. I find it pays to fan and screen seed oats so thoroughly as to leave not more than 25 per cent for sowing. Those screened out are just as good for market or for feeding. Then each seed will produce a vigorous plant that will stool out well and better withstand the attacks of insects and blight and rust.

The distribution is so uneven that I have counted a hundred shoots on a square foot and found none at all on the adjoining square foot. I have also found them planted from nothing to four inches deep. Oats when sown in corn stalks nearly all go into the low places and when disked in these low places are covered very deep. The thick places do not produce well; the bare places produce nothing; those not covered usually do not grow, and those covered too deep come up weak and are very susceptible to rust. Where oats are sown broadcast it is a good plan to thoroughly disk the field, then sow and disk in shallow so as not to cover them too deep. I use a disk drill and it works splendidly, sows evenly and plants at an even depth. The yield is greatly increased over broadcast sowing. The only fault I find with it is that it will drill in oats without preparing the seed bed, and some farmers are foolish enough to put in their crops that way.

It takes time to put oats in right, and the season for sowing oats is shorter than for other crops. Why can't we do part of the work in the fall? Stalk feed is not worth more than fifty to seventy-five cents per acre, and the tramping of the stock usually does more damage than the feed comes to. I find it pays big to keep the stock in yards and sheds, and cut up enough corn to feed through the

winter, either whole or shredded, and raise some clover to help out. Then plow as much of the stalk ground as possible for the succeeding oat crop. Plow just as well as for corn. The stalks will not bother the oats. That will give time to put the oats in right in the spring, and oats do much better on the fall plowed fields. It is true that plowing comes at husking time, but it will pay to hire a little extra help or to postpone part of the husking for a few days.

Two bushels of seed per acre drilled in will give a better stand than three bushels sown broadcast. I doubt that over 50 per cent of the seed oats sown broadcast ever grows to maturity.

To conclude will say, thoroughly prepare the ground, plow as much as possible in the fall, use only the very best of seed, distribute the seed evenly, cover an even depth, not too deep; sow as early in the spring as the ground is in good condition, drilling in if possible. If this is done I think the yield of oats will soon be greatly increased. The above is not theory, but actual experience. J. O. Winship.

Putnam county, Ill.

The oil cooler is replacing the water cooler for small gasoline engines on the farm. In a warm room, water is all right, but out doors where a farm engine, especially the portable style, generally is located when at work, something unfreezable is required.

### Cancer and Tumor Cured.

With a Combination of Oils. Write to the Originator for his free books. Beware of imitators. Address Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

Messrs. Taylor & Jones, of Williamsville, Ill., write: "We have to report a good barn trade. Nearly every week we have reported many new sales and now we are pleased to report some very important ones. Mr. Geo. A. Hogg, one of the wealthy and well-known steel and iron foundry men, of Pittsburg, Pa., came direct here to our barns expecting to find just what he wanted and he got it in a very high-class prize-winning Shire stallion that was one of four that won first at Illinois State Fair by one sire. Messrs. C. D. Fowler and E. M. Keer, of Toulon, Ill., came here and got their money's worth in a grand good 2,000-pound imported prize-winning Percheron, a gold medal horse. Mr. C. T. Walton, of Bethany, Ill., was well pleased in an extra good home-bred Shire, and Mr. S. C. Langenwalter, of Lebanon, Ill., took a very handsome home-bred Percheron stallion. Mr. W. C. Hawkins, of Fairmount, Ill., got a beautiful imported Shire stallion that will please his people in one of our very best-bred horses, while Mr. James Welsh, of Knightstown, Ind., got a very flashy Percheron horse. Messrs. Walden, Blume & Co., of Charleston, Ill., went home happy with a big, bold-going imported Shire colt; Mr. F. M. Minshall, of Viroqua, Wis., got a home-bred colt that he writes almost filled his season book in advance as soon as he got home, and Messrs. Patterson & McLaughlin, of Taylor Ridge, Ill., were made happy by buying an 1,800-pound two-year-old Percheron. We have our barns yet full of good ones." See advertisement on page 47.

## Farm Furrows

Turned by a Practical Farmer.

A good disposition and good cooking go hand in hand.

Cane seed may be ground and used as buckwheat in making pancakes.

Twenty degrees below zero sounds like \$20 worth of winter clothing to me.

The man who makes it a business rule never to sign his name to any commercial paper saves himself lots of grief.

Once we had a milk hauler whose name was Cheralgkdye. He always said he didn't care what people called him just so they always called him in time for dinner.

What village or community is there existing that has not seen some of its best business men financially ruined by dabbling on the board of trade or with bucket shops!

It is remarkable how leather has advanced lately. It is said to be due to the large amounts that are being used in the manufacture of automobiles, ladies' gauntlet gloves, etc.

I always feel sorry for the man who has to move the first of March every year, and I feel sorrier for his wife. I have known families to use up all the profits they had earned in a year in getting settled on the next farm.

A great many boys never appreciate the comforts and advantages of their parental home until they are cast on their own resources. A year or so spent as somebody's hired man will bring about a great change for the better in the disposition of some boys.

Crude oil is getting to be a mighty popular vermifuge for stock. We notice some people confuse it with crude petroleum and other oils having the nature of kerosene and gasoline. Crude oil is thick, dark and heavy, and the only method of applying it to stock on the ordinary farm is by daubing it on with a brush.

The boy that has been brought up in luxury and does not know what it is to work for a dollar is surely handicapped when he comes to business.

As much as we dislike to see old Mother Earth covered with snow and snowbanks, we are not going to grumble, for this blanket is just the thing to protect plant life.

If you will use kerosene to soften the dried grease on your plows you will have no further trouble in removing it. I spent many hours scraping before I thought of trying it.

Corn sells for thirty-five cents at the elevator, but the packer who buys your hogs pays you sixty cents for the corn that you fed them. It looks as if the man who sells his corn could think a while on the proposition.

I am of the opinion that the farmers of Kansas and Nebraska have been more successful in growing alfalfa than those of other corn states simply because they have been more persistent, and consequently have conquered the difficulties.

It is a great mistake for parents or anyone else to tell children that "bears will get them if they don't watch out." I have known children that had no more

**WAGON SENSE**  
Don't break your back and kill your horses with a high wheel wagon. For comfort's sake get an **Electric Handy Wagon**. It will save you time and money. A set of Electric Steel Wheels will make your old wagon new at small cost. Write for catalogus. It is free.

## You Can Increase Your Feeding Profits

**YOU** can increase your feeding profits, make more money in less time, and keep every animal on your place in a vigorous, healthy condition, by regularly adding a little Standard Stock Food to the ration.

Let us tell you what *Standard Stock Food* does.

A very little of it flavors the entire ration and makes it taste good.

It stimulates the flow of all the digestive juices, enabling the animal to digest its feed more easily, more quickly and more thoroughly so that it gets a large percentage of nutriment from the feed.

It decreases the waste and increases your profits, because it makes every pound of feed you feed go farther.

It tones and invigorates the entire system and puts every unthrifty animal in a thrifty condition. It makes a horse work better; a cow give more and better milk; a steer, a hog or a sheep take on more flesh and finer finish; a colt or calf grow more rapidly.

*It makes stock thrive.*

### Standard Stock Food

"It Makes Stock Thrive."

And you can use the Standard at less cost to you than any other stock food, because a dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer and produce more and better results than a dollar's worth of any other stock food

made, whether it costs 5c or 15c a pound.

You can easily prove this to your own satisfaction, simply by examining various stock foods and their manufacturers' directions for feeding.

The Standard looks better, smells better, tastes bet-

at least cost.

We urge you to investigate before you buy.

You can see for yourself why the Standard gives so much better results.

You run no risk for we sell you on our Square-Deal, Money-Back Guaranty.

We have more than 400,000 satisfied customers who have proved that "It Makes Stock Thrive."

**Go To Your Dealer**

and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

**FREE TO YOU.**

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price \$5 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

**Standard Stock Food Co., 1516 Howard St., Omaha, Neb.**

fear of darkness than they had of the light, simply because the darkness was never made fearful to them.

The terms "pure-bred" and "thorough-bred" mean about the same thing, yet the latter name is more properly applied to one breed of horses. It doesn't sound good to our ears to hear people talking about thoroughbred hogs. It makes us think of the race horse type of porkers.

For the young farmer just starting out next spring it seems to us that he could find no better place to get stocked up in machinery than at some of the farm sales. A great many tools that have been used for only one season will sell for half price, while they are just as good as new, practically speaking.

Everybody knows the blue jay, and it is true that he is one of the biggest rascals in the bird line that inhabits our country. Some way we like to see him, nevertheless, inting about and stealing a few kernels of corn from the corncrib when he can secure food in no other way. He stays with us all winter.

When the time comes that every man in the central West is able to obtain a good stand of alfalfa, then surely will the great corn belt be the garden spot of the world. Just think what the possibilities are when land will produce five tons per acre of cured alfalfa, a food richer than bran! When I contemplate it I am glad I'm living.

A great many people fool themselves in thinking that a steer or cow needs to be high on the legs in order to be a big animal. The length of the legs don't have anything to do with the size; in fact, the longer the legs of a steer the poorer the feeder, generally. The wide sort of a beast right down next to the ground is the kind that puts the meat on.

For twenty years we have studied

## How To Build Telephone Lines

You want all the information you can get before putting up a rural party line. Knowledge at the right time will save you money. We will be glad to furnish you with all the points of the practical side of the business.

We have made a specialty of telephone service for farmers for many years, and we know every step of the way. Our experience, and expert help are yours for the asking.

### Write For Our Free Books On Telephones:

**Chicago Telephone Supply Co., 149 Beardsley Ave., Elkhart, Ind.**

snow birds and we begin to believe that they are about as sure weather forecasters as most men all the time and the weather bureau most of the time.

It takes five minutes to bed a horse well. This little job properly done saves ten minutes in grooming filth from his limbs. It saves a foul smelling team to work around, and, moreover, adds to the comfort of the horse, consequently to his welfare.

The man with a sure and plentiful supply of water for stock at this season of the year can never appreciate his condition unless he has sometime had to pump water by hand or dig a temporary shallow slough well to relieve the thirst of a hundred head of bawling cattle.

I am hoping that the day will come when each breed of live stock will find its own peculiar set of conditions, in order to end some of this rivalry between the breeds. I can hardly make up my mind that the Short-horn, Angus and Hereford are actually competitors, because each breed is adapted to a little different set of conditions.

## THE HAWKEYE Grain Grader and Cleaner

### BUILT EXPRESSLY FOR FARMERS

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.

It will clean and grade seed wheat.

It will clean and grade seed oats.

It will separate timothy from clover.

In short, it will do any work required of a fanning mill and grade seed grains besides.

If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by

**PARSONS HAWKEYE MFG. COMPANY, NEWTON, IOWA.**

In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## THE NEED OF THE FANNING MILL.

The campaign inaugurated in the interests of better corn a few years ago has in a large measure succeeded, and as a result corn growing is on a better basis today than ever before. Up to date, however, the small grain crop has largely been neglected, and the time is at hand when this should be taken up in earnest by our experiment stations.

There are three practical methods that may be applied to the improvement of small grain. First, better seed bed; second, treating the corn for smut; and last, grading the grain before sowing it.

It is the grading of grain by the use of the fanning mill that we have in mind to speak of at this time. Grain as it comes from the thrashing machine, and especially oats, is very irregular in the size of the grain and usually there is a considerable percentage of broken kernels. When this mixture is sown we find that the small, light grains produce feeble plants. These plants start life more slowly and never equal in growth the plants that come up from the strong grain. The crop in such a case cannot possibly mature uniformly, and everyone knows that grain cut before it is reasonably mature will always be light and chaffy.

By blowing out or sifting out all light, small grain this part of the seed is of value for feeding purposes. If it is sown along with the heavy grain it is not only a loss, but a hindrance

# "My pigs were dying"

Writes Mr. F. L. Miller, a prominent stock raiser of Beaman, Iowa, after having the above unpleasant and very unprofitable experience not long ago.

And yet he feels he was quite fortunate.

You know there's some truth in that old saying that "there's no loss but there's some gain."

Well, in Mr. Miller's case he gained a great deal more than he lost—that's why we say he was fortunate after all.

First, he fortunately obtained the right remedy at once and immediately stopped the death loss among his pigs.

Second, he gained experience that will enable him to prevent such loss and sickness among his hogs in the future and thus he values a hundred times more than his loss amounted to.

Third—now he's master of the hog disease problem.

The purpose of this advertisement is to tell you how to become master of all stock diseases, too, and before you experience loss if you will act on the advice and do as Mr. Miller did.

And that is—Use Dipolene—the greatest disease preventive and dip ever offered to farmers.

Take advantage of Mr. Miller's experience—don't wait until your stock is threatened, or their death picks your pocket of their value.

Just read this letter. It's more convincing than pages of argument we can write simply because it comes from a fellow farmer who has used it.

MARSHALL OIL CO., Marshalltown, Iowa, Gentlemen:—I used your dip on 400 sheep and about 175 pigs. It killed the ticks on both lambs and sheep at the first dipping. Our pigs were dying from sour mouth and skin disease. We dipped them several times and I am satisfied we would have lost a large number but for your Dipolene. I shall always use it.

F. L. Miller, Beaman, Iowa.

Isn't that strong evidence.

Isn't that actual, convincing proof? Then why take chances. Why put off getting Dipolene and being fortified against loss.

## DIPOLENE

THE ONE MINUTE STOCK DIP

It will stop all diseases of cattle, horses, sheep or swine: kill lice, ticks, fleas, etc., cure scab, mange or eczema and do it in double quick time.

It not only cures disease but it keeps it off your farm, if you will use it as a preventive by spraying your pens, sheds, barns, etc.

To relieve you from any doubt, from any risk in giving Dipolene a trial we willingly make you the following

**30 Days Free Trial Offer**

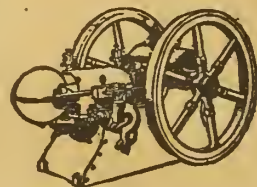

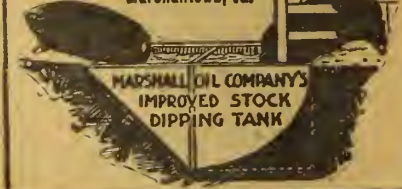

Buy a can of Dipolene from your dealer, if he does not handle it then send to us direct—we pay the freight. Try it 30 days and if not as represented, send it back at our expense. All dealers have authority to make this liberal offer. Accept, no substitute—there's none "just as good."

Isn't that a fair, open offer?

Ask us to send you "A Budget of Real Letters" from farmers—letters like Mr. Miller's in their own words and handwriting—they'll interest you. Also circular on our dipping tank and booklet "Dipping for Dollars"—they're free. If you need a tank ask your dealer to show you our Improved Stock Tank—the best made. Free circular tells why. Round bottom prevents drowning.

MARSHALL OIL CO., Dept. D2,  
Marshalltown, Ia.

## LATE MINING NEWS.

10c. FOR 6 MONTHS.

**TRIAL SUBSCRIPTION** An illustrated weekly up-to-date mining paper with all the latest news of the great mineral camps. Keep in touch with the Great West. Sample copy free. COLORADO GRAPHIC, 250 Toltec Bldg., Denver, Colo.

we saw a bunch of hogs sell at auction that realized the owner about ten cents per pound. We could scarcely see how these hogs could be fed out at a profit. In that case, even though prices are high now, we believe that the seller had the better end of the deal.

A sow ought to raise an average of seven pigs, and these pigs if sensibly handled can be brought to weigh eighty or one hundred pounds a good deal more cheaply than they can be bought. Of course we can imagine men being so situated that it is not practicable to keep many brood sows around the farm, yet at the same time they need the hogs to feed out with their cattle. In such cases men can afford to pay a good stiff price for stock hogs, because all the gains they make will be picked up from waste around the yards, and in that case it will be clear profit. Indeed, nowadays about all the profit the average steer feeder expects to get out of his operations is what he makes on the pork end of the deal.

In every community there are those who will sell hogs in the fall and let the other fellow finish them, and there are always those who are in a position to buy; but as a general proposition for the average farmer it is our opinion that it pays each man to raise his own hogs.

## DISKING ALFALFA.

The Arizona Station has given some attention to the matter of disking alfalfa, and the result of work there leads to the conclusion that it pays to disk.

One effect of the disk is to split and spread the crowns of many of the plants, thus causing them to stool out and send out an increased number of stems. If the disks are only set at a slight angle little damage will result from the operation.

It forms a mulch on the surface and tends to conserve soil moisture. The work may be done before growth begins in the spring, or after any cutting.

Disking sometimes has the effect of destroying certain insect enemies. In Kansas and Nebraska grasshoppers have been known to be reduced in numbers by early spring disking. It is conservatively estimated that using the disk sensibly on a field of alfalfa will increase the yield 10 per cent.

The Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## VETERINARY MATTERS.

**PROFESSIONAL** Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### MANGE IN HOGS.

Please tell me how to cure mange in hogs.

Isolate affected hogs; change unaffected hogs to clean quarters and at once clean up, disinfect and whitewash old pens and places occupied by affected pigs. Spray and scrub each affected hog with a warm 1-50 solution of coal tar dip in which flowers of sulphur have been very freely mixed and repeat as required until hogs are well. Also give unaffected pigs one thorough washing with same solution as a preventive and watch them carefully, repeating the application at the first sign of trouble. Feed light, laxative rations avoiding heavy corn feeding.

#### TUMOR.

I have a red short-horn cow five years old, weight about 1,300 pounds, that has a growth or bunch on her right flank about the size of a coconut, commencing at the bottom of flank and extending upward about one-third the distance to the hip bone. It seems to be between the body and outside skin, as I can move it back and forth and up and down. The hunch is hard and I cannot find any soft spot in it. I noticed it about two months ago and it is gradually getting larger. The cow raises a calf every year and is in calf now since July. So far I have given no treatment. What do you advise?

It would require an expert examination to determine exact nature of tumor described. Apparently it is a fibroid tumor and might be operated upon by an expert, but as it may be a rupture it would be best to leave it alone unless a qualified veterinarian can be employed.

#### SPINAL MENINGITIS.

I should like to have you tell me what ailed my cow and how such a case should be treated. She was running in stalk pasture with plenty of good well water. I fed her a little corn twice a day. She first got stiff in the right front leg and next morning she was stiff in the hind parts, but went to the stalk field and ate the same as usual. That night she got down and lay on her side for two weeks with her legs stretched out and her head back as far as she could get it. After she was down her legs seemed to be limber and natural. The muscles in her neck seemed to draw down toward her shoulders, and the cords in the top of her neck were drawn tight. She did not bloat any at all. Had to water her with a bottle, as her neck was too stiff to allow her to drink otherwise. Her urine was natural and kept bowels open with linseed oil. Glauber salts and sweet lard given alternately as needed. Was giving milk before sick. She died after two weeks.

This is but one form of so-called "corn stalk disease" so common where cattle

are pastured in corn stalk fields and regarding which so much has been said in this department of the paper and its editorial columns. The disease is practically incurable, but cow should have had a two-pound dose of castor oil when first taken sick and this might have prevented the final results had she been kept out of the stalk field and been fed simple laxative rations in yard.

#### LYMPHANGITIS.

I should like some advice in regard to my horse, ten years old, that has a bad case of lymphangitis. One hind leg is swollen up and so sore that he cannot put it on the floor or ground.

The attack follows a period of idleness during which the horse is generously fed on rich food. To prevent the disease always cut down the grain ration when a horse has no work to do and see that he has some out-door exercise each day. At time of an attack bandage leg from foot to body with soft straw or hay rope and keep the rope bandage saturated with hot water in winter or cold water in summer and put on more bandage high up as weight of water forces first bandage downward. Feed soft bran mash and in each dissolve a tablespoonful of saltpeter; also dissolve same amount of saltpeter in each pailful of cold water and keep the water in front of horse all of the time. Three or four ten-drop doses of tincture of aconite in water along with two dram doses of saltpeter should be given at intervals of three or four hours at outset of attack. A physic of raw linseed oil is indicated if the horse is fat and costive. A physic ball should only be administered by the qualified veterinarian and after the high fever has subsided.

#### SICK SHEEP.

I bought seventy-five head of sheep in August and they did finely for a while, when they became troubled with sore eyes and a cough. Some of them got very thin and weak, so that they would fall down and in a few days would die. Some of them scoured very badly and some of them are losing their wool. They seem to have good appetites. I have lost five and another one is down now. Some of them are swollen around the head a little. I feed them corn and corn fodder and they have the run of a timber pasture with underbrush. These sheep are young ewes and with lamb. Can you tell me what to do for them?

The sheep have a complication of troubles, but the swellings about the head (under the jaws), the weakness, scouring and cough, point to the presence of intestinal worms, and possibly worms in the lungs. The eye disease may be from other causes. As ewes are in lamb, it is scarcely safe to use strong medicines for destruction of worms, but at once the ewes should be well fed on a mixture of whole oats, bran and linseed oil meal or cake along with best of hay and adding cabbage, roots or silage if obtainable. Better keep them out of the woods pasture. Hay should be clover and timothy or alfalfa, rather than timothy or prairie hay alone.

## Chief Cause of Hog Losses

This exposure shows stomach and intestines taken from a twenty-five pound shoat, full of intestinal worms.

This shows liver of same shoat, with worm in Bile Bladder, X mark showing location. The duct through which worm has come was split with a knife to show the worm.

#### To Whom It May Concern:

During the month of August, 1906, my shoats got sick, and a number of them died. On August 27th, Mr. Deal, representing the Iowa Stock Food Company, called at my place and told me my hogs were dying on account of worm trouble. In order to make sure of this, we killed one pig. On examination we found the stomach and a portion of the small intestines full of intestinal worms. Some of the worms had worked their way through the bile duct and into the bile bladder and liver.

The jar that Mr. Deal carries with him contains the liver, stomach, intestines and worms taken from this shoat. If anyone doubts this and will write me, I will, if necessary, go before any notary public and make oath to the above fact.

I fed Iowa Worm Powder to the balance of my pigs. It cleaned them of worms, and I had no more losses. Iowa Worm Powder will accomplish all that is claimed for it. I never saw anything that would remove the worms so effectively. I also consider Iowa Stock Food the best appetizer and conditioner I ever fed. The feeding of these products has saved me my crop of pigs. Anyone can be convinced of their value by using them.

Very truly,  
G. L. POULSON.

Colfax, Iowa, Sept. 19, 1906.

**FREE!** To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing. Address Dept. A.

**IOWA STOCK FOOD CO.,** Jefferson, Iowa.

Gasoline in tablespoonful doses mixed with six ounces of new milk and given every three days for two or three times is generally effective for worms of sheep. For eye disease, sponge eyes once daily with a saturated solution of boracic acid, then puff between eyelids a little of a mixture of equal parts finely powdered calomel and boracic acid.

#### SPAVIN LAMENESS.

I have a bay horse coming five years old that has been lame in his right hind foot or leg since I got him last spring, and I cannot locate the trouble. In the barn he rests his foot lightly on the toe and when made to move seems afraid to set his foot down flat. He limps at times when first led from the barn, but seems to get better when exercised. He does not favor the leg when pulling, but have seen him carry it for a few steps when running in the pasture. He wears the toe of the hoof round. Have had his foot trimmed out, but it seems to be all right. Have also had him shod, but it does not do any good. At times he is better and can hardly tell that he is lame at all. What do you think is the matter with him and what should I do to cure him?

This is a plain case of hock lameness and spavin, either external and apparent or internal and invisible (occult), is the cause. Test for spavin if it cannot be found low down on inner front aspect of the hock by picking up foot of affected leg and holding the hoof as close up to the stifle as possible to shut the joint tightly upon itself. Hold thus for three or four minutes, then drop it and have horse instantly trotted forward. If there is spavin lameness he will now go on three legs for the first few steps and then be much lamer than previously. Firing and blistering of the hock joint by a qualified veterinarian and to be followed by at least six weeks' absolute rest, tied up so that he cannot lie down in narrow stall, will be the proper treatment, but occult spavin is most unsatisfactory to treat.

#### Only One "BROMO QUININE"

That is LAXATIVE BROMO Quinine. Similarly named remedies sometimes deceive. The first and original Cold Tablet is a WHITE PACKAGE with black and red lettering, and bears the signature of E. W. GROVE, 25c.

#### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

## FARM DRAINAGE

BY PROF. A. MARSTON, AGRICULTURAL COLLEGE, AMES, IOWA.

While the construction of large drainage ditches attracts more public attention than tile drainage, yet anyone thoroughly conversant with drainage must admit that tiling is the more important. In fact, the real object of our drainage ditches should be considered simply to provide outlets for tile drains. The largest ditch can remove the ground water for a distance of only a few rods from its banks, and while such ditches can remove the standing water from ponds, drainage must be extended beneath the surface to really fit the soil for cultivation. After the completion of all drainage projects now under way, hundreds of thousands of miles of drains must be constructed before the land will be really reclaimed.

The writer of this paper can speak from his own personal experience of the vital necessity of tile drainage. He has had the good fortune to be possessed of the title to some of the fertile lands of the central West. During the recent wet years disastrous experience brought to his attention the fact that much of this fertile land was practically worthless in wet seasons, for the production of crops. Each year the expense of preparing the soil, of planting the seed, and of cultivating the crop was as great as it would have been for a good crop, and while it is true that there was almost a total saving in the expense of marketing the crop, yet the whole operation was the exact opposite of a financial success.

In 1905, the writer and his brother, who were jointly interested in the land, decided to begin the construction of tile drains. Up to this time practically no drains had been laid in the neighborhood in which the farm was located. The neighbors knew practically nothing about tile, and hence were perfectly free to express their opinions on the subject, which were usually unfavorable. They thought that, owing to some imaginary peculiarities in the soil, the methods which had succeeded so eminently in Illinois and elsewhere would prove a failure. They also decided that the tile were being laid so deep that the water could not get to them.

Nevertheless, the work was proceeded with, and one field of twenty acres was quite thoroughly drained early in the spring of 1905, and planted to corn. During all the preceding wet years this field had raised practically nothing, but much to the surprise of the prophets, this year during the growing season the corn stood a foot or more higher than that in the surrounding land, which had been considered comparatively dry.

At the present time tiling is proceeding so rapidly in that same neighborhood that it is practically impossible to secure a tiler to do one's work. The writer is proceeding as rapidly as finances will permit with the drainage of the entire farm, and considers the investment one of the best he has ever made.

Since the writer is an engineer by profession, this was a case where he had opportunity to take a dose of his own medicine, as for some years previous he had widely distributed the advice to a man about to drain, "First, hire an engineer." After his experience to date, he is more firmly convinced than ever that the best way to economize in connection with the tile drainage system is to hire a competent man to survey and plan it and to pass upon its construction. Hundreds of thousands of dollars have been wasted in the improper construction of drainage systems. It is not uncommon to find that the early parts of

a tile system have been made too small or laid too shallow to drain remoter tracts. In some cases sags in the grade line are found, and, although the tile ditcher will always claim that the water will "siphon out" of these sags, the farmer finds to his cost, after the ditcher has been paid, that the tile is practically worthless.

It must continue to be a source of wonder that the ordinary tile ditcher engaged constantly at drainage work really learns so little about the subject. He seems to acquire a set of notions peculiar to himself, for usually these men disagree in their opinions on the same subject. There ought to be some inexpensive school, which tile ditchers could attend and receive instruction in the principles of land drainage, and in simple methods of surveying and constructing drains. We have had some call for some such instruction at the state college and have in some cases arranged for such men to receive instruction from advanced students whom they pay by the hour for the work.

**Complete Drainage Plans**—In planning tile drainage the proper method is to make comprehensive plans for all the land which is to be drained to one outlet from the very beginning. Otherwise serious mistakes are apt to be made in the parts of the system first constructed.

**Sizes of Tile Necessary**—There have not, as yet, been sufficient data collected to show with certainty what capacities of tile are needed to meet different conditions. A few data on this subject are now being collected under the supervision of the state college. However, a capacity under average conditions sufficient to remove one-fourth inch depth of water in twenty-four hours appears so far to have given good results. This means a maximum flow of about 6,800 gallons per acre per day, or about 4,360,000 gallons per square mile per day. If the tile are laid at a good depth the upper few feet of soil act as a great sponge to receive the rain as it falls and to deliver it gradually to the tiles. We are now making a few gaugings of the actual flow of drains to determine the maximum rate during the year, but the writer knows of no systems which have been built with the above named capacity which have proved too small. He believes that usually four-inch tile should be used as a minimum size.

**Depths for Tile Drains**—The writer strongly advises laying the tile, under ordinary conditions, to a minimum depth of three and one-half to four feet. Many advocate laying the tile at three feet deep or less, but careful consideration must show that tile laid four feet deep will drain effectively a strip much more than 25 per cent wider than tile laid three feet deep. Moreover, the land drained will be drained much deeper than in case of the three-foot depth. Tiles laid four feet deep can be planned considerably more than enough further apart than tile laid three feet deep to make up for the increased cost per foot of tile, owing to the great depth. Hence, it is economical to lay them at the greater depth, if the system is intelligently planned.

Of course, the soil structure will affect the depth at which the tile should be laid, to some extent. Again, there may be cases in which a very long line of the tile would all have to be made deeper on account of a very small tract of low-lying land if the minimum depth of three and one-half to four feet were

Do you Shave? Don't be satisfied with poor soap. Washing soap, toilet soap or even the best Castile soap are not suitable for shaving. It requires a soap made especially for the purpose to soften the beard and prevent irritation.

The thick, creamlike lather of Williams' Shaving Soap does this as nothing else will. It has been the standard for 60 years.

"The only kind that won't smart or dry on the face."

Send 2c. stamp for a TRIAL CAKE of Williams' Shaving Soap, or 4c. for a Williams' Shaving Stick, trial size, enough for 50 shaves. Address

**TONIC STOCK FOOD CO. ELGIN, ILL.**

absolutely insisted upon. In such cases a short strip of the tile can be laid to the minimum depth of three feet.

**Distance Apart of Tile Drains**—Intelligently collected data are yet lacking to show the exact distance at which tile drains need to be laid apart in different soils. The writer's own experience and observation have convinced him that under average conditions of soil, with clay sub-soil, the drains can be laid eight rods apart if they are put three and one-half to four feet deep. In the first piece of land which the writer drained on his own farm, as mentioned above, the drains were laid eight rods apart at the depth mentioned. Last fall, after a very wet season in that locality, the writer went carefully over the field. Apparently the drainage was perfect half way between the tiles, for the corn there appeared to the eye to be as good as those immediately over the tiles.

In another place on the writer's land one drain was run up through the middle of a wet swale. The last spring proved exceedingly wet and it is now apparent that a drain will have to be added on each side of the first. The writer found that the corn was good for a width of about eight rods, extending four rods each side of the tile.

We now have under way some drainage tests in which it is proposed to determine the height of the ground water at different distances from tile drains in different soils after different periods of time have elapsed since rainfall. We hope to obtain some information in this way to assist in determining the proper distance apart for tile drains.

**Avoid Short Branches**—One often sees tile drains laid out consisting of a main line of tile with numerous short branches each only a few rods long. This is a very uneconomical plan upon which to lay out tile drains. Each properly laid tile will thoroughly drain the land for a distance of four rods each side. At each junction, therefore, of a branch there will be four rods of tile wasted, because it passes through territory already drained by the main tile. Yet how often one sees branches not more than four or five rods long, which do practically no good whatever.

So far as possible, the tile should be laid in long, parallel lines and there should be as few junctions as possible.

**Avoid Unnecessary Deviations from Straight Lines**—Another common fault in tile systems is to make the line very crooked. One often wonders what idea the ditcher or engineer had in mind when he meandered about over the surface of a practically level tract. Every deviation from a straight line in a tile drain should be considered an evil, only to be tolerated when it is really necessary. The general plan of the system should be as simple and regular as possible.

**Grades**—The writer presumes that

there is no one who still considers that a steep grade is necessary for a tile drain. A fair rate of grade is a good thing, because it increases the capacity of the tile, though some authorities claim that if the grade is too steep the velocity of the current will disintegrate the soil at the joints of the tile, and sometimes result in stoppage.

In tile drains properly constructed, particles of soil do not enter the tile at all, except, of course, that a little soil may find its way into the tile during and soon after construction, which is reason for adopting four inches as a minimum size for all tile. Small sizes are too apt to become stopped up at first. After the earth has become compacted above the tile, only clear water should enter. In case quicksand is encountered during construction it should be removed for a shallow depth under the tile, and clay filled in, on which the tile should be laid.

If tile drains are properly built they may even be laid on a level grade and still do good work. Of course the grade should be no lighter than is really necessary. The lighter the grade the greater is the necessity for careful work in construction.

**Construction**—In the construction of tile drains the writer thoroughly believes that grade stakes should be set at least as close as fifty feet apart by an engineer, and that the ditcher should be required to stretch a cord parallel to the grade line over the ditch, measuring from the grade stakes, and that each tile should be laid by measuring from this string. Tile should be laid as closely as possible at the joints. In case sand is encountered the tile should be surrounded below and on each side, as well as above, with clay or top soil. It is often well to blind the tile with top soil as they are laid, instead of with clay from the bottom of the ditch.

**Outlets**—Each tile outlet should be very carefully built. Usually a masonry wall should be constructed to hold the last section of tile firmly in place. It is also well to use a length of iron pipe at the outlet if the size of tile is not too large. The outlet should be planned in such a way that it can be kept open. A very large percentage of the tile outlets in the state are exceedingly defective.

**Cost**—The cost of tile drainage will depend upon the percentage of the land requiring tiling. In many cases the construction of a comparatively limited amount of tile will greatly benefit large areas by taking care of the wet spots scattered here and there. In such cases the cost per acre is low.

In case every square rod of the land had to be drained the cost might run as high as twelve or fourteen dollars per acre. In the worst case, increased crops will pay for the entire cost of drainage in a few years.—Paper read before Iowa Brick and Tile Association.

## DRAIN TILE

It is a mighty good idea for farmers to buy Drain Tile during the winter months so that they can be hauled while roads are smooth and hard, and while it is possible to drive onto wet fields and string the tile along proposed lines of drainage. By buying now you can avoid any delays in shipping and avoid handling tile when farm work is pressing you next spring. If tile is on the ground they can be put in as soon as the frost is out of the ground, thus giving you a much longer time to work the land before seeding.

**OUR DRAIN TILE ARE HARD BURNED**

and can safely be exposed in this way to snow and ice, as they are not damaged in any way by weather conditions.

We have a large stock of all sizes, so that we can ship promptly and select grades carefully. We offer special terms on winter shipments and solicit your correspondence. Our book, "Hints on Tile Drainage," will be gladly mailed to you free of charge. See Professor Marston's article on tile drainage on this page.

DES MOINES BRICK AND TILE COMPANY,

EAST DES MOINES, IOWA

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## PLYMOUTH ROCKS.

STOUT'S Barred Rocks are again sweeping all the leading shows. If you want to win get in line and breed the winning strain. A few high class show birds and breeders for sale. Eggs \$2 per 15 or \$10 per hundred. G. W. Stout, Rose Hill, Iowa.

BARRED Plymouth Rocks for sale. 300 cockerels, hens and pullets at a bargain. Large-boned, vigorous, farm raised, scored birds that win. I have developed heavy egg producing strains. Mrs. A. A. Berry, Box 128, Clarinda, Iowa.

FOSTER'S Barred Rocks clean the platter at Southern Iowa Poultry Show. If you want to win buy eggs from stock scoring to 92. One dollar per sitting, five dollars per hundred. Write for circular. Albert Foster, Russell, Iowa.

KILMA'S Pure Barred Rocks, Hawkins-Thompson strain. Get eggs of us if you want good value. There's a reason. Ask why and get prices. Any number. Orders now or later. Mrs. J. Willis Idles, Box 54, Grand River, Iowa.

WHITE PLYMOUTH ROCKS—Nice big cockerels and pullets from prize winners. Eggs \$3 per fifteen. Write your wants. George R. Dement, Lexington, Ill.

MASON C. OGG, Fairmount, Iowa, breeder of high class Barred Plymouth Rocks. Some choice cockerels for sale yet. \$1.00 and \$2.00 to close.

75 BARRED Plymouth Rock cockerels for sale, nicely barred and with large bone. Prices reasonable. L. M. Churchill, Fairmount, Iowa.

WHITE PLYMOUTH ROCKS. Cockerels, \$1.50 to \$2.00 each. Stout, healthy birds. Eggs in season. Address, Curtis C. Bent, Bedford, Iowa.

Young stock all sold but 4 M. B. turkey toms scoring 96-97. B. P. Rock and turkey eggs in season. Mrs. Eugene Scott, Lathrop, Missouri.

BARRED ROCK pullets scoring 90 to 93½, fifty unscored, quality good, prices low. Eggs, best pens, \$2.50. Eddie Anderson, Alta, Iowa.

EGGS for hatching from Pure Barred Plymouth Rocks, \$1.50 per sitting; \$6.00 per hundred. Mrs. Dibel, Monroe, Iowa.

ROCKS—The barred, the kind. We got 'em. Eggs \$1 for 15. John Crowder, Panama, Iowa.

## RHODE ISLAND REDS.

EGGS, Single Comb Rhode Island Reds, exclusively. Won first cockerel, first pullet, second pen, Iowa State Show. \$2 for 15. C. A. Kenworthy, Oskaloosa, Iowa.

## MINORCAS.

BREEDER of Single Comb Black Minorcas exclusively. Cockerels for sale. J. C. Tubaugh, Blakesburg, Iowa.

## BRAHMAS.

PURE BRED Light Brahma cockerels for sale. Mrs. O. B. Johnson, Clarinda, Iowa.

## LANGSHANS.

100 BLACK Langshan cockerels from pens scoring 93 to 95; four birds, grand sweepstake, Creston Fair. Philip Stalcup, Lorimer, Iowa.

## TURKEYS.

SOME fine Mammoth Bronze turkeys left. Toms \$5.00, Hens \$3.00. Order from this ad. If you want them. Rosalee Newberry, Argyle, Lee County, Iowa.

HOW to succeed rearing turkeys. Man who followed the business for years and made a success of the job. Price 50 cts. J. J. Bannell, Valosta, Ga.

MAMMOTH Bronze turkeys, large size and true to color, bred by Tom scoring 94, for sale at prices reasonable. Mrs. J. M. Davis, Oskaloosa, Iowa.

77 MAMMOTH White Holland turkeys. Write, Mary Culver, Route 1, King City, Mo.

## DUCKS.

ROUSE DUCKS, farm raised; healthy drakes, \$1.25, ducks, \$1.00. Address, H. A. Flett, Downs, Ia.

## HORSES.

CYDESDALE STALLIONS, Prince Goodwin 8831, an international winner and one of his get, both extra good. Must sell immediately. Also two stud colts. Write owner, Thos. Rider, Fairfield, Ia.

SPAN large black Percheron mares, five years old; three large Percheron stallions, 1,750, two years old; two large black Jacks, 18 hands. L. H. Luckhardt, Tarkio, Mo.

PERCHERON MARES For Sale.—Five black registered mares, also three young stallions. Good individuals and sound. Mares in foal. E. P. Hall, Weldon, Iowa.

FOR SALE—Percheron draft stallion, weight 2,200, color black, age seven, prize winner Buffalo fair. Good reason for selling. B. J. Knoll, Haverhill, Iowa.

J. H. BARNETT estate will sell seven young Percheron stallions at a sacrifice for the next two months. J. H. Dyke, Administrator, Indianola Ia.

## CATTLE.

MAPLE BROOK Hereford Bulls, twelve to twenty-four months old, sired by March On 5, Beau Donald 37. Extra good quality Poland China boars. Prices reasonable. J. W. Hildreth, Slater, Iowa.

SALE OR EXCHANGE—My herd of 9 females and two bulls, well bred Short-horn cattle. Will accept part payment fully head of Angora doe goats. J. F. Engle, Wlot, Iowa.

RED POLLED CATTLE. Special prices for 30 days on good cows and heifers, bred. Write for booklet and particulars. O. P. Russ, Ravenwood, Missouri.

## HOGS.

A FEW very fine August and September Berkshire boars for sale. Good individuals and correctly bred. No fancy prices asked. Will be registered and transferred. C. E. Peirce, Germania, Wis.

FOR SALE—Growthy, smooth, Poland China gilt bred to a large, lengthy, big boned sow of Perfection B. L. 77635. Satisfaction guaranteed. H. G. Boyer, Lovilia, Iowa.

## WYANDOTTES.

BURD'S Business Breed, White Wyandotte winners, cockerels, \$2.00, \$5.00. Eggs, \$1.00, \$2.00 and \$3.00 per 15; \$5.00 per 100. Folder free. Maple Dell Farm, Route 4, Lee, Ill.

WHITE WYANDOTTE pen, one male, 8 females, a beautiful pen of birds; first order \$15 gets them. Few cockerels at \$1.50 and up. S. W. Harr, Riverside, Iowa.

50 CHOICE Silver Laced Wyandotte cockerels and pullets for sale at a very low price, all from high class stock. O. O. Howell, Oelwein, Iowa.

GOLDEN, Silver and White Wyandotte cockerels, nice birds, leading strains. W. W. Conn, Parkersburg, Iowa.

SILVER LACED Wyandotte cockerels for sale. Eggs in season. S. R. Young, Greenville, Iowa.

GOLDEN WYANDOTTES for sale, pure bred. J. L. Boner, Lenora, Kansas.

## LEGHORNS.

MONEY MAKING Buff Leghorns, single comb, solid buff, farm raised. Took three first premiums Clarinda show last December. Thirty eggs, \$2.00, nine dozen, \$5.00. Give shipping date and order incubator eggs. Warranted fresh and chickens unspotted buff. Write today. Mrs. Agnes Smiley, Bradyville, Iowa.

ROSE Comb Brown Leghorns a specialty for twenty-six years. Fifteen eggs one dollar; fifty, three dollars; one hundred, five dollars. Hazeldell Poultry Farm, Chas. Lyman, Clarinda, Iowa.

S. C. W. LEGHORN cockerels. Write for score cards. Winnings at Ames Show, first pullet, first hen, first cock, fourth cockerel, third pen, Clinton Morning, Rural Route 8, Madrid, Iowa.

100 SCOREDS, C. W. and B. Leghorns 93 to 95½ both sexes, 33 firsts, 28 seconds, sweepstakes pen over all. Pekin ducks, Scotch Collie pups. Write wants. Sven Skele, Story City, Iowa.

## MISCELLANEOUS POULTRY.

BLUE Ribbon Poultry Club won this winter 40 1st premiums on Barred and White Rocks, Golden, Buff, White and Columbian Wyandottes, R. C. Rhode Island Reds, R. C. Brown Leghorns, Buff Orpingtons, Black Langshans, Golden, Silver, Sebright and Black Tail Japanese bantams, Bronze turkeys, Rouen ducks. Stock for sale. Eggs in season. (Catalog free. W. I. Carpenter (secretary) Clarinda, Iowa.

EGGS for hatching. Rose Comb Black Minorcas, Brown Leghorns, 1st prize Carroll, 1907; guaranteed fertile \$1.25 per sitting; two, \$2.25; three, \$3.00; six other varieties. Oak Brush Poultry Farm, Templeton, Iowa.

WANTED, to buy a large number of Cornish Indian Games, Minorcas, R. C., R. I. Reds and Houdans. Write describing what you have giving lowest price. Deau Swift Poultry Co., Des Moines, Iowa.

NEW 40-page catalog, 2c. If you are looking for beautiful stock I have them at a very low price. Geese, ducks, turkeys, guineas, pea fowls, chickens. F. J. Daumann, Farmington, Minn.

BARRED and White Rocks, Buff, Golden and Silver Laced Wyandottes. Eggs in season. Write for prices. A. L. Anderson, successor to Anderson Bros., Indianola, Iowa.

TWENTY-FIVE breeds geese, ducks and chickens. Catalog free. Largest poultry farm in the northwest. Great Western Poultry Farm, Mapleton, Minn.

EGGS looked for spring delivery from our Toulouse geese and Pekin ducks. Goose eggs 20c. each, duck, \$1.50 per 15. J. O. Walton, Belle Plain, Iowa.

FOR SALE—Good laying strain, Buff Rocks and Rhode Island Reds. Prices reasonable. J. J. Peterson, Route 1, Garwin, Iowa.

FOR SALE—White Holland toms, White Wyandotte cockerels. Orders booked for eggs. W. A. Marsh Jr., Aledo, Ill.

PURE Black Langshans and Rose Comb Brown Leghorns, one dollar each. Mary McClure, Elk City, Kan.

## DOGS.

SCOTCH COLLIE male 7 months old, sable with full white markings. This is a beautiful Collie; will ship on approval. First draft \$20 gets him, pedigree with sale. Fine puppies, males \$8, females \$5. S. W. Harr, Riverside, Iowa.

SCOTCH COLLIE DOGS—Puppies from best imported strains. Write for our new catalog. Several good studs at service. Geo. T. Underhill, Knoxville, Iowa.

RATS, my Scottish Terriers will make them git. Fine pups, make good ratiers; males \$10, females \$7. Pedigree with sale. S. W. Harr, Riverside, Iowa.

FOR SALE—Some choice Collie pups from working parents. Males, \$7; females, \$5. Leroy A. Hayes, R. F. D. 7, Knoxville, Iowa.

PEDIGREED Scotch Collies for sale at reasonable prices. John Egan, Cumming, Iowa.

## HORTICULTURE.

FOR SALE—175 black walnut trees varying from 15 to 30 inches in diameter at butt, also 9 Bronze-toned turkeys weighing from 22 to 30 lbs. and 20 Barred Rock cockerels weighing up to 10 lbs., same scored. M. V. Leeper, Redfield, Iowa.

SEED CORN, Oats and Clover Seed. Only stock from heaviest yielding varieties offered for seed. Satisfaction guaranteed or money refunded. Illustrated catalog free. Oklahoma Seed Farm, Box 22, Chatham, Ill.

KHERSON SEED OATS—600 bushels for sale; 40 cents a bushel while they last. Bugs 20 cents. John T. Svenson, Gowrie, Webster Co., Iowa.

SEED OATS—Swedish Select oats. Choice stock. Samples free. Alfred Danielson, Black River Falls, Wisconsin.

## LEGAL ADVICE.

MY opinion on any legal point for one dollar. Be sure you are right then go ahead. Chas. Franklin, Lawyer, Truesdale, Iowa.

## PATENT ATTORNEYS.

ROE & ROE, Des Moines, Iowa. Branch in Washington. Send description of invention for free opinion.

G. C. KENNEDY, Patent attorney, Waterloo, Iowa. Write for booklet.

## SONGS.

"IOWA, BEAUTIFUL LAND" and "Old Flag," two beautiful songs for schools, 15 cents per dozen. Tac. Hussey, Des Moines, Iowa.

\$300 FOR POEMS. Write for particulars. Orpheum Music Company, Dept. G, 1183 Broadway, New York.

## AGENTS WANTED.

FARMER Agents Wanted. Time saver and money saver for farmers. Over one thousand sold in one county. Quick, easy seller. Liberal commissions. Write right now. Farm Record Company, Newton, Iowa.

## WANTED.

WANTED—Two milkers, no farm work, \$40.00, room and board. Two farmers, no milking, \$35.00. One experienced wagon man, must understand Sharples separator, no milking, married or single, \$40.00. One woman cook, 10 to 15 men, city conveniences in house, \$30.00. H. C. Burgess, Box 846, Helena, Montana.

MEN AND WOMEN Agents wanted to sell women's \$2.50 Comfort Shoes, Julets, Bals., Oxfords, Splendid profits. Write Restwell Shoe Co., Dept. B, 316 Union St., Lynn, Mass. Reference: Mrs. Nat'l Bank, Lynn.

POSITION wanted as Buttermaker. Ten years experience; thoroughly experienced on whole milk and hand separator plan. State wages in first letter. Enos Albertson, Calvin, North Dakota.

WANTED—Single man for general farm work, April 1st to December 1st; wages \$35. Workers only apply. References required. Coal Harbor Stock Farm, Coal Harbor, North Dakota.

WANTED at once, sober, reliable, English speaking farm hand, good milker, references. State age, experience and wages expected. Address, C. G. Odell, Morrison, Ill.

WANTED—Man by the month on eighty acre farm. Owner not able to do the work. Please state wages wanted. W. R. Stamm, Route 1, Sycamore, Illinois.

## REAL ESTATE.

A CATTLE RANCH FOR SALE—480 acres joining the town of Cascade Springs, Fall River county, South Dakota, at twelve dollars per acre. Contains two thousand dollar dwelling, cistern, springs and plenty of timber. It is so located in a horseshoe bend of hills as to control a large tract of other land. A bargain. Write J. W. Fargo, Deadwood, S. D.

FOR sale, Vernon county, Mo., 920 acre stock farm, highly improved, abundantly watered, seven miles to good market. Here is an opportunity for a lively stock man, price \$53,500, half cash, balance on time at 5%. J. Fred Woltz, 3946 A Botanical av., St. Louis, Mo.

FARM for 10 cents. Send me 10 cents in silver and I will send you a booklet telling you all about how to get free homestead of 160 acres in western Canada. Also sample of wheat which yielded 5 bushels per acre. J. A. Dobry, Killam, Alta, Canada.

FOR SALE, fine improved farm of 322 acres in Brown county, S. D., all ready to move on, 200 acres fall plowed, new buildings, concrete cellar, artesian well, 1 mile from station and 3 elevators, \$45 an acre. A. Kozlowski, 74 Leopore St., Buffalo, N. Y.

BAIGAIN if sold before April 1st, northern Wisconsin, 160-acre farm, 62 under cultivation; 3 miles from two stations; new 6-room house, stone cellar, good water, markets, schools and roads. \$2,200, full particulars. E. Gabelein, Hayward, Wis.

CASH FOR YOUR PROPERTY wherever located. If you want to sell, send description and price. If you want to buy, send for our monthly. Northwestern Business Agency, 380 Bank of Commerce Bldg., Minneapolis, Minn.

WRITE for information regarding Central Missouri. Fine prairie farms, Open Timber Pasture, Fruit, Mineral and Coal Lands. Cheapest in country. Crewson & Harrison, Versailles, Missouri.

FOR SALE—In Seymour County, Kan., 74 acres Neesho River bottom land, 90 miles from Kansas City. Near two railroads, fenced in two lots, \$40 an acre. Milo J. Owens, owner, Barton, Vt.

WE HANDLE bargains only. 446-acre farm, all fenced, good buildings, rich, smooth land, \$50.00 per acre. Cheap farms \$5.00 per acre up. Write for list. Springfield Realty Co., Springfield, Mo.

162 ACRES \$3,000, adjoining Lansing, Iowa, population 1,700; part cultivated, balance wood and pasture. Good dairy proposition. A. Woodruff, 1510 23d St., Des Moines, Iowa.

BIG BARGAINS—Kay County lands, 160 acres, smooth, less than \$40.00 per acre; 160 acres, smooth, less than \$35.00 per acre. Write Chas. E. Vogele, Newkirk, Oklahoma.

CHEAP, OWNER DEAD—You should write for list describing the best 220 acre farm, stock and machinery in Wisconsin. Jonas Bergh, 504 Eddy St., Eau Claire, Wis.

IF YOU WISH to sell or buy real estate send description and price. If you mean business, your wants can be supplied. Write today. A. W. Baird, Marine, Iowa.

FOR SALE—Farms, Reno and adjoining counties, ranches, west, special bargains. Write me what you want. A. M. Jewell, North Main Street, Hutchinson, Kansas.

BELLEVUE & CO., Wichita, Kansas, handle the best farms in Kansas and Oklahoma, also timber lands in all parts of the south. Write for list.

A GOOD improved 160 acres, 1 mile from Devon, Harbison county, Kan. Railroad at Devon. Price \$35 per acre. S. S. Jordup, Wenonah, Ill.

\$1400 Buys good 160 acres. Stock, crop implements; good soil; southern Mo. McGrath, 2940, Prairie, St. Louis.

OKLAHOMA FARMS—Write for prices. H. F. Stephenson, Kingfisher, Oklahoma.

## REAL ESTATE.

ARE YOU looking for a home? If so, don't buy before seeing copy of the Real Estate Journal. It has nearly 4,000 farms, city property and stocks of goods advertised in it, and reaches 45,000 readers each issue. Advertising rates 2 cents per word. Send 10c. in silver for two months' trial subscription. Farm and Real Estate Journal, Traer, Iowa.

COME to the land of the big red apple, best fruit, farming and stock country in America, lots game and fish, no negroes, best water in the world, excursions first and third Tuesdays in each month, expenses free to buyers, first payment, \$200 to \$600 down and \$100 a year. Davis Bros. Realty Co., Richland, Pulaski county, Missouri.

420 ACRES, 4 miles from Clinton, Mo., 2 miles north of Deepwater. All level or gently rolling black prairie. All cultivated except 2 acres timber and 60 in grass. Fenced with hedge and wire, school on land, two houses, but both wanting repair. A fine farm and cheap, \$16,800. H. C. Schmidt, Clinton, Missouri.

320 ACRE FARM in Sherman County, Kansas 60 acres creek-bottom land, suitable for alfalfa, 200 acres level wheat land. Two miles to postoffice, school, church, and general store. Ten miles to town of 2,000 people. No improvements. Price, \$10 per acre. Apply to Albert E. King, McPherson, Kansas.

160 ACRES, 2 miles from Severy, Greenwood county. Nice smooth land, 125 acres cultivation, 30 acres tame grass, well fenced, house 7 rooms, good barn and other out buildings, good orchard, 2 wells, wind pump, \$40.00 per acre. Write L. E. Glasco, Severy, Kansas.

TEXAS LAND in Panhandle for sale at a bargain. 640 acres, four miles from McClain, Donley county, all good, smooth, rich, farm land, 100 acres broke, good water, one-third cash, balance five to ten years' time. Thos. J. Pugh, Omaha, Neb.

FOR exchange, merchandise, hardware, houses, blocks, hotels and mills for farms, northern lands for southern farms. Land for sale cheap, improved or wild. American Land & Ex. Co., Minneapolis, Minn.

EIGHTY ACRES, 1½ miles from Davis, Lincoln County, Mo., 50 acres in fruit. The best winter apples. Balance very fine young timber. A fine home and cheap; \$4,500. H. Boldy, Henrietta, Texas.

FOR SALE—640 Acres A 1 wheat land. Saskatchewan, Canada. All available. Three miles from town. For price, terms, write John McKenzie, Box 162 Alisa Craig, Ont., Canada.

TWENTY-FOUR ACRES at Britt, Iowa, suitable for dairy or poultry farm. No dairy in Britt. Will sell or rent on long time. Address, J. W. Budd, Des Moines, Iowa.

120 Southern Missouri; horses, cattle, crops, farm implements; \$1,500. Seth Cooper, Blanche, Douglas Co., Missouri.

## MISCELLANEOUS.

FARMERS AND SWINE BREEDERS: Brothers—After 50 years' experience I have discovered that it is better to put one dollar's worth of practical knowledge in our heads than hundreds of dollars invested in slum stock foods or medicines in our hogs. A good swine tender like the good shepherd will succeed. Know how to do for yourself and get Smith's unequalled treatise on Swine Culture, essays, advice, receipts and formulas of quality not quantity. Work right and prevent disease, then there will be no need of trying to make impossibilities come true. This valuable treatise sent by mail upon receipt of \$1. Remit by P. O. order or registered letter to Francis Smith, Lock Box 616, Des Moines, Iowa.

LADIES—Entirely new thing in picture making. You can become an artist at once. No previous knowledge necessary. Practically no expense; make your home beautiful. Surprise your friends. Send 10c. silver; we'll do the rest. Pierce's Art Co., 115 N. Burdick St., Kalamazoo, Mich.

25 fine photos from any photograph 25 cents, size 1¼ by 1½ inches. 15 nice post cards from any photograph 75 cents. Photographs returned unharmed. Satisfaction guaranteed or money refunded. Write plainly, Newlon Photo Co., 1369 East Ninth St., Des Moines, Iowa.

SOLDIER'S Civil war if you filed on a homestead of less than 160 acres before June 20, 1872 and have never used the additional right, write me all about it. I will give you additional right. W. J. Allen, 1331 E. 9th St., Des Moines, Iowa.

HARNESS, saddles, collars, etc., direct from manufacturer to consumer at wholesale prices. Send for circular and convince yourself. Save middleman's profit. H. C. Pwold Harness Co., 1614-1618 Seventh St., Louisville, Ky.

FARMERS, use printed stationery. We send you postpaid 100 envelopes and 100 notepaper, printed to your order, for 75 cents. Cheaper than you can buy the blank paper. Neatly boxed. Williams, printer, Marshall, Wis.

HEAVES—English Heave Remedy, new and only scientific cure of heaves and coughs. Send ten cents for trial package. Regular size one dollar. Chambers Mfg. Co., P. O. Box 315, Rochester, N. Y.

DISINFECTANT Fly and Lice Killer, Easily applied. Does the business. What you want for on everything. \$1.00 per gallon. Guaranteed. Dr. J. H. Phillips & Sons, North East, Pa.

START a factory on the farm. No machinery to buy, honorable, clean, profitable. We do it now free. DeHass Supply Company, Dept. "R" 325 Mt. Vernon St., Philadelphia, Pa.

SHIP your hides and fur to H. Gutman & Co., where you will get the highest market price for same. 106 Second street, Des Moines, Iowa.

FREE—A beautiful Family Record if you send 10 cents for Our Homes one year and addresses of three farmers. Address, Our Homes, Dubois, Neb.

FOR SALE—Six-horse Leffel portable engine, all most new, \$150. D. A. Steiner, Bern, Kan.

WHAT have you to sell or exchange? Do you want to buy, sell or trade farm or grazing lands? Do you wish to sell live stock, dogs or other pets, poultry, poultry supplies, machinery, new or second-hand, implements, musical instruments, merchandise, in fact anything that the farmer wants? If so, the best way to accomplish your purpose is by inserting an advertisement in the classified department of this paper. Only five cents a word for an advertisement in the greatest group of farm papers in the world, with 190,000 guaranteed circulation, covering the states of Iowa, Wis., Minn., South Dakota, Ill., Neb., Missouri, Kansas and Oklahoma. For further particulars, see announcement at top of this page.

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## PROFIT IN VEAL CALVES.

A subscriber from Cherokee county, Iowa, sends the following communication:

We have here 100 cows for the purpose of supplying milk. The calves sired by our Short-horn and Hereford bulls we can sell readily to the farmers near by for \$5 for the bulls and \$3.50 to \$4 for the heifers at three days old. In order to increase the quality of our milk cows we bought a Holstein bull a year ago and intend to raise some of his heifers, but now we find the farmers do not care to buy the bull calves sired by the Holstein bull, and the question is what to do with them. We have thought of vealing them, and here is the result of our experience with the first one: Thirty-two pounds of milk per day at one cent per pound, or thirty-two cents per day for feed. We kept this calf until thirty days old, which made it cost us for feed \$9.60. It dressed seventy-four pounds of veal, which at ten cents per pound is \$7.40, and fifteen pounds of hide at eleven cents per pound is \$1.65, total \$9.05. The question is, "Is there something the matter with our figures or should we have killed the calf at birth and fed it to the hogs?" As this is to be a regular thing for us we will be pleased to have you give us your views on the subject.

It looks as though there must be some mistake about the quantity of milk consumed by this young calf during the first thirty days of his life; indeed, the average calf would not consume more than half this amount and in all probability the results mentioned by this subscriber have been obtained by guess and not by weight.

Nevertheless, it is a question whether there is any profit in handling vealers, especially vealers of the dairy type, and where one is engaged in raising grades, as is the case in this instance, we believe that at the present price of dairy products death should follow quickly the birth of a male calf. As these cows are being kept for milk purposes and not for veal or beef making, it will unquestionably pay to simply keep it on that basis. Of course it would change the situation entirely if the cows themselves were pure-breds, because there would then be some market for the male calves.

## Side Helps to the Balanced Ration.

To the Editor of The Homestead:

The balanced ration is absolutely essential to the economical production of milk; but, while this is true, the balanced ration will not be nearly so effective when the cow is poorly sheltered, abused or irregularly milked, fed or watered as it would be were all these rules observed.

Therefore, I feel that the articles I have written on dairy rations would not be complete without adding the side

helps. Take, for instance, the matter of shelter. The dairy cow is delicately organized and cannot withstand the chilly blasts of winter and the cold spring and fall rains and produce milk economically. The fattening animal converts a great deal of its food into fat and can withstand cold and inclement weather without difficulty. If compelled to, the milk cow will do the same, but her purpose is not to produce beef. I can look back, not altogether without remorse of conscience, to the time when I used to compel my dairy cows to run in the stalks every day except the stormiest days, when I thought I was very merciful to fill the racks with hay and leave them in the lot.

I never thought of keeping them in the barn during the day as I did my horses. Oh, no! that would cause too much cleaning. But we do learn a few things by dear experience, and when I found that my cows were not even paying for the feed they consumed I began looking around for the cause. I subscribed for the best dairy papers, secured all the bulletins I could bearing upon experimental feeding and care of dairy animals, and I soon found that I had been on the wrong track.

I first began stabling my cows night and day and starting them on a balanced ration on the seventh day of January. I was at that time low on milk and thought it a good time to experiment. I was only milking four fresh cows and two strippers. They were only giving eighty-five pounds a day. By stabling night and day, except when they were turned out to water, and feeding a balanced ration they increased their flow by January 20th to 144 pounds per day. At this time other fresh cows were added, so we did not continue the experiment longer; but, suffice it to say, they made material improvement in their flow after this for some time and maintained their flow throughout the winter. The best cows I had, I had been condemning simply because they had not had a chance to show their ability.

Experiments along this line at the Indiana station show that three cows, kept in a warm barn at night and turned out in a lot in the daytime, produced, in forty-eight days, 161 pounds less milk than a like number of cows kept under the same conditions, except that they remained out only an hour each day. The better sheltered cows ate less feed and gained 231 pounds, while the exposed cows lost thirty-three pounds in live weight. When we notice also from this experiment that these exposed cows were partly sheltered from the winds by an open shed in the day time and had a comfortable barn at night, it does not require a very fertile brain to figure

DURABILITY **STRENGTH**

## SIMPLICITY

no other separator so strongly built, or so simple in construction.

**Sharples Tubular Cream Separators**

get all the cream, have low supply can, are easy to run, easy to clean, because there is only one little piece in the bowl to cleanse after each running, and the machine oils itself. It combines Utility, Simplicity and Durability. A glance at the pie-plate construction of most separators will give you a fair idea of what we mean by "simple construction" and "strength." For full information about the Sharples Tubular write for booklet E. 121

out the reason why many cows on our farms are not economical producers. There are other side helps, such as plenty of light in the barn, ventilation, etc., of which we have no data, but which are essential just the same.

Our purpose, however, in these articles is to bring out the improvements which any farmer can make with very little extra cost and will put dollars in his pockets. Of course there are some cows that no amount of care or scientific feeding would make profitable milkers, but, my dear fellow farmers, before you condemn your most faithful servants, give them a chance to redeem themselves and I will guarantee you will be blest in the act. O. O. Brewbaker.

**Raising Dairy Calves.**

To the Editor of The Homestead:

Among dairy cows the best practice is to remove the calf from the cow within twenty-four hours after its birth and at once teach it to drink. This separation may be delayed until the dam's milk assumes the normal condition, but, as a rule, the earlier the calf is taken in hand and its feeding regulated the better for the calf. The younger it is the easier it learns to drink.

It is also better for the dairy cow to be regularly milked by hand than to suckle a calf. The milk of good cows is often too rich for their calves, and the latter are apt to take too much if left to help themselves. There is no truer thing in my experience, and I believe in that of hundreds of others, than that allowing a calf to suck is an injury to the cow. This injury is more or less permanent, according to how long it is continued.

No rule can be given for quantity in feeding calves, they differ so much in size and food requirements. Judgment must be used, the feeding effects observed and the calf given enough to thrive and be

active, but not too much. More calves suffer from overfeeding than from scant diet. Keep the calf a little hungry and eager for more rather than fill it to dullness. The endeavor should be to prevent the beginning of indigestion, which leads to scouring and perhaps fatal diarrhea. Nothing causes indigestion sooner than overfeeding or irregularity in the quantity, time and temperature of the milk, especially while the calf is young; and absolute cleanliness about the feeding vessels is essential, with frequent scalding. If it can with certainty be kept equally clean, some feeding device which compels the calf to suck its milk instead of swallowing rapidly is preferable to the open pail.

The practice of feeding calves by means of what is termed a "calf-feeder" is growing in popularity among the dairymen. This is a pail arranged with a close-fitting top and a rubber teat upon the top of it, which is connected with a tube having a simple valve at the lower end which lies in the bottom of the pail. The objection to a calf drinking from the pail is that by this means no saliva of any account is

**The Empire Proves Its Claims**

A dollar saved is a dollar earned.

Any cream separator will make some money for you.

But, if you knew of a cream separator that would not only make the most dollars, but would, at the same time, save the most dollars you'd buy it, and buy it now. Investigate the

**Improved Frictionless EMPIRE Cream Separator**

Chicago, Ill.

mingled with the milk. The effect of this fluid in aiding in digestion is well known, and it is a fact, also well known, that calves fatten much more rapidly and better, as a rule, upon the cow than upon the pail, even if they get a pailful of new milk fresh and warm from their dams morning and night. A good many calves become pot-bellied by drinking too rapidly. I am certain that skimmed milk taken slowly by the operation of sucking will prove of more real benefit to a calf than to drink it rapidly.

The increased use of milk separators in the dairy sections of the country has resulted in greater attention being paid to raising calves on skimmed milk. It is well settled at this time that practically as large, strong and vigorous calves can be grown on skimmed milk, supplemented by some suitable grain feed, as on whole milk, providing they are properly fed and cared for. There is no question but that whole milk is the normal food for calves, and when the cream or butterfat is removed it becomes necessary to replace it in the calf ration with some equivalent but cheaper form of feed. The calf here referred to is not supposed to be for veal, but to be raised for a dairy cow.

The foregoing treatment should be accompanied by early lessons inducing it to eat sweet hay and a little grain. The sooner it learns to eat hay and the more it eats, the better, but keep up milk feeding as long as possible, if only once a day. Grain should be used, oats, bran and a little linseed to judiciously supplement the other food. Do not turn it onto grass too soon. A fall calf will be in good shape to get its living from pasture the first summer. Fall calves are generally better cared for, thrive better and make better calves than those dropped in the spring.

Our aim should be to produce a cow with a large capacity for consuming and digesting rough fodders. Clover and alfalfa is the best food I know of for this purpose, and we cannot get the calves to eat it too young. From this point to the breeding time we should aim to make the animal grow rapidly without putting on too much fat. It is well to breed the heifer so she will drop her first calf at from two to two and a half years of age. During the first milking period feed the heifer well. Remember, she is not through growing yet, and part of her food must go to building up her frame. The heifer may not give a paying quantity of milk the first year, but this should not deter us from milking her for another year. We must remember that we are establishing character in the heifer, and whatever we teach her to do during the first year of her milking life she will be likely to do the remainder of her life. Long milking is a habit.

J. P. Fletcher.

### Cheesemaking on the Farm.

To the Editor of The Homestead:

Too little cheese is eaten in America and less on the farm than in the city. Ignorance of the nutritive value of a properly made and cured cheese is probably one reason for this. Another reason is that a great many housekeepers do not know how to make cheese and imagine it is a difficult task. How many housekeepers, I wonder, realize that,

pound for pound, cheese contains more nutriment than butcher's meat; that it may with advantage be used instead of it, and especially so, as they may both be called animal food. Where creameries take the milk and are not prepared to make cheese for the patrons, and where there is no factory in the community, it will certainly pay some of the farmers to make enough cheese for themselves and their neighbors, if not for shipment. I do not see why farmers should deprive themselves of one of the cheapest and healthiest luxuries—a well-cured, full-cream cheese, or, the still cheaper, but equally healthy nourishment, a well-made and properly-cured skim cheese.

To obtain the best results when making cheese it is important that the milk should be in the right condition and of the right temperature, also that the right quantity of rennet should be used so as to produce a curd which will develop as desired in the latter stages of the process. Measuring milk or, still worse, guessing at quantity should never be done. The only right way is to weigh the milk. A reliable thermometer is also highly necessary. I will say right here that unless cleanliness is observed in the highest degree, we admit not one, but hundreds of uncertainties into the manufacture of dairy products.

The evening's milk should be strained into common cans or any suitable vessel which, in warm weather, is placed in cold water or otherwise kept cool until next morning. It is a good plan to stir the milk well before going to bed, partly to help it cool quickly and partly to prevent too much cream from rising. Next morning, after weighing the morning's milk, it may at once be strained into the cheese tub. Then pour in the evening's milk and stir well. Any common tub or tight wooden box may be used for cheese tub. If you have an open boiler the milk may be heated in a shot-gun can or a tin bucket, placed right in the boiling water, but it must be stirred all the while unless the temperature of water is as low as 140 degrees, when it may be left alone, though the heating takes much longer if not stirred. This way of heating I have found the best, as it is always necessary to have a large boiler for heating water for cleaning purposes, and it is much safer than heating it over direct fire.

When the milk is heated to 84 degrees, remove the can from the boiling water and add the rennet, yet before adding the rennet we must carefully stir in the coloring. For farm cheese-making rennet tablets are very handy to use. The number of tablets required is one for every hundred pounds of milk. This tablet should be dissolved in pure water and the solution is added to the milk. Stir well for four or five minutes and stir now and then gently on the surface, so as to prevent the cream from rising, but take care to stop in time so that the coagulation be not disturbed. Cover the vat and, if a reliable rennet is used in the right quantity, it may be left about half an hour without any attention. After that it must be watched closely and whenever the curd splits or breaks clean when a finger is passed through it, it is time to cut it. The cutting may be done with any knife long enough (which can be made at home of tin or hard wood). With this the curd is cut crosswise, taking care it is cut right down to the bottom of the vat. Then take a common skimmer, inserting it slowly and then gently lifting it up, allowing the curd to break by its own weight.

When the whole mass is reduced to cubes of two or three inches leave it for about five or ten minutes, then stir the curd gently, breaking up the pieces until they average one-half or one-quarter of an inch in diameter. The curd is now left to settle and as soon as possible part of the whey is dipped off into a can or pail, stir again and when settled, dip off more whey. Keep up this process until the curd feels shotty or the particles are hard enough to rub between the fingers without sticking together. Add good dairy salt at the rate of four ounces to the curd from 100 pounds of milk. Too little salt allows the cheese to ripen too fast and too much salt will make the cheese too dry and prevent its curing properly. Of course the salt must be distributed evenly in the curd.

It is now filled into the molds or hoops. The best hoops are made of heavy tinned iron, but can be made of wood if only care is taken to have it perfectly straight and smooth inside. A piece of cheesecloth is carefully placed in the hoops so as to have the folds as smooth as possible before filling in the curd.

## CLEAN SKIMMING CREAM SEPARATORS

Clean skinning is the first consideration in the purchase of a cream separator. That is what you buy a separator to accomplish. But there are two kinds of clean skinning. One is under ideal or favorable conditions—warm milk, from fresh cows, running thin cream, with reduced capacity. The other is under practical every-day farm use conditions—with milk sometimes warm and sometimes cool, cows as they come, cream as heavy as possible instead of as thin, and capacity large so that the work is finished that much more quickly.

These two kinds of clean skinning mark the first great difference between the DE LAVAL and other kinds of cream separators. There is a small but material difference between the DE LAVAL and the other kinds of machines under favorable conditions. There is a BIG difference under the practical every-day use conditions,—the difference between the "ALPHA-DISC" system and other superior constructional features of the DE LAVAL machines and even the best of other separators.

This is the difference which of itself saves the cost of a DE LAVAL farm machine in six months or a year, and in creamery use several times a year, with the result that 98 per cent of the world's creamery separation today is done with DE LAVAL machines. A DE LAVAL catalog makes plain the REASONS for this difference and is to be had for the asking.

107 FIRST STREET PORTLAND, ORE.

When it is full the edges of the cloth are laid smoothly over the lid or follower is put on.

This cheese is usually pressed about twenty-four hours. After two hours it should be turned and the cloth changed. The pressure must be about 500 pounds for a ten-pound cheese. When taken from the press it is bandaged by sewing a piece of cheesecloth around it. The room should be well ventilated, but without draft, and the temperature considered best is between 50 and 60 degrees. The cheese should be turned every day during the first month and twice a week during the next month. It is not considered fit for eating until it is three months old, and should improve until it is ten or twelve months old.

Anna F. Sorensen.

Howard county, Neb.

### TERRIBLE SCALY ECZEMA.

Eruptions Appeared on Chest, and Face and Neck Were All Broken Out

—Cured by Cuticura.

"I had an eruption appear on my chest and body and extend upwards and downwards, so that my neck and face were all broken out; also my arms and the lower limbs as far as the knees. I at first thought it was prickly heat, but soon scales or crusts formed where the breaking out was. Instead of going to a physician, I purchased a complete treatment of the Cuticura Remedies, in which I had great faith, and all was satisfactory. A year or two later the eruption appeared again, only a little lower; but before it had time to spread I procured another supply of the Cuticura Remedies, and continued their use until the cure was complete. It is now five years since the last attack, and have not seen any signs of a return. I have more faith in Cuticura Remedies for skin diseases than anything I know of. Emma E. Wilson, Lincoln, Iowa. Oct. 1, 1905."

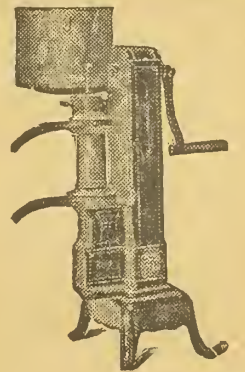

### Why Not Visit California

this winter? There will be an especially low rate during March and April—colonists' second-class one-way tickets \$33 from Chicago. A corresponding reduction in rates will be made from all points on the North-western Line.

Our daily and personally conducted tours offer many advantages to the traveler, among which is our service of Pull-

man tourist sleeping cars, through without change Chicago to San Francisco, Los Angeles or Portland, in which a double berth costs only \$7.

First-class round-trip tickets with very liberal return limits are sold daily. Consult the nearest agent of the North-Western Line for full information regarding rates, routes, etc.

## You Want All The Cream

Therefore You Want the

## Iowa Dairy Separator

No other Separator made extracts every particle of cream. Some is always left, and this "some" is your loss.

The "IOWA" does not take part of the cream part of the time. If it did, it would be no better than the others; but it takes all the cream all the time. A Separator that does less than this you cannot afford to buy. Gold medals at World's Fair and Portland mean something. Write today and ask for catalog 25. It's free, and you will find your investment of one cent in a postal card the best you ever made. All sizes from 250 to 750 pounds. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

## This Skims Off Your

### DOLLARS FOR YOU

And if you'll just write us a postal we'll make you a special proposition so you can prove what we tell you about the National Cream Separator.

### FREE

30 Days' FREE Trial

Prove It

It won't cost you a dollar to find out whether you want a National. Try it before you buy it. It pays for itself easily as it earns for you. The

### NATIONAL Cream Separator

will save you lots of hard work and valuable time now spent in "setting" milk. Saves waiting, washing pans, and waste.

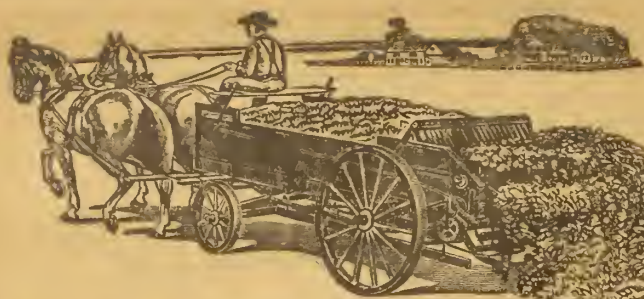

### ONLY 2 PARTS to Clean in 3 Minutes

You get 1/2 more cream and butter—\$5 worth where you now get \$4. Our National is the simplest, most desirable, best paying Separator made. Prove this by 30 days' FREE trial. Write today for FREE Catalog and Dairy Guide No. 133 to nearest office.

## AMERICAN MANURE SPREADER

Here is the Fairest Offer

You ever received on the best Manure Spreader ever made. You can't afford to buy a Spreader until you know all about the AMERICAN. We are the largest Manure Spreader Manufacturers in the world. We make the most complete line—from a small size Spreader to a Machine holding 150 bushels. And we will be glad to ship you any Spreader you may select from our big, handsomely illustrated Catalog

Direct to You at Factory Price

You save the Jobber's and Dealer's profits now, because we have cut out all Middlemen. You deal direct with us, and pay the special low wholesale factory price only, on the AMERICAN,—the Spreader that has 40% more exclusive features than any other. You can buy the American Spreader as shown in the illustration above for less money than you will be asked to pay for many other machines of inferior quality. We can prove it. We will prove it, if you will let us quote you our special whole sale factory price. Write for it today.

We Pay All the Freight

We will pay the freight to your railroad station, and if, after trial of the AMERICAN, you decide to return it, we will also pay the freight from your station. So, you see, if this Spreader fails to do what we claim, you will not be one penny out of pocket. You take no chances whatever.

You Get an Iron-Clad Guarantee for 10 Years with this Spreader

We Sell for Cash or on Time

Either way; suit yourself and you will please us. Just select from our line the American Manure Spreader that you like best, and (after you have tested it) you can pay either all cash or on easy terms. Under our liberal credit plan the AMERICAN really pays for itself as it earns for you. And it must do all we claim it will because we not only give you a guarantee after sale, but also, before you decide, a fair

30 Days' Free Trial Test

We want you to be satisfied. You must be perfectly sure or no sale! We take all the risk. To prove that our Spreader will do all we claim, we say to you—"Test the AMERICAN in your own fields. Use it for 30 days. If it isn't as good as represented, send it back at our expense." The trial will cost you absolutely nothing. We make the AMERICAN. We know just how good it is. If we were not perfectly certain that it would do your work better, easier and cheaper than any other Spreader, we could not afford to make you this liberal offer.

Write Me Today

Don't fail to do it. I have exactly the right Spreader for you at a price that will suit you. You have everything to gain—nothing to lose—by writing at once for my Free Spreader Catalog, and Special Booklet about Fertilizing. You'll be interested in both. You'll be glad that you wrote. It will be big money in your pocket. An AMERICAN MANURE SPREADER will make your manure cover more ground, your ground grow more crops, your crops sell for more money, your land worth more per acre. If you need a Spreader, you want the best. No use fooling with a poor machine, when you can buy the AMERICAN at my special low wholesale factory price—saving you a large percentage—direct from the factory, on the most liberal terms ever offered.

Remember.—The American is the BEST MANURE SPREADER in the world; you get 30 days' practical field test before final sale is closed; you can buy on easy payments, if you like; we pay the freight; we guarantee the American;—what more COULD you ask?

A postal will bring you full information. Write it today—right NOW while you're in the humor. Address it to me. I'd like to deal with you personally. Yes,—that's just the way I feel about it!

W. W. Collier, Gen'l Manager,  
American Harrow Co 146 Hastings St. Detroit, Mich.

### Hale's Duroc Sale.

The sale of Duroc Jersey bred sows held by Mr. B. W. Hale, at his farm near Laddonia, Mo., on February 14th, was fairly well attended by breeders and farmers. No high prices were paid and only twice was the \$100 mark passed. Perfect Gold Dust 33d went to Mr. T. E. Laurie, of Jacksonville, Ill., at \$112, the top price of the sale. On the cataloged stuff an average of \$36.50 was made. Several extras were sold, but at prices below the average. The day spent at Mr. Hale's will be one long to be remembered by visiting breeders, as it was St. Valentine's day and a happy surprise had been arranged by Mrs. Hale. The table set for the visiting breeders was loaded with the most appetizing delicacies. At each plate a valentine suggestive of the occasion and a "pig" souvenir was laid and a happier or a more jolly dinner party is seldom seen. Even the senior Mr. Kraschel and Mr. Baxter, of Buddy K. 4th fame, joined in the merriment and might well be classed among the younger colts on the trip. All joined in a jolly toast to Mr. and Mrs. Hale and voted Mrs. Hale the banner entertainer of the "Show Me" state. Following is a list of all sales over \$25:

Lot.	Price.
1. T. E. Laurie, Jacksonville, Ill.	\$112.00
2. J. J. Boyd, Reeds, Mo.	110.00

26. Paul Prichett	30.00
27. Mrs. A. Fisher, Kansas City, Mo.	38.00

### Riggin & Rogers' Sale of Durocs.

Messrs. Riggin & Rogers, of Petersburg, Ill., opened the Illinois and Missouri sale circuit on February 12th. This was Messrs. Riggin & Rogers' first sale. A few older breeders were present from a distance. These with a number of local breeders and a big local crowd filled the barn in which the sale was held. Practically every animal sold was bred by Messrs. Riggin & Rogers and the average of \$40.32 on the forty head sold shows a nice profit. Farmers in the neighborhood of Petersburg bought a number and Messrs. Riggin & Rogers deserve the

support received from the farmers in their vicinity. Mr. B. W. Hale, of Laddonia, Mo., topped the sale, paying \$77 for Lot 1, an Arbitrator sow bred to Gold Finch. Colonel Fred Reppert conducted the sale in a most satisfactory manner. Following is a list of all sales:

Lot.	Price.
1. B. W. Hale, Laddonia, Mo.	\$77.00
2. Henry Onken, Mason City, Ill.	41.00
3. T. F. Wubben, San Jose, Ill.	34.00
4. Howe Williams, Athens, Ill.	37.00

30. Perry Dixon	30.00
31. A. Contrell	28.00
32. Perry Dixon	31.00
33. G. A. Waring	31.00
34. Same	37.00
35. Geo. Wemling	24.00
36. T. A. Laurie, Jacksonville, Ill.	40.00
37. A. Kline, Athens, Ill.	27.00
38. Gaines Welch	34.00
39. Cecil Henline, Towanda, Ill.	40.00

### Schwab Makes Good Sale.

A good crowd of breeders and farmers from Nebraska and Iowa were in attendance at the Geo. W. Schwab sale at Clay Center, Neb., on February 11th, and an average of \$34.25 was made. The offering was small in numbers, and had it not been for a number of late summer pigs being included the average would have reached the \$45 mark, as all the larger stuff sold well. Mr. Geo. M. Boddie, of Edgar, Neb., was the most prominent among the buyers, purchasing most of the top sows. Below is a list of those selling for \$30 and over:

Lot.	Price.
1. Geo. M. Boddie, Edgar, Neb.	\$50.00
2. Same	34.00
3. Same	30.00
4. Same	52.00
5. David Loudon, Clay Center, Neb.	30.00
6. Geo. M. Boddie	32.00
7. S. A. F. Mauch, Clay Center, Neb.	30.00
8. D. V. Curry, Harvard, Neb.	40.00
9. P. A. Brim, Harvard, Neb.	35.00
10. H. B. Loudon, Clay Center, Neb.	40.00
11. Geo. M. Boddie	92.50
12. Wm. J. East & Son, Clay Center, Neb.	47.50

### W. J. East & Son Make \$44.80 Average.

The sale of Duroc Jersey bred sows made by Messrs. W. J. East & Son, of Clay Center, Neb., on February 13th, was well attended by breeders and farmers from Nebraska, Iowa and Kansas, and an average of \$44.80 was made on the entire consignment. The top price paid was \$150 for No. 1 in catalog, a fine gilt by Improver II. out of Countess, the highest-priced sow ever sold in Kansas. She was sold to Messrs. Ward Bros., of Republic, Kan., and a bright future is predicted for her. Below is a list of those selling above the \$35 mark:

Lot.	Price.
1. Ward Bros., Republic, Kan.	\$150.00
2. Geo. Schwab, Clay Center, Neb.	85.00
3. Same	51.00
4. J. W. Graves, Bladen, Neb.	42.50
5. C. E. Inglesby, Hastings, Neb.	71.00
6. Edward Gilbert, South Omaha, Neb.	50.00
7. L. H. Page, Friend, Neb.	36.00
8. M. F. Marymee, Bladen, Neb.	53.00
9. B. J. Dunn, Trenton, Neb.	47.50
10. J. B. Hendrick, Glenville, Neb.	35.00
11. L. R. Alibirding, Glenville, Neb.	35.00
12. James Cooney, Clay Center, Neb.	35.00
13. Edward Gilbert	50.00
14. L. H. Page	35.00
15. B. J. Dunn	35.00
16. Same	46.00
17. James Cooney	37.00
18. A. A. Galt, Edgar, Neb.	37.00
19. Chas. Mitchell, Edgar, Neb.	35.00
20. C. Wineberg, Glenville, Neb.	35.00
21. H. B. Loudon, Clay Center, Neb.	49.00
22. B. J. Dunn	41.00
23. A. A. Karschner, Wilcox, Neb.	65.00

### T. E. Laurie Has a Good Sale.

Mr. T. E. Laurie, of Jacksonville, Ill., held a most successful sale of Duroc Jersey bred sows on February 13th. Breeders from the Riggin & Rogers sale of the day before were joined by fully a dozen new arrivals. Mr. Laurie had promised the boys a good lot of hogs and that they were not disappointed is proven by the average of \$67.52 on the entire number sold. The top of the sale was \$212.50, paid by Messrs. Thomas & Hogsett and Fagin, Browning & McCabe, Golden, Ill. Upwards of ten head sold at prices ranging from \$100 up to the top. Many good bargains were sold in Mr. Laurie's sale and buyers will undoubtedly make good money on their purchases. Colonel Reppert did the selling in his usual satisfactory manner. Following is a list of all sales:

Lot.	Price.
1. W. R. Deffrees, Smithville, Ill.	\$135.00
2. E. S. Weeks, Griggsville, Ill.	125.00
3. B. W. Hale, Laddonia, Mo.	105.00
4. Dave Canady, Jacksonville, Ill.	31.00
5. McGaffine, Little Indian, Ill.	195.00
6. W. R. Deffrees	85.00
7. S. Archer, Pittsfield, Ill.	42.00
8. E. S. Weeks	85.00
9. E. J. Sweeney, Bloomington, Ill.	32.50
10. Dave Canady	36.00
11. H. Day, Kern, Ill.	55.00
12. Sub.	35.00

16. Mr. Chenoeth	34.00

Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$2.00, addressed as above.

LAW QUESTIONS CONSIDERED.

UNDELIVERED DEED.

A Subscriber, Corydon, Iowa.—A and B were husband and wife. A died. B deeded land to their children, but did not deliver the deeds, and will hold them until she dies. One of the children is a son who is married and has money in bank. In case he should die without children, while his mother is alive, what portion of said land and of said money would his wife be entitled to by law?

Answer.—None of the land, because the deed would not be delivered. Title did not vest in the son. A deed takes effect from delivery. The son's wife would be entitled to her widow's allowance out of the money in bank, and then one-half of the balance, other half going to the son's mother.

CONVEYANCE—HUSBAND AND WIFE.

A Subscriber, Walker, Iowa.—A and B are husband and wife. They own 200 acres of land. A talks of selling the land, but B is not in favor of it. Can A sell and convey the farm against the will of B?

Answer.—We assume, of course, that the title to the land is in the husband's name. If it be a homestead or includes a homestead, both husband and wife must execute the deed of conveyance to make it valid. If it be not a homestead, and does not include one, then the husband can convey it without his wife's consent, but such conveyance will be subject to the wife's distributive share of one-third, provided she outlives her husband.

HOMESTEAD ENTRY—LAND WARRANT.

A Subscriber, Richmond, Kan.—(1) A filed a homestead claim on 160 acres of government land in Colorado, in November, 1906, and intends to make it his future home, but cannot at present make a living on it for his family. Can he live on the claim himself and leave his family working in another state, sending him money to help along with the improvements, and hold his claim under the homestead law? (2) Can A purchase a soldier's government land warrant and apply it on his homestead entry, and get patent for the same at once? (3) Does such a land warrant require residence on the land for any length of time?

Answer.—(1) He can hold his claim under such circumstances. If the homesteader himself resides on the claim, although his family be absent, it is sufficient. (2) He cannot apply a bounty military land warrant on a homestead entry. He can locate government land with the land warrant, but cannot mix it up with a homestead claim. (3) It does not.

HOMESTEAD—CITIZENSHIP.

An Oklahoma Subscriber.—A and B are father and son. A came to this country from Germany when the son was three years old. When B was five years old A took out his first naturalization papers, but has not since then taken out his second papers. Must B take out his second papers before he can prove up on land as a homestead in either Kiowa, Comanche or Apache counties in Oklahoma?

Answer.—B can make a homestead entry after he has filed his declaration of intention to become a citizen of the United States—first papers, so called—but he must become a citizen fully natural-

ized before he can prove up and get a patent.

STALLION SERVICE FEE.

A Subscriber, Diagonal, Iowa.—A bred a mare to a stallion. The service fee was \$10. Afterwards A sold the mare to B with service fee to follow the mare, but did not then know whether the mare was with colt or not. B had a public sale and sold the mare at auction the same way to C, who took her out of the state. The owner of the stallion was present at this sale and saw the sale made, and said nothing. Afterwards he demanded that A pay the service fee. Can he recover the amount from A?

Answer.—The owner of the stallion can recover the stallion fee from A. He need not look to either B or C. He had no contract with either of them. He did not release A, and take in his place as his debtor either B or C. His contract was wholly with A, and therefore A is liable to pay the fee. He may compel B to pay him, and B may compel C to pay him, but the stallion owner looks only to A. The law of Iowa does not provide that the service fee of a stallion shall become a lien on offspring. It is simply a common debt like any other debt.

ROAD DRAINS.

A Subscriber, Lewiston, Neb.—(1) Several years ago the road authorities graded the public road in front of my premises, and made a ditch on the side, and put a culvert there for me to get in and out from my place to the road. The culvert was made of planks and they are breaking down and a new culvert is necessary and the commissioner says I will have to provide it. What is the law about it? (2) If I should neglect to fix it and drive through it as it is, which would turn the water on the road, would I be liable for damages?

Answer.—(1) There seems to be no statute law in Nebraska which specifically settles the question. It is our opinion that the commissioner is correct, and that the adjacent land owner must provide a cover or passage over a drain or ditch made along the roadside, in order to cross it in going to and from the public road, if he wishes one—that is, he cannot compel the dis-

HAVE YOU CROPS EXPOSED TO HAIL STORMS ?  
PROTECT THEM IN A COMPANY THAT PAYS ITS LOSSES IN FULL

OF  
**Des Moines, Iowa**  
**DOES THIS**

Average Assessment for 14 Years 2 7/10 Per Cent.

It has paid \$1,039,494.07 for losses in the last fourteen years. It returns more money to its policy holders than any other company of its kind doing business in Iowa. It requires the smallest percentage for expenses and pays the LARGEST percentage for LOSSES of any association doing business in Iowa.

It has made the SMALLEST ASSESSMENTS without exception, in proportion to its losses of any association in the state. It points with pride to an experience of fourteen years of correct business methods by which it has been enabled to carry Hail Insurance and pay its losses in full with no handicap to its members. It has gained the respect of bankers and business men. It has never offered something for nothing and has never used cheap claptrap to catch the unwary, but offers sound Insurance at actual cost, and has never made a pledge which it has not honorably redeemed.

It is the oldest and strongest Hail Insurance Association in Iowa, and its plans are such that each member pays in exact proportion to every other member, according to the risk carried.

Take None But the

THE OLD RELIABLE  
..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs.

I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

Cancer Cured at Home

I have so perfected my Mild Combination Treatment that patients may use it at their home with as good results as though it were applied at my offices. I will gladly furnish to every sufferer positive and indisputable proofs that my treatment does cure Cancer. I will furnish ample evidence of my integrity, honesty and financial and professional ability. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—write for my book, "Cancer and Its Cure." It will cost you nothing and will tell you how you can be cured at home. Address,

**DR. O. A. JOHNSON, SUITE 371, Kansas City, Mo.**  
1233 GRAND AVE.

Have you a friend suffering from Cancer? Do them a favor they'll never forget by sending them this ad

trict to provide it. (2) We think not.

NAME—MARRIAGE.

A Subscriber, Nokomis, Ill.—Master A was illegitimate born. His mother afterwards married B and Master A took the name of his stepfather without any process of law. In case he should marry by that name, would the marriage be legal?

Answer.—Perfectly so. Just as valid and binding in every respect as though he should marry by the name of his mother before she married B.

R. F. D. TROUBLE.

An Iowa Subscriber.—Certain false reports in reference to several rural free delivery routes and their patrons have been made to the postoffice department at Washington, and to members of congress, by postmasters, and also by rural agents or inspectors. These reports have been misleading and evasive of the truth. Misrepresentations have been made by postmasters to citizens to induce them to sign petitions for routes, and to congressmen to obtain their influence to get routes established in order to increase the patronage of the postoffices. What can be done about such matters?

Answer.—Probably nothing of any consequence. You might write to the General Superintendent, Free Delivery System, P. O. D., at Washington, D. C., and lay all the facts before him, but most likely nothing would be done about it.

Evergreens in the yard and about the house lend a particularly pleasing appearance to farm premises. They cheer up these cold, dull days and, moreover, make a windbreak that can be secured in no other way. We noticed that a good many fall birds remained with us until late in the winter, for the simple reason that they could roost in the pines.

SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Minneapolis & St. Louis R. R. will place on sale special second-class settlers' tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

"The Encyclopedia of Iowa Law."

"No work like this has ever been published in the English language." From The Homestead.

"Your book is the only one I have seen on which I can place any reliance." The Hon. H. E. Deemer, Judge of Supreme Court.

"I would not take one hundred dollars for it if I could not get another." W. W. Hagin, R. F. D., Union, Ia.

"No fifty volumes, and I might safely say, not even a hundred volumes in my library could be selected that would be to me of so much practical use what the law is in Iowa on a given question, or advising others as to the law." Judge C. B. Bradshaw.

"The laws of Iowa need no longer be a sealed book to the people of Iowa." Register and Farmer.

Sample pages free to those interested. Address, Iowa Law Book Co., Box 343, Marshalltown, Iowa.

Your Pocketbook and Your Stock  
Will be Fatter IF YOU TRY THIS

Because you can use 25% more of the food value of corn on the cob which you now throw away. That means more dollars in your pocket. Besides, all stock thrives better when the rich nourishment which the corn supplies is mixed with the palatable food which the cob supplies—if you slice your corn ears with

Dean Ear Corn Slicer

That's a recognized fact. Experiment stations say so. For example, hog cholera, caused by rich corn feeding is prevented. Think of that. Your stock will be stronger, healthier and fatter if you slice the corn ears—think how much you will save in feed even in a month or two. The Dean Ear Corn Slicer will pay for itself in a short time in feed saving.

It is built strong to last a lifetime. It is easy and safe to run—even a boy can run it. Slices 1/2 to 2 1/2 inches thick—capacity 30 bushels per hour up. With or without elevator which delivers to bin or wagon.

You can buy the size best for your needs.

Try It Before You Buy

Get the DEAN Ear Corn Slicer from your dealer or write us direct for lowest price and we will send you one to try 15 days with return privilege if not satisfactory. Convince yourself. If it isn't satisfactory—send it back.

# DIAMOND JOE'S BIG WHITE SEED CORN.

**DIAMOND JOE'S BIG WHITE**—A Strictly new variety. None like it. The Earliest and Best Big White Corn in the World. Thoroughbred—inherited—propagated for the past seven years. Bred for the earliest maturity and most Big Bushels of sound solid corn per acre and not for fancy show points. Every stalk bears one or more good ears, and outyields all other sorts. Made 146 bushels per acre on our trial ground last season, leading all other varieties by far. Cataloged for the first time last year and won the hearts and admiration of thousands of farmers and corn growers everywhere planted, making almost unbelievable yields, some reporting as high as 125 to 150 bushels per acre and over, while 90, 100 and 110 bushels average was a common thing. Our big FREE illustrated Seed Catalog gives full description and tells you all about it, as well as all the other leading and best varieties.

**EVERYTHING FOR THE FARMER AND GARDENER**, including all the best varieties of SEED OATS, BARLEY, SPELTZ and other Farm Seeds. We carry large stocks of Clovers, Alfalfa, Alsike, Timothy, Blue Grass, Red Top, Bromus Inermis, Orchard Grass, Meadow Fescue, German and Siberian Millet, Cane, Kafir Corn, Red River Grown Seed Potatoes, and all other Farm, Grass, Garden and Flower Seeds. Write for our Big FREE Illustrated Seed Catalog. Send today and it will be mailed to you tomorrow.

## THIS FANNING MILL PAYS FOR ITSELF ON EVERY 7 ACRES

That's just exactly what the "New Superior" will do—only from increasing your yield—After Harvest it makes money for you again, grading your grain for market so you get Topnotch prices, and escape Dockage.

The "New Superior" don't cost any more (in many cases less) than ordinary mills, and it is equipped with our New Invention for separating wild or tame Oats from Wheat or Barley. The New Superior subjects all seed and grain to 3 distinct and different "treatments" in the same operation. 1st the scalping process, 2nd the cleaning process, and 3d the screening process. This leaves the grain absolutely pure and the kernels of uniform, even size.

Why not accept our offer of a 30 DAYS FREE TRIAL (freight prepaid) of the "New Superior" before you buy a fanning mill?

All we want is to prove by the New Superior itself—in actual work—on your own barn-floor—that it will pay you back its cost quicker and surer than any other mill made. No matter what fanning mill you have decided to buy—write us first—you have nothing to lose, but everything to gain by doing so—and the trial is free. If you write us we will send you our new book, "How to Increase your profits", which is valuable to any farmer; and explain everything about the New Superior and tell you how to increase your profit. Write today. Do it now. **J. L. Owens Co., 614 Superior St. S. E., Minneapolis, Minn.**

# SEED CORN

The Iowa corn crop is worth more money than all the mines in the United States. Will it pay you to expend 50c per acre to increase your yield 25 bu.?

We can furnish you seed corn that has been bred back of it. "Why?" "Because" We have been breeding the best varieties for years.

We have a \$14,000 equipment for handling it. We have experts to grade it and select the best. We have 1,200 acres of the best land in Page county devoted to its growth.

We have graduates of Agricultural Colleges in

**A. A. BERRY SEED CO., Box 52, CLARINDA, IA.**

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure brood corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16

**W. W. VAN SANT & SONS**

Farragut, Iowa.

## Pure Bred SEED CORN

Our business is growing seed corn. It means more bushels to the acre, when such seed is planted, and better corn; it means a bigger profit on your labor, and a corn that is ears—not nibbuns. We grade it all by hand; test it; guarantee germination. We are located in best corn section of the world. Write for Catalog and free samples. Free Garden Seed Offer in Catalog. Photographs of real corn as raised.

Box 12

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### THE HOT BED.

Those who have had experience with the hot-bed, and especially those who have taken sufficient pains in handling it so that their efforts resulted successfully, are loud in their praises of this plan of raising early vegetables.

In his book on "Plant Culture" the late Professor Goff, of the Wisconsin Agricultural College, says that the hot-bed should be from two to two and a half feet deep and that it should be naturally or artificially drained. Heating material of some kind should be made to nearly fill this pit and nothing is better than horse manure, though, of course, it will be an improvement to have this mixed with leaves and other moist vegetable matter.

The heating material should be put in place several days before the pit is desired for use. The manure should be sufficiently moist so that it will generate heat freely, and Professor Goff advises that it be turned over and thoroughly mixed after heating begins. It is generally advisable to erect a frame extending, say, six inches from the surface on the one side and nine inches or a foot on the other, thus giving a slant to the glass top. Of course it goes without saying that the lower side of the frame should be on the south.

Generally, it will be necessary to wait for a few days after the manure is put in until after the maximum temperature point is passed. Indeed, it is not unusual to find instances where the temperature goes high enough to kill plants, and it would be a mistake to have done any seeding before this point is reached.

The manure should be covered with three or four inches of soil and then over this again, of course, is placed glass frames.

As to what should be put in the bed, depends upon the needs of the family. Such vegetables as radishes and lettuce are generally the first sown and of course it is always advisable to start one's tomato, cabbage and possibly the sweet potato plants.

### Problems of the Farmer Starting an Orchard

To the Editor of The Homestead:

There is one warning which should be given every farmer who expects sooner or later to start an apple orchard. It is simply this—begin in time. That is, begin right now, whether the orchard is to be put out this spring, next spring or the next. The matter of starting an orchard should be seriously considered, for unless anyone has had experience, he does not know how many things there are to learn.

Naturally the more one knows about any work the better it can be done. The same is true with the farmer about to start his first orchard. The more years of observation of other people's failures and successes in apple orcharding the better prepared is he to start an orchard of his own. Of course, a farmer does not have the time to become a specialist, but he can learn a great many things about the varieties best suited to his climate and soil, the best location of the orchard, and distances apart for planting; besides, a hundred other points of valuable knowledge and all this information can be picked up at random in one's neighbors' orchards and by reading.

Of the many different problems which the farmer must settle in order to put out an orchard that will sometimes prove a profitable one there are two outstanding ones—namely, what varieties to plant and how far apart to plant them. When once the order has been sent in and the orchard site staked out, the mind can rest fairly easy.

Whether the trees are purchased of a local or distant nursery it is more or less of a confusing task to make selection from the score or more of varieties that are offered and suited to one locality. It is a fact that is fully appreciated, especially by those who have bearing orchards in the northern part of the corn belt that there are all together too many summer varieties of apples. Every fall season finds the market glutted with Wealthy, Duchess and Whitney in a great many localities. Few there are indeed who are not well acquainted with these varieties. A few

Box 25, SHENANDOAH, IOWA.

trees of each are very desirable, for they make the first apple sauce of the season. However, they are so perishable that the local market is the only place where they can be disposed of except perhaps the Wealthy, which we know in some parts of the country

around the larger cities are barreled by commission firms, held in cold storage for several weeks until the burden of summer apples has been disposed of, and then placed on the market again, even in some of the very same localities where they were grown. This points out more clearly than ever that more late ripening varieties should be planted. Just what varieties to recommend for each locality is better left to some reliable local nurseryman. South of the

## Wanted:

Two married men for orchard and farm work. Separate house and garden for each. No booze fighters or cigarette fiends need apply. Address, N. C. Dunlap, Manager Watson's Ranch, Kearney, Nebraska.

A Gentleness wanted to introduce Burbank's wonderful stoneless plum—Miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. Oregon Nursery Co., Detroit, Michigan.

CLOVER SEED FOR SALE—Choice, re-cleaned, medium red, my own raising. Price \$8.50 per bushel including bag. Write for sample, H. D. Clore, Norwood, Iowa.

5 VARIETIES of seed corn for sale at \$1.25 per bu., eared or shelled. Satisfaction guaranteed or money refunded. Alex. James, Rt. 1, Shenandoah, Ia.

KIERSON SEED OATS FOR SALE. Big yielder, will not lodge or rust. 50 cents a bushel. Aye Brothers, Blair, Nebraska.

forty-first meridian the Ben Davis is a good bearer and stays on the trees long after the leaves have fallen and in the northern orchards after the last fall apple has been searched out from the aftermath, where it has been hidden and ripened to a high degree of juicy and mellow eating. There is, of course, few winter varieties for the northern orchard that will keep till spring; however, there are some, among which may be mentioned the Greenings, Willow Twig, Scott's Winter, and the Janet, which is a good bearer in the North, and while many do not consider it much of an apple, we think it very good in spring, when it has become mellow and all other kinds of fruit are gone. As stated in the beginning, the best way to learn the best kind of varieties is to observe other people's orchards in your own locality. If we were to put in 100 trees now, seventy-five of them should be winter varieties. There is always a good market for late apples. In the summer the market is glutted and the farmer does not have time to sort and market apples. Regarding the matter of the proper distance apart for trees to be planted, we wish to say that it is our experience that nearly everyone in putting out their first orchard makes the mistake of planting the trees too close. We well remember our first experience and even after we had been warned that thirty feet between trees was a proper distance we violated the experience of those who knew and placed the trees closer. Twenty-five to thirty feet apart each way looks like scattering trees over a large area, but we have learned by experience that that is not a bit too much space to allow. By the time the trees attain a good age there will be left none too much room between them. Besides plenty of sunlight in the orchard prevents much disease and fungous growth. There need be no waste of land whatever in planting trees this distance, since the land between the rows can be cultivated and good crops grown until the trees are of sufficient age and height to prevent crops from growing. Even then rape can be grown. Iowa Subscriber.

### Top Grafting.

To the Editor of The Homestead:

A little while ago we wrote concerning root grafting and gave instructions for doing the work. The other form of grafting which may be performed upon the farm is top grafting, and this latter is generally much more practical from the standpoint of the general farmer and fruit grower than is root grafting. In almost every orchard of any size there is too large a proportion of trees of some variety, which, though perhaps good, does not make a proper balance for general purposes. Very often what one has purchased for some standard variety is not true to name. Again a smooth-tongued nursery agent often succeeds in selling some new variety with high sounding name at five or six times the price of ordinary standard varieties. It often happens that when this "prize" comes into bearing it is found to be very inferior and undesirable. In all these cases if the undesirable tree be taken before it has grown too large it may very readily be worked over into some more desirable variety.

It is possible by this same method to obtain fruit from a new variety much more quickly than the natural method of allowing the tree to grow and come into bearing. This is done by grafting a twig from the new variety into one of the top branches of an old and bearing tree. By this method fruit may be obtained the second or third season.

The method of top grafting is easily learned by observation and a little practice, but hard to describe in writing. The scions or grafting pieces from the desired variety should be taken from the last year's growth and stored in a cold dry place. This may be done at any time during the winter. It must be done before growth starts in the spring, for a growing scion cannot satisfactorily be grafted, nor one taken even after the sap has started. The grafting should be done any time between March 1st and April 15th, and if done early the scions may be cut and used immediately.

The grafts should be put into limbs not over one and one-half inches in diameter, better less. The limbs to be grafted should be selected with a view to the future shape of the tree and should be generally distributed throughout the head, and the point where the grafting is to be done should be about

To quickly introduce this valuable "Blizzard Belt" Chestnut and at same time gain new friends, we offer to send a fine, 1 year old Tree entirely free to a limited number of property owners reading this who have not already benefited by our Advertising Offers. Mailing expense 5c which send or not as you please. A postal will bring the tree. We have

for this free advertising distribution and if you want one of them write at once as they will go quickly.

Our catalog containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens etc., with a mine of valuable information for fruit-growers is free for the asking. Write today.

The Gardner Nursery Co., Box 702, Osage, Ia.

## BURPEE'S "Seeds that Grow"

are proved the Best Seeds that can be grown. We do the testing.—You run no risk! If you garden either for pleasure or profit you should study "The Leading American Seed Catalog." A postal card will bring you a copy, by return mail.

W. ATLEE BURPEE & CO., Seed Growers, Philadelphia, Penna.

## The New Ideal Seed Corn Tester.

NO more cigar box, tin plate and blotting paper seed corn testing. The New Ideal Corn Tester solves the whole problem. It is endorsed by Professor Holden and every other corn expert in the Central West. It tests thoroughly enough corn for forty acres each time. The season for testing is at hand. Write at once for catalog to

ULBRICH SEED CORN TESTER COMPANY,

424 Walnut Street,

Atlantic, Iowa

the same distance from the ground in each one if possible. If the tree is quite large it is best to graft about half of the principal limbs one season and the balance the following season.

The limbs which are to be grafted should be cut off squarely across with a sharp saw and the surface smoothed with a knife. The next step is to split the stub. For this no instrument is better than a chisel. The cleft is then pried open with the same instrument and held to receive the scions. Scions should be cut from four to six buds (usually three to five inches in length). The lower end is next prepared to place in the cleft. This really is the most important part of the cutting and for it a sharp, thin-bladed knife should be used. Nothing is better than a shoe knife. Each side should be shaved off with a single stroke of the knife, making the lower end the form of a wedge about an inch and a half in length and a bud just at the top of the wedge. As two scions are put in each cleft, two pieces of almost the same size should be used. These are now fitted in position. They should be slipped down until the entire cut surface is within the cleft. The inner bark of scion and stock must coincide. This is the point where growth takes place and here a circulation must be set up or the twig will not start into growth. When both scions are in place, every cut surface, including the top of the scion, should be covered with grafting wax. A strip of cotton cloth about an inch wide should then be wrapped about the union and stuck down with a little of the wax.

A very satisfactory wax for grafting may be made as follows: Resin, four parts; beeswax, two parts; beef tallow, one part. Melt the resin and add the beeswax; when it has also melted, add the tallow and stir well, keeping on a fire for about five minutes. Then pour the mixture into a pail of cold water. This immediately hardens it so that it may be worked with the hands. It should be worked and pulled until it is white, when it is ready for use. It is generally necessary to have a little tallow on the hands, both while working the wax and while using it, as it is very adhesive.

The easiest fruit grafted is the apple and anyone with a little practice should be able to graft it very successfully. The plum and cherry are much harder and one should become something of an expert before attempting either.

As the grafts come into growth the surrounding limbs should be gradually removed. Numerous water sprouts and shoots will start on the limb in which the graft has been placed. These should be rubbed off from time to time so that

the graft will get the full strength from the tree. If both grafts live they should be allowed to grow throughout the season and the following spring the weaker one removed, allowing but one to remain. Franklin Brown.

What Varieties of Strawberries to Plant.

To the Editor of The Homestead:

The question of what varieties of strawberries to plant is one which comes

to every grower, whether he is in the business commercially, or merely desires a few berries for his own use. It is hard to answer except in a very general way, and the answer depends upon a number of circumstances.

In the first place, some varieties, no matter how desirable, cannot be grown in a given locality on account of unfavorable conditions of soil and climate. These local conditions have much more bearing than would naturally be supposed. A matter of forty or fifty miles north and south often completely changes the list of varieties which may be successfully grown.

Varities which are suited to one kind of soil will not do well upon another. A variety, for instance, which makes a fair growth and a good yield upon a sandy soil, may, upon our rich, black prairies, run almost entirely to leaves and vines and bear little fruit. Drouth affects the varieties which may be grown in any locality. For that reason the most definite advice which may be given is to plant varieties which have proven successful in your neighborhood. The planting of any other is an experiment.

There are, however, some varieties which have given more general satisfaction than others, and their use for planting may be recommended more generally. Among these we would mention Warfield, Crescent, Clyde, Bederwood and Senator Dunlap. There are perhaps others which are as much entitled to mention. Our hobby is Warfield and Senator Dunlap and we believe they are giving better returns than any other two varieties.

The first three varieties mentioned are imperfect flowering, that is, the blossoms contain no male organs and hence they cannot fertilize the seeds. For that reason they will not develop fruit unless a perfect flowering plant, that is, one the blossoms of which contains both male and female organs, is growing near. The last two varieties named are perfect flowering and may be used to fertilize the blossoms of imperfect flowering varieties. Being perfect flowering, either will bear fruit without any other variety near. Subscriber.

Remodeling a Hedge Fence.

To the Editor of The Homestead:

A subscriber at Hartville, Mo., sends the following inquiry:

"I would be pleased to know what treatment to give an orange hedge fence. It is about ten years old, the stems are from one to two inches in diameter at the base, and it is about twelve feet in height. I wish to make

it stock and hog proof. When and in what manner should it be worked upon? How far into the diameter of each body should I cut and how far from the ground should it be pruned, and what season of the year should the work be done?"

If we were dealing with this problem on our own farm we should solve it by cutting out the hedge and installing a good woven wire fence. In our opinion the hedge fence proposition has seen its best days. One reason for this is that even after it is well established it requires a good deal of labor each year to keep it in condition. The scarcity of labor and even the difficulty of securing it at any price makes this feature of it an important problem.

It is frequently stated that after the fourth year little further care is necessary on a hedge fence, and probably the majority of hedge fence owners are following this policy. The conditions described by the correspondent are the direct results. Hedge fence form is not the natural one for this plant to take and it can only be held to it by careful and regular attention.

Land is also rapidly increasing in value and every foot of space must be utilized. The hedge fence is greedy in this respect and takes up wide swaths on either side. Frequently crops are planted close up to it, but the soil is so thoroughly taken up with roots that the newcomer is robbed of its share of plant food and moisture.

However, coming directly to the correspondent's question concerning the best plan of putting this hedge into condition to turn both cattle and hogs, I would suggest that the probabilities are that in the long run the best plan would be to cut it back to the ground and get a new growth. If this cutting back is done this winter a heavy sprout and a new growth will be secured next spring. If this new growth is repeatedly cut back during the first summer to induce a bushy, stalky growth near the ground at the end of the first year you will have a hedge far superior to the present one. The young shoots naturally grow upright, and to secure a thick growth at the base constant cutting back or heading in is necessary. A better fence will be secured if pains are taken to bend each shoot down and weave it into the preceding one. This is rather a disagreeable task, however, and requires both time and labor.

A fence in this condition can sometimes be remedied by running a few strings of wire through the hedge near the bottom. This is largely a temporary make-shift, however.

In case a wire fence is substituted it is probable that a number of the hedge plants could be trimmed up and used as posts in place. A. T. Erwin.

**A CHERRY COLLECTION FOR \$3.33**

There's no use talking—we've hit on the right plan of handling nursery stock. We select good trees and the best varieties and make them up into popular collections. We have had long experience with cherries. We know what varieties succeed practically everywhere. Say you want as many as a dozen—we recommend the following:

4 Early Richmond, the old reliable  
2 Large Montmorency, later and better  
2 English Morello, latest of all  
2 Dyehouse, the coming cherry for market  
1 May Duke, an old favorite  
1 Late Duke, hardy and good

All two and three year trees, 4 to 5 ft. high, 1/2 inch caliper, thrifty and well rooted, and will be packed so well that they will be certain to reach you in good growing condition. Now we offer you these 12 fine Cherry trees, together with your choice of the valuable premiums shown, for \$3.33 cash with order. With the special offer of Cherry trees listed above we will send you any one of the following collections (your choice)

**ABSOLUTELY FREE**

100 Mulberry Seedlings  
100 Norway Spruce, 12 inch  
6 Plums, 2 year, 6 kinds  
4 Pears, 3 year, 4 kinds

10 Fine Roses, 10 kinds  
100 Gladiolus, blooming size  
3 Peonies, red, white and pink  
10 Apple Trees, 2 year, 5 good kinds

We will pay the freight, too, if you live in Iowa, Wisconsin, Illinois, Nebraska, Missouri, Kansas, Oklahoma, or South Dakota. Persons in other states should send 50 cts. more. Won't this bundle of cherries suit you? Read the offer over again. Re-read the list of premiums, make your choice, and send in the \$3.33. Do it now. References: Ia. **Bred Sow Sale at Shadeland.**

On Thursday, February 7th, Messrs. Edmonds, Shade & Co. held their annual draft sale of bred sows from their well-known herd. The day was ideal, the crowd all that could be asked, and the offering in nice sale condition. The main attraction in this sale was the well-known sweepstakes sow, Royal Blossom 5th. This sow was in the pink of condition, and was started by the well-known breeder, Mr. Jas. Williams, at \$500. She was worked up slowly, showing that the bidders were wanting to buy the sow, but to buy as cheap as they could, until she reached \$600, when she was knocked off to Mr. Geo. Nordike, of Allen, Neb., at that figure. Mr. Nordike certainly has a good proposition in this sow. No. 2 in the catalog, a Proud Advance sow, went to Mr. Geo. Blessing, of Homer, Neb., at \$300. The bidding was spirited and the whole offering was disposed of in good season at an average of \$94. Colonel Luther conducted the sale in his usual able manner. Below we give a list of sales:

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## Treatment for Frozen Combs.

To the Editor of The Homestead:

There is nothing like a bit of personal experience to impress needed lessons both of prevention and cure. This has just been well illustrated recently. In making up the White Wyandotte pens, a fine cockerel not wanted there at the present, and which has been accustomed to roosting in one of the Wyandotte houses, was put in with the general flock in the large house. Severe weather kept all the fowls shut in for several days, when a milder temperature ensuing, the fowls in this large house were given a run. I noticed during the day that this cockerel was determined to gain entrance to his old stamping ground, but toward night seeing nothing of him, I concluded he had given up and gone in with the other fowls. But the next morning he crawled from some hiding place, comb and wattles badly frozen. In a short time he was a most pitiable looking object. His head almost trailed on the ground, the frosted portions frightfully swollen. I brought him to the house,

## The Paying Hen

is the one which contributes 150 eggs or more in a year, toward the family grocery bill. The sure way to have such hens, eggs in abundance, and a lot of ready cash is to give a little of

DR. HESS  
Poultry PAN-A-GE-A

with the morning feed every day in the year. Dr. Hess Poultry Pan-a-ge-a is a tonic, the sole purpose and action of which, is to assist nature in the performance of necessary functions. It aids digestion, prevents disease, and sends the proper proportion of each food element to the organ most in need. It also contains germicides which destroy bacteria, the usual cause of poultry disease. Poultry Pan-a-ge-a is the prescription of Dr. Hess (M. D., D.V.S.), and is a guaranteed egg-producer. Endorsed by leading poultry associations in United States and Canada. Sold on a written guarantee, and costs but a penny a day for 30 fowls.

WRITE TODAY AND SEE FOR YOURSELF THE BARGAIN WE OFFER.

and anointed the parts with vaseline, and put him back in a warm corner of the house, hoping to find him better next morning. But the matter was far worse when I looked after him bright and early. It seemed a question of a very short time before the poor fellow would give up the ghost. As he was a valuable bird, purchased the past season, I determined to save him, if such a thing were possible.

Going to my clipping file, I looked up the department of frozen combs. I found several things recommended. One woman recommended Old English Black Oil, applied to the affected parts with a feather. It had done wonders for her, but, alas! I neither had Old English Black Oil nor did I even know what it was. Another writer claimed that the best remedy was a mixture of two drams of oil of glycerine and one dram of oil of peppermint, applied morning and evening for two or three days. This seemed more practical and hopeful, but on looking further I found recommended lard, two parts, quinine, one part, and same amount of coal-oil; melt all together and bathe frosted parts, and it will take out the frost in a hurry. I was a mile and a half from a drug-store, and no quinine, so I investigated still farther. Then I chanced upon this: One tablespoonful turpentine to five or six of vaseline. If vaseline isn't available, use half that amount of glycerine. Even turpentine and fresh lard will do if the others are not handy. Nothing better than turpentine, this authority said, to draw inflammation from a frost-bite.

Eureka! I had found the practical remedy. A thorough application was at once given the suffering bird, and a 'phone message sent to the drug store to have some two-grain quinine capsules ready for a hurry call. The quinine taken internally would serve as a tonic and an aid in throwing off the cold.

It looked pretty dubious for a while. My patient was kept in a cool part of the house in a flannel-lined box. He lay motionless the most of the time, not caring, seemingly, what was done to him. But early the next morning, we were astounded by a feeble crow from the hospital box. I put him out in the warm Wyandotte pen during that day, and he looked rather forlorn, sitting in almost motionless dejection. That night I brought him in again to his box, and the next morning he crowed quite lustily for nearly five minutes. Then he began to eat, and is now on the road to recovery. Three capsules of quinine, the turpentine-vaseline "dope," did the business, and I am not mourning the loss of a valuable bird.

Mrs. S. B. Titterington.

## To Catch Turkeys.

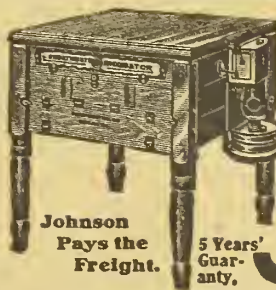

To the Editor of The Homestead:

In a late issue of your paper I notice you ask for some one to tell how to catch young turkey gobblers that will fly when an effort is made to drive them into any building.

I succeeded in capturing a bunch of that kind by adopting the following plan: In the first place, we have a chicken fence of wire netting along one side of our poultry yard and happened to have an extra piece of the netting about a rod and a half long. We drove a stake in the ground some three or four feet from the fence and took the piece of netting and carried it some eight or ten feet beyond the stake and tied it securely with binding twine to the fence, then fastened securely to the stake, thus forming a wedge-shaped pen. We then covered this small pen with some of the same material and fastened

Incubators shipped the same day order is received.

Reliable Incubator & Brooder Co., Box B103, Quincy, Ill.

securely, letting the loose end of the piece lie upon the ground. We then gently drove the turkeys along the wire fence and they just walked into the wire trap without noticing the wire netting. We made a grand rush and caught up the loose end and carried it across the opening behind them and we had them good and safe. It might be well to fasten a pole or weight of some kind to the bottom of the netting between the stake and where tied to the fence to keep the turkeys from raising it up and letting some out under it.

Schuyler Co., Ill.

M. W. Greer.

## Care and Management of Incubator Chicks.

To the Editor of The Homestead:

The majority of incubator operators let the heat go too high during incubation. This is one of the causes of the chicks dropping off so fast. Another cause is lack of fresh air. Just before leaving the shell the chick draws into the body the whole of the unabsorbed yolk of the egg. This is its food before and after leaving the shell. It must be just exactly right, as nature never errs. It is the food nature provided to sustain life until the chick is strong enough to take other food.

Do not feed the young chicks for from twenty-four to thirty-six hours after they are hatched. If fed too soon of

## The Racine Incubator

Built by the man who devoted 25 years to its present perfect development.

We pay the freight

Can be operated by anyone, anywhere. Automatic regulator, copper tank, white pine case, double walled, nursery. Built to last 20 years. Don't buy until you read our remarkable Incubator Book, written by the man who made the Racine. When you learn what he knows, you will want his machine, we think. The book is free. Write for it. Address Racine Hatcher Co., Box 135, Racine, Wis. Warehouses: Buffalo, Detroit, Kansas City, St. Paul.

too much the yolk of the egg which it took into the body before leaving the shell will not be drawn upon. It will remain unabsorbed and in time decompose, causing bowel trouble and death. The greater number of chicks which die of bowel trouble do so at about a week or ten days of age. If you open one of the chicks, nine cases out of ten you will find decomposed yolk in the yolk sack. Chicks normally hatched and given almost any kind of corn will live and seem to thrive for the first week, then

the trouble begins. The critical period in the chick's life is the first two weeks.

Starting the chick right is half the battle. When they arrive at the age of three or four weeks they have nearly passed the dangers of chickendom. One great danger is overfeeding. Improperly feeding chicks, especially for the first two weeks, unmakes more would-be poultrymen than any other thing in the whole business. Subscriber.

#### Sunburg & Olson's Sale.

February 5th dawned bright and clear and found the offering of the above breeders in splendid shape, as was testified to by all those who stopped at Madrid that day and were treated to a hot sled ride and some good eating at the farm just north of town. The selling was hardly as brisk as the quality of the offering would have admitted and a splendid lot of toppy red hogs were taken away by the crowd. It goes without saying that those present will return next year, for Messrs. Sundburg and Olson are not satisfied to breed anything but the best and most reliable hogs.

#### POINTERS.

—In order to close out his Black Langshan cockerels, Mr. S. L. Parkhurst, of Lacey, Iowa, is offering them at very liberal

prices in his advertisement that appears on this page.

—Mrs. T. O. Cooper, of Knierim, Iowa, offers Mammoth Bronze turkeys for sale.

Thirty choice Single Comb White Leghorn cockerels are offered for sale by Mr. Jno. C. Miller, of Harlan, Iowa.

—Fancy White Holland turkeys are offered for sale on page 17 of The Homestead by Mrs. A. C. Mainquist, of Red Oak, Iowa.

—Mr. Peter Geiger, of Minden, Iowa, has a few fine White Wyandottes left and some fine Buff Cochins cockerels and pullets; also some White Holland turkey toms for sale as per advertisement on page 17.

—Mrs. Ida Hepp, of Gray, Iowa, writes: "I have Barred Plymouth Rock cockerels scoring 92½ and a few unscored birds for sale. I am selling them at bargain prices in order to close out, as I need the room for breeding stock." Mrs. Hepp's advertisement appears on page 17.

—Mr. Cbas. H. Meyers, of Cincinnati, Iowa, writes: "I have a number of good heavy-boned, finely-marked Barred Plymouth Rocks to sell. Considering their quality they ought to bring \$5, but owing to the lateness of the season I will sell them at from \$1 to \$2 each. I can furnish some very fine birds that are not scored, but from stock from the best birds money could buy. Those wanting first-class Barred Plymouth Rocks should write quick." Mr. Meyer's advertisement appears on page 17.

—Mr. W. S. Gregory, of Keota, Iowa, breeds White Wyandottes exclusively. His advertisement appears on page 17. Mr. Gregory writes: "Our breeding stock is better this year than ever before. Our flock is headed with cockerels from Duston's strain and every breeder of White Wyandottes knows that Duston has the best flock of this breed in this country. We guarantee to please our customers. On all the eggs we shipped last season, we did not get a single complaint. We can furnish eggs by the setting or in 100 lots, or in any quantity desired.

—Mr. J. W. Waggoner, breeder of Barred Plymouth Rocks and Mammoth Bronze turkeys, of Monroe, Iowa, under date of February 15th, writes: "I still have a couple dozen Barred Plymouth Rock cockerels. These cockerels are large-boned fellows and are extra well harred. At the Newton and Monroe Poultry Show, 1906, my birds won sixteen prizes and nine of them were firsts. If you want good blood in your flocks now is your time. I will sell them at a bargain order to get room to mate my breeding pens." See advertisement on page 17.

—Mrs. Silas Cobbs, breeder of Barred Plymouth Rocks, Mammoth Bronze turkeys and Pekin ducks, Marathon, Iowa, in furnishing change for advertisement, writes: "I am sold out of Mammoth Bronze turkeys and have sold all my Toulouse gamers, but have three females yet to sell. At the Northern Iowa Poultry Show, January 31st to February 2d, I won first on Barred Plymouth Rock cockerels with a score of 92½, first on breeding pen and second on hen. I also won first and second premiums on Pekin ducks." The advertisement appears on page 17.

—Mr. G. M. Grinstead, of Mitchellville, Iowa, in furnishing new copy for advertisement found on page 17 of The Homestead, writes: "I am offering a grand lot of Mammoth Bronze turkeys at reduced prices. They have been prize winners for our customers wherever shown. These turkeys are large and very vigorous and the foundation stock came from the choicest blood in the country. The Pekin drakes are fine, deep, long-bodied fellows weighing from eight to nine pounds. Our Barred Plymouth Rocks are all sold. We are prepared to furnish eggs to the trade at live and let live prices."

—Mrs. T. O. Cooper, of Knierim, Iowa, writes as follows: "My advertisement in your paper is bringing lots of inquiries and some good sales. I shipped four Mammoth Bronze hens to Mrs. M. H. McElroy, of Percival, Iowa, and one tom and hen to Mrs. Lillian Par, of Auburn, Iowa, this week. I still have a few good young toms for sale, weighing from twenty-five to thirty pounds, which I will price right to close out. Anyone wishing an extra good tom can secure one at a bargain from me. Those in need should write now." See Mrs. Cooper's advertisement on page 17.

—Mammoth Bronze and White Holland

turkeys, both hens and toms, are offered for sale by Mrs. E. H. Dancer, of Lamoni, Iowa.

—Silver Laced Wyandotte cockerels are offered for sale by Mrs. F. H. Long, of Manning, Iowa.

—Mr. Peter Haegen, of Trenton, Neb., is offering White Plymouth Rock eggs to Homestead readers in his advertisement on page 17.

—Mr. Geo. H. Lawshe, of Harlan, Iowa, is offering some special bargains in Barred Plymouth Rock eggs on page 17 of The Homestead.

—Mrs. Nettie Crane, of Blencoe, Iowa, is offering some thoroughbred Single Comb Brown Leghorns for sale in her advertisement that appears on page 17.

—Readers of The Homestead who wish to purchase Barred Plymouth Rock eggs should send for free booklet to Messrs. H. Richards & Son, of Toledo, Iowa. Their advertisement appears on page 17.

—Mr. E. S. Dyas, of Bellevue, Iowa, writes: "I have no more Pekin ducks for sale, but some good Light Brahma pullets at reasonable prices. Also eggs, Light Brahma, White Wyandotte and Pekin duck."

—Mr. Franz Bollman, of Wall Lake, Iowa, has on hand a nice lot of Single Comb Brown Leghorn and Barred Plymouth Rock cockerels which he will sell at reasonable prices. His advertisement appears on page 17.

—Mr. A. C. Harre, of Belmond, Iowa, whose advertisement will be found on page 17, writes that he has some of the best-bred Buff Plymouth Rocks and Buff Orpingtons in the country and that he will guarantee good hatch. Write him your wants.

—Mr. William Michael, of Lawler, Iowa, in his advertisement on page 17 of The Homestead, announces that he has a fine lot of Barred Plymouth Rock, Silver Laced White Wyandotte and Light Brahma cockerels on which he will quote December prices.

—Mr. Fred Post, of Moulton, Iowa, proprietor of Hillsdale Poultry Farm, in furnishing copy for his advertisement on page 17, states that he is all sold out of White Holland turkeys and has but two choice toms left. He is now advertising a few more Pekin ducks and Barred Plymouth Rocks for sale.

—Mr. A. H. Graham, of Alexis, Ill., in writing The Homestead to continue his advertisement, which will be found on page 17, says: "I have been very successful in making sales of my White Wyandotte birds from my advertisement in The Homestead. I have only a few pullets now to offer for sale, but still have some very fine cockerels."

—Mrs. Mary Pierce, of Nevada, Iowa, is advertising a thirty days' sale on Barred Plymouth Rock cockerels and pullets. Everything goes at \$1.50 and \$2 each in cockerels, pullets cheaper. She has some fine stock and anyone wanting some will do well to order. Satisfaction guaranteed. She has a few Mammoth Bronze turkeys to go at right prices. See her advertisement on page 17.

—Mr. N. A. Neff, of Earlham, Iowa, is offering Black Langshan cockerels for sale in his advertisement on page 17. Mr. Neff, in sending in copy, writes: "I have ten fine cockerels to sell. I won all prizes at the Central Iowa Poultry Show this year and have been winning for years. I want to dispose of these cockerels at once. Three of them are prize winners. They are all nice ones and I am pricing them right."

—The advertisement of the Holt Poultry Company, of Pleasantville, Iowa, Mr. Barton J. Holt, proprietor, appears on page 17 of The Homestead. They are offering thirty very choice Barred Plymouth Rock cockerels for sale at reasonable prices. These cockerels are of the Hawkins and Bradley strains. Mr. Holt is a breeder of thirteen of the leading varieties of fowls. He will send circular for the asking.

—Mr. S. M. Allen, of Bethany, Mo., writes: "We have sold all our hen turkeys, but have a nice lot of young Mammoth Bronze toms that are descendants of a fifty-two-pound tom and from eggs from some of our largest hen turkeys. These young toms are very heavy boned and ought to make monstrous birds. We still have a nice lot of White Pekin ducks of the Giant strain which we are selling at one-half price to make room for our breeding stock." See advertisement on page 17.

—Mrs. B. De Jaeger, of Waterloo, Iowa, in furnishing copy for her advertisement on page 17, writes: "The Silver Laced Wyandottes are the best I have ever raised. They are of good size and good laying strain. They are from a high-scoring pen

in which the cockerel scored 92 and the pullets scored from 90 to 92½. They are good and will be sold at a reasonable price. The Brown Leghorns are of a good kind, good shape and good comb. All orders promptly filled."

—Mr. Guy W. O'fall, of Prairie City, Iowa, is offering some extra good Mammoth Bronze toms and hens. This stock has been all scored and is in fine condition. It is the progeny of hens weighing from twenty-five to twenty-seven and a half pounds each, and the yearling tom in Mr. O'fall's flock weighs forty-five pounds, his score being 96½ points. In order to make rapid sale these young toms are offered to Homestead readers at \$5 each and the hens at \$3. These are exceedingly reasonable prices for turkeys of such superior quality and size.

—Mrs. George Tutt, of Marathon, Iowa, breeds Black Langshans, and in her advertisement on page 17 she is offering twenty fine cockerels for sale. She writes: "The cockerels and eggs we are offering for sale are from stock scoring as high as 95 points, several of which have won blue ribbons at a number of leading shows. Our cockerels this year are large in size, heavy boned and of good color. They are certainly worth the price we are asking for them. We will be able to furnish a large number of eggs. We have a large flock of nice birds; no disqualified ones. Many of the hens and pullets have taken first and second premiums at shows. They will be mated with first-prize cockerel at Webster City, Iowa, show in 1906."

#### EXTRA CHOICE BLACK LANGSHAN COCKERELS.

Some especially good Black Langshan cockerels from high-scoring birds are offered for sale by Mr. E. D. Keasr, of Wiota, Iowa.

#### PLYMOUTH ROCK COCKERELS.

Seventy-five choice Plymouth Rock cockerels are offered for sale by Mrs. E. F. Escher, of Manning, Iowa. These are of the Bradley, Ringlet and Eclipse strains. She

## Big Sure Hatch Book

Crescent Poultry Farm, Frank Foy, Proprietor, Des Moines, Iowa.

A representative of this paper informs us that Mr. Frank Foy, of Crescent Poultry Farm, still has a lot of stock of many leading varieties for sale. He also informs us that he will be especially well prepared to furnish eggs for hatching in large quantities by the single sitting or hundred or thousand for incubators. Mr. Foy is a practical poultryman and believes in doing things right. He also pays particular attention to line breeding. He says it costs more to raise a hen that will lay 200 eggs per year than one that will lay less than half that many. Mr. Foy is also a practical incubator man and has been in the business for years. His experience is practical, not theoretical, and there is no doubt but what he makes as good a machine as there is on the market today. His sales have been unusually heavy this season, particularly in localities where they were used last year. Anyone interested in poultry and incubators who has not received a copy of his new book entitled, "Money in Poultry," should send for it, as the information contained therein is valuable. Same will be mailed to any address for four cents by addressing Mr. Frank Foy, Box D, Des Moines, Iowa.

will also sell hens and pullets. Write her at once and send her an order.

### THE RELIABLE INCUBATOR AND BROODER.

The Reliable Incubator and Brooder Company, of Quincy, Ill., celebrate their quarter century anniversary this year, and in token of that event the company have compiled an unusually interesting and valuable catalog dealing with every phase of the poultry question. The record made during the past twenty-five years is one that entitles the Reliable Incubator and Brooder Company to the confidence of the public. Their success has been coincident with the public's keen satisfaction with the Reliable poultry supplies. The catalog referred to is in reality a compendium on poultry raising, and no one who desires to succeed in the raising of poultry, especially in hatching chicks with incubators and raising them in brooders, can afford to miss the opportunity of sending for this anniversary catalog. Address the Reliable Incubator and Brooder Company, Quincy, Ill., and please mention The Homestead when you write.

## OUR HOME DEPARTMENT.

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

### WITH THE EDITOR.

The other night there was a most charming picture in the sky. The moon was in Orion, whose beautiful stars were somewhat bedimmed by her silvery luster. Not far off, brilliant Jupiter shone among the lesser diamonds of the sky. It was a picture well worth looking upon.

We are so bound down by dishes and chores and things upon the earth that we miss the sight of that heavenly cyclorama which nightly rolls from the Atlantic shores to the cliffs of the Pacific. There is scarcely an evening when looking up after hanging up the dish-pan or shutting the stable door, would not put a peace or a sweetness or perhaps great awe into your heart as you stepped in again to take up the "common round," when it would not leave a feeling of—oh, as though cobwebs had been pulled from off you.

The "common round!" Those planets, those stars, that silvered orb! How many rounds, rounds upon rounds, century millenniums has Earth donned her robe of night to gaze at the ever-changing, ever-returning pictures in the heavens. There they shine as they have shone steadfastly for countless centuries, and yet only a very few of us know star from planet.

It is worth while to know Orion when you see it. There is nothing else in all the heavens to equal it in glory. If the night is fine look toward the south about nine o'clock, and about half way between the zenith and the horizon, in a row, you will see three bright stars; these form Orion's belt; and at almost equal distances above and below are other brilliant stars. A frosty moonless night especially shows this constellation's exceeding brilliancy.

Orion, so the story runs, was a famous hunter so tall that he could wade the seas, and that when on land his head was in the clouds. Yet in spite of his greatness, and maybe because he was the most beautiful of mortals, he lost his heart. Then his troubles began. A stubborn father stood in the way. He lost his sight, but then a goddess fell in love with him. This made one of the gods jealous and he tricked the goddess, who excelled in the use of the bow and arrow, into shooting poor Orion. But the gods were kind. They placed the hunter and his dogs in the sky where they unceasingly chase the great wild bull Taurus—though it may puzzle you to make them out as they roam the heavenly hunting grounds.

Very probably you know the group of stars known as "The Dipper;" but do you know that it is only a part of a greater group called the Great Bear? And can you find Polaris? Do you recognize the Little Dipper, or the Little Bear? And do you know the interesting Indian legends concerning them? Can you find a group known as the Pleiades? Are you acquainted with the old, old story of those seven sisters? Go out and find them, and the "bands of Orion," and read in your Bible concerning them; find other star passages and drink in their majestic beauty.

Some day read Felicia Hemans' poem on the Lost Pleiad. Some day commit to memory Addison's grand hymn beginning:

The spacious firmament on high,  
With all the blue, ethereal sky,  
And spangled heavens, a shining frame,  
Their great Original proclaim.

When speeding in the cutter, when crunching the crisp snow under foot some night between the barn and the house, look up to the stars, let them look down upon you, into you, into your depths, and they will give you power to look past them into the beyond.

Some summer evening shake off the thrashing fever, lie down upon the grass with your head to the north, and simply look up. Lie still and look. After a time the glory of the stars will seem too great to be endured. Your spirit will struggle for wings to "fly to the uttermost parts."

Moses, David, Elijah, John the Baptist and Jesus, the Saviour, all must have lifted up their eyes to the stars and have seen beyond. Perhaps it was after some such contemplation near the cave of Adullam that the Shepherd-Poet-Warrior-King of Israel wrote:  
When I consider the work of Thy fingers

Your shoe money will go twice as far if you buy the strong, well-made and hard-to-wear-out

**Mayer**

## SCHOOL SHOES

for boys and girls. They are made of the best seasoned upper leather and tough solid soles and have fewer seams than other shoes.

ANDERSON BROS., DEP. 19, MINNEAPOLIS, MINN.

And the moon and the stars which Thou has ordained  
What is man, that Thou art mindful of him.  
And the son of man that Thou regardest him?

Thinking of this you may rise from your meditations with a realizing sense that great as are the wonders of the stellar universe there is something in you—no, that you are something more valuable still in the sight of Him who numbers the stars. In His ears the music made by these whirling orbs with their attendant trains of revolving planets cannot equal the strains of harmony arising from those creatures whom He made from the breath of His nostrils to be "only a little lower than the angels."

Come, go out into the picture-gallery of Night and let thy soul revel in heavenly beauty.

### HOME AND HOMEMAKING.

#### LITTLE HELPS BY THE WAY.

The clouds may rest in the present,  
And sorrow on days that are gone,  
But no night is so utterly cheerless  
That we may not look for the dawn;  
And there is no human being  
With so wholly dark a lot,  
But the heart by turning the picture  
May find some sunny spot.

—Selected.

Some people actually attract illness to themselves by constantly thinking about it. They feel sure that if they should happen to get their feet wet they would soon be sick with pneumonia or influenza. If they happen to be in a draft for a few minutes, they are confident dire results will follow. They will have chills or sore throat. If they cough a little they have dreadful visions of consumption. Is it not in the family? They thus fix images of sickness in the mind, and so lessen its power of resistance to disease and make the body more susceptible to the very things they fear.

Throughout the entire Word of God we

are taught the sacred duty of being happy. Be happy, cheerful, rejoicing as we can, we cannot go beyond the Spirit of the Gospel. Christ, "though a man of sorrows and acquainted with grief," was happy and rejoiced in spirit.—Dean Stanley.

### BUYING LINEN.

Unless one is an expert judge of linen, it is always wiser to buy of reliable firms, for there is a great difference in the durability of fabrics that to the uninitiated look much the same. An experienced shopper can tell good linen by the "feel," but, for the novice, there is no better test than the old one employed by our grandmothers. Dampen the finger and apply it to the surface of the fabric. If it wets through quickly and shows on the reverse side you may be sure it is linen. If it is slow, there is an admixture of cotton.

In selecting a medium quality of table damask (the cheap sleazy stuff is a dear bargain at any price), choose medium weight and a pattern that nearly covers the ground. This both wears and looks better than one that has a great deal of plain surface displayed. Leave "snow drops" and similar dainty patterns for your best cloths. Table cloths cut from the web are much cheaper than those woven in a pattern with a border. Cream damask, or the half bleached, is con-

sidered much more durable than the full bleach, which has been accomplished by the aid of chemicals.

The term "double damask" means a heavy linen, but is no indication that it is any more expensive than a good single damask. Indeed, a too heavy linen is apt to crack if folded when it is frozen. A pointer just here is that table linen should not be dried out of doors in freezing weather.

#### CERTAINLY NOT.

Mamma—I saw a little boy speak to you in church. I hope my little girl had more manners than to talk back.

Elsie—Oh, yes, ma, of course I had. I just put out my tongue at him.—Jester.

#### A STORY WITH A MORAL.

Meu all over the world will appreciate the feelings of the Morristown, N. J., banker who had retired to that suburb, rich beyond the dreams of avarice, but who was prevented by the noise made by his wife and daughters from putting his feet on his own table or even sitting around comfortably in his shirt sleeves at eventide. He had built himself a superb mansion and furnished it in a style becoming a royal duke. His family, once poor, immediately began putting on grand airs. His ways were old fashioned. He liked to walk home from the station in the afternoon and often muddled the floor and carpets, which brought down upon him the wrath of his wife and daughters.

The old man said nothing, but one day truckloads of stone, bricks, steel, wood, glass, cement, etc., arrived and men began the erection of a small and ornamental house a few feet from the front door of the palace. The worm had turned. The banker refused to tell his wife and daughters what it was to be used for, and had their curiosity piqued to the verge of passion. They guessed everything—porter's lodge, conservatory, sun parlor, organ room, kiosk, aviary, etc. When it was completed he furnished it with an umbrella stand, coat rack, table, boot and shoe receptacles and a single deep, soft, comfortable leather chair. He then put the key in his pocket and had "Dulce Domum" painted above the door. When the banker got back from town in the dark he kicked mud all over the floor, lit his pipe, fell into the deep chair, put his heels on the table and spat where he pleased.

In the course of three or four weeks there were so many tears and protestations from the family that the old man had "Dulce

Domum" torn down and now he totes his mud into the palace as if he owned it.

This is an extreme case, but don't you sometimes envy the man who lives where there isn't quite so much housekeeping around?

#### WHAT TOMMY DROPPED.

"Oh, dear me, isn't dinner served? I think you're awful slow!"

And Tommy fumed and fretted, till His father said, "Oh-o!"

Go pick up what you dropped, my son, Before you came inside."

And Tommy quickly ran to look, But not a thing he spied.

"That's strange," quoth father, "for I saw Two boys, with faces bright, Who walked together at the gate, In manner most polite. I heard a voice speak pleasantly, Till on the porch it stopped, And so I thought your manners, Tom, Outside the door you'd dropped!"

—Pauline Frances Camp.

#### FOR THE HOUSEWIFE.

Many a housewife gets into a rut in her way of cooking. The family gets tired of it, but what can they do? Try a fresh recipe at least once a week, and see how every one will enjoy it.

Housework cannot properly be accomplished unless a woman determines at the very start to have system. That means she must never let the bulk of work get ahead of her, not necessarily that she must forever keep at work. It is the woman who neglects the little affairs at home who never knows when the day's work is done. Many women work very rapidly and get through the cleaning in a comparatively short time, while others will delve along the entire day. The world is full of lifters and leaners, but the housewife is having a strenuous time if she happens to belong to the latter class.

#### TO CLEAN KEROSENE LAMPS.

There is nothing more disagreeable than the odor from a kerosene lamp which needs cleaning. If a lamp is oil soaked, it should have all the oil poured out of the tank. Clean the tank with lye water, and boil the burners in water to which must be added a good quantity of soda. If the lamp wick is old, it is best to have a new one, or boil the old one in vinegar and dry. When the lamp is again filled, put one teaspoonful of salt in the oil, and note the brilliancy it adds to the light.

#### FRUIT SPONGE PUDDING.

Make a rich custard of one pint of milk, three eggs, one dash of salt, three tablespoonfuls of sugar, one-quarter teaspoonful orange extract. Add one quarter ounce of gelatin, well soaked and softened. Have a loaf of rich sponge cake or pound cake. Slice in thin slices and pour over the cake the sirup from a jar of peaches or a strawberry jelly melted. Butter a mold and put in it, well scattered over the bottom, a few whole strawberry preserves, a few candied cherries, some candied citron and a few sultana raisins. Put in a layer of the cake, put in some preserved peaches, another layer of cake, and pour over it the prepared custard. Serve very cold. This should be made the day before it is to be served.

#### AMONG OURSELVES.

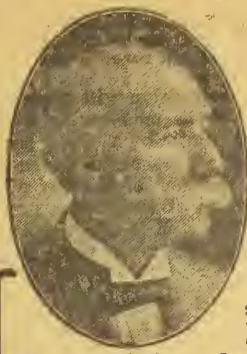

Although we have no regular book talk for our program this week, we are to have something literary, or at least with a literary flavor, from our friend Reine:

When a girl in high school I chanced upon Whittier's "Among the Hills," and it took a hold upon my imagination and my aspirations toward an ideal life which has never been loosened in the slightest degree. To many, it may prove a very commonplace poem, but to me, a girl reared in a small town with an inborn love of everything rural, it came as a complete and perfectly beautiful answer to the question, "What ought we young people to strive for as we shape our lives and characters for the future?" I have not had a copy of this little poem for several years, until I recently bought one to show "my man" in print what I had been trying to put into daily practice during our married life. It struck a responsive chord in him, just as it had in me, and I write this in the hope that my mention of it will be the means of directing others' attention to what has proved an inspiration for years. The romance will probably appeal to the young people particularly; I know I remembered it best of all as a girl. But now no other love story can quite equal my own, and the prelude gives the solid food I rather slighted then. Just now I re-read it, and with the same result—brings a lump in my throat and tears in my eyes, not of sorrow, though. Anything which moves me strongly, whether music or painting or a sermon or a poem, if it exalts my feelings, causes the tears to come very near falling. If this is read by anyone in the heyday of youth who dreads the coming years, for fear they will rob him of the romance and high ideals which are youth's own heritage, I would say I believe that if you will let this poem be your inspiration, and choose a life partner who is like minded with yourself, your country home will be a haven of rest to you, an uplifting power in the community and a place your city friends will delight in.

As everybody does not have either Among the Hills or a copy of Whittier's poems, I suggest that Reine make a synopsis of the story for us, illustrating it by brief extracts from the poem and thus more effectually pass on the message which so blessed herself.

Mrs. Macbeth this week brings that word for parents which I would like to be as regular a feature of our meetings as the Little Helps By the Way are of the Home and Homemaking section of the Home Department:

Dear mothers and fathers, do talk to your boys, as well as your girls; give them advice—good, plain, hard facts—ever respect-

## Let me send you a Genuine BURDETT ORGAN FREE on Trial

—You can buy it on your own terms at my lowest factory price, saving \$25 to \$50.

I guarantee it Forever and give you Free Insurance and Free Music Lessons

I AM President of the Hobart M. Cable Company—Capital, \$350,000.00. I build the world-famous Burdett Organ that you have heard so much about. I sell the Burdett Organ right to you and charge you my lowest factory price.

That's my new way, and it gives you the Burdett Organ, the organ which for fifty years has been known everywhere as the best, and you save at least half on the price.

Now I am going to make you an offer that is so liberal you simply can't afford to refuse it:—

I will send you the genuine Burdett Organ (any one you select) and you can try it in your own home for ten days.

You don't have to pay me a penny in advance nor make any deposit of any kind.

I take all the chances, all the risk.

Now, if you want to keep the organ after you have tried it, I sell it to you at my lowest wholesale factory price.

If you don't like the Burdett Organ—if you don't think it's by far the best organ, or if you don't think the price is less than half you would have to pay for an organ not half so good—then I don't want you to keep it. So you just notify me and I will take it right off your hands.

And you are not out a penny, and you are under no obligations to me whatever.

But if you do keep the organ, I give you, without any extra charge, a perpetual guarantee.

You see I guarantee the Burdett Organ forever—with a legally binding pen and ink guarantee, secured for you by \$350,000.00 capital of my company.

If at any time (no matter how many years after buying) you find that the Burdett Organ is not fully as represented, or that it has any defects in material or workmanship, I will either repair or replace your organ with a new one entirely at my expense or refund every penny you have paid.

That's all in the iron-clad guarantee, which legally binds me to live up to every word.

No other organ builder in the world dares to make such a guarantee, because no organ except the Burdett Organ will stand it.

And now to remove every possibility of objection which you might have to this plan, I even go further—With every Burdett Organ I give you absolutely Free Insurance.

This insurance is a part of my agreement with you, and is absolutely binding upon me and my company: (Capital \$350,000.00.)

After you have bought a Burdett Organ on the easy payments, if the money-maker of your family should die, and you find it impossible to meet the payments, the organ immediately becomes your property, even though you have made only one small payment.

That puts any other way of buying an organ clear out of your consideration.

Because no other organ builder in the world does anything like that.

And in addition to all this I offer you a course of music lessons given by the best instructors

in the country. As soon as I hear from you I will send you, absolutely free a copy of my handsome book, "The Story of the Burdett Organ" which gives you full particulars, pictures and full descriptions, and factory prices of Burdett Organs to select from, and a copy of my Unlimited Guarantee and Free Insurance offer. Remember, you are dealing with the largest manufacturers in our line, who are fully responsible and honorable, and you get the genuine Burdett Organ, which everybody knows is the best. 10 days' free trial in your own home and the lowest wholesale factory price, payable on your own terms, a Perpetual Guarantee, Free Insurance, Free Music Lessons. This is a positive fact—no other responsible manufacturer has ever made such a liberal offer. It is so very liberal that I don't know how long I can keep it up.

So write me the postal now—put your name and address on the back—no promise—no anything. That doesn't put you under any obligations—there can't be a bit of risk on your part.

Address the postal like this: Hobart M. Cable, President, 566 Steinway Hall, Chicago, Ill.

ing their feelings, ever looking out for their welfare, and do begin with them at an early age. I have two girls and just one boy, all grown to womanhood and manhood. I began with them in their youth, advising where and when I should, giving the girls good plain talks, and the boy hard, plain facts. I long ago won the confidence of the boy, as well as the girls, and I think after a mother wins that she has less to worry her. I share my children's sorrow and joys and as I reared them under adverse circumstances, is it any wonder I am thankful? The confidence alone that our boy has in me is worth more to me than wealth untold. I feel my time has not been lost. "Show me that man whose life is pure, that man who claims success; show me that man who treads the ways of fame, that man whose deeds adorn the name of truth and uprightness; whose soul knows not the tarnished blush of shame, and in his glory thus arrayed—behold a man that mother made."

Now, if some mother or father, who has had similar happy experience, will only tell a little more in detail how the love and confidence of the children were cultivated the circle will be not only inspired, but strengthened.

Mr. Robert J., who enjoys Among Ourselves, comes to share his views with us and also to make a proposition:

I agree with Mrs. A. that girls should demand purity in man just as much as man does in woman. How many boys who read this would go with a girl who smokes, or chews or drinks? I will wager not one in a hundred, and yet the girls will accept their attentions. Now, girls, when kissing games are played at parties just stand aside and watch, and when a man requests the pleas-

ure of your company, give him the mitten if he uses tobacco or drinks. They will only respect you for it and you will find that they will soon give them up. The channels through which I think the most harm comes to both girls and boys is what are known as the questionable amusements. How many of us here dance, play cards or attend theaters? I wish that these might be discussed through the press and that those who do these things would send in arguments in favor of them that they may be answered. To any who believe the Bible I can disprove any argument they may put up. Now I hope a number will send in arguments in favor of these things and then may a number send in arguments proving them wrong. Now, lest you think that I am a minister, I will say that I am not yet nineteen, and I live on a farm.

We will give a few meetings to the discussion of dancing, if the friends will

write briefly. Confine your remarks to 300 words at the most.—200-word letters will be even more welcome. Give one or two reasons for or against and stop. Others can say the rest and change of speaker adds interest to the discussion.

The circle seems pretty much stirred up over the remarks of June Bug at a recent meeting. Aunt Violet was among the very first to rise. Let us hear what she has to say:

The letter of "June Bug" was read with much interest by me. I had been thinking all day before I received the paper, of the very same thing her letter contained. Indeed, my advice to girls is, "Never marry a man very much older than yourself." I don't know whether ten years older is too much difference in ages or not, but I do know fifteen years is. My husband is that much older than I am, and after we were married I discovered what I thought was love was only a daughterly affection. And he in return has always treated me as if I were a child. It is true he provides well for me, but no one knows, only those who are in "June Bug's" and my place, what it is to be married and not have those relations to each other which married people should have. A woman's desire is for a companion, one on whom she can bestow her caresses, from whom she can receive them. She naturally wishes to be consulted in regard to the "nicest place to plant a special tree," or "Where, Rose, had we better put your flower garden?" Many such things which husband and wife should plan together, these things which give the wife much pleasure, are denied such as "June Bug" and I, simply because our husband's are so much older and think they are wiser. I, like "June Bug," am looking for a remedy for a chronic crank. Why don't those husbands see what we

women desire? Why don't they make our lives happy as they alone can do? Let us hear from some of those husbands. Let them tell us why they don't. If there is any fault the wife's, I am sure we are willing to mend our ways.

Aunt Violet's proposition will open another discussion, if the men take up the gauntlet she has cast down, as I hope they will. Meantime let us to the matter in hand. A number of women who are the happy wives of men some years older than themselves have risen to reply to June Bug. First we shall hear Pansy:

After reading "June Bug's" denunciation of marriage with "old men," I felt that I, for one, must write and present the other side of the matter. I, too, speak from experience, my husband being fourteen years older than myself, yet I do not call him an "old man." I am sure no one could have a kinder, better husband than he is. As for thinking my ideas and thoughts childish, we couldn't be better comrades if we were the same age, and from the care he takes of me I do not think he married me only for a "housekeeper and chore boy." A man who is intolerant and unkind to his wife would probably not have been much better had he married ten years sooner. It is not the age, but the natural disposition of a man that governs his conduct. For my part, if I had daughters of marriageable age I would far rather see them marry men at least ten years older than themselves than of the same age. It is an accepted fact, recognized in law, that women age faster than men, therefore a man should be several years the older to be a woman's equal.

A couple of the men have ideas on this matter which they wish to share with us. Mr. John K. Whitehill will be followed by Mr. George B. Ham:

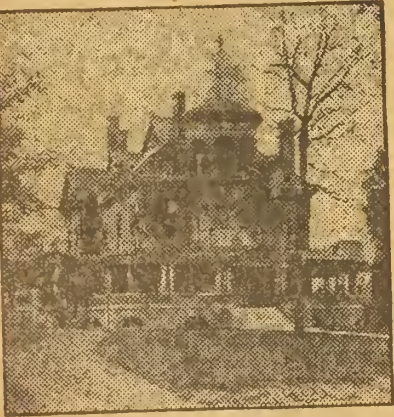

When two grow up to manhood and womanhood and agree, I say go ahead, no matter what the difference in their ages may be. I know a woman whose husband was twenty years older than herself, and a person asked her what she wanted of an old man. She replied she was looking for a good man and she was satisfied.

I, a Nebraska bachelor, clamor for admittance to reply to "June Bug" for the old men, in behalf of pure love, over which death itself is stated to have no power. Love must be regarded, regardless of the difference in years, notwithstanding huge blunders and frequent tyrannies. Love is probably the most welcome and beneficent guest that knocks at the door of the human heart. Doubtless Lady June Bug has not met with as pleasant a lot as she expected, but I do not think that the slight difference of ten years between her age and that of her husband necessarily need cause serious difficulties. Ordinarily I should suggest a difference of about eight years. But some of the happiest couples of my acquaintance have as great a difference as twenty-five years. As to a remedy for a chronic crank—one who would find fault with the angel Gabriel—the best remedy that I can recommend, for both your own and his future happiness, is to treat him as the angel Gabriel would—with a smile and pleasant word.

This subject will bear further discussion. It will be continued for a few weeks. May I suggest that companion pieces to talks from the wives of men older than themselves would be welcome? It would be interesting, I am sure, to hear from men who married women from ten to twenty years younger than themselves.

Mrs. C. A. asks our attention for a few moments while she tells how she cans beef for summer use:

I have seen so many good things in this department that as it is time to care for the summer's meat I thought I would send my way of canning beef. It is so nice and retains all strength and flavor. Cut meat from bones and cut in pieces suitable to pack in glass fruit jars, pepper and salt as for immediate use, then fill jars to the rim and tamp down so there are no air spaces, put on covers and place cans in the boiler with a lath frame on the bottom, or hay, to keep the jars from breaking. If hay is used it can

Mrs. Miller's New Residence, Earned in Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

#### Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5394, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

**SAMPLE FREE**

**15 to 35 CTS. PER ROD DELIVERED**

be put between the jars, too, to keep them from striking together if they boil hard. Fill boiler up to neck of jars with cold water and boil two-quart jars two and one-half hours. Use new rubber and if rubbers are put on at first, take jars out and tip them up to see if they leak, just before time to take them off, and if not, take out just before you take them off and place rubbers and set in again long enough to boil up. This is fine and keeps well. I have a pint jar left over from last year; I found it in with my fruit jars.

#### Dressmaking and Millinery. No. 557.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

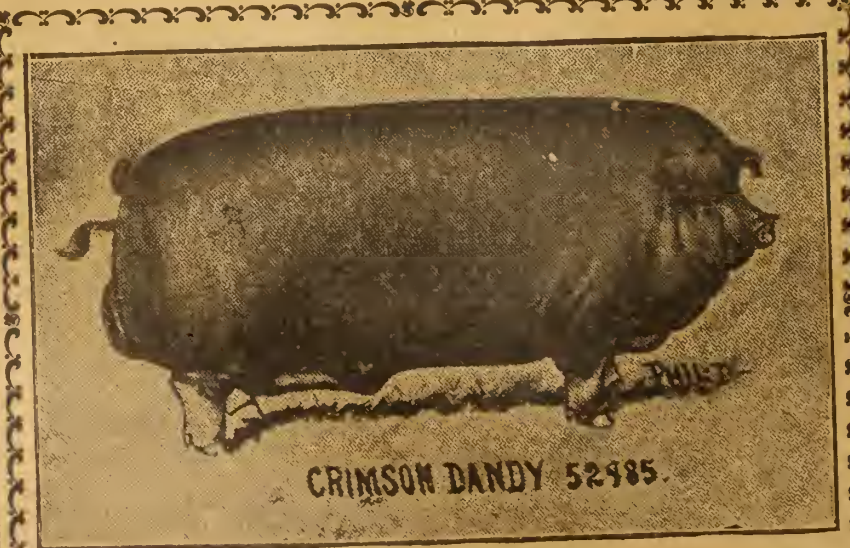

Plaids, checks and stripes are all to be noted in the early showing of spring fabrics.

### By Howe Weight

That's absolutely correct. Scales standard the world over. Steel frame, Compound beam, ball bearing, non-binding. For over 50 years the Howe has been the leading farm scale. Better to-day than ever. Call for the proof. It's ready.

**HOWE SCALE CO., OF ILL.**  
50-52 Lake Street, Chicago, Ill.

The above is a correct likeness of Crimson Dandy, a grandson of Crimson Wonder. He is now in the herd of Mr. S. J. Tillman, of Ragan, Neb., and several of the best sows in his February 27th sale are bred to him.

rics, but it is noticeable to what an extent the "hairline" effect marks these. In the plaids this hairline is often in the nations and lines, the lawns, ginghams, etc., while the material may be in a solid color or white, many of them show a satin (or mercerized) plaid or striped effect. It is well to note this, as when one is purchasing it is well to be posted in regard to the leading and newest lines.

The Empire modes being still greatly favored assure us of the same effect being continued in our garments cut on other lines, and therefore the shortening of the waist at the back and the dropping of its line at the front is evident. This effect is brought about by the adjustment of the skirt band, lifting ture of a silk or satin stripe forming an overplaid, the under tint or color of the material harmonizing with or even contrasting with this. The body color may be in a very pale shade, while the lines may be of a very deep color. Many of the spring fabrics are of the sheer or transparent order, even in the woollens, the stripe or overplaid being then more of a "feature" because of its heavier effect. Even in the sheer cotton at the back and drawing it down at the front, or by the shaping of the girdle. By the way, it is also "therefore" very evident that the shaped girdle will pay an important part in our list of dress accessories.

The tucked blouse or shirt waist still retains its favor whatever may be the vagaries of fashion in other lines, and the design shown in 5511 is one of the most desirable, whether it is to be made up as part of a costume or in silk or in white. The novel arrangement of the tucks gives both slenderness and breadth of shoulder, and these items are to be considered in the spring gar-

ments. Four deep tucks extend from the shoulder to the waist line at both front and back, while tiny tucks that give a yoke effect are arranged at the front. The closing is made invisibly beneath the wide tuck at the left of the front. The sleeves are pictured in both elbow and full length, the pattern providing for both. They conform to fashion's latest decree that sleeves shall be slightly diminished in size. The pattern provides also for a fitted lining, but this will

The pattern provides for a lining, but this may be omitted if preferred. The Peter Pan collar may be made to be worn at will, or it may be joined to the neck of the dress in

[5511 Tucked Blouse or Shirt Waist, 32 to 42 Bust.]

be omitted in most instances. Pattern No. 5511 is cut in sizes for a 32, 34, 36, 38, 40 and 42 inch bust measure.

A novel and certainly most natty costume for the school girl is seen in No. 5560. It has the shirt waist effect, and yet it is made up with skirt and waist joined in a seam at the waist line. There are the "shirt waist" tucks at the shoulder at the front and extending the entire length of the back. The skirt is pleated and may be finished with the yoke or plain, as desired. The sleeves are to be made in either elbow or full length, charming cuffs finishing the elbow sleeve.

[5560 Girl's Blouse Costume, 8 to 14 Years.]

making. Pattern No. 5560 is cut in sizes for girls 8, 10, 12 and 14 years of age.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

# Increase Your Corn Crop

THIS BOOK FREE

Will You Write Me a Postal for a 50c Corn Book?

Do it NOW—while they last.

The book is from the pen of Professor A. D. Shamel of the Illinois Experiment Station—recognized everywhere as "the man who knows"—about corn.

It's full of photographic illustrations, and explains fully about selection—modern corn breeding and cultural methods.

The American Corn Expert, Professor Holden, demonstrates his Seed-Testing Machine on page 17 of this book. The book should be in the hands of every up-to-date corn-raising farmer—it will help him double his corn crop.

All I ask you for this 50c Book

is that you will give, on a postal, the names and address of three of your farmer neighbors whom you understand will be in the market for a riding plow this season. It will take only a few minutes of your time, and a postal, and I will send you the book prepaid by return mail.

See that little girl lift her father with one foot?

He weighs 196 lbs., and she is only 6 years old—yet she can lift him with only one foot.

WHY—and what does the "WHY" mean to you? Simply this—it means that the Emerson Foot Lift Plows are the easiest handled in the field of any plow made.—FOOT-CONTROL ALWAYS—in or out of the hardest soil. Manage the Plow with your Feet—your Horses with your Hands.

The name EMERSON means easiest to handle—lightest draft—and most durable.

Every EMERSON Gang Plow is equipped with 2000-mile magazine box and axle. When you buy an EMERSON you buy for a lifetime, not for a few years, because an EMERSON will last as long as you live. I will send you, FREE, our Implement Literature, and the Corn Book if you act promptly and write the postal TODAY. I gave away 100,000 of these books—then the supply ran out. They went like wildfire. I've only a limited number this year, so don't wait till they're all gone.

Putting off may mean I won't have a single copy to send to you.

Write TODAY—Now—while you think of it.

S. H. Emerson,  
Emerson Mfg. Co.  
Rockford,  
Ill.

First Quarter. Lesson VIII. Genesis xvi, 5-16. February 24, 1907.

### God's Covenant With Abram

Nomadic life has always its own strong attraction. But the story of the migrations of this first of pilgrim fathers has a fascination peculiar to itself. Before the eye of imagination his caravan seems to pass. There goes the venerable sheik, clad in his crimson robe, wearing his silken turban with its fillet of rope. His "princess," in all her Oriental finery, rides beside him. There are the armed scouts on fleet horses; the noisy herdsmen, urging on the flocks and droves; the women and children, a thousand souls and more; and the long train of beasts of burden, carrying the impedimenta of a great camp.

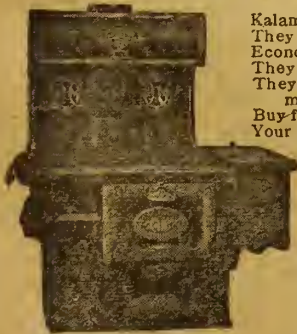

They pass by Damascus, the superb, and leave the snowy heights of Hermon and Lebanon to their right, and the Sea of Chinnereth to the left, and pause at the oak grove of Moreh in Shechem, while Beal and Gerizimi look down

at them. On they move through the lovely plain of Esdrelon, strewn with its roses of Sharon in patterns more beautiful than any Brussels, down into the rich Jordan Valley, under the beetling crags of Gilgal, up Salem's steeps, on to holy Hebron and Adullam's weird cave—through the whole land, from Dan to Beersheba, they wander as fancy takes them, or the necessities of their flocks and herds require.

But the sacred character of the pilgrims and the pilgrimage is never lost sight of. Abram is priest as well as king of his tribe. The caravan never halts without an altar being upreared. The idol-worshipping Canaanites look on curiously as the smoke curls up before an invisible God. Abram's whole retinue understands and shares his high hope and purpose. The morning and evening sacrifice keeps them constantly in mind of it.

Abram's noble generosity has marked exemplification in his dealing with Lot.

## "A Kalamazoo Direct to You"

Kalamazoo are fuel savers,—  
They last a lifetime—  
Economical in all respects—  
They are low in price and high in quality,—  
They are easily operated and quickly set up and made ready for business,—  
Buy from the actual manufacturer,—  
Your money returned if everything is not exactly as represented—  
You keep in your own pocket the dealers' and jobbers' profits when you buy a Kalamazoo.

All Kalamazoo Cook Stoves and Ranges are fitted with patent oven thermometer which makes baking and roasting easy. All stoves blacked, polished and ready for immediate use when you receive them.

OAK STOVE HEATER,  
For All Kinds of Fuel.

Oven Thermometer

His tact and prowess shine in his pursuit of the four kings and rescue of his nephew, his magnanimity in his refusal to take thread or shoe latchet from the spoil. There are two blots on the escutcheon of this high-minded patriarchal prince—his timorous duplicity in Egypt concerning his wife; again, his overhaste and use of human expedients to fulfill God's promise in the taking of Hagar to wife. But these are mere specks upon an effulgent disk. Abram was twenty centuries beyond his day in character and in manner of life.

God disciplined His servant for these lapses—in the first instance, by a rebuke from the lips of a heathen monarch; in the second, by withholding from him for thirteen years any visible manifestation of Himself. But at length this long period of correction ended with the sudden outbursting of the glory of the shekinah upon his dreary path.

There is a significant change of name ordered in the case of each party concerned in the covenant. The Deity Himself condescends to follow the custom of man and at this juncture give Himself a new and significant name; namely, El Shaddai—the All-sufficient God. Abram's name is changed from Exalted Father to Abraham, Father of Nations. Sarai, my princess, to Sarah, princess universal. This change of name was a device of the eldest times, when means of intercommunication and record were scarce, to arrest attention and fix in memory important events and change of circumstance. By this means it was advertised to Abram's motley clan, and the surrounding tribes as well, that this aged sheik should miraculously beget a son by his own and venerable wife, from whom in turn should spring noisy masses and tumultuous nations.

The pledge of this incredible circumstance was the new name of the Deity. He was "sufficient" for this thing. "I am the Almighty God." On that golden

hook Abraham could hang his faith. And he did! He fell on his face, in that very act of adoring worship, appropriating the promise in all its fullness. In the injunctions, "Walk before Me!" and "Be perfect!" there is gentle hint of the times when Abraham had failed to see the Invisible, and had stooped to ignoble devices to ward off imaginary dangers.

This is no new covenant, but the happy assurance that Almighty God is rising to set in motion toward their blessed consummation the contents of the covenant, the first elements of which were given at least thirty years before in Ur of the Chaldees.

### Analysis and Key.

1. Nomadic life: Its attractions. Abraham's journey through Canaan. Its sacred character: Sign of it.
2. Abraham's generosity with Lot.
3. Abraham's lapses; their punishment.
4. The covenant. Change of name in contracting parties. Promise of descendants. Pledge of it.

### The Teacher's Lantern

What a bugaboo perfection is to many people. Yet twenty centuries before Christ, God commanded Abraham to be perfect, and Jesus, with this very command apparently in mind, directs His disciples to be perfect, even as their Father is perfect. Yet many seem to pride themselves upon their imperfection, to even boast of it. He magnifies the grace of God most who lets it work to the uttermost in his heart.

El Shaddai should be the mystic talisman, the broad phylactery bound upon our foreheads. God's almightiness ought to stir our feeble faith, make us realize the promises, however exceeding great they are.

Saved from many a snare would we be if we only walked before the Lord, conscious that His eye was on us from

above. "Thou God seest me." The Lord said, "Walk before Me." The thought of a continued purpose inheres in the Word—set thyself, be firmly purposed, thoroughly determined to obey before Me. God and His Church need such today.

Frederick W. Robertson, in his charming sermon, "The Illusiveness of Life," flatly denies that God fulfilled His promise to give Canaan to Abraham and his descendants. He goes further to say that He never intended to fulfill it. He could only beguile a gross Israel from the flesh-pots of Egypt by offering them something of the same sort—a land flowing with milk and honey. If He had told them that the "rest remaining for the people of God" was only inward and spiritual, and the promised land was the Jerusalem above, they would never have budged. So God offered one thing, but gave another—compensated for His failure by bestowing something greater.

Dangerous and excessive spiritualizing, this. We all recognize God's educative processes with His ancient people, and their steady advance in the apprehension of spiritual truth. But we resent the idea of any double entente in the Divine method. Here was a solemn covenant, the explicit terms of which were attested by an oath and sealed with a sign. Robertson does not prove that the covenant was not literally fulfilled. If it was not fulfilled, I would rather believe, as many do, that God will yet make good His promise by giving Palestine to the Jews, than to believe He never intended to give it to them.

Truth is, literal and spiritual run side by side in the history of God's favored people. Abraham is literally a father of nations—Arabia, Midian, Ammon, Moab, as well as Israel. But he is also the Spiritual Father of the nations that are now being born in a day by the preaching of the gospel. Kings are his offspring—David and Solomon, literally; all believers spiritually, who are made "kings unto God." His descendants are literally and phenomenally numerous, but his spiritual descendants are already numbered by the hundreds of millions.

## OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

### ABOUT FEEDING GRAIN TO EWES.

The following inquiry has been received:

My sheep are in very poor condition. Next month will be lambing time and I would like to know if there will be any harm in feeding grain, and please state what kind.

There will certainly be no harm in feeding grain to pregnant ewes, particularly those that are poor in flesh. If the ewe does not get sufficient food to maintain herself, we cannot expect her to produce a strong, vigorous lamb. There are many poor and stunted lambs dropped because of under-feeding rather than over-feeding.

As to the kinds of grain to feed, oats should be the largest part of the ration. Two-thirds oats and one-third corn is a good ration for the ewe, and bran should be included for a month or more prior to lambing. Wheat might take the place of corn, but be careful of feeding much wheat to a sheep unused to it. In starting to feed grain, begin with only a handful per head each day and increase it gradually. A half to three-fourths of a pound per day should be fed the ewes, and if you are obliged to feed timothy hay, a pound of grain with less hay will give better results.

### AVOIDING FOOT ROT IN THE FLOCK

Foot rot is an old and familiar disease. This very fact has made a good many flock masters and farmers careless regarding its prevention. Every now and then the beginner or the old breeder learns the lesson of careless and scanty bedding in the quarters of a flock. Foot rot is simply what its name implies, a rotting of the horny and calloused parts of the hoof. This is caused by allowing the sheep to stand in damp and wet quarters. The moisture under foot keeps the hoofs tender and swollen, and the result is that parts of the foot rot and fall away, exposing the sensitive parts, which causes the animal to go lame. This naturally brings about an unthrifty condition.

The prevention of this trouble is very simple, so simple, in fact, that it seems altogether unnecessary that breeders should allow it to happen in their flocks. Keep the under footing in the sleeping quarters dry at all times. This is not a difficult matter, for sheep are naturally clean. Many of the best sheepmen do not clean out the quarters more than a few times during the entire year; instead, the quarters are bedded regularly with a few inches of straw. This keeps what little moisture there is absorbed and saves the trouble and unnecessary labor of cleaning the quarters often.

The time from now on until spring is a critical period with the breeding flock. The thriftiness of the spring crop of lambs will depend on the thriftiness of the flock during the coming few months. At the present price of mutton every farmer and breeder can well afford to be extra careful in the sheep cote.

### Classification of Wool.

Wools, according to their length and strength, are divided into clothing which is short, being about two inches, or it is weak; then there is the delaine class, which is a fine wool from two to three inches long in fiber. The other class is a combing, which is a strong wool over three inches long. This classification depends altogether on the length and strength of the wool. Considering first, clothing wool, which is used for making flannels and certain kinds of rough cloth, shortness in fiber is its leading characteristic. If the fiber of a fleece, however, is four inches long, it would, on its length, be classified as combing wool, but if that fiber has a weak spot in it where it readily breaks it passes from the combing class into the clothing class and drops two or more cents on the pound in price. The delaine wools are fine wools that are not longer than three inches. They are used for making the finest kinds of cloth. The combing wool must, in the first place be strong, to stand the process of combing, and with that the greatest length is desired. In further reference to the quality of

## A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs; look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

**THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.**

the wool, in examining a fleece, it should be noticed that the length and the density are even over all parts. Considering first the length, the fleece should be examined at the brisket, on top of the back, along the side of the thigh and on the belly. As a rule sheep fitted for show are trimmed in such a way that the wool in front of the brisket is much longer than on top of the back, and the same may be said of that on the sides. In an untrimmed sheep, on which the wool has grown naturally, it will be found that there is a natural variation in the length of the fiber on different parts of the body. The wool on the brisket will invariably be found to be longer than on the top or in most other parts. The density of the fleece may be determined by the feel of it under the hand. If the fleece feels firm and it seems to be compact, it is likely dense.—(Craig's "Judging Live Stock.")

### A. T. Sundell's Sale.

Another good average has been made on Duroc Jerseys and this time it is to the credit of Mr. A. T. Sundell, who sold a splendid collection of forty head on his farm between Boxholm and Paton, Iowa, February 7th. An elegant day brought out breeders from all directions and bidding moved right along in the hands of Col. C. E. Luther from the start of the selling until the finish. One of the best numbers of the sale was a March gilt sired by King West 26163 out of a dam by Lord Roberts 17329. She went to Mr. S. E. Eakle, of Prophetstown, Ill., for a round \$200. The quality of the offering was first class as will be substantiated by the following list of purchasers:

Lot.	Price.
1 Munson Bros., Gowrie, Iowa.....	\$ 55
2 J. M. Summers, Farnhamville, Ia....	51

### Facts for Stockmen.

No combination of figures or long line of ciphers, can give a just idea of the colossal proportions of the cattle industry as carried on by American farmers and ranchmen. Statistics of a year or so back tell us that 17,000,000 cows and more than 43,000,000 other horned cattle, roamed the great ranges of the West, or fed in farm yard and stable in every state of the union. All this stock reaches a total valuation of one thousand three hundred million dollars—figures too large to get hold of with any clear comprehension. Now, in view of the immensity of this great business, what would it become in the future if all needless waste were eliminated? For there is waste, enormous and useless. Cattlemen are just beginning to realize how much has been lost by lack of system and the happy-go-lucky methods of a past generation of great cattle kings, and how great a loss there still is today in every stable and on every farm. Success now depends upon economical methods—not on the thousands of head a man counts in his herds. Every pound of hay or grain is carefully reckoned with in these days, and the individual animal required to return the greatest possible growth or increase for the outlay. To further this desired result, knowing feeders give Dr. Hess Stock Food in small doses twice a day, because experience proves its great value as a digestive tonic and flesh builder. Common sense tells us that an animal in confinement is surrounded by unnatural conditions. When such conditions are

### The "STAY THERE"

Aluminum Ear Markers are the best. Being made of aluminum they are brighter, lighter, stronger and more durable than any other. Fit any part of the ear. Nothing to catch on feed trough or other obstacle. Your name, address and any series of numbers on each tag. Sample tag, catalogue and prices mailed free. Ask for them. Address: WILCOX & HARVEY MFG. CO., 107 Lake St., Chicago, Ill.

### SHEEP.

## Glover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growing rams and ewe lambs. Also 150 beautiful yearling ewes bred to 255 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

**Chandler Bros., Kellerton, Ia.**

## Ewes for Sale

THE Iowa State College is offering twenty Shropshire, Oxford and Southdown ewes for sale at very moderate prices. Address:

**DIVISION OF AGRICULTURE, AMES, IOWA.**

### Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

**GEORGE ALLEN, Lexington, Neb.**

**Registered Shropshire Rams and Ewes** of the best breeding. Willard Miller, R. P. D. No. 2, Audita, Iowa.

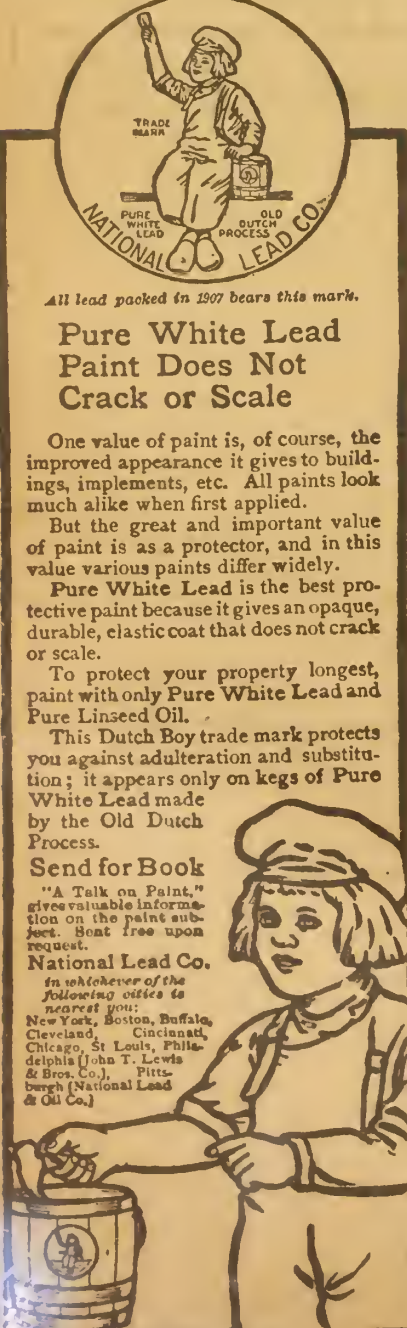

**15 Registered Shropshire ewes, bred to imported** Minton ram. W. C. Frazier, Atlantic, Calhoun county, Iowa.

made still more unnatural by the use of dry feed, nature must be assisted in her struggle for a proper balance and action of animal functions. Dr. Hess Stock Food maintains this balance and activity of the animal economy by so assisting and strengthening the digestive organs that the maximum amount of nutriment is assimilated and converted to growth, fattening, or secretion of milk. That Dr. Hess Stock Food actually accomplishes this desired end is abundantly proved by the unsought testimonials of thousands of successful feeders, and by the endorsement of the agricultural department at Washington. Furthermore, Professors Quimman, Winslow and Finley Dun—acknowledged authorities on such subjects—state that bitter tonics, iron for the blood, and nitrates to expel poisonous matter (all of which enter in the composition of Dr. Hess Stock Food) are essential in maintaining the highest degree of animal health and efficiency. With such abundant proof of actual value, farmers everywhere are turning to Dr. Hess Stock Food as the one thing necessary to put the feeding business on a paying basis. By its aid the margin of profit, sometimes so narrow as to come dangerously near actual loss, is increased till a year's operation shows a substantial balance on the right side of the ledger. Bear in mind, then, that nothing "tones up" a feeding animal, gives such good health and increased appetite, as Dr. Hess Stock Food.

A little twice a day in grain ration solves the feeder's most serious problem, and places his business in the front rank as an agricultural stand-by.

**SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.**

On every Tuesday during March and April the Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B.

**TRADE MARK**  
**PURE WHITE LEAD**  
**OLD DUTCH PROCESS**  
**NATIONAL LEAD CO.**

All lead packed in 1907 bears this mark.

## Pure White Lead Paint Does Not Crack or Scale

One value of paint is, of course, the improved appearance it gives to buildings, implements, etc. All paints look much alike when first applied. But the great and important value of paint is as a protector, and in this value various paints differ widely. Pure White Lead is the best protective paint because it gives an opaque, durable, elastic coat that does not crack or scale. To protect your property longest, paint with only Pure White Lead and Pure Linseed Oil. This Dutch Boy trade mark protects you against adulteration and substitution; it appears only on kegs of Pure White Lead made by the Old Dutch Process.

**Send for Book**  
"A Talk on Paint," gives valuable information on the paint subject. Sent free upon request.

**National Lead Co.**  
In whichever of the following cities is nearest you:  
New York, Boston, Buffalo, Cleveland, Cincinnati, Chicago, St. Louis, Philadelphia (John T. Lewis & Bros. Co.), Pittsburg (National Lead & Oil Co.)

## ADVERTISING NOTES.

Mr. W. J. Stone, of Ludlow, Ill., has a 480-acre farm located near Arthur, North Dakota, in the Red River valley, for rent. This farm is all plowed and ready for crops. There is a new house and barn on the farm, fifteen acres pasture and fifteen acres of corn ground free. Grain rent will be accepted and seed furnished. See advertisement on page 27.

His Majesty King Edward VII recently issued a royal warrant to the manufacturers of the well-known Cooper Sheep Dip which indicates that this preparation has been selected for future use upon the royal Sandringham flock of Southdowns. This compliment to Cooper Dip is well deserved, the merits of which are known to the leading sheepmen throughout the world.

The Tonic Stock Food Company, of Elgin, Ill., are placing their Tonic Stock Food on the market, and in their advertisement on page 6 of this issue the price at which a 100-pound sack can be obtained is plainly stated. They also have a special premium offer that they desire Homestead readers to write for in case dealers cannot supply this stock food. Ask them for full particulars.

Mr. Louis B. Losse, of Milwaukee, Wis., has just issued a catalog which he will send free quoting prices on groceries, hardware, farming tools, etc. This he will send free to Homestead readers. In his advertisement on page 4 he states that he can save money on everything used in the home or on the farm. He refers our readers to the First National Bank, any express company or business house in Milwaukee as to his responsibility.

Several good farms are offered for sale by Mr. J. L. Griswold, of Dodge Center, Minn., in his advertisement which will be found on page 27. These farms range in size from 320 to 530 acres. They are all tillable and mostly well improved. The prices that Mr. Griswold is asking for them are named in the advertisement. He has farms of all sizes, located in southeastern Minnesota, and he would be pleased to give our readers further information in regard to them.

Mr. J. Haleen, of Dayton, Iowa, has a highly improved Iowa farm consisting of 320 acres of the finest black land in central Iowa which he is offering for sale in his advertisement on page 27 of this issue. The improvements are an eleven-room house, a barn that holds 100 tons of hay and fifty head of stock, and seven other good-roofed and painted outbuildings. The farm is located near three good towns and there is no timber or rocks on it. Sixty bushels of corn to the acre was raised last season. He also has a nicely-improved eighty-acre farm located in Poweshiek county, Iowa, and at

the prices named in the advertisement, to which we above refer, they certainly should be bargains. Write Mr. Haleen for further particulars.

Mr. G. Gregory, of Ralston, Iowa, has early Champion seed oats for sale. They weigh thirty-six pounds to the bushel and have been re-cleaned. They were treated for smut last spring. His advertisement appears on page 13 of this issue.

Messrs. Cameron & Duncan, of Melita, Manitoba, Canada, are advertising for sale on page 27, unimproved prairie land and improved farms. They advise us that these farms are all well located near good towns with churches, schools and telephone systems. On some of their lands the rate of interest is only 5 per cent with ten year payments. Write them for list after reading the advertisement referred to above.

In the buying of seed corn one naturally wants the best—the purest strain—free from contamination of inferior grades. No other kind will bring the results so eagerly desired. Poor seed brings poor corn, and nibbins are a poor investment. There is a satisfaction in knowing beforehand that such goods as one orders will be just as represented and those desiring the finest corn grown are asked to note the advertisement on page 12 of this issue of Messrs. W. W. Van Sant & Sons, Box 16, Farragut, Iowa.

During the recent cold wave over the entire country, when the plateau lands of Idaho and Washington were tied up by a temperature of from 18 to 26 degrees below zero, Lewiston-Clarkston, at the head of navigation in the Columbia valley, had mild, clear, invigorating weather, the lowest drop of the thermometer on one night being 2 degrees below zero. In the famous Yakima valley, the thermometer registered from 17 to 26 degrees below zero. The snowfall all over the Inland Empire country ranged from one to four feet in depth, but in Lewiston-Clarkston it was not more than four inches at the deepest. They could not have had more perfect weather for orchards and vineyards.

## BROME GRASS SEED FOR SALE.

Mr. Geo. W. Schwab, of Clay Center, Neb., wishes to say that he has a fine lot of Brome grass seed for sale which will be priced right if taken at once. This grass is a very valuable pasture for horses, cattle or hogs, is easy to get a stand and one of the longest lived grasses to be found anywhere. Write him for prices on any amount, and mention The Homestead.

## A RELIABLE SEED HOUSE.

Messrs. Currie Bros., of Milwaukee, Wis., are one of the largest farm and garden seed houses in the West. This concern have worked up an enviable reputation on the reliability of their seeds. Their favorite phrase, "Currie Bros.' seeds always grow," is justified in their large and growing business. They make a specialty of northern grown seeds. Write for their new seed annual, just off the press. It's sent free. See advertisement on page 12.

## ENGLISH EVERGREEN HEDGES.

Beauties they are. Once in a while they are seen in America, especially in the older settled portions. They're useful, too. If allowed to grow quite tall they make a valuable wind-break. It doesn't cost much to get the first four trees. Six hundred thousand sample evergreens have been reserved by the Gardner Nursery Company, of Osage, Iowa, to send free to property owners who write them. Here is a good way to get a start. See advertisement on page 13.

## RED TAG TREES.

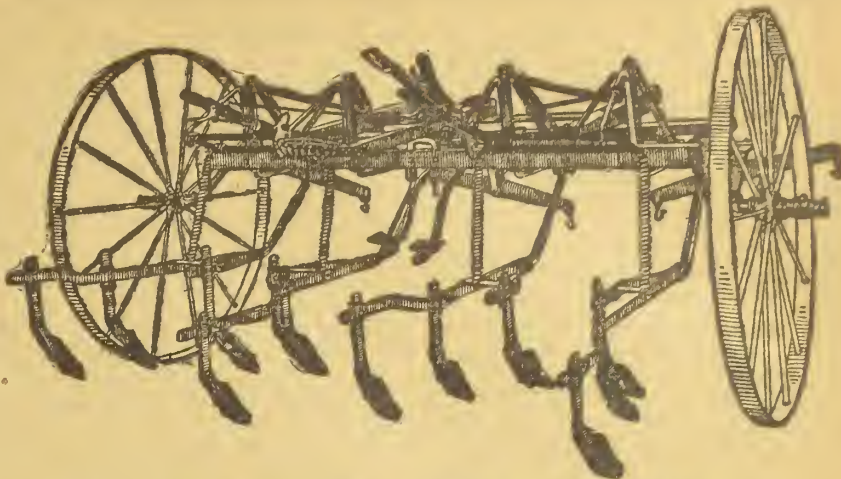

Red Tag trees are the trees with the red tag. They are the trees from the Phoenix Nursery Company, of Bloomington, Ill. They are the sturdiest and best stock that experience and good soil can produce. The Red Tag trees are known all over the country. If you are not yet acquainted with the Red Tag and know what it means, you should send today for a free catalog which tells all about a complete stock of nursery trees and plants that this company will soon send out to its different patrons all over the country. Kindly mention this paper when writing for catalog. See page 13.

## THE MONARCH SEPARATOR.

The Monarch Separator involves a number of new ideas in its construction. It is exceedingly light running and convenient in its entire makeup. It is simplicity itself and consequently it has lasting qualities because there are few parts to wear out. It is built to save not only all the cream, but to save the strength of the man who operates it to the greatest possible extent. If you will turn to page 8 of this issue you will find the advertisement of the Monarch separator. It is manufactured by the Lisle Manufacturing Company, Box 39, Clarinda, Iowa. Upon request, this company will send you a free catalog telling all about this separator. When you write state the size of your dairy herd, and please mention The Homestead.

## THE BEST SEED CORN.

The best seed corn is that variety of corn that is best suited to the climate and soil of the country wherein it is to be grown. There is no one variety, or several varieties for that matter, that are the best to grow in every part of the corn belt. All those who have given the study of corn any attention well know that there are a great many farmers who have, by careful selection, developed a type of corn that is probably more exactly suited to their farm conditions than any type that they could buy. In Winneeshiek county, Iowa, lives a farmer who has devoted a great deal of attention to developing corn that is best suited to the environment of the farms in a great part of the corn belt. The supply of this variety of seed corn has been placed in the hands of the Adams Seed Company, of Decorah, Iowa. Professor Holden, a world-wide authority on corn, says that Goddard's "Silver King White Dent" is a remarkable corn and one of the very best. This is certainly a high recommendation and should be fully appreciated by seed corn buyers. There is a very interesting history of this variety of seed corn, and if you are interested it will be sent you on request. The Adams Seed Company also carry a wide line of home-grown grain and grass seeds. The adulteration of seed nowadays is so great that it pays to buy solely of the most reliable firms. In ordering of this company we think you can make no

## A Boy and Three Horses Can do the Work of Two Men and Four Horses

When your corn needs cultivating it needs it bad and you know that you lose money every day it is left uncultivated.

It is true that with plenty of help it is no difficult matter to cultivate every acre at just the right time.

But—

When you need help the very worst way it is scarce and you know how hired help cuts into your profits.

We have just issued a book on the Midland Cultivator. Those who have seen it say it is one of the most interesting and instructive books ever issued for corn growers.

There are ten articles, each one written by an expert in his particular line. Some of the writers are: O. L. CENTER, Professor of Agriculture Illinois University, A. F. WIANCKO, of the Lafayette Experimental Station, O. E. YOUNG, Secretary Michigan Corn Improvement Ass'n and F. W. TAYLOR.

### "MIDLAND" TWO ROW CULTIVATOR

Now, if you knew of a cultivator that would enable you to get on with less help you would be interested, wouldn't you?

Such a machine would pay for itself in one year.

Any young boy with three horses on a Midland Two Row Cultivator can cultivate as much corn as two men and two teams using one row cultivators.

That's the kind of cultivator you want, isn't it?

Chief of Departments of Agriculture and Horticulture, World's Fair, St. Louis.

This book is FREE to every corn grower who is using one row cultivators and will write and tell us so.

Better send for a copy today. Learn more about the Midland and read the most interesting articles every written on corn growing.

TARKIO, MO.

## Great Reduction Cream Separators

Low Prices  
Strictly  
High  
Grade

We have now put the prices of Cream Separators down to the lowest point ever reached for high grade machines. We are enabled to do this at this time by reason of the very large demand and great volume of sales, and because of improved machinery, factory short cuts, modern methods and our usual liberal policy of giving our patrons all the benefits possible on everything they buy of us. This is done for your benefit, and we want YOU to consider this as a personal reduction made to induce you to put off no longer the making of all the profit you can from your cows to settle the matter once for all in your mind that right now and here is the greatest opportunity ever offered you to secure a high grade, guaranteed Cream Separator at a great cash saving in price, for the very least money a cream separator of this high quality was ever put on the market.

## Reduced Prices:

Model	Capacity per hour	Price
Mawthorne No. 1, 250 lbs. milk	\$33.50	
Mawthorne No. 2, 350 "	\$37.50	
Mawthorne No. 3, 500 "	\$42.25	
Golden Harvest No. 4, 350 "	\$41.95	
Golden Harvest No. 5, 500 "	\$44.40	
Golden Harvest No. 6, 650 "	\$48.00	

We also sell the Little Marvel, capacity 175 lbs. milk, for \$27.00.

These prices are obtainable only of Montgomery Ward & Co.

They are spot cash prices, and every one sold at these prices is fully guaranteed to give perfect satisfaction in every way. If after thirty days' use you find any cause for complaint, write us fully all about it. If we fail to satisfy you in every way we will write you where to ship it, and will refund every dollar you paid for the machine, including your freight. Under this positive guarantee you are safe in trusting your order with us. You will find our Cream Separators to be the closest of skimmers, easy to handle, easy to clean, World's Fair winners and money makers for you right from the start.

A Montgomery Ward & Co. Cream Separator adds the profit of one cow to every four cows in your herd.

And at our reduced prices any of our machines will soon pay for itself and give you a regular, steady profit well worth your while to consider. Do either one of two things today. Either send your order right in to us for a Cream Separator, or send to us for our Special Cream Separator Catalogue.

WE ARE READY to assist you to make all the profit there is in your cows. We make it easy for you, by our greatly reduced prices. Take advantage of this reduction at once. Order your Separator sent you today.

Branch House: Kansas City Chicago

## A Shady Transaction

If anybody sold you some lumber and if upon careful examination you discovered that it was really not solid timber but merely short pieces spliced together you would call it a shady transaction. That is about the kind of a proposition you are up against when you buy cut stay fence.

It's really not a first-class, full strength product. About half of its strength is wasted—sacrificed to convenience and speed in manufacture. Our stay wire is NEVER cut. It runs continuously up and down across the fence for many rods without an end, thus preserving and utilizing ALL the strength and service there is in the wire.

**30 Days Approval.** Let us prove to you that Advance Fence is the best made fence on earth. We offer to ship you all you need on 30 days approval. We want you to examine it carefully and compare its construction with other fences. You may stretch up a part or all of it and turn your stock against it. In fact give it any kind of a test you wish.

Then we will let you be the judge—absolutely. If you do not like it send it back and it won't cost you a cent as we will pay freight both ways and refund to you every cent you paid. We know that Advance Fence will please you or we would not dare make this liberal offer.

**We Prepay Freight** and guarantee safe delivery of shipment. You take no risk whatever. Write for our Free Fence Book and Prices.

**Advance  
Fence Co.,**  
34 Old St., Peoria, Ill.

## THE "DENNING" FENCING IS FAMOUS

For its "Peerless Tie" close mesh, strength and durability. Our motto is "not how cheap but how good." Yet our prices are as low as any compared with weight. We use the best galvanized steel wire. Our hog fence is superior. Our poultry fence beats the world. Our lawn fence is ornamental. Our slat corn cribs and steel grain bins are popular. Ask your dealer, or write us for catalogue.

THE DENNING WIRE & FENCE CO. : : Cedar Rapids, Iowa

mistake. If you want the history of the "Silver King White Dent," as well as a catalog of the standard varieties of field grains, garden and flower seeds, write your request to the Adams Seed Company, Decorah, Iowa and kindly mention this paper when so doing. See advertisement on page 12.

## THE DENNING FENCE.

The Denning Wire & Fence Co., of Cedar Rapids, Iowa, have been faithful advertisers in the columns of The Homestead for a number of years. This to us is an indication of two things, namely, that the company are putting out an extra good fence, and secondly,

that the readers of The Homestead are buyers of good fencing. The motto of the company is "Not how cheap, but how good." Considering the weight of its fencing material, prices are reasonable. The hog fence manufactured by the Denning Company is a superior article in every respect and the company claim for its poultry fence that it beats the world. A specialty is made of lawn fencing, and slat corn cribs and steel grain bins are now also being offered to the public by this company. Their catalog will give full and accurate description of all their goods and prices on same. Address the Denning Wire & Fence Co., Cedar Rapids, Iowa.

and please mention The Homestead when writing.

#### OF INTEREST TO TRAPPERS.

Those who hunt and trap a great deal of fur will find some very interesting reading in the "Hunter-Trader-Trapper," an illustrated monthly magazine which tells all about steel traps, snares, dead falls, raw furs and all the other secrets of the trapping business that are known by old and experienced hunters and trappers. The next number is going to be an exceptionally interesting one, and we would advise those who are interested in this kind of reading to turn to page 30 for further notice of this offer which is being made by the A. R. Harding Publishing Company, of Columbus, Ohio. When writing them kindly mention this paper.

#### BIG 132-PAGE SEED CATALOG AND OTHER BOOKS FREE.

If you want to know how to make your land pay you better, or read all about such interesting subjects as "Alfalfa," "Hog and Sheep Pastures," and learn how to get eleven premium packages of vegetable and garden seeds free, just write a postal card and say so to Messrs. Northrup, King & Co., seedsmen, of Minneapolis. They will gladly send you their big 132-page 1907 seed catalog, postpaid, and also a list of their books, any of which you can have free. It takes only a postal card or letter and a moment's time for you to send for this valuable, reliable and interesting lot of books, and any of our readers who do so will be well repaid. Address Northrup, King & Co., seedsmen, 184 Hennepin Ave., Minneapolis, Minn. Page 2 of their seed catalog must be read by you to learn just what eleven varieties of their "Sterling Seeds" you want in your list of free premiums. So write for the catalog now.

#### "HOW TELEPHONES ARE MADE."

"How Telephones are Made" is the subject of a book of forty-eight pages, handsomely illustrated, just from the press, which is offered free by the Chicago Telephone Supply Company, of Elkhart, Ind. This book is a remarkable addition to telephone literature, as it explains telephone construction so clearly that one who knows nothing about telephones can readily understand it. Excellent illustrations also throw much light on the subject. Other books published by this company, and free for the asking, are on "Telephone Lines; How to Build Them," and "Magnet Telephone." The Chicago Telephone Supply Company have long devoted the best efforts of experts to the improvement of the service for rural party line users. As result of this, they are offering several exclusive features, which will bring the service up to a much higher standard than heretofore, and make the rural service not only the convenience it ought to be, but a real pleasure. The Chicago Telephone Supply Company have also added some features of protection that will interest farmers, notably, a "Telephone Lightning Insurance Policy" and a guarantee bond for the perfection of the instrument. Write them at once for these and copies of the books, as per address in the advertisement on page 3.

#### AN ORGAN ON TRIAL FREE.

Most of our readers have heard of the famous Burdett organ. The news that this organ is now being shipped directly from the factory to the home will be glad news to many of our readers who have contemplated buying a good musical instrument, but who have felt that the price in the past has been prohibitive. This organ is manufactured by the Hobart M. Cable Company, of Chicago, Ill., and the president of the company, Mr. Cable, says in his advertisement on page 3 of this issue that he will ship an organ without receiving a penny in advance and will allow a thorough ten-day trial before settlement of any kind is made. If the organ is not satisfactory in every way it will not cost the person to whom it is shipped a single penny. This part of the bargain seems liberal, but when the price is considered at which these organs are offered the proposition seems liberality itself. If application is made at once Mr. Cable will send free a copy of his book entitled, "The Story of a Burdett Organ." This booklet is illustrated from cover to cover and gives in detail just the kind of information that is needed by those who contemplate buying a musical instrument. Those who are at all interested in the purchase of an organ should write at

once to the Hobart M. Cable Company, 566 Steinway Hall, Chicago, Ill., and please mention this paper when you write.

#### BARGAINS IN TEXAS LAND.

Messrs. Boyer, Peterson & Co. offer some rare opportunities to those who wish to make their homes in the Panhandle of Texas. This firm have such great faith in this region that they are willing to accept as little as \$2 per acre down and easy payments on the balance. The land they are offering is only about ten miles from the flourishing city of Amarillo. The price is from \$12 to \$15 per acre. The low price is due to the cutting up of large ranches for farms. The rainfall of this district is twenty-four inches per year, mostly falling in the growing season. For further information address Messrs. Boyer, Peterson & Co., 400 Gumbel Building, Kansas City, Mo.

#### LIGHTNING AND TELEPHONES.

Mr. W. E. Ashby, of the Ashby Telephone Cut-Out Company, of Chariton, Iowa, has a device which he calls "The No Risk Lightning Arrestor and Cut-Out." It is attached to the country telephone in a very simple manner, and is so arranged that by pulling a lever the main wire of the telephone line is disconnected from the telephone and connected with ground wire, thus absolutely cutting out the telephone so that lightning on the main wire will run into the ground. By this device the heaviest lightning stroke is switched away from the telephone—switched away from the house. The telephone is protected and the house is practically made lightning proof. This "No Risk Lightning Arrestor," while very remarkable, is at the same time very simple. It sells for \$2 and will be sent to any address on receipt of that amount, with full instructions and materials for installing it. Full details and particulars will be sent to any one upon application. Address W. E. Ashby Company, 101 Square St., Chariton, Iowa.

#### THE DEAN EAR CORN SLICER.

The experiment stations have demonstrated that it does not pay to throw away the cob in feeding corn to live stock. Not that the cob furnishes much nutriment, but rather, that it acts as a divisor, and consequently the animal will take as much nutriment out of seventy pounds corn, cob and all as it will out of seventy pounds pure corn without the cob. This means a gain of fourteen pounds on every bushel that is fed. The Dean Ear Corn Slicer prepares corn in an ideal way for all classes of stock. It slices the ear in lengths varying from one-half inch to two and one-half inches and has a capacity of from thirty bushels per hour up. It will be sent on fifteen days' trial with the privilege of returning it if it is not satisfactory in every way. It is manufactured by the Enterprise Windmill Company, of Sandwich, Ill. This company also manufacture the National Manure Spreader—a spreader, by the way, that has taken wonderfully well since it has been placed upon the market. If you are interested in either of these implements write the Enterprise Windmill Company, 24 Main St., Sandwich, Ill., and please mention The Homestead when you write.

#### 20,000 BOOKS A DAY.

Sears, Roebuck & Co., the great mail order house, write us an interesting letter concerning the volume of their business, which is now almost past belief. Among other big items, they mention the fact that they are now sending out almost 20,000 of their mammoth general catalogs a day, the new book for spring and summer. Just think! Twenty thousand 1,382-page books a day each weighing nearly four pounds, three big cartloads a day—what a terrific amount of paper this represents. The blank paper comes in rolls forty-six inches wide and thirty-two inches in diameter, and if the roll paper used in one day were unrolled and laid end to end, it would reach 510 miles, or from Chicago to Omaha, or Chicago to Pittsburg, or Chicago to Memphis, or from Chicago to Duluth. It requires the spruce timber on six acres of land to make the paper for one day's supply of catalogs for this big concern. These facts give some little idea of the immensity of this institution. The demand for this new catalog is astonishing, and is due, most likely, to the attractive offers made in this big book, and since it is free to anyone who will write for it, every thrifty person should not fail to take advantage of the opportunity and write Sears, Roebuck &

**Wagon-Box  
Manure Spreader**

**Only Endless Apron Force Feed Spreader Made.**

JUST that. It's been a long time getting here—but I've got it. The Only Endless Apron Force Feed Manure Spreader in the World.

The Only Wagon-Box Manure Spreader on the market. Think of the combination!—Just the two things in a manure spreader the farmer has always wanted.

The wise ones said it couldn't be done. I've disappointed them.

First—they said a wagon-box spreader wouldn't work. My hundreds of well satisfied customers have already stopped that talk.

Then—when it came to an endless apron, force feed machine—they said, "impossible". Did you have free mail delivery, telephone or a cream separator ten years ago? Nothing is impossible! You will say so when you see how simple and how wonderfully effective my great new improvement is.

It is simply turning the spreader business right end to end and giving the farmer a chance.

Every farmer can afford a Galloway Wagon-Box Spreader.

I want every farmer in the United States to own one.

That's why I sell it direct to you, saving you every cent. (Tell your neighbors.)

Right at the start I am selling this machine for \$59.50, freight prepaid. At retail it would cost you \$75.00. I also save you tying up \$50.00 in a spreader truck useless eleven months in the year.

My guarantee is the broadest possible—I back it up to show you that I mean business by a \$25,000 legal bond.

Then to absolutely convince you I say, "try one of my spreaders for 30 days on my free

plan." Let me send you one to take out in the field to use, or abuse if you want to, for 30 days. If it's not worth more than my price—take it to the depot—ship it back—and I'll return your money.

Why not get everything that's coming to you out of your land? That manure heap outside of your barn will buy my spreader twice over for you.

Every farmer has been saying,—"I must own a spreader."

Forty-nine out of fifty say the old style horse-killing machine is too high in price. Isn't that a fact?

Now, I claim the Galloway is right in every particular.

Made in three sizes—capacity 50 to 60 bushels. Fits any truck, narrow or wide tread. Lightest draft and simplest machine made and the work it does under all conditions is perfect.

Why not let me send you a machine—and let you be convinced by the machine itself, without sending me a cent? I'll do it today if you will write me.

I have just this further clincher to offer you. For a limited time I will make a proposition to the first farmer owning a Galloway Spreader in every community whereby he can partly or entirely pay for his machine without a bit of work done. It's a strictly business proposition and will positively hold good only for the first few farmers buying. Either send in your check pinned to this ad, telling me the style of truck you use, or write me at once, postal or letter, so I can send you by return mail my free booklet. Address me personally.

"THE ONLY WAY IS THE GALLOWAY—FROM FACTORY TO FARM."

## A TON OF HAY

taken into the mow no on the stack at three sling loads. That's not only fast work but nice clean work. No littersings whether you are handling hay, straw, fodder, or bound grain.

## The Loudon Hay Sling

drops your hay flat just as it lay on the load.

Can be used either double or triple draft and with either right-angle or parallel pulleys.

Saves half the work of mowing away.

Send for our special booklet showing our different kinds of slings and sling carriers. Hay Tool catalog free.

LOUDON MACHINERY CO., 49 Broadway, Fairfield, Ia.

Co., Chicago, for a copy of the new catalog if he is not already supplied.

#### THE FOUNDATION

of a house or any machine represents its life and strength. The foundation of the front end of the Great Western spreader is the double oak bolster, which carries the front end of the machine and load. The Great Western spreader costs more than any other, but when buying a big machine of this kind a few dollars extra in the cost is a small matter if for every dollar extra it costs you get \$5 in value. That's what you get in a Great Western.

#### GOVERNMENT LAND.

Mr. Joseph McCarthy, of Spokane, Wash., has an advertisement on page 28 of this issue that will be of special interest to any of our readers who contemplate moving to either Washington, Oregon or Idaho. There are two Indian reservations and four United States government irrigated districts to be thrown open in these three states, which will contain 1,000,000 acres of land. These lands are valuable for agriculture, fruit raising, stock raising and dairying. The climate is unexcelled. Mr. McCarthy has prepared maps and descriptive booklets of these reservations and irrigated lands, containing also statement of laws for taking up land and water rights, which he will mail postpaid on receipt of \$2. His references are named in the advertisement to which we have referred.

#### THE PRESIDENT'S MESSAGE.

The message recently issued by President Roosevelt has occasioned probably more discussion than the message of any president for many years back. It has been praised and blamed generously, depending upon the view point of the reader, but one paragraph seems to have attained almost, if not absolutely, universal approval. It is as follows: "We should establish shooting galleries in all the large public and military schools, should maintain national target ranges in different parts of the country, and should in every way encourage the formation of rifle clubs throughout all parts of the land. The little republic of Switzerland offers an excellent example in all matters connected with building up an efficient citizen soldiery." All of this is in direct line with the teachings which have been put out for some years back by the J. Stevens Arms & Tool Co., High St., Chicopee Falls, Mass., who will be pleased

#### PULLING STUMPS.

The method of clearing land by hand has always been considered the hardest work the new settler had to do. Yet the timber regions are known to be the most fertile. In recent years the work has been lightened by the introduction of modern machinery for uprooting trees and stumps. The more recent advancement in perfecting this machinery has been wonderful. The immense power necessary to pull up large trees and stumps requires heavy and powerful machinery, while the method of doing the work demands that the machines be not too large or heavy to handle by horse power. The difficulty heretofore has been to get the machines powerful enough and yet not too large and heavy for practical results. This seeming insurmountable difficulty has finally been achieved through the march of progress. The advancement in casting the higher grades of steel has made it possible to make these pullers out of solid steel, sixteen times stronger than cast iron. The weight of the iron machines has been reduced one-half in the steel, yet making a line eight times stronger than the iron ones, in that way doing away with all heavy lifting and making stump pulling a pastime. The Hercules

## Just Ask for Our SPECIAL PRICE On this CHATHAM Fanning Mill

Our answer will surprise you.

Why? Well, there will be a lot of surprises.

First, the price that we will quote you.

Second, the easy terms on which we will let you pay for the mill.

Third, the Chatham Fanning Mill will actually, clean, separate and grade (yes, sir, we said grade, and we mean it!) from 40 to 80 bushels per hour.

—Its capacity is wonderful—its ease of operation is remarkable.

—Its all-around usefulness and its importance as a profit-maker makes its owner wonder how he ever got along at all without a Chatham.

The Chatham Fanning Mill will handle all kinds of grain and seed. It tackles any kind of a job—It is

"death on weeds"—Takes buckhorn plantain out of clover—in fact, wipes out any kind of a weed pest by giving you pure seed grain.

It is equipped with 17 screens

and riddles—a patent bagging attachment which saves one man's time, and more special practical features than we have space even to name here.

Our idea is to build the Chatham so complete and perfect that the mill sells itself. We will ship you a Chatham Fanning Mill on 30 Days' Free Trial, freight prepaid, no matter where you live. Use it all that time, free, while you are making up your mind whether to buy it or not. If it doesn't do all we say it will, send it back at our expense.

We're not going to let you keep it if it doesn't do the work and do it right! Selling Fanning Mills on the plan we do—direct from our factory to the actual user—the very life of our business depends upon the satisfactory working of the mills we put out.

All we ask is that you try the Chatham and let it prove itself—Let it show how it can quickly put its own coat back in your pocket and make a profit for you. The Chatham Fanning Mill isn't a luxury. It's a necessity. You need it on your farm right NOW.

Send for the Chatham Book FREE. It tells of over 100 ways to increase farm profits. Tells how to stop the losses and make every cultivated acre on your farm yield crops in abundance. It's a regular Bureau of Free Information on Grain, Breeding, Planting and Seeding. It tells everything in a mighty sensible interesting way. Get it. Read it. Profit by it.

Sent promptly, postage paid, if you just ask for it on a postal card. If you live west of the Mississippi, write our Topeka office; if east, write to Detroit.

#### FREE PACKAGE OF HEALING POWDER.

Our readers will find the advertisement of the Red Star Healing Powder on page 11 of this issue. This powder is prepared by the Red Star Healing Powder Company, of Garner, Iowa, and at this time the company are making a liberal offer. They propose to send a fifty-cent can of their powder free to any of our readers on one condition, namely, that this powder has never been used by the person who makes the application. The company feel that the powder itself is its own best advertisement when it is once given a trial, consequently at this time it is the purpose to get thousands of new patrons started. The powder is specially designed to cure wire cuts, collar galls and scars of every description. Address the Red Star Healing Powder Company, Garner, Iowa. Please mention this paper when you write.

THE "LAST" OF A BOOT THAT WILL LAST.

If you want a boot that is solidly made from the boot-straps to the last, just try a pair of Rubberhide boots. Rubberhide may sound new to you. However, the boots that bear this name have been tried out in all kinds of service and have proven true to all claims that have been made for them. The company that make these boots are so sure of the claims that they make that they are ready to let you try the Rubberhide boot at their risk; in fact, most anyone who has carefully studied this article of footwear will be satisfied that the boot has every indication of proving a good one. Being made of the purest rubber, with a heavy leather outsole, leather insole and all securely joined together, it stands to reason that such a sole should last. If you are interested in getting something good in the line of boots, just turn to page 2 and note the guaranty which is given with these boots. Send today for their catalog and address your request to the Rubberhide Company, Boston, Mass. For further particulars look up the advertisement in our columns.

#### GORDON VAN TINE & CO.'S LOW PRICES.

Gordon Van Tine & Co., at Davenport, Iowa, have good news for our readers in their advertisement on page 48 of this issue. This company are simply revolutionizing the wood work and roofing business by selling directly from their mills and factories to those who use the material. The company claim that on orders ranging anywhere from \$5 to \$10,000 they can effect an immense saving to their customers—a saving that amounts, on doors and windows and every-

thing else that goes into a building, to nearly 50 per cent. Their free catalog gives full information about their materials and you will find there the price of each article that is offered for sale. Valuable architect plans are given in their catalog, showing exactly how to build and what it will cost. The company will send a book giving plans for barns, hen houses, hog houses and all other outdoor buildings, and they are now building up a special trade on some superior roofing that they are offering at low prices. The quality of the Gordon Van Tine & Co. mill

work is the very highest, everything turned out being strictly in the official grades adopted by the Sash, Door and Blind Manufacturers' Association of the Northwest. Any order may be returned at the company's expense if it is not exactly as represented and all money will be refunded at once. The mills of this company cover four acres of ground. If you will address a card or letter to Gordon Van Tine & Co., Station C, 33, Davenport, Iowa, they will send you such literature as you request by return mail. Please mention The Homestead when you write.

#### THE AVERY IMPLEMENTS.

The 1907 catalog of the Avery Manufacturing Company, of Peoria, Ill., is a work of art. This company manufacture wagons of all kinds, stalk cutters, single and double-row corn cultivators, edge-drop and round-hole planters, tanks, thrashing machines, stackers and engines of all kinds. Everything manufactured by the company is illustrated and described in this catalog, and we doubt if there is a single individual among our readers who would not be enlightened by a careful perusal of this beautiful booklet. The Avery company are not in the business for a year and out again, but are a fixture and have been so long that the name of the firm has almost become a household word in many homes where The Homestead enters. This catalog, in the first place, tells how all machinery is made; in the second place, why their construction makes them capable of producing such excellent results; and third, how well their goods accomplish in the field the purposes for which they are designed. A card addressed to the Avery Manufacturing Company, of Peoria, Ill., with a request to send this catalog will bring it to you by return mail. Please mention The Homestead when you write.

#### BEFORE YOU BUY A SPREADER

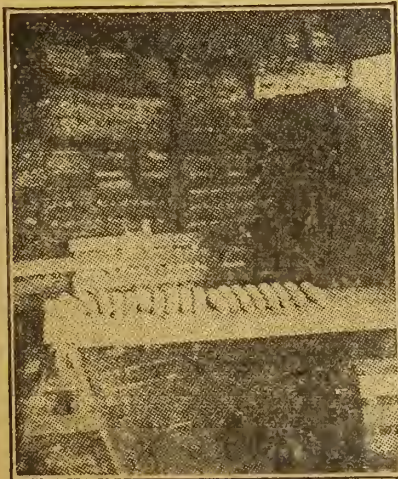

you should acquaint yourself with every firm in the field that is manufacturing manure spreaders. It is seldom that one finds just exactly what he is looking for in farm tools. It doesn't pay to buy a thing until you are satisfied there is nothing better. It doesn't pay to buy a spreader until you have carefully studied the different principles involved in the construction of the Appleton manure spreader, manufactured by the Appleton Manufacturing Company, of Batavia, Ill. One of the good things about this spreader is its simplicity of construction. Those who have had experience with manure spreaders will realize just what this means. A manure spreader is subject to very hard usage. It should be made just as simple and durable as possible. Every part should be as strong as oak and steel can make it. These are just one or two of the many things which are essential in the construction of this valuable farm implement. If you are really interested in learning all about the different features of a spreader you should write today for a free catalog containing special prices and terms regarding the spreader which the above company are manufacturing.

#### QUALITY IN CREAM SEPARATORS.

The cream separator today is a highly specialized piece of machinery. Invention after invention has brought this valuable machine to a high degree of efficiency. The more simple a separator can be made the more it will appeal to men and women who are seeking real worth and substantial merit. It is always well to look for the best value for your money when buying anything. It is especially desirable to keep this in mind when buying a separator. There is nothing that counts so much in the making of separators as quality. The Empire Cream Separator is emphatically a separator of quality. There are great things claimed for the Empire. If you are interested in separators, why not just send for a catalog and proofs of these claims? No matter what make of machine you are using, you will be interested in the easy-running, improved, frictionless Empire. The machine itself proves all the claims that are made for it. We are quite certain from our own experience that if you order an Empire you will be very well satisfied with the service which it will give you. When you write for this catalog address your request to the Empire Cream Separator Company, Bloomfield, N. J., of Chicago, Ill., whichever place is nearest your mailing point. Kindly mention the fact that you saw their advertisement in this paper. See page 8.

#### THE CORN HANDLED BY A. A. BERRY SEED COMPANY.

The A. A. Berry Seed Company, of Clarinda, Iowa, have invested a large sum of money in a scientifically constructed corn crib. Their double crib is 110 feet long and twenty-four feet broad. A special system of ventilation is employed which perfectly dries

CORN FROM BERRY FARM.

out the corn and removes entirely the danger of injuring the seed. A tipping and butting machine has been installed, so that nothing but the best grain from the middle of the

car is sent out by this company. The butts and tips are not only removed and the seed well cleaned, but it is graded, so that when the farmer receives it the corn is ready for the planter. After all, it is but natural that one of the most scientifically constructed plants in the whole country should be found in the great corn territory in which Clarinda is situated, and yet it is creditable to the Berry seed firm that they have been able to force to the front and carry off laurels for their superb method of handling seed corn. Those of our readers who are further interested in this question are requested to write for catalog to the A. A. Berry Seed Company, of Clarinda, Iowa, and please mention The Homestead when you write.

#### IRON AGE TOOLS.

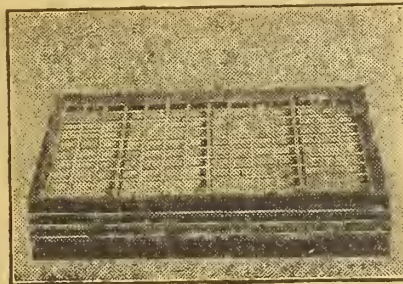

This is an age in the manufacture of farm and garden tools when wood is being discarded. Iron is displacing wood wherever possible. The reason is obvious. Metal lasts longer and the rapidity and cheapness with which many small parts of the machine can be made nowadays out of steel and iron allows of wide usage in the manufacture of farm tools. The Bateman Manufacturing Company, of Greenloch, N. J., are making a specialty of farm and garden tools. The different implements which they manufacture are up to date in every respect. On page 28 of this issue our readers will find an announcement regarding the Iron Age tools. If there is anything you might wish in their line it would pay you to write for their new book describing potato spreaders, potato diggers and other farm and garden tools. Kindly mention The Homestead when writing.

#### HOW TO GROW CORN.

This is a subject of vital interest to the great majority of our readers and we are glad to announce that we are going to be able to offer you through our advertising columns, a valuable compilation on this subject from the work of Prof. A. D. Shamel, formerly of the Illinois Experiment Station, now in the government service, Professor Holden, an acknowledged authority on corn growing, and the United States government reports. This work is offered to our readers without cost by one of our leading farm implement manufacturers, builders of the Emerson foot-lift plows and wide-cut Standard mowers. The only requirement to get this really valuable work is that you give the names and addresses of three or more of your acquaintances who are likely to want a riding plow. A postal is all it costs and we recommend that you write today. Address Mr. S. H. Emerson, care Emerson Manufacturing Company, Rockford, Ill.

#### THE NEW IDEAL SEED CORN TESTER.

Many of our readers have already ordered the new Ideal Seed Corn Tester, the advertisement of which is found on page 10 of this issue. It is now considered an absolute necessity to test seed corn, no matter how carefully it has been preserved, and in the new Ideal tester the sound principles of the operation are involved. At one time it will test enough for forty acres of corn, and does the work as nearly under nature's conditions

THE NEW IDEAL TESTER.

as it is possible to attain. Professor Holden, of the Iowa Agricultural College, as well as other corn experts who have used this tester, pronounce it superior to anything that has yet been offered to the public. In addition to doing the work accurately, it is simple in every respect, so that the boys and girls can do the testing just as well as the grown-up. It is manufactured by the Ulbrich Tester Company, 424 Walnut St., Atlantic, Iowa. Send at once for catalog and please mention this paper when you write.

#### RELIABLE HAIL INSURANCE.

Your attention is directed to the advertisement of the Farmers' Mutual Hail Insurance Association of Iowa, which appears on page 11 of this issue. This is the pioneer hail insurance association organized in 1893 and generally known over the state as "The Rutledge Company." The association is a member of the state convention of mutual insurance, and the men who manage it are among the reliable mutual insurance men of Iowa. At the convention of mutual insurance, held in Des Moines, Iowa, November 22-23, 1906, the secretary, Mr. W. A. Rutledge, read a paper on "The Present Status of Hail Insurance in Iowa," from which we quote as follows: "First, let me state as a general proposition that the mission of an insurance company is to pay losses. Unless it does this it has no right to an existence. An insurance company or association may pay large commissions, fat salaries or big dividends, but if it does not pay losses then it does not justify its existence. In fact, the justification for the existence of an insurance organization lies in the fact that it can meet and pay its losses without diverting the larger part of its premiums or assessments to the pockets of its stockholders or its officers. I am about to bring to your mind some statistics that must convince you that hail insurance as carried on by the company of which I have had the honor of being an officer for the last fourteen years, has come nearer proving its right to an existence than any other company doing business in the state of Iowa. For the purpose of making comparisons I have taken the reports made to the Auditor of State, and compiled therefrom a table showing first, the name of the company; second, the losses paid in the last thirteen years, or since organization; third, the expense paid in the last thirteen years; fourth, the per cent of loss paid from each dollar collected; fifth, the per cent

**\$4.00 to \$8.00  
Per Acre**

**That's What a Good Spreader  
Will Do if Used as it Should Be**

Write Us and  
Let Us Tell You  
How.

**There Are Several Kinds of  
Spreaders**

**All The Best ?**

**No Spreader is best, or even good, unless  
it has:—**

- An Oak Pole—not pine
- Oak Sills and frame—not pine or maple
- Wrought Iron Truss and Stay-rods to keep the frame square
- Hickory Double-trees—not rock elm
- Malleable Fifth Wheel—not cast iron
- Double Oak Bolsters
- Wide Front Axle so wheels will track
- Front Axle set under the front end of the body so the load is equally balanced on front and rear axles
- Gear Wheels and Sprockets keyed on—not pinned on or fastened with set-screw only
- Heavy Wheels with big spokes—not light wheels with 1 1/2 or 2-in. spokes
- An Endless Apron—not a half apron
- A Hood and End Gate to keep the manure away from the beater while loading

**The Great Western Endless Apron Spreader**  
has all of the above good features.

**It is Made for the Man  
Who Wants the Best.**

There is no other "just as good" or nearly as good. Ask your dealer about the

**Great Western**

Don't let him sell you a substitute, that he says "is just as good."

The Great Western will cost you just a little more than any other, but for every dollar extra that it costs, you will get \$5.00 more in value. The difference in cost will be more than made up in repairs alone in a short time. Besides this, you will always have a machine that will be ready to do business. It won't be laid up for repairs just at the time that you want to use it.

We issue a book that will tell you when, how and where to spread manure; how to make from \$4.00 to \$8.00 more per acre from your farm than ever before. Write just these words on a postal card or in a letter. "Send me your book, Practical Experience with Barnyard Manure, and catalog No. 468."

They will be mailed to you Free. Do it now before you haul your manure or prepare for another crop. Write us at any address below.

**SMITH MANUFACTURING CO.,**  
158 Harrison St., CHICAGO, ILL.

1201 Leavenworth Street, Omaha, Neb.  
1308 West 11th Street, Kansas City, Mo.  
Fourth Ave., and 8th St., Minneapolis, Minn.

of expense out of each dollar collected; sixth, amount required to be collected to pay one dollar in losses." We omit the table as being too lengthy for this article, but it shows among other things that this association had paid in losses to Iowa farmers \$1,028,830, and that this is more than twice as much as all other hail companies put together have paid in losses since their organization. The table further shows that the Farmers' Mutual Hail Insurance Association of Iowa has paid to the farmers of Iowa for losses seventy-eight cents out of every dollar they have collected and have used only twenty-one cents for expenses. This is better even than the county mutuals can show and they have always been considered the most conservatively managed associations in the state. Every farmer should carefully look up the record of this association and place his insurance where he is assured of fair treatment in the event of a loss.

#### SCALES OF PROVED TEST.

More scales are being sold to farmers than ever before. The scale for heavy weighing has come to be as much a farm necessity as the cultivator or the reaper. No farmer who sells stock, hay or grain in quantity can afford to guess at weight, or even to take somebody's else scale for it. It's economy to own a scale. With the necessity at hand and many offerings before them, it is gratifying to the farmer to find a guarantee in the very name of one scale. "Howe Scales" has been a household word as long as the present generation can remember and a good while longer. They have been on the market more than fifty years and are known wherever weighing is done. They are recognized as standard. Their records are never questioned. Such a reputation is, of course, not an accident, nor is it built up on claims. It is the result of more than a half century of the application of the most expert science to conscientious scale building. When you weigh on a Howe scale you know it's right. If it hadn't been right, it would never have left the factory. To those who are looking for a "steel frame, oilless scale" of the better grade the Howe Scale Company can furnish such at a price within the reach of all. A postal addressed to the Howe Scale Company, at Chicago, will bring full description and illustrations. See advertisement on page 20.

## How to Save Paint Bills

Be careful not to use imitation paints, or substitutes for pure White Lead, containing clay, chalk, etc. They will surely crack, scale and fade, and cost more to burn off than they did to put on.

**CARTER**  
Strictly Pure  
**White Lead**

is most economical because every atom is paint. Spreads best, covers most and wears longest. Gives any color or tint. Sold by reliable dealers everywhere.

Send for our booklet, "Pure Paint." Gives valuable information on the use of paint, and saves you money by showing how to avoid worthless paint mixtures. Sent FREE with six beautiful color schemes.

Address Dept. D  
**CARTER WHITE LEAD CO., Chicago, Ill.**  
Factories: Chicago—Omaha.

Frank Dawley's Poland China Sale.

The last Poland China sale of a two weeks' circuit through Kansas, Iowa and Missouri came to an end at Salina, Kan., and was held by Mr. Frank Dawley, one of the most popular breeders in Kansas. It is hardly necessary to state that noted breeders attended this sale, for the reports of sales show it. Fifty head were offered and brought a total of \$10,287.50, or an average of \$205, which stands as a record for Kansas. Mail bids were many. The top price was paid for Falth, a gilt of the record-breaking litter by Chief Perfection 2d. She brought \$775 and was purchased by Mr. Frank Fites, of Roman, Ind. Colonels Berger, McCracken and Correll officiated. Below is a complete list of sales.

Lot.	Name	Price.
1.	Frank Fites, Rouan, Ind.	\$775.00
2.	Tom Hunt, Blue Rapids, Kan.	250.00

Whitehall Sale Company's Duroc Sale.

The breeders present at the second annual brood sow sale made by the Whitehall Sale Company responded liberally and gave the gentlemen who consigned their stock to this sale a nice average price for the stock offered. Mr. S. E. Morton, of Camden, Ohio, was the largest consignor and sold the highest-priced sow, a daughter of Ohio Chief, at \$610, to Mr. Thos. Johnson, of Columbus, Ohio. Mr. Johnson secured several of the tops of the offering and no doubt has one of the best collection of Duroc females to be found in this country. Mr. Morton sold seven daughters of Ohio Chief at an average of \$385.71, and his consignment of nineteen head averaged \$208.71. The consignment from Whitehall Farm was the next largest in numbers and fifteen head sold for an average of \$91. Much credit should be given Manager Drake for the excellent condition of the consignment. Mr. C. E. Speaks, of Yellow Springs, one of the best breeders of the East, consigned four head to the sale and made the high average of the day, \$278.75. He has been one of the most enthusiastic breeders to be found anywhere, and the average made by him was in keeping with the offering. The other consignors to the sale were equally pleased with the averages made. This sale with two exceptions is the highest ever made east of the Mississippi river. Colonels Vinedge, Iglehart and Eisenhower conducted the sale in a satisfactory manner. A list of buyers and prices obtained follows:

New Tongue Truck

FOR DISK HARROWS AND OTHER MACHINES

No need of buying a new Harrow, Mower or Seeder to have the new tongueless implements. Your old implements can be made modern and up to date by buying one of our inexpensive Famous Tongue Trucks. Can be attached as shown in picture to any implement, old or new, and is the simplest and most practical truck made. Takes the weight from the horses' necks, prevents bruises and galls. Only truck made which permits raising or lowering of tongue and hitch at the same time, thereby causing direct draft and even cut of disks. Write postal for particulars.

LANDS AND HOMES FOR SALE

Last Chance to Buy Cheap Land.

PROVIDE FOR THE RAINY DAY.

For the rainy day will come—sooner or later—and the man who is wise and has the interests of his family at heart will buy land, for land is sure, stable, and will always make the wife and the boys and girls a good living. You say where? We answer—in the

FAMOUS FALFURRIAS DISTRICT

In The Gulf Coast Country of Texas.

**FALFURRIAS, TEXAS.**  
Shipped the earliest vegetables: Bermuda Onions, Watermelons and Cotton in the U. S. It is 1,000 miles nearer the consuming markets than California. The soils are a rich, sandy loam, alluvial deposits of some pre-historic water course, underlain by red, sandy clay, with unusual capacity for holding moisture, and in itself, rich in plant food. Rainfall. The U. S. Weather Report states an average rainfall of 26 inches for the last 20 years. The last few years since lands have been cultivated, the rainfall has been 30 inches, sufficient to raise all crops, without irrigation. Artesian water, at 500 to 750 feet, either flowing wells of good capacity, or on higher lands rising to about 10 feet of surface, making it an ideal pumping plant through windmills or gasoline engines. Products of all kinds as Corn, Cotton, Forage, Alfalfa, Vegetables, have been raised successfully and profitably for years. Fruits, such as Oranges, Lemons, Olives, Dates, Grapes, Peaches and Plums are making rapid growth. The Climate is Semi-Arid, no excessive rainfall, no malaria. Dry air, cooled by constant gulf breezes; cool nights, no storms. Ideal climate, good for lung trouble, asthma and catarrh.

Where the farmers are now making from \$50 to \$300 per acre per year from their crops; where we have artesian wells; where land has doubled in value in twelve months; where new towns and new railroads are being built; but don't wait—you know how land has increased in value in your own country—buy in the Falfurrias district; get near these new towns and your land will grow in value as the town grows. Land is selling now at

\$15 PER ACRE.

Come and see our modern and progressive town; speak to our satisfied farmers. We have churches of various denominations, the best schools, good society and a happy, prosperous and enterprising community. Do you wish to know more about this wonderful Falfurrias country, the land of Heart's Delight, of Sunshine and Big Crops.

Rosenfeld & Siverly's Angus Sale.

On one of the finest days imaginable, in response to sale announcements a crowd of 300 farmers or more, and breeders from different parts of the state, gathered at Kelly, Iowa, on February 15th, and generously bid on a most excellent lot of black cattle. Prices ruled steady and the crowd was very appreciative of the offering. The top of the sale was made when Mr. J. Arnold, of Ames, took No. 11, Queen Barbara 81736 for \$190. At her side was a very toppy calf which made her a splendid proposition. Mr. J. O'Donnell, of Colo., secured a bargain in the two-year-old state fair winner bull, Inland Dandy, for \$167.50. Colonel Igo, with his assistants, did good work, as the appended list will show. By the way compliments were heaped upon these two breeders who can depend upon it they have made a reputation that will stand them in good stead at future events of this kind.

Government Land.

1,000,000 Acres Soon Open.

TWO Indian Reservations and four U. S. Government irrigated districts soon to be thrown open in Washington, Oregon and Idaho—over 1,000,000 acres in all. These lands are valuable for agriculture, fruit raising, stock raising and dairying. The climate is unexcelled. President Roosevelt in a speech in Seattle three years ago said that if he were twenty years younger he would settle in Washington. The western states contain the last of the government lands and when new districts are thrown open the best land is soon taken. I have prepared maps and descriptive booklet of the resources, etc., of these Reservations and irrigated lands, containing also statement of the laws for taking up lands and water rights which I will mail postpaid on receipt of price, \$2.00. Address,

JOS. MCCARTHY,  
Hyde Bldg., - Spokane, Wash.  
References: Fidelity National Bank, Spokane, Wash.; Floyd L. Daggett, Mayor of Spokane, Wash.

366 ACRES—15 Miles From Des Moines, Iowa

# LANDS AND HOMES FOR SALE

## Go to Texas with Noland

**SPECIAL LOW RATE EXCURSION MARCH 5th and 19th  
ROUND TRIP \$23**

**THE "NILE OF AMERICA"** is a term given the Brazos Valley of Texas on account of the phenomenal yield of all crops, especially sugar cane, corn and alfalfa.

**THE SOIL** is wonderfully rich and lasting. The rainfall is 45 inches per annum; the climate warm and healthful, while the death rate is given as twelve per thousand. Nearly all has natural drainage.

**THE LOCATION** is 15 to 25 miles south of Rosenberg in Brazoria and Ft. Bend counties, Texas. The nearest stations are Booth, Thompson, Columbia and Adamson. The land is almost surrounded by the following railroads: Santa Fe, Southern Pacific, International and Great Northern and St. Louis, Brownsville and Mexico. It is 50 miles from Houston or Galveston, on the main commercial pathways to the best markets of the world.

**GOOD INVESTMENTS** We have many tracts of land, some improved, some wild, some with timber, some ready for cultivation, some level, some partially rolling, some have natural drainage. These tracts range from 100 acres to 2,000 acres and from \$8.00 to \$13.00 per acre. Aside from these we have a tract of 50,000 acres in Borden, Scurry and Mitchell counties, Texas, through which the Colorado River flows. Water obtained in wells at depth of from 15 to 50 feet. This land will be sold in tracts of from 160 acres up on easy terms.

**OUR STRONG POINTS** Prairie lands—45 inches rainfall, no irrigation, no hot winds, level lands, good drainage, no grubbing, good fruit, corn, alfalfa, cotton, hay and cattle land. Positively no trudes.

**S. K. NOLAND, Watrous Bldg., DES MOINES, IOWA**

## IOWA BLACK LAND FARM

**\$25.00 PER ACRE CASH.**

Balance, Long Time, 5½%.

**FARM** consists of 320 acres of the finest black land in Central Iowa. **HIGHLY IMPROVED.** Fine 11-room house; barn holds 100 tons of hay, 50 head of stock. Seven other good roofed and painted outbuildings. Fine grove and orchard. Near three good towns. All fine black land; no timber or rocks. Corn this year averaged over 60 bushels per acre. If looking for something good this will interest you.

**PRICE, \$85.00 PER ACRE.**

Also nice improved 80-acre farm Poweshiek County, Iowa. \$75.00 per acre. Both belong to non-residents, and are bargains. Call or write.

**J. A. HALEEN,**

**DAYTON, IOWA**

## 5 FREE BOOKLETS. FARMING IN CALIFORNIA.

Intensely interesting. All about the enormous profits. \$70 per acre on sugar beets, \$150 on grapes, \$100 on alfalfa. Dairying and stock raising are extremely profitable. Grain and vegetable products pay \$50 to \$200. Booklets give facts and figures that are indisputable evidence of the vast superiority of California farms. 20 acres will pay more than a 160-acre eastern farm. Get the absolute, vital facts and figure out how to secure an independent income and delightful home in this land of plenty and comfort, at small cost. Write today.

**California Farmland Company, 58 Grosse Bldg., LOS ANGELES, CAL.**

## WANT A FARM HOME?

**NOW** is the time to get it. Investigate Meadows Settlement, 45 miles from Duluth, in Saint Louis Co., Minn. Prices right. Terms, \$1 per acre down and balance in fifteen years' time. Good soil, water, etc., railroad. For full information write

**LAND COMMISSIONER D. & L. R. CO., 525 Wolvin Bldg., Duluth, Minn.**

**TO EXCHANGE:** Have a good improved farm, well located, to exchange for registered cattle or stallions. Write giving description and prices. Box 81, Independence, Iowa.

## WE SELL THE EARTH.

**YES**, we sell the earth. If you don't believe it, please send for our new price list of Central and Western Nebraska Lands. We have the best land for the money in the West, located in Buffalo, Dawson, Custer, Lincoln and Keith counties, from \$2.50 to \$60 per acre. Don't forget to write us for our list of Nebraska Lands.

**W. F. Smith Realty Co., Kearney, Neb.**

**1018 ACRES** in the Garden Spot of southeast Mo., in ½ mile of station on Frisco railroad. Not one foot of waste land and as rich corn, wheat and alfalfa land as there is in the world. If bought by March 10th can be had for \$22.50 per acre. It's a tremendous bargain, in a country where we always raise crops, and owing to our short winters and long seasons, two crops in one year. See S. B. Newhouse, 617 Frisco Building, St. Louis, Missouri.

## FOR SALE.

**FARM** lands, 10,000 acres of prairie land in lots to suit purchasers, payments easy; also improved farms, all sizes, in southwestern Manitoba, near good towns. Write for list stating your requirements. **Cameron & Duncan, Melita, Manitoba**

**IOWA FARMS:** Send for our new illustrated list of improved Iowa farms. This is the finest list we have ever issued, gives full descriptions with good pictures. Also offers some good places for exchange and rent. **Northern Iowa Land Co., Independence, Iowa.**

**GOOD** farming and grazing land in Lincoln county, Nebraska, \$3.00 to \$25.00 per acre. For land lists and full particulars, address Buchanan & Patterson, Land and Immigration Agents, U. P. R. R., North Platte, Neb.

When writing please mention this paper.

**DO YOU KNOW THAT UNCLE SAM PRODUCES 80% OF THE WORLD'S SUPPLY OF CORN? DO YOU KNOW THAT YOU CAN BUY GOOD CORN LAND CHEAPER TO-DAY IN SOUTH DAKOTA, THAN ANY OTHER CORN PRODUCING STATE IN UNCLE SAM'S DOMAIN?**

**FARMERS!  
INVESTORS!  
STOCKMEN.**

Before buying lands investigate **South-Eastern South Dakota**, where good lands may be obtained at \$18.00 per acre and up, according to location and improvements. We are 175 miles south of the southern boundary line of North Dakota and east of the 99th Meridian W. Longitude, where climatic conditions and rain fall are both favorable to the profitable production of **Corn, Red Clover and Small Grains.** Our soil is a **Black Vegetable Mould** 24 to 36 inches deep (Mississippi valley formation), with a clay sub-soil.—Write us today for descriptive literature, crop reports (issued by the State), and big land list.

**BIG SIOUX VALLEY LAND CO. (Ltd.)**

**Ramey Bldg., Sioux Falls, S. D.**

## GET A SLICE OF THE EARTH

Do you know that the State of Texas is six times as large as the State of Iowa? The Panhandle of Texas contains about 25,000 square miles. This is not all good land; some sand, some rough land only fit for grazing, and some as fine land as the sun ever shone on. In some portions of the Panhandle it is very deep to water, some places 300 to 450 feet. Our land is in what is known as the shallow water belt, from 40 to 140 feet. We are agents for the owners who have recently purchased 30,000 acres of the L. S. Ranch, directly west of Amarillo, the very choice of this immense property. All good black soil, and covered with the thickest and best growth of grass that can be found in the Panhandle.

Our land lies ten miles along the New Rock Island grade, and nearly five miles wide, in Oldham County, and adjoining the town of Vega, which is destined to be the new County seat.

**GOOD SOIL, GOOD CLIMATE, GOOD CLIMATE**, located within a few miles of the greatest railroad in America, (The Rock Island) and all for \$10.00 to \$15.00 per acre. Here is a chance to get some of the CREAM and on good terms. Write us,

**BOYER, PETERSON & CO.,**

**408 - 410 Gumbel Building,**

**KANSAS CITY, MO.**

## FARMERS, READ THIS!

If you want to buy a farm this year in Minnesota, South Dakota, North Dakota or Canada, either for cash, or on the crop payment plan, send ten cents for postage, tell us where you want to go and we will tell you all about the land, our easy terms of selling and how you can get a free ticket to see it. We will also tell you how you can make \$100 per month working for us.

**GILLILAN BROS., 354 Temple Court,**

**MINNEAPOLIS, MINN.**

## MILD WINTER

Protected by great hills and warmed by almost perpetual sunshine, Lewiston-Clarkston Basin has the ideal climate for profit and comfort. No blizzards. No cyclones. No floods. No malaria. No consumption. No asthma. No serious thunderstorms. At the head of river navigation from Pacific ocean, Lewiston-Clarkston [pop. 12,000] is the commercial and transportation center for an immensely productive fruit, grain, timber and mining territory. Write today for detailed and authentic information about new fruit and vine lands just being brought under irrigation, within mile of city limits. Tracts close to and same lake-bed soil as fruit lands now paying \$250 to \$1000 per acre. Easy terms. Land pays for itself while orchard is growing. Why live amid dreary surroundings, far from neighbors, when a few acres in delightful Lewiston-Clarkston make you independent and prosperous, with all advantages of fine schools, churches, libraries, daily papers, neighborly city activity? Address **DEVELOPMENT LEAGUE, AT EITHER LEWISTON, IDAHO OR CLARKSTON, WASH.** Send list of neighbors who may move west. Write names and addresses very plainly and kindly mention this paper.

## LEWISTON-CLARKSTON

**IDAHO WASHINGTON**

**"The Gateway of the Pacific Northwest"**

## SELL YOUR FARM

If you want to buy, sell or exchange a farm, home or business, send description at once. We have sold properties in 3 to 30 days. Our system is safe, sure and satisfactory to all. Address today.

**Real Estate Salesman Co. 412 Braco Bldg. Lincoln, Nebraska**

## Dodge County Acres For Sale.

220, all tillable, improved, well located, \$40.  
320, mostly seeded, improved, farther out, \$38.  
480, all tillable, fine set buildings, new, \$55.  
680, all tillable, two good sets buildings, \$50.  
I have all sizes of farms. Let me tell you more about southeastern Minnesota farms. Address, **J. L. GRISWOLD, Dodge Center, Minn.**

**OLD VIRGINIA FARMS** Good Low Prices, Mild Climate. Free Illustrated Catalog. Largest list of farms in State. This is the country for the Northern Farmer. We want to hear from every man who desires to better his condition. **Casselman & Co., Richmond, Va.** **Lawrence Casselman, Former Auditor McLean County, Ill.**

**FOR SALE OR EXCHANGE:** 240 acre eastern Texas peach and pear orchard, located within 2 miles of growing city of 18,000 population. The owner will sell on easy terms or will exchange for northern farm or city property. **Northern Iowa Land Co., Independence, Iowa.**

**TO EXCHANGE:** Good 640 acre farm in Wilkin county, Minn.; 468 acres in Dunn county, Wis., both improved. Want smaller farm, livestock or city property. Box 151, Independence, Iowa.

## Farms That Grow "No. 1 HARD" WHEAT

(Sixty-three Pounds to the Bushel)

are situated in the Canadian West, where Homesteads of 160 acres can be obtained FREE by every settler willing and able to comply with the Homestead Regulations. During the present year a large portion of

## New Wheat-Growing Territory

has been made accessible to markets by the railway construction that has been pushed forward so vigorously by the three great Railway Companies. Grain-growing, mixed farming and dairying are the great specialties.

For literature and information address Superintendent of Immigration, Ottawa, Canada or the following authorized Canadian Government Agent.

**W. L. Bennett, 601 N. Y. Life Bldg., Omaha, Neb.**  
**H. T. Holmes, 215 Jackson St., St. Paul, Minn.**

Mention this Paper.

## WELL IMPROVED FARM \$18.00 Per Acre.

**227 ACRES**, facing a beautiful lake, 70 miles from Minneapolis. 20 acres under cultivation, 20 acres hay land, 60 acres very easily cleared, balance covered with a nice growth of hardwood timber and will cut 600 cords of maple wood. 160 acres fenced. A good four-room house, barn, granary, chicken-house, etc. Water in house and barn. Rich, productive soil. No waste land. This is a big bargain for some one.

**HOMESTEAD LAND COMPANY, 302 Nicollet Ave., Minneapolis, Minn.**

## Get the Best While You Can.

In the Panhandle of Texas, a general farming country proven by crops, Government reports, and annual rainfall in growing season. We bought early 3 to 8 miles from Summerfield, a station between Hereford and Tulo, that we can sell at \$15 per acre, one-third down, while it lasts. Farms on two sides of us pay \$30 to \$35 per acre annually. We have cheaper land farther from R. R. Take our excursion and free sleeper March 5th. Agents wanted. **Western Land Co., 530 Good Bldg., Des Moines, Iowa.**

**FOR SALE OR EXCHANGE:** 300 acres Merced county, Missouri, improved, good land. 246 acres Henry county, Missouri, good new improvements, productive soil. Write for description and price. Box 151, Independence, Iowa.

**WANTED** to sell or exchange, well improved, splendid 236 acre eastern Kansas farm that adjoins town with graded school, for a smaller farm in Iowa. Address, James E. Seaton, Vernon, Kan.

## BEFORE YOU BUY A MANURE SPREADER

SEE that its frame and sills are made of oak; that it has a ball and socket joint on front axle to prevent racking and twisting and steel braces and steel truss rods to guard against warping and sagging. See that the apron does not run backward and forward on hilly ground but insist on a positive and continuous apron drive.

"A boy can run it!"

See that it is practically automatic and so simple that any boy who can drive a team can run it as well as any man and control its every operation without leaving the seat. The

### Appleton Manure Spreader

has all these improved features and many others equally important. Write to-day for free catalogue and special prices and terms.

APPLETON MANUFACTURING CO.  
39 Fargo Street, Batavia, Ill., U. S. A.

## THIS ON TRIAL FREE MILL 20 DAYS

We'd like to tell you how we send our "Corn Belt" Feed Mills on 20 days trial free, and why it's the mill for you to

buy. This is the one mill you'll like better the longer you use it. 20 days gives you time to see how it works—how it's made. "Corn Belt" Mills grind all kinds of grains evenly and rapidly. Write today for free catalog describing full line of sweep and power mills. Spartan Mfg. Co., 282 Chambers St., Galveston, Ill.

## IRON AGE Farm and TOOLS Garden

## HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

Our readers who find it necessary to pass through small gates with their hands engaged in carrying things to and from the house will find a very convenient device in a gate latch that may be opened with the foot. The idea is a very simple one and may be applied to the ordinary hinged latch which lifts up and down in a slot on the gate and fits into a hook on the gate post. To apply the idea, suggested by one of our readers, to this gate a light strip of board is attached with cleats to the panel of the gate so that the upper end of the strip bears against the lower side of the hinged latch, which in this case is a wooden one, say a foot long. The strip extends several inches below the bottom panel and is above the ground five or six inches. If one desires to open the gate he merely places his foot under the lower end of the strip and raises the latch, at the same time giving the gate a little push, which may be hung so as to fly open of its own accord.

One of our subscribers, G. W. L., of Whitehall, Wis., writes: "Every farmer who sacks grain knows what a bother it is to keep track of his knife to cut bag strings. We have a plan which we think very handy. Nail a mower or reaper section to one of the studding where the grain is to be sacked. The sketch shows the position of the section. When you want to cut off a bag string, merely lay the string over the blade of the section and it is done. The section is always there and saves you a lot of bother keeping track of your pocket knife."

One of our subscribers requests a device for preventing a weaned calf or even a grown animal from sucking cows. We submit herewith a sketch of halter with an extra piece of leather attached to the strap over the muzzle. Four or five sharpened ten-penny nails are driven through this piece so that they will project away from the animal's nose in such a position that when he attempts to suck a cow the nails will prod the udder and put a stop to the operation. There are also a number of patented devices on the market for this purpose. However, this halter proves very satisfactory.

J. W. M., of Galesburg, Ill., writes regarding a method showing how to determine the vitality of seed corn, as follows: "The directions which are generally given for selecting ears and the advice about how they should shell and how the kernels should look, to my mind are generally first class. To examine the sprout itself is a final test, and I believe I can tell you a plan that with a little practice you can be as sure of the quality of your seed corn as you can by planting it and allowing it

to germinate. The accompanying illustration shows how a good grain of corn should look. Cut a corner of corn crosswise through the germ near the tip. Now, if you will examine the germ closely you will notice a white spot in the center of the sprout. Around this will be a yellow layer and still around this will be a lighter layer. If the white spot does not appear in the center of the sprout or if the yellow layer is greasy and dark in color the seed is not good. I have always found this to prove true."

Mr. W. A. Graham of Madison county, Iowa, favors us with a plan of a wood rack for wagon or sled. His description reads: "Take two 4x4 timber twelve feet long for the bed of the rack. With four pieces three and one-half feet long bolt these timbers together in the same position that they will lie on the wagon bolsters. On each side of the twelve-foot timbers attach four stake irons to

# Robust, Healthy Men

## Command Attention--Win Success ARE YOU ONE OF THEM?

or are you going through life minus the energy and vitality necessary to success, or handicapped by some disease like **Blood Poison, Weaknesses, Nervous Disorders, Prostate, Urethral, Kidney or Bladder Disorders, Etc.** If so, let us put before you some important facts about these troubles. Facts as we have found them during our many years of practice. Facts that will enable you to overcome the weakness or disease and enable you to become once more a healthy and robust man. We will put you in possession of these facts free of charge, without one penny of expense. All we ask you to do is to come to see us. If you can't come write us a letter describing your case. We will tell you honestly

and frankly what your trouble is, whether curable or incurable. If curable in our opinion we will prove it to you in a manner that will put you to no expense if it fails. Many men have accepted this opportunity; today they are healthy and strong.

To give every sick or ailing man a better idea of our method we invite them to call or write and get our

receive the upright stakes. The upright stakes for wood may be of any desired length. For a hog rack take boards twelve feet long and put floor in the wood rack, then make sides out of four-inch boards bolted to stakes to fit in the stake irons. Endgates may be made of the same material with cleats and rods to hold them in position."

Mr. J. A. Jay, of Wapello county, Iowa, has solved the problem of ringing hogs in a very simple and evidently satisfactory manner. A rope noose is placed over the upper jaw of the hog and drawn taut. The animal is then tied to a post and the ring is inserted in the end of the snout. This is certainly a very simple way after the hog is once secured, which part of the operation is probably more difficult.

There are more ways than one of removing the wagon box from the trucks, and in the following plan which Fred Schmidt, of Cherokee county, Iowa, submits, a very good idea is brought out: The upright pole is 4x1x14 feet long and is set several feet in the ground, so that it will be firm enough in its position to stand the strain which is required of it. The platform on which the rear end of the wagon box rests when it is to be raised from the wagon may be made any height, so as to suit the height of

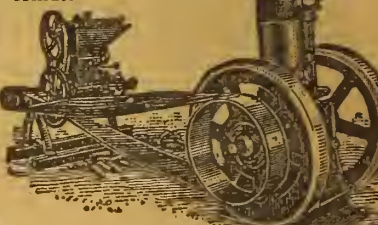

the trucks. Two guy wires should be attached to the pole a foot or so from its top and be secured to the rear of the platform eight or ten feet. The rope which is used to do the lifting is attached at one end to the upright pole near its upper end. From there it continues on to a pulley hooked in a rope, which passes around the front end of the wagon box, then back over a pulley in the top of the pole and down to a windlass at the rear end of the platform. When the wagon box is in its final position on the platform it should stand upright and should be left attached to the rope so that it cannot be blown down in case of winds.

### Homeseekers' Rates.

Homeseekers' tickets are on sale via the North-Western Line from points in Wisconsin the first and third Tuesday of each month at very low rates for the round trip to points throughout the West, Northwest and Southwest. Also special low rates for one-way colonists' tickets same dates in February and

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, kafir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

\$100,000 for one invention; another \$8,500. Book "How to Obtain a Patent" & "What to Invent" sent free. Send rough sketch for free report as to patentability. We advertise your patent for sale at our expense. Patent Obtained or Fee Returned. CHANDLER & CHANDLER, Patent Attys, 956 F. Street, Washington, D. C.

## TRY THE LANKFORD COLLAR CURE

Cures galls, sore necks and sore shoulders while working the horse. Fits any shaped neck, guaranteed. Cotton filled, and flexible, strictly humane collar. Costs only \$1.00. Circular and book free. THE POWERS MFG. CO., 1405ycamore St., Waterloo, Ia.

March to Colorado, Wyoming and the Black Hills, and to Pacific coast points daily during March and April. Ask agents of the North-Western Line for particulars.

Kraschel & Son's Duroc Sale.

A large crowd of breeders and farmers were present at the annual brood sow sale of Messrs. Fred Kraschel & Son, at Macon, Ill., on Thursday, February 7th. The offering was sent forward in the pink of condition, and those present responded liberally. This firm have been liberal bidders at the important sales throughout the entire hog belt. They have been successful showmen, and it should be to their credit that they bred Buddy K. IV., the highest-priced Duroc boar ever sold at public auction. The top price of this sale was \$325, at which figure two sows sold. One, a granddaughter of Ohio Chief, went to Mr. Thos. Johnson, of Columbus, Ohio, while the other, a daughter of Proud Advance, bred to Ohio Chief, sold to Messrs. J. M. & W. T. Gatton, of Springfield, Ill. Gold Standard, a yearling boar of Messrs. Kraschel's own breeding, sold to Mr. J. H. Williams, of Clinton, Ill., who was a liberal purchaser of the best sorts. He will show this boar at the leading state fairs next year and will be a warm competitor for honors. Mr. T. E. Laurie, of Jacksonville, Ill., secured a daughter of Model Chief, at the bargain price of \$225. Col. Judd McGowan opened the sale and was ably assisted by Col. Fred Reppert in the selling of this stock. List of sales follows:

Louden & Son's Sale.

The annual sale of Messrs. H. B. Louden & Son, of Clay Center, Neb., was a success. Twenty-five head of cattle were sold at an average of \$72, and fifteen head of brood sows averaged \$62.50. A good crowd of breeders from Nebraska, Iowa and Kansas were present and the good things of the sale were snapped up at good prices. Mr. John McFarlane, of Fairfield, Neb., topped the sale of the cattle and was a buyer of several of

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE WARRNON-WILLIAMS COMPANY, Cleveland, Ohio.

Does the mortgage worry you?

What's the use of trying to own a farm where land is so high if you have got to have a mortgage hanging over your head to worry you and to keep you poor paying the interest on it?

Why not sell out and go to the Southwest where you can own a big farm without a mortgage? Good rich land is so cheap in the Southwest that you can buy a farm without having to mortgage it. This land is rapidly increasing in value---so much so, that in a few short years it will command as high a price as your present high-priced mortgaged farm and you will own it all without a cent of debt against it.

You can buy a good farm in the Southwest at a small fraction of the cost of land in your state. On this land you can grow 30 bushels of wheat, 50 bushels of corn or 90 bushels of oats. You will have good markets and will get top notch prices for all you raise. You will have good schools and churches, a healthful climate, and you will prosper.

Now is the time to move to the Southwest---a year later it will cost you more.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it---together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines

1418 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

the very best cows. The hogs were mostly gilts of much quality and they went to leading breeders. Mr. C. E. Inglesby, of Hastings, Neb., topped the hog sale at \$120, a fine gilt by Red Jumbo. Fifteen hogs averaged \$62.50, which was very satisfactory to all parties concerned. Col. C. E. Luther, of Grand Junction, Iowa, did the selling. Below is a list of those sold.

Dispersion Sale of the O. L. Kerr O. I. C.'s.

The dispersion sale of the herd of O. I. C. hogs owned by the late O. L. Kerr, of Independence, Mo., drew breeders from Iowa, Nebraska, Kansas, Illinois and Missouri. Over 100 breeders were present during the two days. The hogs were in nice condition aside from the fact that they were not showing heavy in pig. This caused many to sell below their actual value, but breeders had no guarantee of the future usefulness on any lot, hence an air of conservatism prevailed. Mr. A. T. Garth, of Larned, Kan., was the heaviest purchaser and bought the two tops of the sale, Kerr Dick at \$165 and Silver at \$252. Everything from pigs weighing thirty pounds was sold and on 158 lots an average of \$32.20 was made. The smaller pigs were sold in bunches and counted as a

lot. Colonels Sparks and Zaun did the selling in their usual satisfactory manner. Following is a list of all sales over \$25:

The Homestead and The Homemaker  
\$1.25 per year.

## Ruebel Bros.' Sow Sale.

The Poland China sow sale of Messrs. Ruebel Bros., at Rockwell City, Iowa, on February 12th, was well attended by farmers and breeders and everything was disposed of at very satisfactory prices. The first twenty-five head averaged \$50, and the sixty head averaged \$37.61. Many of the sows were bred late, otherwise the average would have been way beyond what it was. R's Keep On, a son of the great Keep On, was sold in the sale to Mr. T. O. Cooper, of Knierrim, Iowa, and he got him at a bargain. Col. F. M. Woods cried the sale. Below is a report of those selling for \$30 and over:

Lot.	Name	Price.

## Ira Jackson's Duroc Sale.

Breeders from several states, and a large crowd of farmers, were present at the first annual brood sow sale of Mr. Ira Jackson, of Tippecanoe City, Ohio, which was held at the breeding farm on Wednesday, February 13th. Mr. Jackson's show records made at the leading shows of this country were not forgotten by the breeders throughout the entire hog belt, and enough mail bids were received to more than take the entire offering at profitable prices. The unlucky "13" did not prevent Mr. Jackson from having a record-breaking sale. The get of his noted herd boars, Orion Chief and Kruger, both World's Fair winners, and sows bred to these boars were picked up readily at good figures. One striking incident of the auction was the fact that not one sow over a year old was included. That is, not a sow which had reached two years of age was sold. The entire offering was in good breeding condition, so that those who were fortunate enough to secure brood sows may expect good, strong litters. Twenty-six head sold for \$100 or over, and the average secured by Mr. Jackson is the highest ever made in Indiana or Ohio, and with one exception the highest ever made east of the Mississippi river. Messrs. O. Walker & Son, of Palestine, Ill., topped the sale, securing a daughter of Kruger, bred to Orion Chief at \$1,100. Mr. W. M. Finch, of Portland, Ind., being the competing bidder. The litter from which this sow came is the highest-priced litter ever sold, five head selling for \$2,100, an average of \$420 each. Col. Judd McGowan, of Clinton, Ill., one of the popular Duroc auctioneers of the middle West, sold the entire offering in less than two hours. Colonel McGowan is to be congratulated upon the average he secured. He was ably assisted in the ring by Colonels Iglehart and Foster. A list of sales follows:

Lot.	Name	Price.
1.	Ira Jordan, Palestine, Ill.	\$ 50.00
2.	P. T. Thompson, Christianburg, Va.	35.00
3.	T. P. Moren, Johnson, Neb.	75.00
4.	Martin Jackson, Clayton, Ohio	47.00
5.	Fred Bauer & Son, Eastwood, O.	42.00
6.	H. H. Hawkins, Palestine, Ill.	50.00
7.	B. F. McCann, Dayton, Ohio	50.00
8.	J. O. Kerfoot, Elizabethtown, Ky.	58.00
9.	M. R. Grinnell, Yellow Springs, Ohio	60.00
10.	Robt. Quisenberry, Danville, Ky.	66.00
11.	J. E. Swope, Frankfort, Ind.	59.00
12.	B. F. Studebaker, Tippecanoe City, Ohio	60.00

## These Are Facts It Pays To Remember When You Buy a Manure Spreader.

**I. H. C. SPREADERS—Corn King and Cloverleaf**—one lever controls every operation. Operator can remain seated from time he leaves the barnyard until he returns.

Self-adjusting, vibrating rake levels the load and brings the manure up squarely to the cylinder.

Cylinder is large and runs easily, and the teeth are long, square, high carbon steel.

Apron is equipped with three sets of rollers attached to slats, running on steel tracks. Is driven from both sides and cannot bind.

Apron drive clutch is automatically thrown out of gear when load is fed out and again when apron has returned. No attention required.

Range of feed is three to thirty tons per acre with ten speeds.

Ends of apron slats are protected so that no manure can work in and bind or clamp the apron.

Driving axle is extra large—made of cold-rolled steel.

Front axle is attached to frame by means of ball and socket joint.

Chain drive, direct from rear axle to cylinder, gives easy transmission of power.

The wheels are steel with staggered spokes. Both rear wheels are fitted with lugs, affording ample traction in wet or frozen fields.

Seat is hinged so it can be turned forward and kept clean while loading.

Box is attached to frame by means of heavy steel cleats.

Frame is made of carefully selected lumber re-enforced at corners by metal braces.

That's a good deal to say of a manure spreader, and yet that is by no means all you should know about I. H. C. Corn King and Cloverleaf Spreaders before you buy.

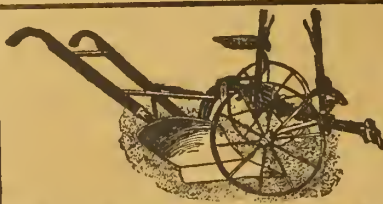

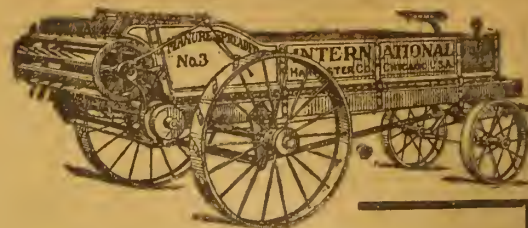

Those are the main points, and they are sufficient to indicate the superiority of the I. H. C. line. They tell you not to buy a spreader until you have seen the Corn King and Cloverleaf Spreaders.

The key-note in the I. H. C. line is strength and simplicity of construction. Strength in every part means much, for a manure spreader has hard work to do. Simple construction means that it will not get out of order, that it will have light draft and be easily operated. Those are the things you want in a manure spreader.

I. H. C. spreaders are made in two styles, Cloverleaf, an Endless Apron machine, and Corn King, a Return Apron machine; each is made in three sizes.

## Maupin &amp; Applegate Duroc Sale.

The sale of Duroc Jersey bred sows held at Shelbyna, Mo., by Messrs. Maupin & Applegate, on February 15th, was one of the successful sales of the Illinois Missouri circuit. Sixty head were sold at an average of \$38.98. The top was \$135, paid by Messrs. Wardell & Gattley, of Macon, Ill., for Lot 5, Helen's Sister, a litter mate to Helen Blazes,

## What Co-operation Has Done Farmer's Friend Separator Costs You Only \$55 Delivered

WE farmers of Iowa have broken away from the creamery trust and are manufacturing and marketing our own dairy products. During the past eight months, we have forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa.

Now we are saving money in another way—on farm supplies, and our offering of the Farmer's Friend Cream Separator gives you a fair idea of the saving.

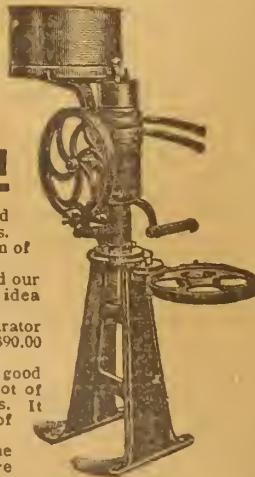

This Separator is made for our members, in the best cream separator factory in the world, and we fully guarantee it to be as good as any \$90.00 Standard separator ever made.

Just think of the difference in price, \$35—Thirty-five dollars just as good as thrown away as far as you are concerned. Thirty-five dollars—not of separator value and efficiency, but of big profits for the manufacturers. It was only by getting nearly 2,000 farmers together, (there are more of us now) that we could force this reduction.

But we have it now, and we want every farmer in this part of the country to know about it. We organized to benefit the farmer and we want to help just as many as we can. Space will not permit us to describe the "Farmer's Friend" fully here. Send for our catalog. We have selected a number of articles on which we are able to offer remarkably low prices. We save you from 20% to 50%. Write today.

FARMER'S CO-OPERATIVE PRODUCE CO.,

DES MOINES, IOWA.

Capacity, 450 to 500 Lbs.

## SEPARATOR FREE FOR A TWO MONTHS' TRIAL

WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER. \$19.75 full 1907 model Dundee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dundee separator made, regardless of name or price, and is sold at a small part of the price others ask for high grade separators; and we guarantee our Economy to have greater capacity, to skim closer, skim colder milk, run easier and not get out of order, wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you free, and we will always furnish you any needed repair or part in the years to come, promptly and on a few day's notice.

PRICES NOW GREATLY REDUCED. OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a postal and say, "Send me your New Cream Separator Catalogue and all your new offers," and our great 1907 Cream Separator proposition will go to you by return mail, free and postpaid. We have two big cream separator factories and can sell you a machine on a two months' free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save) at a lower price than you ever thought possible. If you buy from us you get our free "Fruit Sharing" Certificates and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address:

Most accurate and reliable seeder made. Sows all seeds. Sold only direct from factory at factory prices. Grinder and Seeder circulars free. Write for them  
G. M. DITTO, Box 12, Joliet, Ill.

## Watt &amp; Foust and Mahan Bros.' Sale.

On Tuesday, February 12th, Messrs. Watt & Foust, of Cedarville and Xenia, Ohio; Mahan Bros., of Osborn, Ohio, and Fred Bauer, of Eastwood, Ohio, sold a select draft from their herds of Duroc Jerseys, at the fair grounds in Dayton, Ohio. A large crowd of breeders were present and competition was keen throughout the entire sale. Mr. H. E. Watson, of Edinburg, Ind., topped the offering, securing the yearling show sow, Grand Champion Girl, at \$375. Mr. H. E. Browning being the contesting bidder. This sow is a daughter of the noted breeding boar, Kan't Be Beat, and was out of Ruberta, one of the best daughters of old Top Notcher. A spring gilt of the same breeding went to Mr. R. W. Shafer, of Westport, Ind., at \$250. There was a good demand for daughters of Kan't Be Beat and they were worthy of the prices paid for them. One of the very good bargains of the sale was No. 33 of the catalog, a daughter of Top Notcher's Last, which went to Mr. J. B. Davis, of Fairview, Kan., at \$215. Colonel Iglehart opened the sale and was ably assisted by Colonels Vinnege, Keil and Foster. A list of sales is given below:

Lot.	Price.
1 Perfection Chief Stock Company, Maryville, Mo. ....	\$100.00
2 T. F. Shetterly, Lapel, Ind. ....	55.00

59 C. E. Kimm, Blairstown, Iowa. ....	125.00
60 M. J. Caldwell ....	51.00
61 Daniel Egbert ....	65.00

The entire offering averaged \$89.50 and the Watt & Foust average was \$107.

## S. P. Freed's Duroc Sale.

It was expected that Mr. S. P. Freed, of Ames, Iowa, would have an unusually good sale, because no man in the corn belt has taken greater pains to build up a herd in the essentials of Duroc Jersey character. The event, which was held February 11th, was fully up to expectations and resulted in an average price of \$65 on thirty-five head. The attendance was large, both of breeders and neighborhood farmers, so that when the sale began every seat in the tent was filled. The first event of the day was the inspection of Manley Orion. When this great hog was brought into the ring he created a sensation, because there were many present who had never seen him before. There is no doubt but what he is one of the top hogs of the breed. The five Tientsin gilts, full sisters of Ruberta, the \$1,500 sow, were the

I think too much of my name to put it upon poor lamp-chimneys. Evidently other makers feel the same way. Good lamp-chimneys bear my name, and the poor ones go nameless.

Let me send you my Index to chimneys. It is free.

Address, MACBETH, Pittsburgh.

## FANNING MILLS

We build both Side and End Shake Cleaners for farm use. Let us tell you about the "Expert." It has stood at the head for many years. Will grade your Oats and Barley, and is the very best in Timothy, Clover, etc. Select seed on the Double Test principle.

## SMUT MACHINES

The Expert Smut Destroyer will stop the smut in OATS and BARLEY as well as wheat, and will increase your yield 5 to 10 bu. per acre. A boy can operate it. Write and see whether our claims are reasonable.

## CORN GRADERS

We have the grade that is Expert in its work. Sacks all grades. Capacity 15 bu. per hour. Operator is seated. Folds for storage. Costs less than inferior machines. Write.

ANDREW CLELAND, Inventor and Mfr., 30 Years' Experience, 80 Western Ave., MINNEAPOLIS, MINNESOTA

attraction of the sale. These five gilts, four of which were bred to Manley Orion and one to Pride Advance, realized the neat sum of \$737.50. The top of the sale, \$200, was paid for No. 19, by Mr. A. L. Mossman, of Radcliffe, Iowa. The following is a list of the buyers and the prices paid:

Lot.	Price.
19. A. L. Mossman, Radcliffe, Iowa. ....	\$200.00
18. O. L. Mossman, Polk City, Iowa ....	185.00
20. A. E. Olive, Scranton, Iowa. ....	152.50

## The Glissman Holstein-Friesian Sale.

The Holstein-Friesian sale of Mr. H. C. Glissman, of Omaha, Neb., which was held February 12th, at South Omaha, passed off successfully in every respect. One hundred and eighty dollars was paid for No. 1 in the catalog, a two-year-old heifer with a calf at foot. Mr. J. V. White, of Mitchell, S. D., was one of the heaviest buyers, having seven females and a bull knocked down to him. Mr. H. B. Elliott, of Duke, Iowa, purchased nine head. Bulls were rather slow sale, there being some extra good ones sold below \$80. Messrs. B. Witt, of Scribner, Neb.; Peter Diedrichsen, of the same place; S. Gleason, of Pierce, Neb.; Wm. Sargent, of Bronson, Iowa; G. F. Junkin, of Dexter, Iowa; Wm. Jensen, of Omaha, Neb.; H. Bler, South Omaha, and E. Elton, of Benson, Neb., were among the buyers. Thirty-two head, including calves from nine days to six months old, sold at an average of \$112.50. Everything was sold that was put up, so that it was a straight auction sale from start to finish. Mr. Glissman still reserves fifty head at Rock Brook Farm.

Sixth Annual Stock Sale  
OF PURE BRED

## Short-Horns and Poland Chinas

Grand Junction, Iowa, March 6, 1907.

**33 HEAD CATTLE** (consisting of sixteen young bulls, 8 to 18 months old, of good Scotch blood lines and choice sappy fellows of right conformation. ## FIELD NOTES.

Duroc Jersey bred sows are offered for sale by Mr. Delmar McCann, of Kennard, Neb.

Mr. John E. Griffith, of Washington, Iowa, claims October 16th as the date for a public sale of Aberdeen Angus cattle.

Three Clydesdale stallions are offered for sale by Mr. A. Bailey, of Anita, Iowa. These are bargains if taken soon.

Duroc Jersey sows and gilts bred and ready to farrow are offered for sale by Messrs. Rood Bros., of Lake Park, Iowa.

Mr. W. J. Prather, breeder of Duroc Jersey swine, Russell, Iowa, writes: "I am about all sold out, but will have some good boars by Tom Davis for spring trade. He is a hog I sold at the Iowa State Fair for \$300 and at which place he took second premium. At the Nebraska Fair he took

first premium. I have been told Mr. Van Patten, who purchased him, refused \$1,000 for him."

Registered French draft mares and fillies are offered for sale by Mr. F. J. Svoboda, of Snyder, Neb., and at very reasonable prices.

French draft and Percheron stallions and Missouri and Kentucky jacks are offered for sale by Mr. C. T. Gollehon, of Blair, Neb.

Ten head of Junior Jim gilts, of April and May farrow, bred to Long Alix and Redwood Chief, are offered for sale by Mr. Austin Renshaw, of Blair, Neb.

Mr. Henry Dorr, of Remsen, Iowa, whose public sale of Poland China swine took place February 5th, writes that the average on sixty-two head was \$40.10.

Mr. George Mutch, of Elroy, Wis., will dispose of his Short-horn bulls at what he terms "snap prices." His advertisement will be found on page 35 of this issue.

Ten to forty head of Short-horn or Aberdeen Angus cattle are wanted as per advertisement on page 35 of this issue, the address of which is Box 21, Ocheyedan, Iowa.

Mr. E. R. Wood, of Jefferson, Iowa, writes as follows: "My average at my recent Duroc Jersey sale on thirty-six head was \$52.25 and on forty head, \$49.30; you have it \$46 on thirty-eight head."

Mr. W. I. Toop, of Auburn, Iowa, has a few good young Short-horn bulls for sale, sired by the noted bull, Gondolier. He is pricing these within the reach of anyone who wants a good young bull. Write him and get his terms.

Mr. Sherman Edwards, of Bondurant, Iowa, is offering twenty head of pure-bred Duroc Jersey gilts for sale in his advertisement that appears on page 35 of this issue. They are bred for April farrow to a son of Crimston Wonder Again.

Messrs. F. M. Deyoe & Son, of Mason City, Iowa, have twenty Duroc Jersey gilts and six yearling sows that are bred, which they are offering for sale to Homestead readers in their advertisement on page 35 of this issue. They make the announcement that these are all choice animals.

Mr. W. R. Wilson, of Arispe, Iowa, has recently secured from France a two-year-old Percheron stallion that will weigh 1,900 pounds. He sailed on January 6th and landed in his barn January 25th. He is one of the best young stallions ever brought to southern Iowa.

Mr. J. F. Waggoner, breeder of Poland China swine, of Olin, Iowa, in ordering his advertisement continued, which will be found on page 45 of this issue, says: "I still have a number of good young Poland China sows for sale. My hogs are all healthy and growing nicely."

Mr. H. B. Griffiths, of Bowen, Ill., writes: "I see by the sale report in The Homestead that gilt No. 18 is quoted as having sold at \$17.50. It should be \$67.50." We make this explanation in justice to Mr. Griffiths and also to Mr. J. E. Reed, of Aledo, Ill., who was the purchaser.

Mr. M. A. McWilliams, of Wall Lake, Iowa, will sell forty head of Duroc Jersey brood sows at his farm on February 22d. These are largely the get of his splendid boar, Orion J., a son of old Orion, and out of the great Kruger Maid. He is selling a good bunch of sows in this sale.

Mr. F. Bowman, of Eldora, Iowa, is offering Duroc Jersey gilts, bred to Golden Tip 17911 for April and May farrow. He also has a few late boars for sale, sired by Champion 12351. Mr. Bowman will quote reasonable prices on this stock. His advertisement appears on page 43 of this issue.

Mr. Ernest Babcock, of Manning, Iowa, whose public sale of Poland China swine took place February 2d, writes that he had a very bad day, as it was 10 or 15 degrees below zero and quite stormy. However, the sale was a successful one, three sows selling for \$77.50, \$75 and \$70, respectively. His average was around \$40, excepting nine fall pigs.

We desire to call the attention of our readers to the advertisements found on page 35 of this issue, of the Cedar Rapids Jack Farm, of Cedar Rapids, Iowa. They are offering now one of the largest and best supply of jacks for sale that they have had on hand for a number of years, and they will dispose of them at the lowest prices. They also have a large number of imported Percheron and Belgian stallions at very attractive prices. Their new importation of German coachers will arrive March 12th. Write them for photographs of animals they have for sale.

In sending change for his advertisement, Mr. Fred Ebendorf, breeder of Poland China swine, of Strawberry Point, Iowa, writes: "I do not offer twenty-five bred sows sired by Corrector, Hustle On, L's Tecumseh 2d and Ohons. They are good, growthy, heavy boned, best of color and coats. They weigh from 225 to 450 pounds and are just right to do the buyer good. They are also safe in pig to Hustle On, Perfect Spellbinder and Correct I Know Jr. All are good colored, well coated and will make large hogs at maturity. I also offer some choice Short-horn cows with calves at side and some open heifers that will grand cows, and several bulls from nine to sixteen months old, all red, and a good, uniform lot. Would be pleased to quote prices on any amount of stock. I want to close out my entire herd. I also have fifty Rose Comb Brown Leghorns for sale." See advertisement on page 35.

Messrs. P. S. & S. Barr, of Davenport, Iowa, write: "Sales are good and stock in best of condition to please buyers. Our Poland Chinas have been fed and raised for best results as breeders, plenty of clover and blue grass and shorts slop. They are a growthy, vigorous, good-boned lot, and our prices are moving them fast with the aid of The Homestead. Recent sales are: Two sows to Mr. J. Hiles, of Gilson, Ill.; two to Mr. J. Andrews, of Marengo, Ill.; two to Mr. O. Each, of Sabula, Iowa; two to Mr. O. Hebranson, of St. Olaf, Iowa. Price of pork seems to be stimulating sale of breeding stock and someone will be too late ordering, as usual, as we expect to run short on bred sows later in the season. We recently sold a foundation herd of nine head of Short-horn cattle to Mr. O. Robeson, of Brooklyn, Iowa, also a choice two-year-old Polled Dur-

ham herd bull to the Amana Society, of Homestead, Iowa." See advertisement on page 45.

Mr. T. A. Stevenson, of Shannon City, Iowa, is offering the imported Shire stallion, Toft Right Stamp 5704, for sale in his advertisement that appears on page 47. Mr. Stevenson writes: "This horse is a great individual, a wonderful breeder and one of the best, if not the best, Shire horses in the West." Toft Right Stamp is ten years old and weighs 2,260 pounds.

Messrs. H. A. Eveland & Son, of Jamaica, Iowa, have chosen this issue of The Homestead to announce that they have a number of young Angus bulls and females for private sale. Their herd has been established for a number of years, and they have been quietly working to produce better stock each season. In keeping with this policy they purchased a year ago of Mr. W. A. McHenry, of Denison, Iowa, their present herd header, Patriot Boy. He is a double-bred Pride of the richest blood and his dam is a \$1,000 animal. Among the bulls, which range in age from nine to twelve months, is one very splendid youngster. He is a yearling and a very attractive fellow, that stands a good chance of making a show bull. Any of our readers desiring some good, useful Angus will do well to call on these parties or write them. Their advertisement appears on page 43. Kindly mention The Homestead.

Mr. J. G. Truman, of Bushnell, Ill., writes: "I am very pleased to report the safe arrival of our third importation for this season. After looking them all over, I have no hesitancy in saying that they are, taking them all round, the best lot of Shire stallions we have ever imported. Every horse is a show horse. In ages they run from three to five years, extra good colors, with very heavy, clean flinty bone and feather of the right kind, and, together with the Shire stallions we have on hand, make us by far the most select and largest stud of imported Shire stallions today in the United States. These horses we are offering at greatly reduced prices in order to move them, as we have another importation about ready to leave England and we have got to have the room. It will pay your readers that are contemplating purchasing a stallion to come and see our horses before they buy." See advertisement on page 47.

Messrs. Edmonds, Shade & Co., proprietors of Shadeland Stock Farm, of Kingsley, Iowa, in remitting for advertising already done, write that they are offering a fine bunch of bulls ranging in age from twelve to twenty-four months of age, all by prize-winning sires, and every one a good one, and a fine bunch of bred heifers. They are also offering for sale their great show bull, King Edward, as they have his sire, Columbus 35th. The two cannot be used to advantage in the herd, so they will offer this great young bull for sale. His winnings are second to none for four consecutive years. He was first in the yearling class at Nebraska State Fair in 1904, first in class and reserve grand champion at South Dakota State Fair in 1904, over all breeds, first in class Interstate Fair, 1903-4-5, and first and sweepstakes in 1906. Their 1906 calf herd, shown at three state fairs, were all his get. Those who are looking for something extra in a herd bull, a great prize winner and a bull that produces prize winners, should be looking after this one, as this kind is seldom offered for sale.

Miss Lou Goodwin, of Blue Rapids, Kan., writing in regard to her contribution to the combination sale of Hereford cattle to be held at Kansas City, Mo., February 27th and 28th, advertisement of which appears on page 40 of this issue, says: "I have contributed five head of young bulls, Lots 70 to 74 in catalog. Four of these are sired by Beau Mystic 179220, that won first prize in the aged class of bulls at the American Royal show this last fall and is now at the head of the Sunny Slope herd. These bulls are from sixteen to twenty months old. They are in prime condition for breeding purposes. Two are out of Archibald Nic. cows, one out of a May's Keep On cow, and the other out of Corrector blood. They are all long bodied, straight backed with good quarters. Lot 73 is a May's Keep On bull out of a Wild Tom cow. He was two years old last December. This bull is a full brother to Modest Keep On, the junior yearling that won second prize at the American Royal show in 1905. He is of the same broad-backed, low-down, beefy type of his brother and sire, is in fine condition and worthy to head a herd. The only reason I part with him is because I have so many cows of his breed-

ing I cannot use him to advantage. I have used him on some of my best cows this last fall."

Dr. W. Cheatham, of Orrick, Mo., is offering ten stallions and mares for sale of the style shown in the illustration that appears in his advertisement on page 35 of this issue. They are all blacks and are of the same breeding as the stallion shown which has had but few equal in the show ring. Dr. Cheatham also breeds Mammoth jacks and jennets and was the owner of King Mammoth, sire of Callaway Queen, the largest mule in the United States, weighing 2,200 pounds.

In the advertisement of the Harvard Nursery Company, of Harvard, Ill., which appears on page 14 of this issue of The Homestead, prices are named at which Norway spruce and arbor vitae trees will be sent prepaid by mail. There are also other bargains and can furnish evergreen, by express or freight very cheap. The Harvard Nursery Company grow sixteen different kinds of evergreens. If intending to plant this season, or for that matter any other season, ask them for their free price list.

Mr. U. G. Davidson, of Manson, Iowa, owner of the sweepstakes boar, Crimston Wonder I Am, and breeder of the sweepstakes boar, Crimston Wonder Again, writes: "I still have a few gilts sired by the great champion that are bred for early April and May farrow. I have been told that I offer better gilts at \$50 each than many that have sold for \$200 to \$300. Parties who doubt this are invited to visit the herd and see for themselves. To the party who wrote us for prices on gilts by C. W. I Am about February 12th and did not receive an answer, we wish to state his letter fell into the hands of a four-year-old scion of the house and was never seen afterward. If he will please write again we will give him all the information possible. Intending purchasers are invited to visit the herd. In writing, please mention The Homestead." See advertisement on page 43.

Mr. James E. Walker, of Anita, Iowa, whose public sale of Poland Chinas will take place on February 26th, writes: "I purchased two sows at Mr. E. D. Keasey's sale which I will put into my sale. One of them is Avira, farrowed July 13, 1905, bred by Mr. E. L. Jimison, of Oneida, Ill. She is out of Chief Sunshine 2d by Chief Sunshine by Ideal Sunshine 59515. She was bred to Contractor, Mr. Keasey's prize winner at Iowa and Nebraska State Fairs, on December 18, 1906. I consider her one of the choicest animals sold at his sale. I will also sell Faith, a Keep On sow, farrowed April 5, 1906. She has splendid size for her age, and is by a grandson of Perfect Perfection, her dam by Keep On 2d by Keep On. She was bred to Contractor 120133, December 2, 1906. She is a fancy gilt and has size to burn. In the field note in The Homestead last week it was stated that the big fall yearling sow, Gold Crums, was in pig to Corrector; it should have been Timekeeper."

Mr. W. H. Jones, of Clemons, Iowa, furnishes the following notes in regard to his herd of Poland Chinas: "I still have a number of spring gilts of March and April farrow that are large and growthy with good length, heavy bone, deep bodies, good backs, good heads, ends and middles, that will weigh from 225 to 260 pounds and are sired by Standard Perfection 95601 (a large, broad, deep hog with the bone under him that will carry any load in full flesh—he will weigh 900 pounds), and Baraboo 108427, with lots of bone, size and finish, a hog that would do credit in the best of herds, and he stamps his get just so. Our herd is rich in Perfection blood. These gilts are bred to T. J. Perfection 114983. This boar has the largest bone of any young boar we have seen this season. He is of good length with great shoulders and bulging hams. He is a model. He was sired by Star Top 104001, he by High Top 62417, dam Lady Zerling 159886. We also have two fall gilts to spare of sound breeding, that are good ones, sired by Standard Perfection and bred to Baraboo, that would grace any herd and should not last long at the price we are asking for them. We will also spare a few tried two-year-olds, good, large brood sows, that have proven themselves profitable breeders. They are all safe in pig to Baraboo 108427, the head boar of the herd. Any breeder wishing something good can safely land here. Our motto is 'honest and square dealing.' Answers to inquiries will not be overdrawn."

but the facts given just as they are." See advertisement on page 45.

Messrs. C. C. Drake & Son, of La Harpe, Ill., are offering a fine, well-trained, yearling Fox Terrier dog for sale in their advertisement that appears on page 17 of this issue. This dog is well bred and will be priced right.

In this issue of The Homestead on page 26 appears the advertisement of a 366-acre farm, within fifteen miles of Des Moines, level, all under cultivation, good soil and two sets of improvements, at the bargain price of \$100 per acre. Write Mr. Geo. C. Hunter, 317 I. L. & T. Bldg., Des Moines, for particulars, and mention The Homestead.

Mr. William Spear, of Stanwood, Iowa, has a very fine Shire stallion advertised for sale in this issue. This horse is a bay, three years old last fall, good heavy bone, very heavy bodied and best of breeder; has colts to show. Will be sold cheap if taken before March 15th. If not sold by that time he will put him on stand. See advertisement on page 35.

Interurbans are a means of advancing the price of property along their courses to a great extent. This has been the case in a marked degree, especially in this locality, yet Mr. Geo. C. Hunter, 317 I. L. & T. Bldg., Des Moines, Iowa, is advertising on page 26 of this issue a 160-acre level farm, within fourteen miles of Des Moines, at a bargain. Write him at once for particulars.

Mr. A. C. Lanham, breeder of Poland China swine, of Battle Creek, Iowa, writes: "We still have a few good bred sows and gilts left for sale. Among them are some of the best we ever raised. Sows bred to L. Sunshine have gone into some of the best herds in this section. The herd is in good shape, sows are all safely bred to L. Sunshine and we are expecting some great pigs this spring."

The Powers Manufacturing Company, 140 Sycamore St., Waterloo, Iowa, are advertising the Lankford collar for sale in their advertisement on page 28. They set forth the fact that this collar cures gall, sore necks and sore shoulders and it fits any shape neck. It is cotton filled and flexible and is a strictly humane collar. Circular and book will be sent free by writing to the above address.

"Hardy Trees, Plants and Shrubs—How to Grow Them," is the title of an interesting catalog and booklet being mailed by Strand's Nursery, R. F. D. 16, Taylors Falls, Minn. All of our readers should procure a copy (which will be mailed free upon request), as it contains many suggestions that will be of benefit to planters. They grow a complete assortment of varieties adapted to the Northwest which they sell direct to planters at reasonable prices.

The Big Sioux Valley Land Company, of Sioux Falls, S. D., ask that farmers, investors and stockmen investigate their good lands of southeastern South Dakota before buying. Their lands are located 175 miles south of the southern boundary line of North Dakota, where the climatic conditions and rainfall are favorable to profitable production of corn, red clover and small grains. They will send descriptive literature, crop reports and high land list for the asking. The advertisement appears on page 27.

A public sale of four registered Percheron stallions and about thirty brood mares and fillies, about twenty of which are in foal, and thirty head of choice market horses and colts, ranging in age from three to nine years of age, will be held at Gilmore City, Iowa, on March 5th. The advertisement will be found on page 32. Mr. D. M. Wolcott in furnishing copy for this advertisement, writes: "The stallions we offer are choice ones and the brood mares and market horses are also the best of their respective classes." This being a large offering and little late in the season, there will undoubtedly be a good many bargains.

Messrs. Maasdam & Wheeler, of Fairfield, Iowa, whose advertisement of Percheron horses appears on page 46 of this issue, write: "We are making a few satisfactory sales and receiving a great many inquiries for stock. We have had no trouble in selling to those wanting first-class stock. One of our recent sales was to Messrs. Hartley & Wilson, of Dallas, Iowa. These gentlemen purchased the dark gray four-year-old imported stallion sired by Besique that we have mentioned before in your columns. They visited a number of the leading breeders and dealers in the country before deciding on this horse. We still have about twenty head of mares and stallions for sale. Among the mares we will mention a black team that we have at work every day. They are four and five years old, well broke, sound and weigh in just ordinary work condition 3,680 pounds. This would make someone a grand pair of work and brood mares. This pair is only one of several paid we have that are equally good. We have every reason to believe that we own and have on our farm the best three-year-old Percheron mare in America. She is a dark gray, perfectly sound, draft type, full of quality and weighs in just fair condition 2,080 pounds. Our stallions are large, with plenty of size and weight, both home-bred and imported. We can sell a good stallion from \$300 up, according to age, size and quality."

#### FRENCH DRAFT MARES FOR SALE.

Seven good French draft mares and fillies are offered for sale by Mr. F. J. Svoboda, Snyder, Neb. These are all registered or are eligible to registry and are bred to a good stallion. If you want these, write at once or go and see them.

#### HORSE SALE POSTPONED.

The Percheron horse sale at Arispe, Iowa, on March 6th, under the management of Mr. W. R. Wilson, has been postponed until a later date. Horsemen will take notice of this, and tell their friends that the sale will be held at a later date, when it will be announced in these columns.

#### J. T. JUDGE'S POLAND SALE.

On Saturday, March 2d, Mr. J. T. Judge, proprietor of Walnut Grove Stock Farm, one mile north of Carroll, Iowa, will sell forty head of extra good Poland Chinas. A number of the sows and gilts in this sale are bred to Billy Sunday 83621 and some bred to Defender 98447, a son of Corrector and a great-grandson of Chief Perfection 2d. Mr.

Judge's gilts and tried sows throughout combine size and quality and are just the kind that men are looking for these days. The offering consists of six aged sows, thirteen fall yearlings and twenty-one gilts. Write at once for catalog to Mr. J. T. Judge, of Carroll, Iowa, and mention The Homestead when you write.

#### HIGH-GRADE SHIRES HORSES AND MARES.

On Tuesday, February 26th, Mr. W. D. Pittman, of Lake City, Iowa, will sell twenty splendid high-grade Shire mares and horses at public sale, also a couple of extra fine driving teams. Mr. Pittman is one of the best horsemen in the state and he always puts up a splendid lot of horses.

#### A SALE OF PERCHERONS AND SHIRES.

Messrs. Jas. A. & S. E. Niblo, of Milan, Mo., claim April 2d for a dispersion sale of Percheron and English Shire stallions and mares. The stallions in service are imported stock and the mares of breeding age are in foal to their service. This will be an excellent opportunity to buy desirable breeding stock. Watch for future announcements.

#### FREE SLEEPER TO TEXAS.

The Western Land Company, 530 Good Block, Des Moines, Iowa, are offering Panhandle Texas lands cheap. All they want is an opportunity to "show you." In order that they may have this opportunity they are offering in their advertisement that appears on page 27 of this issue, to furnish free sleepers on their next excursion, which goes March 5th. Write them for details and mention The Homestead.

#### THE HOOKER PERCHERONS.

On page 35 of this issue will be found the advertisement of Mr. Will F. Hooker, of Northboro, Iowa, who is offering two extra good Percheron two-year-old stallions. One of these, Longworth 45596, is a full brother to the stud colt sold by Mr. Hooker at Shenandoah last fall for \$500. He is sound and right in every way and is the making of an extra good draft stallion. The other, Francis 41697, is a bay, and in the opinion of Mr. Hooker will make a stallion weighing 2,100 pounds when he is mature. He is a half brother to the former International champion, Olbert, now at the head of Mr. McMillan's stud at Rock Rapids, Iowa. These colts, wherever they go, will do the men who buy them good and will be a blessing to the community into which they are introduced. They are good, sound, blocky fellows and will be priced right. Address Mr. Will F. Hooker, Northboro, Iowa.

#### CLOSING OUT ABERDEEN ANGUS SALE.

On March 19th, at Perry, Iowa, will occur the closing out sale of Aberdeen Angus cattle owned by the Messrs. White Bros., and it will be one of the great offerings of the year. They will sell sixty-one head altogether, and thirteen of these will be bulls, including their great Pride bull, Prince of Pilsen, considered one of the great Aberdeen Angus bulls in the West. In this sale will be a string of young bulls and heifers sired by this splendid bull that are as good as were ever seen in one herd. There will be one young K. Pride bull in the sale out of an imported cow, and one splendid Queen Mother bull. There are four K. Prides in the sale, three Blackbirds, two Queen Mothers and four Lavenders. There will also be one imported K. Pride, one imported Lavender and one imported Trojan Erica in the sale, and these will all be bred to Prince of Pilsen. Aberdeen Angus men should write at once for catalog. This firm have been purchasers of some exceedingly good cattle, and there will be some good bargains offered in this sale.

#### LAST CALL FOR THE WALKER POLAND CHINA SOW SALE.

On Tuesday, February 26th, Mr. Jas. E. Walker, of Anita, Iowa, will sell thirty head of Poland China brood sows at Atlantic, Iowa. These are yearlings, matured sows and spring gilts. Mr. Walker has selected his best sows and his best gilts for this sale. Everything to be sold will be bred to Corrected, a son of the noted boar, Corrector, or to Timekeeper, a son of the great Keep On. He sells a great fall yearling in the sale called Gold Crums. This sow has the size, length, depth and finish that will please them all, and she deserves to sell well. She is bred to Corrected for early farrow. There will also be a full sister to her in the sale, Silver Lining, a John Francis & Son-bred sow, will also be sold in the sale. This sow was in the Francis & Son prize-winning herd at Des Moines and she was in Mr. Walker's sweepstakes herd at Atlantic. She will be bred to Timekeeper. Mr. Walker is putting in his best gilts in this sale. If you want a few good Poland China sows, don't forget this sale at Atlantic, Iowa, February 26th. Write Mr. Walker at Anita, Iowa, for catalog.

#### C. R. STEELE'S TWO-DAY SHORT-HORN SALE.

On Tuesday and Wednesday, March 12th and 13th, at his farm near Ireton, Iowa, Mr. C. R. Steele, one of the best Short-horn breeders in the state of Iowa, will make a two-day sale, and it promises to eclipse anything ever before offered from his herd. He is selling 112 head, and forty of these are straight Scotch cattle. He is selling two imported cows in this offering and two of these will have calf at foot by the great prize-winning bull, Ceremonious Archer, and the other by Lord Banff 3d, the best son of the noted bull, Imp. Lord Banff. Of the Scotch females that will go into the sale are Orange Blossom, Duchess of Gloster, Victoria, Butterfly, Mysie, Lavender, Matchless, Airy Buckingham, Louisa, Miss Ramsden and Mary Ann of Lancaster. There will be a lot of the popular Rose of Sharon, Young Mary, Young Phyllis, Rosemary, Lady Sale and other well-known families, and there will be enough cattle for both breeder and farmer. They will be bred to Ceremonious Archer, Lord Banff 3d and Imp. Sittytton Fame. There will be a splendid lot of young bulls in the sale and seven or eight of these will be Scotch bulls. Mr. Steele has never before offered such a bunch of cattle as he will sell at this time. He will put the greatest lot of Scotch and Scotch-topped heifers through the ring on this occasion that he has ever sold, and there never was a better lot sold in one sale in western or northwest Iowa. Every Short-horn man in the West should

This is Huttig.

through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt.

Asphalt comes from the Island of Trinidad. A large part of it is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad

**H. W. Huttig**

PRESIDENT

## I Stand Back of Huttig's Rubber Roofing

WITH A WRITTEN, PERSONALLY SIGNED, LEGALLY BINDING GUARANTEE.

Yes, sir,—I can afford to stand back of my roofing because it stands back of me, and makes my word good as gold.

I GIVE you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

Asphalt, which protects every particle of fiber. Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have used for roofing—

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and to your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad. I will take care of all your roofing troubles, if you will trust me. Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it.

Anyway, write for a big, free sample of my roofing and let me send you my booklet B and special Ironclad Roofing Guarantee. Write me personally, and do it to-day.

**HUTTIG MANUFACTURING CO.,**  
MUSCATINE, IOWA.

write at once for catalog. Watch for following issues of The Homestead for fuller details about this offering. Kindly mention The Homestead when writing for catalog.

#### BAXTER'S DUROC SALE.

When Mr. Ed. A. Baxter, of Pawnee, Ill., selected the stock for his closing out sale he found that there were more pigs than he could sell in one afternoon, and on account of this fact, he was obliged to keep a good lot of spring and fall pigs. It is Mr. Baxter's intention to quit the business entirely, and he now offers to the public the balance of his herd at auction. He has selected Monday, February 25th, and will be pleased to have readers of The Homestead present who wish to get some extra good late spring and fall pigs. Every Duroc on the place will be sold in this sale. There will no doubt be many bargains and the readers of this paper should plan to be present at this sale. Bids sent to Mr. D. M. Pierce, representing this paper, in care of Mr. Baxter, will be properly handled. Plan to be present sale day. Mention The Homestead when writing.

#### C. H. SEIBEL'S CLOSING OUT ANGUS AND POLAND SALE.

March 7th is the date chosen by Mr. C. H. Seibel, of Paton, Iowa, for his closing out sale, which will include his complete holdings of cattle, hogs, horses, and farm equipment. For a number of years this breeder has been breeding registered Aberdeen Angus and Poland Chinas and finding it impossible to secure the necessary help to carry out his plans successfully, he has decided to place his herd at public auction, although with the expectancy that many buyers will leave the farm sale day with some snaps in the line of investments in cattle or hogs. The Angus cow offering merits the attention of all those looking for some regular profitable producers. Many will undoubtedly be sold below their value; however, Mr. Seibel is going to leave this matter solely with the auctioneers and the buyers, as there is absolutely nothing that will be held in reserve. Among the bunch of yearling bulls will certainly be some attractive ones, and there will be over a car load. Many of the cows have calves at foot, and those that are with calf are bred to King Ito out of the noted Prince Ito. The former bull is at the head of the herd and is also included in the sale offering. In referring to the swine herd we will say that there will be some first-class stuff to pass under the hammer. It will be an unexcelled opportunity for young breeders to add something good to their herds. The farm is just east of Paton four miles. Further particulars will appear next week. Come out to this sale. Send for catalog and kindly mention this paper. On page 36 appears the advertisement.

#### FORTY HIGH-CLASS, HIGHLY-BRED HEREFORDS AT AUCTION.

At Sioux City, Iowa, on Thursday, March 7th, forty high-class, highly-bred Herefords, about equally divided as to sex, will be sold in Manager McGavock's auction. Mr. G. W. Harness, of Galveston, Ind., who has had no much to do with developing cattle of the blood of the celebrated bull, Dale, as any other one man, sells on this occasion some of the best specimens of this famous family that he has ever offered. It will be remembered that the two bulls recently sold in Indiana and at Chicago for \$1,000 and \$1,010 were grandsons of the famous Dale, and that Mr. Harness offers on this occasion not only the blood of the animals that are winning the prizes, but that is commanding the highest prices in the auction rings of this country. More complete details concerning this valuable consignment of Mr. Harness' will be given later. He has included an equal number of bulls and females and is offering western breeders representative animals of his herd. A bull that should appeal to those in search of high-class herd headers is the two-year-old, Vulcan 189527, sired by Imp. Ross and out of a dam by Imp. Western Eagle, one of the best sons of the celebrated bull, Anxiety 4th. Mr. W. A. Bichel, of Glenwood, Iowa, includes some good ones sired by Hesiod Lad that was bred by Mr. Funkhouser, sired by the noted Hesiod 2d and out of a dam by Mr. Elmendorf's celebrated show bull, Earl of Shadeland 30th, the sire of St. Louis, the Armour herd bull. The catalog should be in

the hands of Hereford breeders and admirers and Manager McGavock will be glad to send it.

#### ADMINISTRATRIX SALE OF LONE RETREAT JACKS, JENNETS AND STALLIONS.

Attention is again directed to the administratrix sale of Lone Retreat's Stock Farm's jacks, jennets and stallions, to be held at the Lone Retreat Farm, near Lawson, Mo., on Friday, March 15th. This should be an event worth the time of any who are interested in the jack business, as Lone Retreat jacks and jennets are noted wherever the mule is raised. The late J. C. Ray bred jacks all his life, succeeding his father, who settled in Missouri in the early part of the last century. Mr. Ray's great success was made by his honest dealings and the guarantee that every animal that left Lone Retreat must be as represented. It was a Lone Retreat jack that sired many prize-winning mules at the St. Louis World's Fair and it was only by their performance after leaving Lone Retreat that these jacks became noted, as Mr. Ray was not a show man. Mr. C. F. Chamberlain, who has been associated in a business way with Mr. Ray for the past six or seven years, has had charge of the farm and the stock since Mr. Ray's death, and will manage the sale for Mrs. Ray, administratrix of the estate. Catalogs are being issued and will be mailed to all who write for same. See page 40 for advertisement of the sale and when writing kindly mention this paper.

#### SMUT IN OATS AND BARLEY

Is most deceiving to the farmer who undertakes to arrive at his annual loss from this disease. He is apt to figure that if 5 per cent of the heads are smut instead of good grain that his loss is 5 per cent. This is an error. The smut spore in these grains are enclosed beneath the husk or hue of the kernel. The start with the kernel when it germinates and from then until the head is formed the fight is on as to whether the head will be smut or good grain. During this period the grain is greatly stunted in growth. The smut being covered as it is, the treatment must be most thorough to eradicate it. A solution must be as strong as can be safely used and must be applied in a careful way to not endanger the germ of the grain. This, if undertaken by hand, is apt to prove disappointing. Three years ago Mr. A. V. Cleland, of Minneapolis, invented a smut machine especially for this work that has now been thoroughly tested by farmers and has proven that it is possible to control the smut in these grains. It has been found that an increase in yield results of from five to ten bushels per acre. This has been determined by leaving a portion untreated for comparison. This machine is advertised on page 32. Write them for information and see if the claims are reasonable. If an increase of five bushels per acre can be obtained, figure up what it will mean to you.

#### LAST CALL FOR THE KANSAS CITY HEREFORD SALE, FEB. 27TH-28TH.

The above sale is one that should not be overlooked, as all the cattle to be sold have been carefully selected and not a poor one will be offered. Every year at this time a big public sale of Herefords has been held in Kansas City and each year the contributors have tried to put forward better cattle than the previous year and this year they think they are putting forward the best lot ever offered. From the advertisement that appears on page 40 of this issue it will be seen that the sale is made up from a number of the leading herds in the country and as each contributor has selected some of his very best things, those who attend the sale with the expectation of seeing something really desirable, will not be disappointed. If a breeder wants just one good bull to head his herd, he can fill his wants at this sale; if the ranchman wants a car load of good, strong bulls to improve his range cattle, he can fill his wants at this sale; if the farmer or breeder wants a few head of good females to start with or to add to their herds already started, their wants can likewise be filled in this sale. Every animal is of a good age and all are thoroughly guaranteed. The sale will begin promptly at 1 o'clock on the afternoon of the 27th and at 10:30 o'clock on the forenoon of February 28th. Catalogs are now ready giving a full description of

each animal offered and if you have not already received one, Secretary C. R. Thomas, 221 West Twelfth St., Kansas City, Mo., under whose management the sale will be held, will take pleasure in sending you one. If you cannot attend the sale in person, trust your bids to one of the auctioneers, any one of whom will be glad to serve you.

LAST CALL FOR MESSRS. CHURCH'S SHORT-HORN SALE AT ROCK FALLS, ILL.

On Tuesday, February 26th, which is next week, Messrs. L. A. & H. L. Church will make a sale of Short-horn cows, heifers and bulls from their herd on Larchwood Farm, five miles south of the above place. This offering merits the attention of all those looking for some good individuals of Scotch breeding and from families that have proven profitable for the general purposes for which this breed of cattle is bred. As stated last week, the cows either have calf at foot or are bred to one of the two herd bulls, Matchless 207311 and Beaufort's Victor's Pride by Imp. Beaufort Victor 211984. One of the good cows in the sale is May Queen 6th sired by Reformer out of May Queen. She is, like her sire, a thick-fleshed, beefy cow and an easy feeder and should be worth looking after, as she is just in her prime. Several others are by this sire. Quite a number of yearling heifers are included and are sired by Matchless out of good cows of English and Scotch breeding. The male offering contains seven bulls and includes some excellent material for herd bulls. The breeding is similar to that of the heifers. Matchless, the sire of much of the offering, is also included. He has proven his value as a sure breeder and his get on sale day will be absolute assurance of his worth as a sire. Those looking for individuals of this breed of either sex will do well to secure the catalog which will be sent for the asking. Kindly mention The Homestead.

HIGH-CLASS ANGUS AUCTION AT SIOUX CITY.

It is an unusually attractive offering of Aberdeen Angus that Manager McGavock catalogs for the opening day of the Sioux City sale on March 6th. Sixteen entries are consigned from the noted herd of Messrs. Anderson & Findlay, of Lake Forest, Ill., the oldest importers and breeders of this breed in America. These are all cows and heifers and are especially attractive not only on account of their individual merit, but from the fact that they are of such famous families as the Erica, Lady Ida, Coquette, Westertown Rose and other good ones, and are sired by the great imported bulls brought over by Messrs. Anderson & Findlay a few years ago and which have done such grand service for the breed in America. Sixteen daughters of such imported bulls are attractions in any auction and a word about the breeding of these bulls is interesting at this time. Imp. Elberfeld, as well as a bred Trojan Erica as was ever brought to America, has the distinction of being out of Elba, the greatest breeding cow ever in the famous herd at Ballindaloch, and she was by Young Viscount, the greatest bull of the breed. Elberfeld was sired by the Pride bull, Prince of Insh, an almost full brother to the \$9,100 Highland Society champion, Imp. Prince Ito, both having the same sire and Prince of Insh being out of a daughter of Iliad that was from the dam of Prince Ito and representing all that is best in the celebrated herd at Ballindaloch. Imp. Pacific, another of the Anderson & Findlay sires, is an Erica-topped Pride, being sired by Egypt, a son of Equestrian and out of Pure Pride by Esquire, one of the most celebrated cows of recent years. Imp. Monitor of Glamis, a Blackbird, represents the great prize-winning blood of Glamis, the property of the famous breeder, the Earl of Strathmore; and Imp. Conqueror of Aberlour is a Coquette that stands for the excellence of the great herds of Mr. John Findlay, of Aberlour, and the Countess of Seaford, of Cullen House. There are some twenty-five cows and heifers and fifteen bulls cataloged for the auction. The catalog will prove interesting and can be had upon application to Mr. W. C. McGavock, sale manager, Springfield, Ill.

SELECT SHORT-HORNS IN THE SIOUX CITY SALE.

Sale Manager McGavock has attained an enviable reputation as manager of high-class Short-horn sales. He has sold quite a number of stock bulls to head western herds and some of the best females secured by the breeders in this country have been bought in his auctions. His Sioux City sale on March 8th is one of the most attractive that he has held anywhere. Of the twelve bulls cataloged, nearly one-half of them are Scotch. Mr. A. O. Stanley, of Sheridan, Mo., is sending quite a choice consignment. The yearling bull, Scottish Banker, of the Cruickshank Marsh Violet family, was sired by the Norton-bred bull, Rosemont, a Cruickshank Rosemary by Imp. Banker, Valley Godoy, another yearling, was got by Baron Godoy, a son of the celebrated Harris-bred bull, Godoy, and out of the Cruickshank Victoria cow, Rose Victoria by Cherub 159421. In addition to these two Scotch bulls, Mr. Stanley is sending several high-class Scotch-topped bulls. Mr. G. P. Simpson, of Blockton, Iowa, consigns the long yearling Scotch bull, Baron Bud, also by Baron Godoy, and out of Rose Leaf, a granddaughter of Imp. Daybreak 4th. This is a straight Scotch bull and an unusually good one, and breeders in search of Scotch bulls to head herds will find this sale replete with them. Mr. McGavock always makes good his claims. This is something that he is very particular to do, and he claims that he is offering in this auction four show females of one family, the best representatives of one family he has ever included in one auction. The seven-year-old cow, Louise, was got by the Prather-bred bull, Financier, by the Duthie-bred bull, Imp. Duke of Hamilton 2d. She is a show cow and two daughters and a granddaughter, all show animals, are included in the sale. The three-year-old Miss Signet, a daughter of Louise, is a beautiful red with the quality, symmetry and smoothness of her dam, and she was got by Imp. Scottish Signet, a Duthie-bred bull that sold for \$1,350 when a yearling and proved a remarkable sire. Miss Signet 2d, a daughter of Miss Signet, is a show heifer in any company, very short legged, thick and quality all over. She was got by Scotch Hero, a Harding-bred bull by Iowa Champion, out of Cecelia 12th by Imp. British Statesman.

A last June heifer calf from the seven-year-old cow, Louise, is also cataloged. She is called Concord Missie and was got by Concord, a son of Scotch Hero. Messrs. J. L. Smith & Son, of Minier, Ill., consign this grand quartet, along with eight other cows and heifers of superb quality. Mr. McGavock will take pleasure in mailing catalog. See advertisement on page 37.

LAST CALL FOR THE JAMES BIG POLAND CHINA SALE.

On Saturday, February 23, 1907, Mr. J. A. James and his big Poland China brood sows will attract breeders from far and near. Pawnee Lad and his get will be the center of attraction, as will also some big Big Prospect gilts, and some grand, good brood sows that he is selling on this occasion. A word about Pawnee Lad to those who are not personally acquainted with him. He is a son of Klever's Best 25447 and is out of Big Mariah, and he is as good a boar as Mr. John Blain ever bred. He has done a great service in the James herd and there is not a Poland China breeder in southern Iowa, and especially those who are looking for the great, big kind, that have not been impressed with Pawnee Lad and his get. One of his great brood sows goes into the sale bred to Pawnee Lad. She is Rose Perfection by Proud Monarch and out of Rose Allerton by Allerton Tecumseh, a boar that weighed 1,000 pounds. This sow is a tried brood sow and is strictly all right. Mr. James also sells two spring yearlings and two fall yearlings by Pawnee Lad and out of his famous old brood sow, Anna Price II. No man can go wrong on any of these. He sells a great many Big Prospect gilts out of Pawnee Lad sows. It is an offering of the big kind, with great, big bone and lots of stretch. If any of our readers want this kind they should attend this sale.

NOLAND HAS TEXAS LANDS.

While many other real estate men have been selling Texas Panhandle lands, Mr. S. K. Noland, Watrous Block, Des Moines, Iowa, has been quiet. He declared that he would not sell Texas lands until he was able to put on the market the very best lands at the very best prices. This, he says, he is now in a position to do. He has hargains in about twenty-five different pieces, of which he will be glad to give you a detailed description if you simply drop him a card. His lands are accessible to good market centers, such as Houston and Galveston, and are surrounded by railroads. Then, too, an important point in their favor is that they require no irrigation. One can obtain a constant flow of water at a depth of from fifteen to fifty feet. Following is a letter from a man who lives forty miles from the land in the Brazos Valley: "Chapell Hill, Texas, Nov. 20, 1906. Answering your inquiry, beg to say I have on several occasions in the past twenty years gathered as much as two bales of cotton per acre off my plantation in the Brazos Valley. I have gathered as much as ninety-three bushels of corn, but sixty bushels is about an average crop of corn. If we don't get sixty bushels we call it a small crop. I have fifty acres in alfalfa and cut it from six to eight times a year and get one and one-half to two tons per acre at a cutting. I have never sold a ton for less than \$15. Sugar cane makes well, but I have a small mill and lose 25 per cent of the juice and get 400 gallons per acre. The valley of the Brazos is the richest in the world. Off 1,200 acres in cotton this year I have gathered and ginned 1,628 bales and have about thirty or forty hales to pick yet. My rents this year will amount to more than \$15 per acre. I never rent for money, but for one-fourth cotton and one-third corn. My plantation can be seen at any time and will bear out my statements. Yours truly, John Carlisle." Mr. Noland's advertisement appears on page 27 of this issue.

LAST CALL FOR PODENDORF'S SUNSHINE SALE.

On Saturday, February 23d, Mr. A. J. Podendorf will sell about thirty-seven head of Poland China sows and fall pigs at Logan, Iowa, and it is an offering that our best breeders can afford to buy. A large part of it is sired by his celebrated boar, Iowa Sunshine, or will be bred to him. This old hog has been the sire of all the Podendorf show stuff and he has won many a hard-fought battle with the get of this old boar. A number of the sows will be bred to Western E. L. 43250, a son of Perfection E. L. and out of a G's Perfection dam. Among the matured sows to be sold are Lora Pet, a daughter of Black Chief, bred to Iowa Sunshine. She has been a producer of some of Mr. Podendorf's show winners and also some of the highest-priced sale stuff. U. S. Lady is a four-year-old sow and her daughter by Iowa Sunshine won second prize at the Iowa State Fair in 1905. She is bred to the same boar for March 2d farrow. He sells Proud Lady, a daughter of Proud Perfection, bred to Iowa Sunshine for early March farrow. Tecumseh Belle 2d is one of his great producing sows that is the dam of a lot of his high-priced stuff. While not a great individual, she certainly has been a great brood sow, and bred to Iowa Sunshine she is certainly worth buying. The Podendorf offering is full of quality and much promise, and a sow bred as these are will do any breeder a lot of good. He is putting in a good bunch of fall pigs. No. 30 is a great prospect for a show boar and we will simply say to Poland China breeders that they will miss a good thing if they do not buy this pig. There is a good gift in this same bunch. Remember the date, February 23d and be sure to attend the sale.

A COMING SALE OF SHORT-HORNS AND POLAND CHINAS.

One of the pure-bred stock sales that should be of special interest to stockmen is that to be held by Messrs. W. & G. A. Schneider, of Dana and Grand Junction, Iowa, respectively. The sale will take place March 6, 1907, at the farm of the latter named breeder, which is located two miles east and one mile north of Grand Junction. These two brothers have made a splendid success of their breeding work during the ten years they have been in the business. By careful selections from some of the best Iowa herds, some very excellent individuals have been added to the two herds, and the effect of this purchase of good blood has been marked. Buyers will find all of the stock in nice thrifty condition and we

TOO LATE TO CLASSIFY.

Two Good Percheron Colts For Sale

I AM now offering for sale two extra good two-year-old Percheron stallions, one sired by Blande 35257 and the other by Beringer 48918-3556. These colts are the makings of big horses with clean limbs and drafty make-up. One of them, a son of Blande, is a half brother to the former international champion Olbert, now owned by Mr. McMillan of Rock Rapids, Iowa. These colts will stand inspection and they will be priced right. Will F. Hooker, Northboro, Iowa.

Bluff Road Herd of Pure Bred Improved Chester White Swine.

I NOW have for sale some good fall pigs, and am booking orders for spring pigs to be shipped at three months old.

D. H. LEWIS, R. F. D. 6, GENESEO, ILLINOIS.

The Puckett & Grinnell Duroc Sale.

The last day of the noted Ohio Duroc Circuit was devoted to the sale of Messrs. Puckett & Grinnell, of Yellow Springs, Ohio. Those present were well pleased with the offering. Owing to the fact that these gentlemen did not decide until late to make a good brood sow sale, they had disposed of many of their early pigs and were compelled to include a number of pigs of late farrow which they had concluded to keep in their own herds. The top sow of the sale went to Whitehall Farm at \$178. Mr. S. E. Morton secured a very good yearling sow in Veribest's Model at \$150. Colonels Vinnege, Iglehart and Eisenhower conducted the selling in a highly satisfactory manner. List of sales follows:

# C. R. STEELE'S Great Two-Day Short-horn Sale

112

40 HEAD STRAIGHT SCOTCH CATTLE---90 COWS AND HEIFERS AND 25 BULLS

IRETON, IA., TUESDAY &amp; WEDNESDAY, MARCH 12-13, 1907

112

Never before has such an offering of Scotch and Scotch-topped cattle been offered in the Northwest. The Scotch families in the sale are Victoria, Duchess of Gloster, Orange Blossom, Mysie, Dorothy, Lavender, Nonpareil, Airy Buckingham, Miss Ramsden, Matchless, Louisa, Butterfly, Mary Ann of Lancaster, and other families. There will be three imported cows in the sale, two with calf at foot, by Ceremonious Archer, the other by Lord Banff 3d. There will be eight Scotch bulls in the sale. There will also be a lot of Scotch-topped cattle in the sale. In fact I am offering cattle for both the farmer and the breeder. They will be bred to Lord Banff 3d, Ceremonious Archer and Imp. Sittyton Fame. Write me at once for catalog. Address.

COLS. BELLOWS AND JONES, AUCTIONEERS.

Kindly Mention Iowa Homestead When Writing.

C. R. STEELE, IRETON, IOWA.

## The Logan Valley Duroc Jersey Sale Circuit.

One of the last Duroc Jersey sale circuits that will be held in the state of Nebraska this year will be the Logan Valley sale circuit, beginning with that of Mr. George Blessing, of Homer, Neb., on February 26th, and ending with that of Mr. W. A. Peterson, of Lyons, Neb., on March 2d. Those who have not already secured sows had better arrange for this week of sales, because there will be sows offered here that are as good as have been sold this year.

GEO. C. BLESSING.

On February 26th, at Homer, Neb., Mr. Blessing will offer forty head, and twenty of these will be sired by that noted boar, Reed's Banker, a full brother to the great Proud Advance. In some of the best herds in this country you will find Reed's Banker sows and you will find they have made great brood sows. The most of these are bred to the present herd boar, Mo. Gold Finch, a first-prize boar at both the Missouri State Fair and also at the American Royal. This boar comes from a line of prize-winning ancestry, both on sire and dam side. He is a hog of medium size, with heavy bone, stands on the best of feet, with a good back, a good under line, low and full in the hams and a good breeder. About twenty-five sows in the sale are bred to him. His dam, Mary Windsor, was a prize winner and her sire is Oom Paul 2d. We predict a splendid outcome for these Reed's Banker sows bred to this great prize-winning boar. Quite a few sows in the sale are sired by Mammoth John, a son of Long John. One of the very best of these is out of a sow called Princess by Gold Dust Jim, the old sweepstakes boar. No man will go wrong who buys this sow at any price. Lady Banker 1st and Lady Banker 2d are two others of the "peaches and cream" kind and they are both bred to Mo. Gold Finch. Mr. Blessing also sells a daughter of old Peerless and an extra good daughter of Carroll Boy. To top it off he sells a daughter of Proud Advance bred to Mo. Gold Finch, and here is a line of breeding that combines the blood of Oom Paul, Gold Finch, Advance and old Orion. She has a right to bring a good price, and if the breeders present to do the right thing she certainly will. A number of the sows in the sale will be bred to Duroc Banker, a son of Reed's Banker. Write for Mr. Blessing's catalog and go to the sale.

JOHN H. TRYON &amp; SONS.

The second day of this circuit—February 27th—Messrs. John H. Tryon & Sons will sell thirty head, and such an offering! It has not been duplicated in Nebraska this year. Twenty of these sows are bred to Junior Jim, the \$5,000 boar, and the hog that Ruberta was bred to when she sold for \$1,500. Five of the sows to be sold are daughters of old Orion. One of these, Manley's Profit, is one of the greatest sows ever sired by that old king of kings. This sow is good all over, and such a pair of hams! She is bred to Junior Jim and she will be one of the great bargains of the year. They will also sell three daughters of the immortal Proud Advance, all bred to Jim, and they are all good. They will also sell some good daughters of Carroll Boy and old Dandelion, others by Trone's Oom Paul, Young John, Profit Advance and a few by John L., a son of Long John. Breeders will find the Tryon offering one of the greatest of the year. There are sows in this sale that are fit to go anywhere. The sows that go into this sale are bred to Junior Jim, West's Compromise, Robt. Orion and Oom Paul Jr. Write for catalog and if you cannot get there send your bid to Mr. M. T. White, in care of the above firm.

W. H. STONE, FEBRUARY 28TH.

The third day's sale will be that of Mr. W. J. Stone, at Lyons, Neb. Mr. Stone has been a good buyer from the Manley and other herds and has laid a good foundation, and he is now offering a good bunch of sows for sale. There will be ten aged sows in his offering and thirty gilts. One of his best matured sows is Adelaide 2d by Onlmade by Red Chief, dam Adelaide by Royal Red by old Jumbo Red. She is a splendid individual, is quite large and very smooth and is bred to a son of Top Pride. A sow that will appeal to breeders on that day is Proud Addy by Proud Advance. This sow is the one that topped the Edmonds, Shade & Co.

sale last year and her dam is the great sweepstakes winner, Royal Blossom 5th, that sold for \$600 recently in the Shade sale. She is bred to Orion's Redeemer and should be the top sow in the sale. He also sells two of her gilts in the sale. The gilts will be sired by Barton 40397, a son of Belle's Chief and Davy 40599, a son of Agitator by Proud Advance. They will be bred to Royal Prince, a son of Top Pride and out of Proud Addie, and also to a son of Orion. Mr. Stone puts up a nice, useful offering and there will be some bargains in his sale. Write for his catalog at once and be sure you are with him on sale day.

E. F. LA RUE, MARCH 1ST.

Few offering this year have been able to show a better lot of sows than Mr. E. F. La Rue will show the boys in his sale at the town of Lyons, Neb., on March 1st. He is selling a number of matured and yearling sows in this sale that are hard to beat, and the breeder who does not attend his sale is going to miss one of the good offerings of the season. The most of these matured sows are sired by Col. Roberts, a son of the great Owen and Glendale Chief. Another good sow is a daughter of the old sweepstakes winner, Gold Dust Jim, and she is bred to Radiator, the boar that Messrs. Manley & Co. formerly had in their herd and the boar that was used at the head of the state farm at Lincoln. The gilts are mostly sired by Monarch L. by Red Chief W. C., and also by Alix. They are bred to Radiator and to Prince Regent. There will be a couple of extra good gilts in the sale by Alix and out of the Gold Dust Jim sow. There will be four granddaughters of Jumbo Red to go in, and the whole offering is first class in every particular. Mr. La Rue is a good care taker and he will surprise the boys with what he will sell on this occasion. Be sure to attend his sale if you can.

W. A. PETERSON, MARCH 2D.

The last day of this circuit will see the boys at the home of Mr. W. A. Peterson, of Lyons, Neb. Mr. Peterson sells on the last day, but the boys should stay with him, because he is selling a splendid lot of sows and he is one of the most popular young breeders in the state. He is only selling thirty-five head. Ten of these are yearlings and aged sows. These will be sired by the well-known boar, Dandelion, Long Arion and Acme. The gilts are sired by Dandelion and Dandy Orion. They will be bred to Jumbo John 53403 and a son of Top Pride, dam Proud Addy out of the great sweepstakes sow, Royal Blossom 5th. Two of his yearling daughters out of the granddaughter of Jumbo Red are the attractions of the sale. They are both good sows of the Dandelion type, being heavy quartered, thick, close to the ground and are bred to Jumbo John, a son of Young John, whose dam is by Jumbo Red. Either of these is very good. Another daughter of Dandelion whose dam is by Long Orion is a good smooth sow, not overly large, but a very neat one. She is also bred to Jumbo John for an early litter. Two spring gilts sired by Dandelion, dam by Acme, are red ones with nice length and good finish and are the making of desirable matrons. They also are bred to Jumbo John. Place one of these in your herd and you will own some of the same blood that produced Proud Lady, the \$1,275 gilt. There is also another Dandelion gilt in the sale whose dam carries the blood of Surprise. This is the best gilt in the sale. Has good color, nice size, good width, broad head and the making of something above the ordinary. She is bred to Logan Pride, a son of Proud Addie and Top Pride. Every breeder on the circuit should stay for the Peterson sale. He will appreciate the favor and will not forget to return the compliment.

## The Last Call for Wheeler's Mastodon Poland China Sale.

Those looking for big Poland Chinas should not miss Mr. W. W. Wheeler's brood sow sale at Harlan, Iowa, next Wednesday, February 27th. Mr. Wheeler's chief stock boar is not only a large hog, but he is a big, smooth, mellow fellow. The gilts are on the same order, big, smooth and mellow, with strong arch backs, and they have the size and length that insures their making prolific brood sows of the profitable sort. Mr. Wheeler has turned down flattering offers for sows at private sale in order that he might make this a sale of tops. Our read-

EVERYTHING GOES . . . CLOSING OUT SALE

## Angus and Polands

To be held at Farm near Paton, Iowa, March 7, 1907.

Seventy head Angus males and females representing leading families. Many valuable producing cows, some with calves at foot by King Ito by Prince Ito. THE remainder aged sows, sired by Perfection Star, Nemo Boy, Long Price, Ohio Perfection 2d and Lookout Tecumseh. They are bred to Keep On Perfection 2d 115921 and Good Shine 117265. Write for catalog which is now ready.

**J. C. BAILEY, Proprietor, - MARSHALLTOWN, IA.**  
Cols. Menzie, White and Esslinger, Auctioneers.

## JAS. E. WALKER'S

## ..Annual Bred Sow Sale..

AT ATLANTIC, IOWA, TUESDAY, FEBRUARY 26, 1907.

THIRTY HEAD of yearling fall and spring gilts, some of which were in my prize winning herd last fall. Two three-year-old daughters of Vale's Perfection. Nine yearling daughters of Perfect Chief 2d, a Francis-bred boar. 6 fall gilts, daughters of Perfect Chief 2d, a Francis-bred boar. 12 spring gilts, daughters of Corrected, by Corrector 2d. 1 fall gilt, Silver Lining, bred by John Francis & Sons. She was a member of their under a year show herd at Des Moines, Iowa, 1906. These sows will be bred to Timekeeper, a son of Keep On, bred by E. L. Jolson and to Corrected. Sale under cover and a square deal. Send for catalog.

JAMES E. WALKER,

ANITA, IOWA

Cols. Geo. P. Bellows, Todhunter and Goodspeed, Auctioneers.

ers looking for the good ones with extra size and bone should appreciate this fact by patronizing the sale. Mr. Wheeler is breeding the big kind because he has found this is the kind most in demand and the most profitable kind for both the breeder and farmer to raise. The farmer sells his hogs by the pound and he wants the kind that makes the most pounds in the shortest time. Mr. Wheeler is selling the big kind backed up by breeding that produces that kind. Write for his catalog, read his unique announcement, foot notes, etc., and arrange to be at the sale. Write for his catalog and mention The Homestead.

## The Wm. W. McClelland Duroc Sale.

Mr. Wm. W. McClelland, of Clarinda, Iowa, will hold a Duroc bred sow sale on February 26th. The offering includes Lady Crimson 51814, a 600-pound sow which at this weight moves around like a gilt. She is bred to Pratt's Improver, a son of Improver 77. This sow is enough in herself to attract many a buyer to Mr. McClelland's sale. There will be three litter sisters to Pratt's Improver offered and these are bred

to Iowa Standard, a pig that has been selected by competent judges as an extra good one. Four of the gilts are sired by Proud Perfection by Proud Advance and three by Iowa Banker Again. There will be a pair of fall yearlings by Paddy Orion out of Crimson 2d, one of the best sows ever owned by Mr. McClelland. One of these yearlings is bred to Iowa Standard and the other to Gold King. There will also be a Glendale Critic sow in the offering. The offering throughout includes forty head, there being six tried sows, three fall yearlings and the balance spring gilts. There will be offered an extra good young male farrowed last August. Of the many good things in this sale we desire again to refer to Lady Crimson. Mr. McClelland says it is like pulling teeth to part with her, and he is particularly anxious that she be taken to a good herd so that her kind will be preserved for the benefit of the breed through years to come. The sale date is just at hand, February 26th. Catalogs are ready and will be sent upon application, but in case there is not time to send, no man who is looking for something good will make a mistake if he plans to attend this sale. See advertisement on page 32.

## ONE HUNDRED AND TWENTY HIGH CLASS

## Aberdeen Angus, Herefords, Short-horns

..... AT AUCTION AT SALE PAVILION, STOCK YARDS, SIOUX CITY, IOWA, MARCH 6, 7 AND 8, 1907 .....

Comprising the Greatest Auction of Breeding Cattle of the Beef Breeds to be held in the Northwest this Season.

Forty Aberdeen Angus are cataloged for Wednesday, March 6th, from the well-known herds of Anderson & Findlay, Lake Forest, Ill.; J. V. Arney, Leon, Iowa, and L. H. Lamar, Storm Lake, Iowa. The sixteen cows and heifers consigned by Anderson & Findlay are sired by the imported bulls, Elberfeld, Conqueror of Aberlour, Monitor of Glamis and Pacific, and are from dams of the Erica, Coquette, Lady Ida, Westertown Rose and Garline Beauty families. Other consignments include representatives of the Blackbird, Queen Mother, Pride and other noted strains. It is a choice offering, grandly bred and a full attendance of the friends of the breed is asked.

Forty Herefords will be auctioned on Thursday, March 7th. They are consigned by G. W. Harness, Galveston, Ind.; H. J. Stinger, Allen, Neb.; W. A. Bichel, Glenwood, Iowa; C. W. Morse, Sioux City, Iowa; Jesse Engle, Sheridan, Mo., and J. N. Neal, Jr., Lamberton, Minn. The fifteen entries consigned by Mr. Harness are strong in the blood of the famous champion and sire of champions, Dale, the grandsire of the only two bulls to sell for as much as \$1,000 at public auction within the last few months. All of the strains that have contributed to the greatness of the breed are represented and the best of individual merit is maintained throughout.

Forty superb Scotch and Scotch-topped Short-horns will be sold on Friday, March 8th. They are consigned by A. O. Stanley, Sheridan, Mo.; J. L. Smith & Son, Minier, Ill.; Louis Clouse, Galva, Iowa; G. P. Simpson, Blockton, Iowa, and J. N. Neal, Jr., Lamberton, Minn. The twelve bulls include the Scotch herd headers, Valley Godoy 275195, a Cruickshank Victoria; Scottish Banker 275194, a Marsh Violet; Lancaster Lad 262183, a Cruickshank youngster of great merit, and other good ones suitable for breeders or farmers' use. The females include the show heifer, Miss Signet 2d, a daughter of the Harding-bred Scotch Hero; and her dam and grandam and also a daughter of the latter cow. The quartet comprises the greatest family of show cattle that I have ever offered at auction and there are many other show and breeding females cataloged that will well repay the attendance of Short-horn breeders and farmers.

SEPARATE CATALOGS OF EACH BREED WILL BE MAILED ON APPLICATION TO

W. C. McGAVER, SALE MGR., SPRINGFIELD, ILL.

Col. Geo. P. Bellows and Assistants, Auctioneers.

### Last Call for the Central Iowa Duroc Jersey Sale Circuit.

The last of the important Duroc Jersey sale circuits to be held in Iowa is the Central Iowa Circuit, which begins with Messrs. W. A. Staples & Sons, at Glidden, Iowa, on February 25th and ends with Mr. J. W. Pittman, at Lohrville, Iowa, on February 27th. Every one of these sales will have some of the best to offer, and there will be daughters of Orion, Junior Jim, Ohio Chief, Glendale Critic, Proud Advance Again, and other great sires. It will be one of the last opportunities of the season to attend one of the most important circuit sales, and there will be some splendid sows in these three sales.

W. A. STAPLES, FEBRUARY 25TH.

The opening sale of the Central Iowa Circuit will be that of Messrs. W. A. Staples & Sons, at Glidden, Iowa, on February 25th, when they will sell fifty head, the tops of their herd. Their offering is a good one and deserves to be well patronized by both breeders and farmers. Among the many good things that they will sell is their noted brood sow, Willmette, a daughter of old Indicator and of Nancy 4th. Here is one of the best sows they have ever owned, and they are putting her in the sale simply as an attraction. As a brood sow she farrowed twenty-eight pigs last year. She has great length of body, with good depth and deep ham, and is one of the best brood sows that will be sold in Iowa this year. Proud Nancy, a March 14th gilt out of Willmette also goes into the sale. She is sired by O Pig, a son of Orion, and she is bred to Proud Advance Again. There will also be two litter sisters to Proud Nancy in the sale. Messrs. Staples also sell a daughter of their noted show and brood sow, Nancy VII. In this offering, she is sired by Orion and is bred to Proud Advan. Again, a comingling of blood that should produce something good. They sold two litter brothers to her last fall for \$232.50 and \$140. About ten sows in the sale are bred to Clear the Way, a litter brother to this sow. They also sell a good sow in Beatrice, a yearling daughter of Orion out of the great Kruger's Maid, and she is bred to Proud Advance Again. There will be two Orion gilts in the sale and a granddaughter of Kan't Be Beat in the sale. They also sell two Junior Jim gilts and one by the great Ohio Chief, two by Critic's Echo, a prize winner himself, and a son of a noted prize winner, Glendale Critic. Their offering is a good one and it is to be hoped that the breeders will all turn out and give this firm a lift. No breeder in Iowa has been a better pusher than Mr. Staples, and we hope the boys will not forget him on sale day.

W. D. PITTMAN, FEBRUARY 26TH.

At Lake City, Iowa, on February 25th, Mr. W. D. Pittman will sell thirty-five head, and a perusal of his catalog will show that no breeder has put up a better lot of sows. He will sell nine granddaughters of the great Nebraska Belle in this sale, three very choice gilts by Ohio Chief, and a great many granddaughters of old Orion. There will also be some choice gilts in the sale by Orion, Goldie's O., Top Notcher, King James and Orion II. They will be bred to Pittman's Ohio Chief, a son of the great boar, Ohio Chief, and Clear the Way, one of the best sons of old Orion out of the great brood sow, Willmette. He also puts a daughter of the great Tientsin in the sale. She is a half sister to the great sow, Ruberta, that recently sold for \$1,500 in the Garrett sale. He is offering several granddaughters of Proud Advance in the sale and a few daughters of Zoo V. Orion. We want to say this to Homestead readers, that we have known Mr. Pittman for a number of years past and have never seen him buy a poor sow nor a poor boar. He was always after the tops and it was the tops he purchased. He now comes forward with the tops from his herd, and not only offers a line of blood that any breeder can use, but is offering a class of sows that are right up to the mark in individual merit. He deserves a good sale because he is offering a good, well-bred, and high-class lot

of sows. He will also offer twenty high-grade Shire horses and mares and a couple of good driving teams on day of sale. The mares will all be bred to one of his splendid Shire stallions, one of which is an imported horse, and a leading prize winner in the old country. Write him for a catalog and be sure that you go to his sale.

J. W. PITTMAN, FEBRUARY 27TH.

The last sale of this circuit will be that of Mr. J. W. Pittman, at Lake City, Iowa, on February 27th. Breeders should secure one of his catalogs at once and see what he is selling. He is offering three splendid daughters of old Orion, three by Proud Advance, two by Crimson Wonder I Am, one by American Royal, one by Tientsin, the sire of the great \$1,500 sow, Ruberta, several by Young John, Peerless Orion, West Side and Young Advance. No. 1 is a daughter of Orion out of Nebraska Queen by Red Chief. This sow is a splendid mother and a good sow all round. She has a nice, arched back, a good bone and stands on good feet, and is bred to Young Advance. Another good Orion sow is out of a Dandelion sow and she is also bred to Young Advance. Two good Crimson Wonder I Am sows go in, bred to Orion Jr. These two sows topped the Frank Clouse sale as gilts, and have since developed into good sows. Their dam, Crimson Lady is by Duke of Ohio by Kan't Be Beat. Another one of his best sows to be sold in this sale is Violet F. II. by American Royal. Here is where you get show blood. Her sire, American Royal, was the undefeated sweepstakes boar, and her dam, Violet F., is out of a litter sister to the dam of Royal Blossom V., the sweepstakes Iowa and Minnesota State Fair sow. Here is a good proposition for any breeder. Tolstoy Beauty is a daughter of the great Tientsin out of Hazel VI. by Fairview Chief, and she is bred to Orion Jr. Mr. Pittman also sells the sweepstakes sow at the Manson Fair and she is bred to Young Advance. Anna Tolstoy is a half sister to the great Crimson Wonder, and she is bred to Orion Jr. There are two good Young John sows in the sale out of Zoo V. Orion, and they are both bred to Young Advance. He also puts three good Proud Advance gilts in the sale, and these are all out of a Matchless Chief dam. Two of these are bred to Orion Jr. and one to W. D.'s Ohio Chief by Ohio Chief. He sells a richly-bred offering and one that will appeal to our very best breeders. He will also sell four Aberdeen Angus bulls in the sale. One of these is a Queen Mother. The dam of this young bull is Queen of Blackwood by Heather Jim by the Immortal Jim Jams. He will make a splendid herd bull when matured. The other three are Easter Tulloch Duchess bulls. Their sire is Pallas 66948, an Erica-topped Pride bull, and everyone of these will develop into good bulls. Send for his catalog and if you want sows or bulls, be sure to arrange to be with him on sale day.

CUSTER'S BROOD SOW SALE.

On February 28th, Mr. George W. Custer will make his annual Duroc Jersey brood sow sale at Merville, Iowa. He is selling forty head of yearling and matured sows and spring gilts, and they are of the big-boned, long-bodied kind of sows, with good backs and feet. A great many of these are sired by Jumbo Giant, a son of the great Jumbo Red. There will also be daughters of Royal Triumph, Phil Clark 2d, Iowa Model and King James. A representative of The Homestead has looked over the Custer offering and desires to say to our readers that it will be a good place to buy sows. Mr. Custer has paid considerable attention to size of bone, good feet and backs, and he is putting that kind of sows in this sale. Write him at once for catalog and then go to his sale.

CHEAP RATES TO THE PACIFIC COAST.

Commencing March 1st and continuing until April 30th the Iowa Central Railway will have on sale reduced one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los

## THIRTIETH

## Semi-Annual Sale

## 45 - Head of Durocs - 45

AT AUCTION

Monday, Feb. 25th, at Pawnee, Ill.

the property of Ed. A. Baxter.

Owing to the fact that I am closing out my entire herd of Duroc Jerseys, I will offer for sale at public auction about forty-five head of spring and fall pigs. Some of the spring gilts are daughters of Buddy K. IV., but were bred too late for my former sale. An unexcelled opportunity to get breeding stock at your own figures. I extend an invitation to all to be my guests on February 25th.

ED A. BAXTER, : : Pawnee, Ill.

Send bids to Mr. D. M. Pierce, Homestead representative.

Angeles and San Francisco are run via Kansas City and the popular Santa Fe System.

Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

# IF YOU WANT THE BEST BRED SOWS OF THE BREED, THEN WAIT FOR THE ... LOGAN VALLEY DUROC JERSEY SALE CIRCUIT ...

Daughters of the world's most famous sires in the sale, such as Proud Advance, Orion, Dandelion, Reed's Banker, Glendale Chief, Col. Roberts, Long John, Trone's Oom Paul, Belle's Chief and others.

## Feb. 26th--Homer, Neb.--From The Herd of George C. Blessing 40 HEAD--MOSTLY FALL AND SPRING YEARLINGS AND AGED SOWS

Twenty head of these are daughters of the noted boar, REED'S BANKER, a full brother to Proud Advance. Others are sired by Mammoth John, a son of old Long John, and other good boars. The most of these are bred to the famous sire and show boar, MISSOURI GOLD FINCH, first-prize boar at the Missouri State Fair and at the American Royal. Catalog now ready. Write for it. Address, GEORGE C. BLESSING, HOMER, NEB. Col. J. L. Luther, Auct.

## February 27, Homer, Nebraska. As great a lot of sows as was sold in Nebraska from the herd of John H. Tryon & Son. 50 Head, 4 daughters of the noted boar Orion, 3 daughters of Proud Advance, Trone's Oom Paul, Carroll Boy and the great Junior Jim.

These sows will be bred to the \$5,000 boar, JUNIOR JIM 30437, West's Compromise 44429 and Oom Paul Jr. The best breeders and field men say we are selling as good a bunch of sows as was ever sold in the state. Write for our catalog. Address, JOHN H. TRYON & SONS, LYONS, NEB. Col. J. L. Luther, Auct.

## FEB. 28, LYONS, NEB.--THE TOPS OF THE W. J. STONE HERD--40 HEAD, 10 AGED SOWS, REST SPRING GILTS.

I am selling Proud Ady, by Proud Advance, out of the Iowa State Fair sweepstakes sow, Royal Blossom 5th, that recently sold for \$600. This sow topped the Shade sale last year. Also selling some good daughters of Onimode, by Red Chief, Barton 40597, by Belle's Chief and Davy 40599. I am selling my very best gilts in this sale. Write at once for catalog. Address, W. J. STONE, LYONS, NEBRASKA. COL. J. L. LUTHER, AUCTIONEER.

## March 1st--Lyons, Neb.--The Tops of the Herds of E. F. La Rue 40 Head--8 Matured Sows, the rest gilts

The matured sows are sired by Col. Roberts, a son of the great boar, Owen, and Glendale Chief. The gilts are sired by Monarch L. and Alix. I am selling four good granddaughters of Jumbo Red. They are bred to Radiator, the boar that Professor Burnett used at the Nebraska Agricultural College; Prince Regent and R. Gold Dust by Gold Dust Jim. You will find my offering an extra good one in every way. Write for catalog. Address, E. F. LA RUE, LYONS, NEB. Col. J. L. Luther, Auct.

## March 2d, Lyons, Nebraska--A Great Offering from the Herd of W. A. Peterson

35 of the Tops--10 yearlings and aged sows, the rest spring gilts. Sired by old Dandelion, Long Orion, Acme and Dandy Orion, and bred to Jumbo John 53403 and a son of Top Pride. I have culled all my gilts and nothing but the very best will be offered. The blood of Orion, Proud Advance and Long John makes up my herd. Write me for catalog. Address, W. A. PETERSON, LYONS, NEB. Col. J. L. Luther, Auct.

Send for Catalogs to any of the above Breeders and mention Iowa Homestead.

## Last Call for Carey Cameron's Short-horn and Duroc Jersey Sale.

One of the most select bunches of Short-horn cattle and Duroc Jersey hogs that will be offered at public sale in the West this season will be that of Mr. Carey Cameron at Herman, Neb., on Monday, February 25th. It is very seldom that such a good offering of two breeds is made in one sale as he will sell on this occasion. The cattle will be represented by Scotch and Scotch-topped sorts, and he is certainly offering some good ones. He is selling a particularly nice lot of Scotch and Scotch-topped heifers and young bulls. These have been well cared for, in fact have been grown out right. Many of these are sired by his great Scotch bull, Imp. Victoria's Count 195220, considered one of the best-bred bulls in the state of Nebraska. This bull was bred by Mr. J. Dean Willis and was imported by Mr. W. D. Platt, and is sired by the noted Duthie-bred bull, Collinzie Favorite. His dam is Imp. Victoria Adelaide by Count Lavender. He is a line-bred Victoria and on sire's side runs down through Gondoller, Roan Ganntlett, Barnpton Prince, Lord Privy Seal and Champion of England. A heifer by him or bred to him, or a young bull by him will be a most excellent proposition to put into any herd. All the young bulls in the sale are sired by him. One of these, No. 4 of catalog, is a straight Scotch bull out of Rose-dale Butterfly 3d by Red Bud. He is a Cruickshank Butterfly and the making of a splendid herd bull. Another good bull is Red Lochinvar 270941 out of Daisy Lochinvar by the Harris-bred bull, Lochinvar. He was a year old in December, a solid red in color and will make an excellent bull when matured. There are several other good bulls in the bunch. Mr. Cameron is offering some richly-bred heifers and some particularly good ones in this sale. Roan Lady is a Canadian-bred heifer, got by the great bull, Royal Fancy, out of a daughter of old Scotsman. Here is one of the great young heifers in the sale. She is a nice roan in color, a good individual and is bred to the pure Scotch bull, Butterfly Duke 2d. Another good heifer is Red Fanny by Scottish Count out of Fanny Weldon by Knight of Weldon. The dam of this young heifer is the best cow in the Cameron herd. He also sells two richly-bred Butterfly heifers and both of these are bred to Imp. Victoria's Count. Mr. Cameron will offer thirty-six head of Duroc Jersey gilts, and after seeing most of the other sale offerings we will say to our Duroc Jersey friends that a better lot of sows have not been sold in Nebraska than he is offering in this sale. They are rich in the blood of Gold Dust Jim, Crimson Wonder, Malcolm's Model and old Top Notcher. They have the size, length of body and ample bone, in fact the kind that breeders are all after. We went into details in our last week's issue regarding this offering and we only now want to repeat what we then said, that no breeder in the West has put a better lot of sows through a sale ring than Mr. Carey Cameron will offer on this occasion. Herman, Neb., is only thirty miles north of Omaha and can be easily reached. A train leaves Omaha at 6:30 Monday morning, or Iowa breeders can get there by way of Missouri Valley early Monday morning. Mr. Cameron invites all Short-horn men and Duroc Jersey breeders to be with him on that occasion.

## A Notable Jack and Mule Sale At Savannah, Mo., March 7, 1907.

The third annual jack and mule sale of Quiet Glen Farm will be held under cover at the time and place above mentioned. The offering will consist of twenty-five jacks, twenty-two three-year-old mules and one draft and one harness stallion. There will be no postponement whatever and there is every indication to lead one to predict that the sale is going to be a cracking good one. The catalog is most elegant in its get up and contains fifteen page illustrations of the jacks, taken from actual photographs. This feature makes plain reading and very interesting as well. There are other illustrations of farm surroundings which make the catalog one of the neatest we have seen. The farm is situated six miles east of Rea, and

those who are unable to attend the sale should make their selections previously and their bids will be honorably handled. Everything is as good as described. Take a day off and attend the sale. Write for the illustrated catalog to Mr. G. M. Scott, Route 2, Rea, Mo. Kindly mention this paper when you write. Remember, the sale is in Savannah and opens at 10 o'clock a. m.

## The J. C. Bailly Poland Sale.

Mr. J. C. Bailly, of Marshalltown, Iowa, will hold his first annual Poland China sale on the fair grounds at Marshalltown, Iowa, on Tuesday, February 26th. At that time Mr. Bailly will offer something a little extra in the way of yearling sows and gilts. The special feature of the offering is that the sows are a little extra in size, though they combine with this all the quality that can be imparted by the very richest blood found in the breed. Some of his Ohio Perfection 2d gilts measure from six and a half to seven and a quarter inches of bone. Two gilts by this great sire out of Miss Knucky are bred to Good Shine and two to Keep On Perfection 2d. There are two gilts in the offering out of Susa Courtney 167894 by Perfection Star. The dam of these two gilts is two years old and has been a wonderfully profitable sow. No man can make a mistake if he sends a mail bid on either of these two great gilts. One, No. 20 in the catalog, is bred to Keep On Perfection 2d and the other, No. 21, bred to Good Shine. Most of our readers are aware of the fact that Keep On Perfection 2d was sired by Keep On Perfection and he by Keep On. There is no richer blood than this found among the Polands, and when hogs of this breed are handled right, as they are when they fall into the hands of Mr. Bailly, the outcome is sure to be satisfactory. In the offering is an extra good five-year-old sow sired by Perfection U Know 65351 out of Beauty 18860. She raised nine pigs last fall and is bred again January 12th to Good Shine. We possibly have said enough to indicate the character of Mr. Bailly's offering, and we urge our readers to send at once for catalog. The sale will be held under cover at the state fair grounds at Marshalltown, Iowa, February 26th. Please write at once for catalog, addressing Mr. J. C. Bailly, Marshalltown, Iowa, and kindly mention The Homestead when you write.

## Last Call for Sellers & Son's Duroc Sale.

A sale of Duroc bred sows that should attract farmers and breeders from all parts of the state is that of Messrs. M. A. Sellers & Son, of Huntley, Neb., on February 26th. In looking over the pedigrees of the animals in the catalog and more especially of the herd boars, we find that the breeding is second to none, and after a careful inspection of the herd we find some extra good individuals and some that would be worthy of a place in most any good herd. The offering consists of thirty-five head, ten of them being tried sows, five extra good fall yearlings and twenty spring gilts. They are in the pink of condition, not fatted, but just right to do the purchaser good. They represent the best blood known to the breed, there being daughters of such noted prize-winning boars as Cole's Duroc, Improver II, and many other noted boars of show-yard fame. One of the best things of the sale is No. 2 in the catalog, a daughter of Boon by Cole's Duroc. She is a good individual and has proven a good brood sow. She was bred to Tip Top Dandy on December 23d, which should be a good cross. In No. 1 in catalog we have a daughter of Mendenhall Choice, dam Peggie by Liberty Jim. She has good length, good bone, good color, and has proven herself an extra good brood sow. She will farrow a nice litter on March 8th from Sellers' Duroc. The gilts are an extra good, strong bunch of sows of good breeding and bred for the best results, some of them being bred to Ohava Chief, a son of the great Ohio Chief. This sale is the second of the circuit and parties attending the Sanstead sale at Holdrege will be conveyed to this sale free of charge. Parties who cannot attend can send bid to Mr. Ray Page, of this paper, and they will be properly handled. Send for catalog and arrange to attend this sale.

### COLS. BELLOWS, ZAUN, KLAAS, AUCTIONEERS.

#### Last Call for Wassen's Bred Sow Sale.

On Friday, March 1st, Mr. C. C. Wassen, of Wilcox, Neb., will offer a draft of Duroc Jersey bred sows from his herd that should be bought by breeders and farmers of the state of Nebraska. This sale will be next to the last one on the southwestern Nebraska Duroc Jersey sale circuit, and he has a good offering to show his patrons on this day. The sale consists of thirty head, three of which are tried sows, nine spring gilts and twenty-three big, strong fall yearlings. They are in nice breeding condition, are of an extra good brood sow type and are bred to as good males as Mr. Wassen has been able to find. Most of the best things in the sale are bred to Jumbo Wonder 40949, a son of Jumbo's Perfection and out of a daughter of Desoto, the first-prize hog at the Kansas City Royal show in 1903. This hog comes from noted prize-winning blood, his sire being first-prize hog at the Nebraska State Fair two years in succession. He is a good individual, a very strong-backed fellow, with good ham and side lines, good head and ear, good bone and good feet. Several of the best fall yearlings are bred to Cole's Duroc II, he by Cole's Duroc, dam Pauline by Paul Finch by Oom Paul. Catalogs of this sale are now ready and can be had by dropping a card to Mr. C. C. Wassen, of Wilcox, Neb. Those who cannot attend can send bids to Mr. Ray Page, of this paper, and they will be properly handled. Write for a catalog of the sale and mention this paper.

#### Last Call for the Sanstead Bred Sow Sale

With this issue we wish to call the attention of our readers for the last time to the sale of Duroc Jersey bred sows to be held in Holdrege, Neb., on February 25th. The offering is not large, only thirty head being sold, but they are the tops of about seventy-five head now on the Sanstead farm. Eight tried sows and twenty-two spring gilts comprise the offering and among them are some very choice individuals. Among the offering of tried sows is the great brood sow, Pauline 72966. She is a daughter of Paul Finch 14733, he by the great prize-winning boar, Oom Paul 7545. Her dam was Perfect West 50590, she by Duroc Challenger 11163, sire of many noted prize winners. This great sow has proven herself a wonderful breeder, being the dam of several noted herd headers. Another good sow to be included in this sale is Ines 446690, a daughter

of the great Improver II. 13365. Her dam was Alice 98990 by Percy 18641. This sow was bred by Messrs. Bowman & Fitch, of Lawrence, Neb. She is a good individual and has proven a profitable brood sow for Mr. Sanstead. In Rosa Belle 98658 we have a sow of good scale, has good back and ham, good bone and feet and is of typical brood sow type. She is by Holdrege Boy 16689, he by the great sweepstakes boar, Van's Perfection 11571. Her dam was Fancy G. 40344 by Kozy Boy 9317 (A.). The gilts included in this sale are a very choice lot, being the tops of about seventy-five head raised this year. They are mostly daughters of Munger's Ideal and those not by him are bred and safe in pig to him. Most of the Munger's Ideal gilts are bred to Red Prince I Am, he by Red Chief I Am, dam Garnett by Morton Prince. Others are bred to Jumbo Ideal 57989, a son of Jumbo Wonder by Jumbo's Perfection. His dam was Pansie by Mendenhall's Choice. These two young boars are very promising youngsters and much is expected from their get. This sale will be held in sale pavilion right in Holdrege and parties from a distance will be cared for at leading hotels free of charge while attending this sale. Col. T. C. Callahan will do the selling and parties that cannot attend can send a bid to Mr. Ray Page, of this paper, and it will be properly handled. Parties can attend this whole circuit at one expense. Send for catalog and arrange to attend.

#### Last Call for the A. A. & W. G. Karschner Bred Sow Sale.

We wish to call for the last time the attention of the many readers of this paper to the bred sow sale to be held at Wilcox, Neb., on March 2d, by Messrs. A. A. & W. G. Karschner. The offering consists of forty head, eleven of which are aged and yearling sows. The balance are big, strong, growthy spring gilts. They have been raised on alfalfa pastures with plenty of range which gives them the exercise so necessary in developing the brood sow and the litter she is carrying. They are in prime breeding condition, fed on protein foods and are a lot of hogs that we are sure will please buyers and give the best results under anything like good care. This great bunch of gilts are daughters of Nebraska Wonder, a son of the great show and breeding boar, Crimson Wonder. They are very growthy, extra good boned gilts and bred to such boars

as Lord Gold Finch, the great show boar recently purchased by these gentlemen from Messrs. McFarland Bros., of Sedalia, Mo. Others are bred to Chief Bell Top, a son of Morrison's Bell Top, and a pig that is well worthy of a place in most any good herd. Among the best aged sows is Cherry B., a daughter of Colonel Smith by Mendenhall's Choice. Her dam was Jennie L. by Sir George. This is a sow of great scale, has proven a wonderful brood sow and will be sold safe in pig to Lord Gold Finch. The fall sows included are all by Colonel Smith and bred to these great boars, Lord Gold Finch or Nebraska Wonder, they should produce something worthy the best breeders' attention. Write for a catalog of this sale, look over the breeding and make arrangements to attend. If you cannot be present, a bid sent to Mr. Ray Page, of this paper, in care of the above breeders, will be properly handled. When writing please mention this paper.

#### Last Call for Geo. Karschner's Duroc Sale.

With this issue we call attention for the last time to the sale of Duroc Jersey bred sows to be held at Wilcox, Neb., February 28th, by Mr. Geo. Karschner. The offering is not large, only thirty head included, but they are a very choice lot, being the tops of about 100 head raised this year. Four of this number are tried sows and are put in this sale for no other reason than to make the sale a very attractive one. The gilts are very growthy, of good breeding and as individuals as a whole are hard to duplicate. They have been raised largely on alfalfa and are in the pink of breeding condition. Just right to do the purchaser a lot of good. They are bred to such boars as Journal II, first-prize pig under six months at the Kansas State Fair in 1905, and was only four months and two days old when he was shown. He is a son of Duroc Jim by Liberty Perfection. He is a fine individual in every respect, having a fine, wide arched back, with extra good side lines, very even from end to end, good ham coming down well to the hock joint, a good bone and extra good feet. He is assisted in service by Kan't Beat Top Notcher II, a grandson of old Kan't Be Beat, and his dam a daughter of old Tip Top Notcher. This pig is a richly-bred fellow, is a good individual and the produce from the gilts bred to him should be extra good. Catalogs are now ready and should be in the hands of every Duroc Jer-

sey breeder. Parties from a distance will find free entertainment while attending this sale, and those who cannot attend can send a bid to Mr. Ray Page, of this paper, and it will receive proper attention. Write for a catalog at once and arrange to attend this sale. When writing please mention this paper.

#### Last Call for the Tillman Sale.

With this issue we wish to call attention to the sale of Duroc bred sows to be held on February 27th at Ragan, Neb., by Messrs. S. J. Tillman & Son. We wish to say to the breeder who is in love with the large type of the Duroc Jersey that this will be one of the grandest opportunities to secure that kind of any of the sales to be held this spring. They are in prime breeding condition, being fed on protein feed and developed properly to produce the best results. One of the good propositions in the gilt line to be sold this spring you will find in No. 16 in the catalog. She is a daughter of Cole's Duroc II, he by Cole's Duroc, the first-prize boar at Nebraska State Fair in 1904. Her dam was Dark Daisy by Jumbo's Perfection, a first-prize winner at Nebraska State Fair two years in succession. This gilt is an extra good individual, has good size, a wonderful back, good even side lines, good bone and extra good feet. She is one of the best things to be offered this year and will be sold safe in pig to Crimson Dandy for an early March litter. Another of the good gilts that would be a credit to any herd is No. 25, a daughter of the great Jumbo's Perfection, dam Rose Loudon, the \$300 sow sold in the H. B. Loudon & Son sale, 1906. This sow is one of those large, mellow kind, with great length, a smooth, even makeup from end to end and the type that always makes a good brood sow. Send a good bid on her, as she is a hummer. In No. 1 in the catalog we think we have a sow worthy of a place in some good herd. Molly Sanstead is by Koriki by Young Grant, dam Susie Ann by Holdrege Boy by Van's Perfection. This sow has proven one of the most profitable ones on the Tillman farm and will be sold safe in pig to Jumbo's Ideal. We wish to recommend this bunch of sows to anyone who is looking for the right type of a Duroc brood sow. Catalogs are now ready and should be in the hands of every Duroc Jersey breeder. Those who cannot attend can send bids to Mr. Ray Page, of this paper, and they will be properly handled. When writing please mention this paper.

# Administratrix Sale Of "Lone Retreat" Stock Farm's

Harriman & Sparks, Auctioneers.

MRS. LENA M. RAY, ADMX., OR C. F. CHAMBERLAIN, MGR., LAWSON, MISSOURI.

## Jacks and Jennets at Limestone Valley's Thirtieth Annual Sale.

Attention is once more directed to the thirtieth semi-annual sale to be held at the Limestone Valley Farm, owned by Messrs. L. M. Monsees & Sons, of Smithton, Mo. Sixty head of jacks and jennets, the equal of which have never been offered at public auction, will go through Messrs. Monsees & Sons' sale ring on Tuesday, March 5th. They have shown the same judgment in the breeding of jacks and jennets as is shown by the best breeders of other live stock, and as a result they will show a line of jacks and jennets on sale day that have no equal for scale, bone and quality. At the Chicago World's Fair Superior Mammoth was shown by Messrs. Monsees & Sons and was made champion. At the St. Louis World's Fair, Orphan Boy, a son of Superior Mammoth, was shown by them and won the same honors. Thus it may be seen that they breed the kind that go into the big shows and win. Their winnings did not end here, as it was this firm that carried away over \$10,000 in premium money from the St. Louis World's Fair. For their sale on March 5th they have selected forty jacks and twenty jennets. Among these jacks are a whole lot that are classed as "cracker jacks;" in fact there is not an inferior animal in the sale, and the poorest jack listed has a right to be classed as a good one, and were it not for the exceptionally high quality of the tops the poorest would make a great showing. A line-bred jack got by Superior Mammoth, sire of the great Orphan Boy, is one of the superior of which has never gone through any sale ring. He has the scale, the bone and does not lack in quality. At the St. Louis World's Fair he was a second prize winner. Not an old or a stale jack is listed and the large part are three's and four's. Seven yearling jack colts will be sold, as Messrs. Monsees have at each sale been asked to put in some yearlings. The jennets are probably the best twenty head ever gotten together. Several sell with colts at foot and all are in foal to one of the Limestone Valley jacks. Messrs. Monsees & Sons request that those wishing to purchase at this sale come a day in advance, so that you can examine the stock carefully. This is in accordance with Limestone Valley business methods. They want every customer to be satisfied and know exactly what he is buying. See page 37 for advertisement and arrange to be with Messrs. Monsees & Sons sale day if you want a high-class jack or a jennet or two.

## Finley's Sale of Jacks, Jennets and Stallions.

A catalog of the sale of jacks, jennets and stallions to be sold by Mr. W. J. Finley, of Marshall, Mo., on Saturday, March 2d, has just reached our desk. We find that Mr. Finley has included pictures of practically all the jacks that sell. These are made from photographs and are not overdrawn or retouched. In his catalog Mr. Finley says: "I extend a cordial invitation to everyone interested in fine jacks and stallions to attend this, my first public sale. I have been breeding and handling jacks for the past fifteen years and believe I know a good one when I see him. The jacks offered in this sale are most of them tried sires, and several of them are as good as calls be found anywhere, and their produce sells for the highest prices. The jennets, with the exception of a few young ones, are tried dams and have produced jacks that have sold at good prices. I am also offering a first-class lot of stallions, among them a number of trotting-bred stallions, bred on most popular lines, and a number of English Shires and Percherons, all good individuals. Come to the sale and see my offering; you will be well repaid for your time and expense, as I have in the sale jacks, jennets and stallions that will make you money." See page 37 for Mr. Finley's advertisement and if you have not received a catalog write for one now and kindly say you saw his advertisement in this paper.

## Seckman & Allen's Duroc Sale.

One of the best lots of Duroc Jerseys which will be offered to the public this season is that of Messrs. Seckman & Allen, of Ripley, Ill., which will be sold on Wednesday, February 27th, at Mt. Sterling, Ill. In our last issue mention was made of the boars which are now in use in these herds. This week we wish to call the attention of our readers to some of the females which are included in the auction. Two April gilts by Tip Top Notcher and out of a Kruger dam go into the auction, one bred to Speculation, the good son of Orion Chief, and the other to The Commodore, one of the best sons of the champion, Commodore. Four daughters of Ohio Chief II., the boar which sold in Mr. Seckman's last sale for \$605, and out of Lad's Goldie 40th, a sow which Mr. Seckman refused \$1,000 for last fall, go into this sale. Two of these gilts are bred to Speculation and two to The Commodore. To the breeder or farmer who is in the market for something especially good this litter will afford an excellent opportunity to secure well-bred gilts at their own figures. Three daughters of Double Track, the boar which has been used to such good advantage in the

herds of Messrs. E. H. Deal & Son, of Elwood, Ill., are among the best gilts that have been included in this sale. They are very smooth, with good length and stand up well on their feet. In fact, the whole offering is especially good in feet and legs and no one in attendance sale day will need to have any fear on this account. Several yearlings by Tip Top Notcher are also included in the sale and will certainly prove good property in the hands of good breeders or farmers who wish to start into the Duroc business. Gilts by Ohio Chief II., Fancy Orion Chief, Champion Paul, Top Notcher King and other boars of equal note give the buyer a variety of breeding coupled with excellent individuality that is sure to please the most discriminating buyer. We take pleasure in recommending this offering to our readers, and bids sent to Mr. D. M. Pierce, in care of this firm, will be properly handled. Write for catalog at once and kindly mention this paper when writing. See page 41.

## Iams' New Catalog.

The 1907 catalog of that noted Percheron horse importer and breeder, Mr. Frank Iams, of St. Paul, Neb., is off the press and now ready for distribution, and it excels by far anything of its kind ever before issued by him. It is printed on the finest quality of book paper and is illustrated from cover to cover. It contains nearly 100 illustrations, many of which are pictures of his leading winners. The front cover contains a picture of Mr. Iams in characteristic pose, selling a 2,100-pound "peaches and cream" stallion, and is a splendid likeness of both the man and the horse. The name "Frank Iams, the leading importer of horses," stands out in bold relief, being embossed in gold above and below the picture. But while the printing is a work of art, the best thing of all is the information contained therein. The pictures are the work of Mr. Lou Burk, and he has caught them in every conceivable position. In the artist's eye he has pictured them in singles and doubles, in groups and in contented pose. In one instance you will see a 2,000-pounder coming down the road, with great force of movement, but with neatness of action, and on another page you will see one as "wide as a wagon" waiting to be transferred to the home of some good horseman. The life history of Mr. Frank Iams and his winnings, of his rise from that of a poor man to one of the most successful horsemen in the United States, will be found therein, and it all makes interesting reading. The catalog is certainly interesting to all lovers of Percheron, Belgian and French coach horses, and any of our readers who are contemplating buying a stallion will be particularly interested in this great work of art. It is sent free to those who are thinking of buying stallions, provided you mention this paper when writing.

## Last Call for Lyndale Polands at Auction

Mr. A. F. Graves, of King City, Mo., proprietor of the Lyndale herd of Poland Chinas, makes his first sale of bred sows on Thursday, February 28th, at which time he sells as good a lot of breeding matrons as are owned at Lyndale. These are bred to the Lyndale herd boars, a large part being safe to the service of Grand Model, one of the best sons of the \$3,000 Grand Chief. The sows to which this boar has been bred are the kind that Mr. Graves thinks will produce best to his service. Other sows are bred to Tormentor, a son of the World's Fair champion, Meddler, and Maple Lawn's Top, a grandson of Chief Perfection 2d. Mr. Graves says come and see the stock, as he is including sows that he should not part with, but in order to give the public the best he owns they go, and at your price. See page 39 for Mr. Graves' final announcement and arrange to be with him sale day.

## Some Good Short-horns.

Mr. Chas. C. Norton, breeder of Short-horn cattle, Corning, Iowa, writes: "We have recently sold to that discriminating and progressive breeder, Mr. C. L. McClellan, of Lowden, Iowa, the very choice yearling Short-horn bull, Cinch 272753, the sire of which was the prize-winning Bankers' Victor by Imp. Banker, and whose dam was sweet Charity 7th by the prize-winning Imp. Salamis out of old Sweet Charity by Imp. Bandmaster. Sweet Charity 7th was the third-prize yearling heifer at the International Exposition at Chicago in 1900, and her full sister, Sweet Charity 5th, was the second-prize two-year-old heifer at the same show. Sweet Charity will be sixteen years old next April; has had thirteen calves and is well along in calf again. She has the honor of being the dam of two of the produce of one cow that won second prize at the International of 1900. I have kept all of her female produce but one, and the four bulls and one heifer which I have sold from her have brought me \$3,045. We think this good enough blood for any man's herd. We have also recently sold the choice red heifer, Honeyuckle, by the prize-winning Bankers' Victor, and out of the very choice cow, Imp. Honeycomb 5th, to Mr. O. C. Hardin, of this county, who is building up a good herd and is very careful in his selections." See advertisement on page 44.

## DISPERSION SALE

OF REGISTERED

## SHORT-HORN CATTLE AND POLAND CHINA HOGS

To be held on Farm 3 miles north of Gilmore City, Pocahontas County, Iowa, February 27, 1907

## 40 HEAD PURE BRED SHORT-HORN COWS, HEIFERS AND YOUNG BULLS,

COL. A. P. MASON, AUCTIONEER.

E. O. WOLCOTT, PROP.

Gilmore City is north of Ft. Dodge on the Minneapolis & St. Louis. R. R.

"I'm in a hurry to get to Kansas City to buy some of those good Registered Hereford Cattle that are to be sold in the Live Stock Sale Pavilion, February 27 & 28."

This Man is not frightened, as you may suppose, but is simply on the way to Kansas City, Mo., to attend the big combination sale of **HEREFORDS** that will be held at the Live Stock Sale Pavilion, Wednesday and Thursday, Feb. 27th and 28th, commencing at 1 o'clock the first day and 10:30 o'clock the second day, at which time 100 carefully selected ones will be sold. 60 of these are big, strong, well bred bulls, ready for hard service; 40 are choice females. Every animal a good one and especially selected to inaugurate the spring sales at Kansas City. More herd bulls of outstanding character than ever before offered in one sale. Sixty bulls mean bargains for the buyer of one or a car load. Breeding cows of foundation stock. The consignors to this sale are all members, in high standing, of the Hereford Association and each is putting forward some of his best animals.

Send now for catalog to C. R. THOMAS, Sec'y., 221 West 12th St., Kansas City, Mo.

## PUBLIC SALE OF Poland Chinas and Chester Whites

BY F. G. PAUL

Exchange Pavilion, Laurel, Iowa, Thursday, Feb. 28th.

The offering will consist of twenty-five head of bred Poland China sows and gilts and one two-year-old herd boar. The herd boar is Prince Donald 101473. The sows are principally of Nemo L. Dude and Perfection breeding. There will also be twenty-five head of Chester White bred sows and gilts and one yearling herd boar. Laurel Winner. For further particulars, address,

F. G. PAUL, - - LAUREL, IOWA.

Central  
Iowa**DUROC JERSEY SALE CIRCUIT**

The blood of such noted winners as

Proud Advance, Junior Jim, Orion, Glendale Critic, Ohio Chief, Nebraska Belle and Rural, and Daughters of Junior Jim, Glendale Critic, Proud Advance Again, Orion, and out of Nancy VII, the great show sow, and Clear the Way, the best son of Nancy VII.

**"Nancy" Duroc Sows at Auction**

Sale to be held on the farm six miles northeast of

**Glidden, Iowa, Monday, Feb. 25, '07**

There will be about fifty head in the sale, twenty of them tried brood sows, the balance spring gilts. The grand brood sow, Beatrice, by Orion, dam Kruger Maid by Long John, is one of the attractions; also a spring gilt by Orion, her dam the sweepstakes sow, Nancy 8th; Williamette, one of the best brood sows on the farm; two gilts by Critic's Echo out of a Nancy sow; two by the \$5,000 Junior Jim, their dam by Golden Perfection; two by Rural out of Old Gold Lady. They are bred to Proud Advance Again, a pig by Orion, dam by Echo King; Nancy's Orion by Orion, dam the sweepstakes sow, Nancy 8th, and some to a son of I Am A Wonder out of an American Royal dam. Attractions for everybody. A carefully selected lot of stuff. Come to the sale and buy a good one at your own price.

**W. A. STAPLES & SON, Glidden, Iowa.**  
**COL. F. F. LUTHER, Auct.**

**Lake City, Iowa, Tuesday, Feb. 26, '07**

I will offer at my farm near town

**35 Head of strictly choice Brood Sows 16**

gilts, rest yearlings and matured sows.

I am offering nine granddaughters of the great Nebraska Belle in my sale, three choice gilts by Ohio Chief and a great many granddaughters of old Orion. The blood of Nebraska Belle is to be found in my offering, also of June Choice Again by the great Tientsin, the sire of Ruberta, the highest-priced Duroc Jersey sow ever sold, and a first-prize Iowa State Fair winner. I am selling some choice Ohio Chief gilts out of a Belle's Echo, a son of Nebraska Belle. There will also be some good gilts in the sale by old Orion, Young Advance, Goldie O's Top Notcher, King James and Orion II. These will be bred to Pittman's Ohio Chief and Clear the Way. The sows I am putting in are an excellent lot and some of them I hate to part with, but I am going to sell the best and I want the breeders to attend my sale, whether they buy or not. I will also sell twenty head of high-grade Shire horses and mares, and two good driving teams. Write me for catalog.

**Col. F. F. Luther, Auct. W. D. PITTMAN, Lake City, Ia.**

**February 27, 1907****40 Head Yearlings, Matured Sows 40**

and some Choice Spring Gilts

Three of these are sired by Orion; a litter sister to one of them sold in my last March sale for \$205; two by Crimson Wonder I am; three by Proud Advance; one by American Royal; others by Peerless Orion, Young John, West Side, and Tientsin, the sire of the \$1,500 sow, Ruberta. These will be bred to my great young breeding boar, Young Advance by Proud Advance, Orion Jr. by Orion, and W. D.'s Ohio Chief. Come one; come all, and see a fine lot of massive sows go through the ring.

I will also sell 1 Queen Mother and 3 Easter Tulloch Duchess Aberdeen-Angus bulls in my sale. Send for catalog.

**J. W. PITTMAN, Lohrville, Ia.****COL. F. F. LUTHER, Auct.**

Write any of the above breeders for catalog and mention Iowa Homestead.

**Next Week—E. O. Wolcott's Dispersion Stock Sale.**

On February 27th, which is next week, Wednesday, Mr. E. O. Wolcott will close out his herd of Short-horn cattle to the highest bidders in the sale ring. The offering will be made at the farm, three miles north of Gilmore City and four miles south of Bradgate. Gilmore City is on the Minneapolis railroad between Tara and Rolfe. The offering contains some very good cows that have been doing well for their owner in every way and nothing is to be sold except on its own individual merit. This, however, does not signify that the blood lines that are represented are not worthy of attention also, for the collection is made up of some good selections from some of the well-known breeders in the state. Mr. Wolcott has chosen some of his herd numbers from the breeding work of Messrs. H. G. McMillan and N. A. Lind. This part of the offering contains some very attractive numbers, as some of these cows have calves at foot and are in calf to good Scotch bulls, such as Orange Chief 144661, Morning Joy 198620 and others. Leno, Vol. 61, is a black roan, four years old, by the first named sire and due to calve soon to the service of the latter named bull. Roan Lucy by Imp. J. I. Marengo 145091 has a heifer calf at foot and will make a good purchase. Another is a three-year-old sired by Royal Lavender 164545. She is a good, useful type of heifer and promises to be a money maker. The young bulls are three in number and are sired by Victor Lad, the herd bull. They are about ten months old and are vigorous and growthy and should make good herd bulls for some one. Remember that fifteen Poland China sows and gilts will be sold at the same time. Refer to the breeding in the advertisement on page 40. Send for catalog.

**Remember F. G. Paul's Growthy Polands and Chester Whites Will Sell At Laurel, Iowa, February 28th.**

The swine breeder that can put up an offering with as much size, bone and all round individual merit as that which is to be offered at Laurel in southern Marshall county, Iowa, Thursday, February 28th, is to be congratulated. Mr. Paul believes that the great, big, growthy hog, that retains all the early-maturing and quick-finishing characteristics of the Poland, as well as the Chester White, is the hog that will make the most money for the majority of breeders. It is not overstating the case any to say that buyers will find on sale day as grand a collection of sows and gilts from the standpoint of large, deep-bodied, prolific individuals as any breeder could desire. The Poland offering consists of twenty-five head of sows and gilts, all bred for March and April litters to two splendid boars. Prince Donald 101473, a two-year-old, out of a Lightfoot dam, and on sire's side tracing to Ideal Sunshine 44645, is the sire of most of the gilts, and this union has brought such good results that the mature sows have been reared to him. Prince Donald will be for sale also, and we venture to say he is as big and well-formed a hog, at the same time carrying as much bone as any Poland boar in the state. His bone at its smallest part measures eleven inches and after having been used all fall he weighs 800 pounds. He has never been shown except at the county fair, where he has won the tops. However, he has some very toppy gilts in the sale which are certainly showy. Nos. 20 and 21 in the catalog were farrowed the middle of April and now measure eight and one-half inch bone and tip the scales at 350 pounds. They are a very neat pair and have the right kind of a head and ear and are strong in the back and stand close to the ground. They were bred the middle of December to Golden Perfection 115645, a vigorous March pig and one of the growing kind. This pair should prove a valuable addition to any herd. One of the special numbers in mature sows is Modesty 12P, coming three years old in May. Her weight is 600 pounds in ordinary flesh and four gilts from her last litter will be in the sale. A look at them will satisfy anyone about what kind of a producer the sow

is. She is a producer that is certainly what most men are looking for. Her sire is Monarch 81699 by Young Look Over Price, and on the dam's side traces to Young Jumbo 52723. Another one of the good sows is Belle W. 2d by Nemo Boy, and her dam is Bell Wilkes 210634. This is reliable breeding and she has proved it in this case by raising two good litters this last season. She has less range than the Modesty sow above mentioned, and is a very easy feeder. A bunch of fancy gilts is Nos. 10 to 14 inclusive, out of a Nemo L. Dude sow and by Prince Donald, the herd boar. They will stand a neat bid, for they have an eight-inch bone along with an elegant conformation and style. There are more just as good as any we have mentioned, and to be fully appreciated they should be seen. The Chester White offering will consist of twenty-five sows and gilts and one yearling herd boar, Laurel Winner 13485 by Busy Boy by Perfection 2d 10015. Great length, strong back, well-sprung ribs, strong bone and vigor as a breeder are all pronounced in this sire. All the offering is bred to him and the litters he gets will certainly be well sired. Among the many good looking numbers is No. 35, a March gilt that weighs 370 pounds and stands on very strong, straight pegs. Her sire is Jumbo Chief 12179, now doing duty in an Illinois herd. Many of the strains represented are of the Dorsey breeding. The offering of white hogs is full of good, valuable stock. The sows of this breed have been producing an average of twelve pigs right along. Send for the catalog at once. Plan to attend this sale and kindly bring your catalog with you, as the supply through an error is small. Mention The Homestead when you write.

**Last Call for J. C. Bailey's Poland China Brood Sow Sale.**

As has been before stated in these columns, February 26th is the day on which Mr. J. C. Bailey, of Marshalltown, Iowa, will sell thirty very select Poland China bred sows at the fair grounds in Marshalltown, Iowa. He has engaged to make this sale, auctioneers Menzies, White and Esslinger. The writer has been breeding Poland Chinas himself for nearly forty years and considers this bunch of some thirty head now offered by Mr. J. C. Bailey one of the most useful and practical bunches of brood sows that have been offered the public in a long time. There will be five yearling sows and the remainder March and April gilts, whose breeding, from the standpoint of blood lines, is unsurpassed. We have not in many years seen a bunch of gilts that were so well grown and yet stood up as well on their feet, carrying the true level underline with good arched backs, as these referred to. Mr. Bailey has always been a stickler for good, short heads and nice ears, in so far as this was possible and consistent with size, bone and growth. It is doubtful if central Iowa has had the opportunity in several years to buy a class of brood sows equal to these, and we predict that owing to Mr. Bailey being a conservative, quiet and modest man, this stock will not be fully appreciated on sale day, and for this reason we should like to impress upon Homestead readers the fact that it will in all probability afford them a splendid opportunity to buy high-class Poland Chinas at a much lower figure than is usually paid for stock of this class when sold by breeders who have a wider circle of acquaintance; yet we wish to say that Mr. Bailey is in no wise a new breeder. In fact he was raising registered Poland Chinas when a large per cent of the present so-called prominent breeders were growing grades. Mr. Bailey is his own herdsman, breeds, feeds and develops his own stock, and he certainly is an artist at the work. As has been before stated, the most approved blood lines are represented in these brood sows. They are all sired by such boars as Ohio Perfection 2d, Lookout Tecumseh, Nemo Boy, Long Price and Perfection Star. They are bred to such noted boars as Keep On Perfection 2d 115921 and Good Shine 117265. The first named is a boar about eighteen months old that stands on the best of feet and legs, is exceedingly good in his ham, shoulder and

Dispersion Sale of  
**Duroc Jersey Bred Gilts**

I will sell at Lilac Hill Farm, near Clarion, Ia., Tuesday, Feb. 26, '07

**60 Head of Choice Duroc Jersey Gilts, Bred**

They are the long-bodied, heavy-boned, growthy sort that have from 8 to 14 pigs at a litter and raise them. In other words, they are the Farmers' Ideal Mortgage Lifter. They are of March and April farrow and contain some of the best blood lines that has assisted in making the Duroc Jersey the most popular of all breeds. About 60 gilts were selected for this sale and the remainder fattened and sold on the general market. The dams of these pigs averaged 600 pounds each in November. These gilts were sired by Togo 37421, a 1,000-pound boar, and they are bred to Golden Chief and Gold Bud.

IN THE  
**SECKMAN & ALLEN**  
OFFERING

**At Mt. Sterling, Ill., Wednesday, February 27, 1907**

Sired by Tip Top Notcher, Ohio Chief II, Champion Paul, Fancy Orion Chief, Double Track, Best of Top Notchers and others

Bred to Masterpiece Chief, The Commodore, Speculation, Hanley, Tip Top Notcher and King Hanley. These sows have been selected with great care, properly fitted, and all will be safely bred by sale day and carry their own guarantee. Taken as a whole we believe this offering to be as good a lot, both in breeding and individuality, as ever were offered at public sale. Send bids to Cols. Fred Reppert, Judd McGowan, James Riley or to Mr. D. M. Pierce, representing this paper. For additional information and catalogs address Geo. W. Seckman or Fred Allen, Ripley, Ill. A very cordial invitation to all Duroc Jersey breeders in America to attend this sale.

**AT PUBLIC AUCTION.****ALTA, BUENA VISTA COUNTY, IOWA****THURSDAY, FEBRUARY 28, 1907.**

**28 REGISTERED SHORT-HORN COWS, HEIFERS AND YOUNG BULLS.** Scotch and English blood lines. Regular producers, money makers.

**30 PURE BRED POLAND CHINA SOWS AND GILTS.** Recognized blood. Bred to Perfection and Jumbo boars. Growthy and thrifty. Send for catalog. Farm north of Fair Grounds.

**J. A. PENN,**

**COL. C. W. LOOKINGBILL, Auctioneer.**

**ALTA, IOWA**

middle, has an exceptionally fancy ear and a crest seldom equaled. He is a regular peacock in style and appearance, coal black in color and with a splendid coat of hair. The other boar, Good Shine, is intensely inbred in the blood of Ideal Sunshine; this fellow has the smoothest and straightest coat of hair that we have ever seen on any boar of this line of breeding. Aside from his many other good qualities, his great arched back is one of the most striking. This good qual-

ity he imparts to all of his get, and the breeder who purchases some sows bred to this boar, or the young boar above referred to, can reasonably expect to get pigs of a very high class. These brood sows have been fed for growth rather than flesh. We know the ration on which they have been sustained and consider it as near perfect for the proper development of brood sows as can be secured. Mr. Bailey will be pleased to furnish his sale catalog to all Homestead readers who apply.

240 DUROC JERSEY BRED SOWS AT PUBLIC AUCTION

# GREAT SOUTHWESTERN NEB. SALE CIRCUIT

## Six Days Sale---Feb. 25th to March 2d Inclusive---The Tops of Six Grandly Bred Herds

February 25, 1907

They are bred to such boars as Munger's Ideal, first-prize pig under six months at Wisconsin State Fair, first at Beloit, Elkhorn, La Crosse Interstate Fairs. He is assisted by a good son of Red Chief 1 am. This combination of blood should produce good ones. A guarantee with every animal. Write for catalog. T. C. Callahan, auctioneer; Ray Page, assistant.

February 26, 1907

**M. A. Sellers & Son, Huntley, Neb.**

Will sell forty head from their well-known herd and they are right in every respect. The blood of such boars as Crimson Wonder, Cole's Duroc, Improver II., and other prominent sires represented in this herd. Most of them are bred to Seller's Duroc by Cole's Duroc; others to Crimson Pat by Duroc by Cole's Duroc; Dandy Top Notcher by Tip Top Crimsou Wonder, Dandy Top Notcher by Tip Top Notcher, and a son of the great Ohio Chief. Sale right in town in heated quarters. Come and look over a good bunch of sows. Catalog now ready. T. C. Callahan, auctioneer; Ray Page, assistant.

February 27, 1907

**S. J. Tillman - Ragan, Neb.**

Will sell at his place right in town forty head of tried sows and gilts that are hard to duplicate. If you are looking for size, with quality, come to this sale. I have sows of most noted strains and the individuals to back the breeding. They are bred to such boars as Jumbo's Ideal, one of the best sons of Jumbo's Perfection, and a son of Nebraska Wonder by Crimson Wonder. Come to this sale. I can please you. Write for a catalog at once. T. C. Callahan, auctioneer; Ray Page, assistant.

February 28, 1907

**Geo. Karschner, Wilcox, Neb.**

Will offer at his farm near Wilcox, Neb., a draft of forty head, consisting of tried sows and good, growthy, spring gilts. They represent the blood of Jumbo's Perfection, Improver II., Hambletonian, Crimsou Wonder, Red Chief and others of equal note. They are bred to such boars as Journal II., first-prize pig at Kansas State Fair, 1905, in under six months class; others are bred to Kan't Beat Top Notcher, a grandson of Kan't Be Beat. Every sow in prime breeding condition. Write for a catalog and arrange to attend the sale. T. C. Callahan, auctioneer; Ray Page, assistant.

March 1, 1907

**C. C. Wassen, - Wilcox, Neb.**

Will sell forty head, including three tried sows, nine spring gilts and the balance big, growthy, fall yearlings. They are in the pink of condition; represent the best blood lines and are bred to such boars as Jumbo's Wonder by Jumbo's Perfection; others to Cole's Duroc II. by Cole's Duroc. Come and look them over; they are extra good, both in breeding and individuality. Write for catalog and arrange to attend the sale. T. C. Callahan, auctioneer; Ray Page, assistant.

March 2, 1907

**A. A. & W. G. Karschner, Wilcox, Neb.**

Will offer forty head of top sows from their herds, and they have selected nothing but the very best. They are very growthy, being raised on alfalfa and fed to do the purchaser good. They are bred to such boars as Lord Gold Finch, a noted prize winner; Nebraska Wonder, a good son of Crimsou Wonder, and a good son of Morrison's Bell Top. Come and spend the day with us. Catalog now ready. T. C. Callahan, auctioneer; Ray Page, assistant.

Mail bids can be sent to Ray Page, of The Homestead, in care of the above gentlemen, and they will be properly handled.

### Last Call for the Wendt Sow Sale.

On Wednesday, February 27th, Mr. W. J. Wendt will sell at his Grand View Stock Farm, near Marcus, Iowa, thirty-eight head of well-bred Duroc Jersey sows. Mr. Wendt is not a man who makes a great amount of noise, but we will say for him that no breeder has a better lot of hogs. One of the chief boars at the head of his herd is Wonder C., a son of Crimsou Wonder out of a Duroc Challenger sow. He is one of the best sons of his famous old sire and he will have a number of yearling sows and spring gilts in this sale. He is also bred to many of the sows to be sold. Lottie's Top Notcher, a son of the World's Fair boar, Top Notcher Again, is also doing service in the herd and he is bred to a great many sows in the sale. The dam of this hog is Lottie A., the dam of the champion barrows at St. Louis. This boar is an excellent breeder and no one will go wrong in buying a sow bred to him. Some of the sows will also be bred to Grand King 56765, a son of Wendt's King. Among the old sows that Mr. Wendt will sell is a daughter of old Albinus, also one by Royal Plummer. One litter will be sired by Wonder Again, a son of Crimsou Wonder, and a number of litters will be sired by Wendt M. and Wendt's King. We would like to urge all of our Homestead readers to send for his catalog and then attend the sale. He is offering a good lot of well-bred sows, and the Wendt stock always does well in the buyers' hands.

### Short-horns and Polands at Alta, Iowa.

On Thursday, February 28th, of next week, Mr. J. A. Peun will sell at his farm adjoining the Alta Fair Grounds, his herd of Short-horn cattle and thirty head of pure-bred sows and gilts. The herd of cattle consists of twenty-eight head, among which are fourteen cows of Scotch and English breeding and that have proved good producers, as will be shown by their produce in the sale. Some cows have calves at foot and others are well along in calf to the service of a very good Scotch bull, Duke of Orange 2d 192733, a \$225 bull. There will also be some young bulls by this sire and they deserve the attention of farmers or breeders looking for a good young bull. The swine offering includes sows and gilts. The sows are good, prolific producers and represent well-established lines of breeding. The gilts are mostly sired by Ohio Boy 81137 by Ideal Tecumseh. Also by Jumbo 104677 by Crow's Model. This is a bunch that contains good, growthy stock and some have taken prizes at the county fair. Write for catalog and kindly mention The Homestead. On page 41 appears the formal notice.

### Last Call for Gleeson Short-horn Sale.

On Thursday, February 28th, the well-known Short-horn herd of the late Patrick Gleeson, of Oakland, Neb., will be closed out at public auction. This was one of the best-known Short-horn herds in Nebraska and few breeders were better known than the late Mr. Gleeson. At the head of the herd is the noted bull, Count Waterloo, for which Mr. Gleeson paid Mr. Martin Flynn \$1,000 at one of his public sales a few years ago. He never made a mistake in buying this bull, as he has proved himself a great breeder. Many of the young bulls and young

heifers in the sale are sired by him and he is bred to most of the older cows in the sale. This bull is a solid red in color and he is in splendid condition today. He will be sold with the rest, also the two-year-old Scotch bull, Clover Lawn Sultan 254376, a son of Imp. Craibstone, dam Imp. Peony Rose 2d by Fitz Alan 247820. This is a roan Scotch bull that has been used on the Count Waterloo heifers. Among the females the Scotch tribes represented will be Queen of Beauties and Orange Blossoms. Their foundation Orange Blossom cow was Orange Queen 4th. She is now nine years old, but is still a good breeder and goes into this sale with a roan heifer calf at foot by Clover Lawn Sultan and is rebred to the same bull. Her two-year-old daughter goes into the sale bred to Clover Lawn Sultan. The Queen is a good Queen of Beauty cow. She was bred by Messrs. F. Bellows & Sons and is a daughter of old Valley Champion out of a daughter of Imp. Red Emperor. She will have a bull calf at foot by Count Waterloo. Her four-year-old daughter, Missouri Queen, goes in and she is one of the best propositions in the sale. She was bred by Mr. W. E. Robinson, of Fairport, Mo., who at one time had one of the best herds in Missouri. She was sired by Violet's Galahad. She is a richly-bred Scotch cow of the Queen of Beauty family and she goes into the sale bred to the great \$5,500 champion show and breeding bull, Choice Goods. Clover Crest is a daughter of King Abbottsburn and is out of the Queen of Beauty cow. The Queen, she one of the richly-bred Scotch heifers in the sale. There will be a lot of Scotch-topped tribes in the sale. All the foundation cows and their heifers go in. Besides the two herd bulls there will be twelve or fifteen young bulls. Many of these are sired by Count Waterloo and all red in color. This is a dispersion sale, made necessary in order to close up the estate, and it will therefore be a good place to buy. A car load of good bulls can be secured in this sale, or a couple of good herd bulls can be bought. Write Messrs. Gleeson Bros., of Oakland, Neb., for catalog and mention The Homestead, and be sure that you are at the sale if you want Short-horn cattle.

### Last Call for G. J. Mack's Dispersion Sale of Duroc Jersey Bred Sows.

Previous mention has been made of the fact that on February 26th Mr. G. J. Mack, of Clarion, Iowa, would make a dispersion sale of Duroc Jersey swine. While The Homestead regrets to see Mr. Mack close out his Cherry blond pigs, we can with much pride and comfort cite our former readers to this sale as being a splendid place and opportunity to secure the large, roomy Duroc Jerseys that have all the marks of making ideal brood sows, that will attain great size at maturity and be productive of large litters of pigs. Some breeders of Duroc Jerseys have followed the fad laid down by the score card, with the result that they have a neat, tidy, nice red pig to look at, but possessed of little intrinsic worth or merit. It has been the aim and ambition of Mr. Mack to maintain in his herd just as much aristocratic breeding as was possible to find, and still maintain the size, bone, constitutional vigor, growth and ability to reproduce as large, strong litters of healthy, growthy pigs as was possible. In this he has succeeded admirably, as is evidenced by the

Send for catalog. No postponement.

sixty head of gilts that now weigh around the 300-pound mark. A Homestead representative has carefully inspected the entire offering, as well as analyzing the breeding, and believes that this sale affords a splen-

did opportunity for securing good, useful brood sows. The chief claim for the Duroc Jersey has been their strong, vigorous constitutions and ability to produce large litters of strong, healthy pigs and raise them suc-

cessfully. Whenever the Duroc Jersey approximates the Poland China type, which in the hands of some breeders they have done, they have lost many of the strong points that were claimed for the breed by the earlier promoters of the breed. It was the in-and-in breeding of already intensely in-bred Poland Chinas that has caused them to be less prolific than they were in former years when this state of affairs did not exist to any great extent. This condition of things discouraged farmers in some instances from continuing to breed Poland Chinas. They switched them to the Duroc Jersey for relief, and they found what they were looking for, but with the advent of the score-card type of Duroc Jersey, the neat, tidy Duroc found favor in the show ring, but lost favor with the farmer. Mr. Mack has reasoned this all out in his mind and has steered clear of the score-card type and will offer the farmers of the Northwest, and the state of Iowa in particular, sixty head of the ideal type of Duroc Jerseys that are real mortgage lifters. He does not expect at this sale any fancy prices, and is content to accept farmers' prices for this stock, although he himself has invested heavily in the best foundation stock and later in herd boars in order to breed up and propagate this type referred to. These gilts offered for sale are practically all sired by Togo, he by Jumbo Red and out of Pride of Iowa. Togo himself weighs 1,000 pounds. The dams of these pigs, as has already been stated, weighed 600 pounds each in November. The reason these gilts have attained a great size and are possessed of the immense bone of which we speak is now easily understood. Mr. Mack respectfully invites all readers of The Homestead who are interested in the most useful type of Duroc Jersey extant to send to him at once for the sale catalog, mentioning The Homestead. See advertisement on page 41.

E. H. DANCER, Lamoni, Iowa

## HORSES.

## THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props.  
Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH &amp; SON.

Departments:

Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.

MILLER'S  
IMP. PERCHERONS  
AND  
FRENCH COACHERS.

Among the Percherons are coming three and four-year-olds that weigh 1,900 pounds. They have the quality and bone; all dark colors. I am selling these stallions at the barn door at from \$700 to \$1,200. Nothing better brought over this year. I also have some first-class Mammoth jacks. Come to my barns and let me show you, or write me describing what you want. If I cannot fill the description I will say so.

Also fine litter of smooth-coated fox terrier puppies \$3 to \$7.50 each.

S. J. MILLER,

KIRKSVILLE, MO.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## 21 IMPORTED STALLIONS 21

FOR SALE—I have recently landed from Belgium, (everything considered), the choicest bunch of imported Belgian stallions and mares that I have ever owned. They range from two to five years old. They are blacks, bays and rouins.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man of the neighborhood), whose influence is obtained by a large commission paid to him by the seller placing the stallion. The long-time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500 which has to be paid to this influential neighbor or neighbors to sell you a horse.

Good American-bred stallions, \$800 to \$1,000. First-class imported stallions, \$1,200 to \$1,600. Choicest stallions a little higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than anyone. Come to the barns and get the most reasonable terms that can be offered.

Send for illustrated catalog and calendar.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gild from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percheron and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landshaftstrat O. V. Oltmanns, resides in the German Coach Horse district of France and Belgium, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best of the old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

HORSES.

FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE." "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

150 Percherons, Belgians and Coachers 150

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. M a m a, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES;" they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS OF DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

\$1,000 SAVED AT IAMS \$1,000

IKKEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$3,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "boller." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. TAYLOR & JONES,

IMPORTERS AND BREEDERS OF PERCHERON, SHIRE, HACKNEY AND BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

TAYLOR & JONES,

WILLIAMSVILLE, BOX 68, ILLINOIS.

PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

A RRIVED home with their twenty-seventh annual importation of Percheron stallions this year. 80 HEAD STALLIONS and MARKS now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder of PERCHERON HORSES

100 Stallions and Mares. Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (38577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

PETERSON'S BLACK PERCHERONS.

FOR \$700 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot.

M. E. PETERSON, LYONS, NEBRASKA

# 5000 BARGAINS IN SASH, DOORS Windows and Millwork of Guaranteed Quality

Shipped Direct from America's Biggest Mill to

## Home Owners, Carpenters, Contractors

Don't think of doing any Repair Work, or Building, whoever you are or wherever you are, until you have sent for our Free Millwork Catalogue

**W**e will **SAVE** you **HALF** in **DOLLARS** of what your Local Dealer would charge you for Millwork, freight included. We guarantee this. We also guarantee that every article we sell to you direct is up to the Standard of High Quality Required by the Official Grade adopted by the Sash, Door & Blind Manufacturers' Association of the Northwest. Not all Millwork is. Remember that. You see here a few illustrations and prices taken from our catalogue. These are not Specimen Values. Ask yourself if it isn't worth while to see that catalogue. It illustrates the entire products of the Biggest Mill in America—the Only Manufacturers of Millwork who Sell Direct to Home Owners, and to Any Man who is repairing or building, to Carpenters and to Contractors or Builders.

Our Catalogue is an Authority on Millwork Styles. It will show you what you ought to use—show you how it will look—show you prices 50 per cent below your local dealer's prices—delivered to you safe and promptly, in the best of condition to use. These are all statements that we know are true. We are shipping our Millwork to men who are repairing and building every day in every state in the Union.

**You Will SAVE HALF, whether You Order \$5.00 Worth or \$10,000 Worth**

We are a reliable, responsible concern, and do just exactly as we say we will. Read here on the right what the Cashier of a large Davenport, Iowa, Bank says of us. This is our home. We were established here in 1865. This banker, or any other banker in the country, can tell you of our responsibility, if you enclose a stamped envelope for his reply.

The 5000 Bargains we offer you can be bought direct from our Free Catalogue, which shows everything plainly and explains under each article just how to order.

**Keep this in Mind Your Money Immediately Returned for Any Goods Not Exactly as Represented**

It won't cost you a cent if anything you order is not just what we say it is. You can send it right back to us and we will pay the freight BOTH ways and return your money without delay or argument.

If our millwork was not of the high quality it is, we could not have built up this enormous business. We could not have interested the thousands of customers we have and kept them our regular customers if our Millwork was not better than they could buy of their local dealer who is right on the ground.

We can save you half because—we have no expense for traveling salesmen—we do the largest Millwork business in the country—and when a man once buys Millwork of us he remains our customer, so it doesn't cost us a penny to sell him the Millwork he wants the next time. Our prices will astonish you.

### Why Our Millwork is the Best

Our Millwork is the best made because—we have the most skilled workmen—we operate the largest mill in the world—163,000 feet of floor space (four acres)—we own our own timber lands, sawmills and lumber yards. We carry a large stock and can therefore ship promptly. Our lumber is first air-dried and then, as an extra precaution, is put through a scientific drying process. Joints are made with heavy hardwood dowel pins, glued with imported glue, pressed together by heavy steam power press. Absolutely no "come-apart" to our Millwork.

Door Panels have a heavy raise on both sides. Panels are sandpapered on a special machine of our own invention before the door is put together, and the entire is then smoothed with fine-grained sandpaper. Every piece of Millwork we make is just as carefully finished as labor and expense can make it. Just write a postal for that Free Catalogue so you can see all of the 5000 Bargains we offer, and save yourself many a dollar in repair work, or in building the finest home.

### WHAT A BANKER SAYS ABOUT US

**SCOTT COUNTY SAVINGS BANK**  
Capital \$250,000.00 Surplus \$150,000.00  
DAVENPORT, IOWA.

To Whom it May Concern:  
It gives us great pleasure to testify to the reliability, business integrity and honesty of Gordon Van Tine & Co. Their financial responsibility is well over three hundred thousand dollars (\$300,000.00), and they enjoy the highest credit with Western Financial Institutions.

We assure prospective customers that they are perfectly secure in sending the money with their orders, as we understand that if goods are not entirely satisfactory, they may be returned at shippers' expense, and the money will be promptly refunded.

The officers of this Company are well and favorably known to us, and may be relied upon to do exactly as they agree. Yours very truly,  
J. H. HASS, Cashier.

## KEEPING UP SCALE IN ANIMALS.

There are several difficult problems that must be constantly met by the man who breeds pure-bred animals, but it is doubtful if any one causes the average breeder as much anxiety as the one relating to the maintenance of scale. The animal that is finished for the block, suited exactly to the taste of the purveyor of meats, is only in a measure the kind and type that is needed to keep up stamina in the herd.

A little incident occurred a few weeks ago at the annual meeting of the interstate breeders' association, held at Sioux City, Iowa, which illustrates the point we have in mind. Prof. Andrew Boss, of the Minnesota Station, was on the program for a live animal demonstration. Two Short-horn bulls were led into the pavilion to be used as the basis of Professor Boss' remarks. One was a thick set, blocky fellow, fleshed just about where the flesh ought to be and he displayed, withal, typical Short-horn character. His head and horn, if anything, were over-refined, but, all in all, he was an individual that pleased the eye wonderfully well.

His ringside mate was heavier in the bone, a little coarser in the head, rather more openly built in the frame and not quite so well fleshed. He at once impressed you as being a little on the coarse order, and was, in the opinion of practically every man present, rated below the other bull. These bulls were supplied by the Pure Bred Cattle Commission Company, of Sioux City, and when a member of this company was asked which bull would sell for the higher price without reference to pedigree, his reply was that the coarser bull would outsell the other—that the coarser type always sold more readily than those of the more refined type. This reply was significant. While, as said before, those present would readily place the refined bull above the other, yet at the same time the general discussion brought out the fact that in the opinion of many who were present it required the coarser type to keep up the

scale, constitution and general robustness of character in the herd.

Turning to the hog we find almost the same condition of affairs. Unless men take special pains to emphasize the matter of not only strength of bone, but quantity of bone in their males, their herds constantly tend to become too fine. One of the first results of over-refinement is the breaking down on the pasterns, and of course a hog that is not active on his feet under any weight is not a desirable hog to breed from.

Now, the problem is to know just where to draw the line between what might be called "medium" and "coarseness" of bone and frame. As we size the situation up, it is simply this: The feeding of corn, either to hogs or cattle, has a refining influence on the frame, for the reason that in actual composition corn lacks in flesh-forming and bone-forming material. This tendency toward refinement induced by feeding must be counteracted by one's method of breeding. None of us from choice like the coarse animal, but prefer the well-fleshed, smooth individual whether it be male or female. Nevertheless, it behooves the average breeder of the corn belt to use on the male side of the herd just a little more stamina and a little more bone than is desired in the animal

that is fitted for the block. This being the case, one cannot always secure just that smoothness of shoulder, neatness of head and horn and tidiness about the hip bones that so meets one's fancy in an animal finished for the block. Of course it goes without saying that we desire them as smooth as possible on these points, nevertheless the problem is to choose between the neat, well-fleshed, refined and handsome individual and the one of a little rougher contour.

Our advice would simply be this, get as much finish and quality as you can, but above all things keep them up in scale and constitution. In order to attain the latter, one may have to sacrifice a little on the former.

## THE ACRE IS THE UNIT.

We expect to have a good deal to say during the next few months on the subject of preparing the seed bed for grain. As a general proposition we have not yet learned to get the most out of our soils, for the reason that cultivation is hardly carried far enough in most instances.

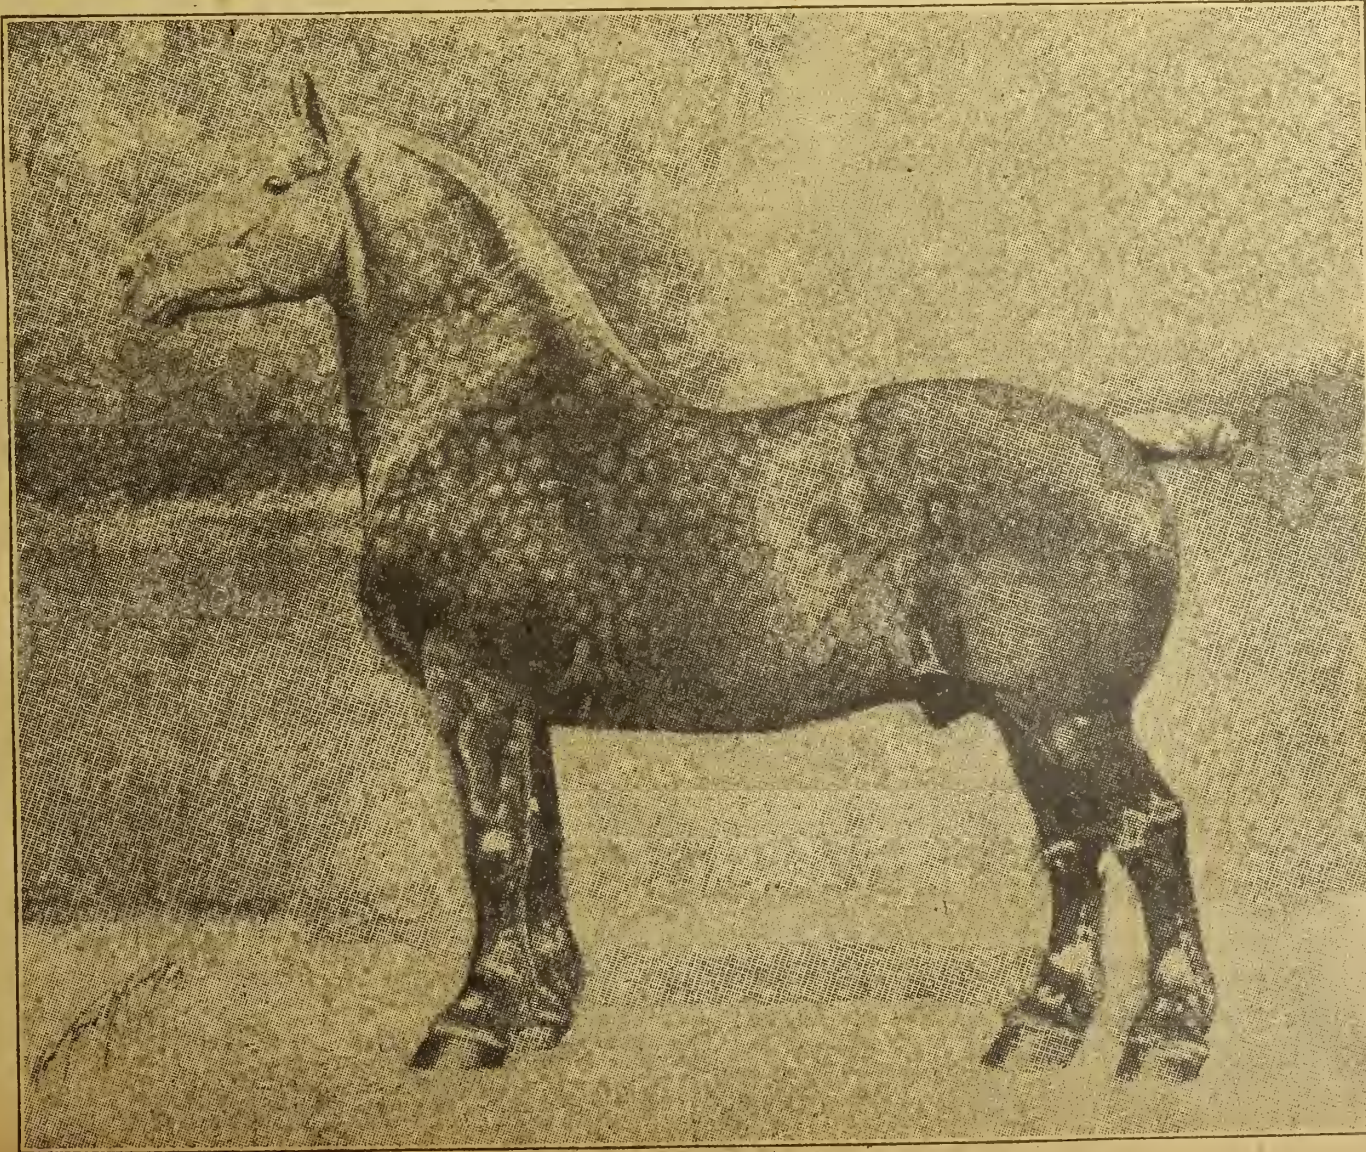

Sometimes the study of an individual character will throw a good deal of light on a single important problem, or even on several important ones. We will give

a little attention now to an individual of our acquaintance. For a number of years this man has been farming a comparatively small acreage. His corn crop amounted to not more than forty or fifty acres annually. His practice has been to put in his crop in what we always have thought a rough-shod manner. Where a good farmer would plow three acres a day and do it well, this man when he started to put in his crop would plow at least five. He would prepare with a disk, in his way, about as much land in a day as a good farmer would in two.

Generally, this individual's corn land was plowed, disked once, harrowed once and then planted. It was the intention to work down the seed bed in good shape between the time of planting and the period of germination. Weather conditions have been such during the last few years that the ground was scarcely ever touched between these dates.

The cultivation of the crop was done much in the same manner—too much in a hurry for good results, and the yield, well, the yield in 1906 on land fully capable of producing sixty bushels of corn per acre was a little less than thirty bushels.

The gentleman whom we are describing had large ambitions and grieved over his lot, that he did not have a larger acreage under his control. He thought that his profits were small because his farm was small, and recently he has, in his estimation, solved the problem. He has rented a 550-acre farm and no doubt expects to do wonders in years to come. We know, without waiting to see the result, that this man will be no better off at the end of next year on his big farm than he was on a farm of 120 acres. We say this because we know that he does not realize that the acre is the unit in crop production. One must handle his land so that every acre under crop is made to do its best. If it is the putting in of corn on old stalk ground it will pay, and pay well, to disk the surface once or twice before plowing. After the ground is plowed it will pay always to work it down well.

Imported Percheron Stallion, Velo (52877) 41474, owned by Messrs. J. Crouch & Son, of Lafayette, Ind. See Field Notes.

the soil is firm and fine. If weeds come on before planting is done, the disk should be used, but in any case see to it that the harrow is worked full time. One can raise corn at a much less cost per bushel when an acre is made to produce eighty bushels than can be done when it requires two acres to give this amount of corn.

We understand perfectly how the work sometimes rushes us, but on general principles it will always pay when you get into a field to do the work just as if it were the only field on the farm. Of course we believe in good, snappy action and in making the horses put in faithful days' work, but we insist that the weak link in the agriculture of the corn belt is that men are in a much greater hurry to get their crop in than is necessary.

Instead of jumping from the 120-acre farm to the 550, we like the thought of going the other way, and indeed, with the present labor problem staring us in the face, it would appear that our main study must be how to make a smaller acreage produce the same yield that we are now receiving from our large acreage.

### LARGE PREMIUMS FOR CORN.

The officials of the Iowa State Fair believe in the encouragement of those who are striving to improve the character of the corn crop. At this year's fair, which will be held from August 23d to 30th, the sum of \$1,273 will be paid out in premiums for corn alone.

The state will, as usual, be divided into the northern, southern and central sections and in each section twelve premiums will be given for the best ten ears of white corn, also for the best ten ears of yellow; for the best single white ear and for the best single yellow ear. Then of course there are a number of cash sweepstake prizes.

The corn for the 1907 fair must be chosen from the crop of 1906, with the exception of sweet corn which is taken from the crop of 1907. We desire that our readers who are growing good corn keep the matter in mind and before shelling the seed for this year's crop take the time to select a good sample to enter at the state fair. It is no small honor to win at a contest of this kind, and whether you win or not, the very fact that you take sufficient interest to enter will fully reward you for all your efforts.

### New Galloway Herd Book.

Volume 16 of the American Galloway Herd Book is now ready for distribution. It contains numbers from 2701 to 2900, made up of 1,115 cows, 880 bulls and five steers. It is illustrated with the noted show celebrities of the breed in 1906 and contains a copy of the association's charter, constitution, by-laws, scale of points, tabulated list of prize winners and the secretary-treasurer's report for 1906. For a copy of this herd book address Sec. Chas. Gray, Exchange Bldg., Chicago, Ill.

### Keeping up the Fertility Supply.

To the Editor of The Homestead:

The day has gone by when the farmer is considered the most ignorant of citizens; in fact, farming today is more of a science than any other occupation if handled rightly and as it should be. Much has been said in regard to the maintenance of soils, but the half has not been told. It is one of the most vital questions of the day.

The history of this country will be the same as other older countries so far as fertility of soils is concerned, and if we feed the people that we will be called upon to feed in the near future we must surely raise more per acre than we do now. Our soils, in my estimation, are like a bank account—if one keeps drawing on his bank account and restores nothing to it, it will soon exhaust itself. It is the same in regard to the soil. Just look at the people everywhere who are getting their living from the soil with practically nothing restored to it. In a very few years all the land in the United States that is worth anything will be utilized, and in Iowa forty to eighty acres will be a good-sized farm, and we will raise as much on eighty acres as we do now on 160 acres. The sooner we come to understand the elements that must be maintained in the soils, the better off we will be.

I have been much interested in the articles printed in your paper in relation to the effect of farm-yard manure on soils. In my estimation the time

has come when we must compute the value of farm-yard manure in cold dollars and cents. The maintenance of the fertility of our soils so that we can make it pay on \$75 to \$100 per acre land is a vital question. I believe the majority of farmers do not study agricultural chemistry as they should today. We find out from experience that we cannot raise the amount of bushels (under favorable conditions) on a certain piece of land that we desire, and it is always an expensive teacher. We should know through analysis of the soil just what elementary body of the soil is lacking and take pains to restore that element. In order to do this successfully we must make agricultural chemistry a study. The fertilizing elements must be maintained in sufficient quantities in the soil in order to produce good crops.

Different crops take away different quantities of these ingredients and in different proportions; according to the quantity of fertilizing elements carried off, the crop is said to be more or less exhausting. Some crops are especially rich in nitrogen, others in nitrogen and phosphoric acid, while others are rich in potash. The system of fertilization to be adopted must be governed by this fact, as well as by the character of the soil and its condition of fertility. This is one of the main reasons why the adoption of a system of rotation of crops is advantageous. The same crop grown for a number of years on a piece of land will take away the same fertilizing elements every year, thus reducing the contents of these in the soil to below a limit where profitable crops can be grown.

Manure may be regarded as a food for plants, and this must be composed of the same elements as the plant itself, although they may exist in quite different forms and proportions. The adoption of manures in the raising of a given crop can only be learned by first acquiring a knowledge of the constituents of the crop itself. A field, as before mentioned, may be fertile in regard to one crop and barren in regard

to another. The defect in a soil which renders it poorly adapted to produce a given grain may often be readily supplied by a small expenditure of money, provided the particular defect is well understood by the farmer. In fact, I don't believe there is one farmer in fifty that has manure enough to keep his farm up to the high state of fertility that it should be in order to make it profitable. We must crop our land so as to restore as much as possible the elements that are lacking. For instance, if nitrogen is lacking, we should raise clover, peas, beans, or something of that nature that will not deprive the soil of any of its stores of nitrogen.

W. E. Goodlander.

Chickasaw county, Iowa.

### Warming Feed for Hogs.

To the Editor of The Homestead:

I have seen so much in your paper recently about warming feed for hogs that I thought I would like my little say on this subject.

In the months of August and September, 1905, I had sixty-five pigs farrowed from eight sows and I was in a quandary what I would do with them without something in which to warm slop for them. We have a feed house with a ground floor, so we bought a large sixty-gallon kettle and dug down about six inches in the floor and filled up level with earth and brick and then took brick and laid up a good fireplace under the kettle. It is best to start a chimney on the ground and have a place in front 8x12 feet for a door. Use a piece of sheet iron for door and have a blacksmith make two hinges and a latch and have a mason set in the brick. A good mason will do the work in a day and it will not cost over \$20, kettle and all. This is far ahead of anything I have ever seen. The fire goes up all around and holds the heat a long time. One fire a day is sufficient and a basket of cobs thrown under will warm sufficiently to feed.

Waucoma, Iowa.

## THE GROWING OF COW-PEAS

BY A. E. GRANTHAM, AGRICULTURAL COLLEGE, COLUMBIA, MO.

The value of cow-peas is not fully recognized by the average farmer of the corn belt. The cow-pea belongs to that class of plants known as legumes comprising clover and alfalfa, and like them has the power of taking nitrogen from the air and appropriating it for its own use. For this reason peas produce abundant forage, rich in protein and leave the soil in a better state of fertility when the crop is removed. Cow-pea hay, when well cured, has a greater feeding value than red clover and has the further advantage of being produced in a much shorter time. A crop of cow-pea hay can be grown in seventy days, while fifteen months are required to produce an equal amount of red clover. Because of its quick maturity habit the cow-pea is especially well suited for a catch crop between the regular crops of the rotation. It is possible to sow peas after wheat and oats have been removed and secure a crop of hay before frost. For the northern half of the corn belt, a very short-maturing variety must be used when sown as a catch crop.

Another method is to sow cow-peas in corn at the last cultivation and pasture the crop late in the summer or early fall. Such pasture is splendid for hogs and sheep. In the case of failure of wheat, oats or clover, cow-peas may take the place of the main crop for the summer. In whatever manner the peas may be grown they leave the soil richer and a marked increase will be noted in the following crop yields. Where a green manure crop is desired for plowing under cow-peas are very satisfactory, provided enough time elapses between plowing under the crop and fall seeding to enable the ground to settle well. It is generally better economy to take off the crop as hay, or pasture it down if the fall sowing of grain is planned. Cow-peas are not difficult to grow. A warm, moist, well prepared seedbed is necessary to insure prompt and uniform germination. When the peas are sown with wheat drill the plants must come through the soil promptly and evenly to insure the smothering of weeds. This method of sowing will not admit of cultivation, but is rather generally prac-

ticed where large areas are sown. Drilling as for wheat will require from four to five pecks of good seed per acre.

Another method commonly used where the area is limited, or where a saving of seed is desired, is to use the ordinary corn planter with drill attachment. Drill as for corn, dropping the peas six to eight inches apart in the rows, and about two inches deep, or at a depth sufficient to secure proper moisture. When field is finished go over the second time straddling every other row, which will leave the rows about twenty-two inches apart. Cultivation should begin early and two or possibly three times going over the field will be sufficient to keep the weeds down until the plants have spread enough to fill the row. Do not cultivate after the plants begin to vine. In general, the cultivation of peas is very similar to that for corn and can be accomplished with the same implements. When drilled six to eight quarts of seed per acre will be required. Peas may be planted at the same time with corn. They will climb and envelop the stalk so that the two may be pastured in fall or winter, or may be cut with binder and fed the usual way.

When peas are the main crop for summer they should be planted about two weeks after ordinary time for corn planting. Care should be taken to have the ground thoroughly warmed as the peas will rot very readily in a cold, wet soil. When sown after wheat or oats for hay or pasture it is generally better to sow with wheat drill. The yield of hay from this method of sowing is hardly so heavy as when cultivated, but the vines are not so coarse. On the other hand cultivated peas produce more pods and a coarser stemmed hay.

The variety of cow-peas to use will depend on the length of growing season and the purpose for which it is grown. The Whippoorwill is one of the best varieties for the general grower and will mature in about seventy-five days. It is recommended for a main crop. The New Era will mature under favorable conditions in about sixty-five days and is the best variety to sow as a catch crop after wheat or oats.

Peas should be cut for hay when the

**\$5.95**

Freight Prepaid

Is all I ask for the

**Galloway Bike Harrow Cart**

Orders From Farmers Only Accepted

That's less than your dealer pays for the cart he handles. I was about to say "the cart he sells" but I'm not sure he sells any. He won't sell you one if you read this advertisement through to the end.

And I'll tell you why. In the first place he can't sell you as good a cart, for I do not sell my cart to dealers. Dealers can't get them. I know all about this dealer business and how every farmer has to pay from 30% to 70% more for his goods, as I was a dealer myself once. But before I was a dealer I was a farmer and so I stick to the farmers. Many's the day I've walked behind a harrow with tired legs and my mouth full of dust.

I guess that's the reason I'm so enthusiastic about my harrow cart. Another reason is that I can save you money. I am going to save you from \$2.00 to \$4.00 on the best harrow cart made. That means that 30% to 70%, I can't help feeling that you will appreciate my doing this.

Wait a minute now. Don't take my word for anything but send for my book, "The Proof of the Pudding." In that book farmers who have used my harrow cart answer these questions.

- Is it good value?
  - Does it save time and labor?
  - Can you do more and better work?
  - Is the draft light?
  - Is it strong?
  - Does it work properly on hillsides?
  - Does it follow the harrow all right in turning?
- All these questions are answered, not by me, but by men I never saw, and who never saw me,—men who have used my Bike Harrow cart, and know just how good it is.

Now about my price. \$5.95—that's it, five ninety-five, freight paid. I have to laugh.

When I hear this talk about the implement trust and the dealers,—and those fellows selling harrow carts for \$8.00 and \$10.00 I just chuckle to myself.

Talk about forcing me to do this or that—they can't force me to do anything.

I am dealing direct with the farmers and they are the fellows who have the money. But to get back to the harrow cart. Send me \$5.95 and I'll send you the cart, freight prepaid. Try it—at my expense. If you don't want to keep it send it back at my expense and I'll refund you \$6.00—that's what you paid me and be for postage.

Write today, send an order. If you're not quite sure send for my booklet. A postal will bring it. Don't go through another summer's work without one of my New Galloway Bike Harrow Carts.

*Wm. Galloway*

President of William Galloway Company,  
105 Commercial St., Waterloo, Iowa.

oldest pods have turned yellow. Begin cutting after the dew is off if conditions promise a period of fair weather. Leave in swath until well wilted, but do not allow the leaves to become dry and brittle. If the vines are heavy stir with a tedder. Where a tedder is not available rake into windrows which may be turned as the upper side dries. Or, the peas when wilted, may be put up in small cocks as high and as narrow as can be built to stand well. This will allow circulation of air and the peas will cure with bright color and retain most of the leaves. Peas in cocks may stand out a week and will take considerable rain without much injury. As soon as dry, however, the hay should be stored in a dry place.

Peas intended for pasture should be allowed to ripen several pods before turning in the stock. The peas have their growth by this time and are not so readily wasted by tramping.

The yield of pea hay will vary from one to three and a half tons per acre, while eight to twenty bushels of seed per acre is an average crop.

### THE DENNING FENCE EXHIBIT.

The Denning Wire & Fence Co., of Cedar Rapids, Iowa, was one of the conspicuous exhibits at the Iowa Retail Hardware Association meeting held in Des Moines last week. Our readers are well aware of the fact that this company manufactures all kinds of wire fencing and portable corn cribs. They have made a specialty of gates. In addition, and the company today is putting on the market some of the most attractive as well as the strongest gates, price considered, that are obtainable. Their six-sided revolving fence, showing the various patterns of fencing made, attracted a large share of attention last week, but not more than was deserved. Those who are interested in fencing this year should write the Denning Wire & Fence Co., Cedar Rapids, Iowa, for their new catalog, and please mention The Homestead when writing.

## Farm Furrows

Turned by a Practical Farmer.

Procrastination cost many a man his supply of ice this year.

Men worry about their money and women about their boys and girls.

Nearly every farmer has figured out an interurban line that will pass right by his front yard.

It takes more study to turn crops into cash to the best advantage than it does to raise them.

They have a Thaw in New York that is causing lots of gossip. We have a "thaw" out West here, too.

If filth could be as easily detected in milk as in clear water there would be fewer careless milkers.

An old case knife, a rag and some kerosene are great helps in removing axle grease from plows and shovels.

The tax assessor is certainly an inquisitive fellow. Of course one always has to put up with him the best he can.

A good many people are wanting to know how to measure hay in the stack. I think a much better way is to measure it over the scales.

The theory and practice of agriculture are coming closer together every day. There is no conflict between the scientific side of things and the common-sense side of things.

Soon the chug wagons will be terrorizing drivers on the country roads. It will give the newspapers something to talk about and maybe some of the legislators something to think about.

Those who have found that feeding the refuse from distilleries to milk cows increases the butter fat content in milk might try feeding beets and red paint to white steers to change their color to red.

There is another question on which I find myself in the lonesome minority; that is on the question of hours on the farm. I think that the person who starts off at five o'clock in the morning should have his work completed by 6:30 in the evening. I not only think this, but I know it can be done and the work kept well in hand also.

I generally concede that the majority are right, but on one proposition I will not yield. The great majority of farm-

## CONSUMPTION

### BRONCHITIS and CATARRH

### CURED.....FREE

TRIAL TREATMENT OF CONDOR INHALATION (California's marvelous discovery) sent to any one afflicted with Consumption, Catarrh, Bronchitis, Asthma, or any nose, throat or lung trouble, to prove that a cure can positively be made at home, without change of climate, loss of time or stomach dosing.

CONDOR INHALATION quickly and directly reaches the affected parts and permanently cures pain in chest or between shoulder blades, raising matter, constant spitting, lingering colds, hoarseness, chronic coughs, tickling in throat, loss of taste and smell, flushed cheeks, night sweats, chills, fever, hemorrhage, foul breath, stuffed nose, head noises, sneezing, shortness of breath, choking, gasping, wheezing, loss of vitality, strength, weight, etc.

Inhaled through mouth or nose, the heated, medicated vapor arising from burning pastilles penetrates to every nook and corner of the air passages and lungs, disinfects and rebuilds ulcerated tissues, loosens and raises mucus, destroys and ejects poison germs, heals lung cavities, affected nasal passages and bronchial tubes, and restores health.

Write today, mentioning your disease, and we will send you free of charge, Trial Treatment, 48-page illustrated book and information about how to get well.

CONDOR CURE CO., Dept. 173 Los Angeles, Calif.

## JOIN THE UNITED STATES NAVY

MAKE your own fence posts. Write for prices of the Smith Cement Post Machine. Address, Dept. B, W. Smith Grubber Co., La Crosse, Wis.

## CAN DAN PATCH PACE A MILE IN 1:54?

CRESCEUS 2:02 1/4

DAN PATCH 1:55

### 3 FEEDS FOR ONE CENT

My stallions, Dan Patch 1:55, Cresceus 2:02 1/4, Directum 2:05 1/4, Arion 2:07 1/4, Roy Wilkes 2:08 1/4, Eutonwood 2:11 and my one hundred high-class brood mares eat "International Stock Food" every day. Dan Patch has eaten "International Stock Food" every day for over four years and during this time has broken fourteen World Records and his physical condition has been marvelous. It will pay you to use it for your Stallions, Brood Mares, Colts, Race Horses, Show Horses, Carriage or Coach Horses and Work Horses because it gives more Nerve Force, Endurance and Strength. "International Stock Food" is prepared from finely powdered medicinal Roots, Herbs, Seeds and Barks and is fed in tablespoonful amounts as an addition to the regular grain feed. It is equally good and very profitable to use for Horses, Colts, Fatening Cattle, Cows, Calves, Hogs, Pigs, Sheep or Lambs, because it Purifies the Blood, Tones Up and Permanently Strengthens the Entire System, Keeps them Healthy and Greatly Aids Digestion and Assimilation so that each animal obtains more nutrition from all grain eaten. In this way it saves grain and will make you a large extra profit. We have thousands of reliable testimonials on file in our office, and every pound of "International Stock Food" is sold, by over 150,000 dealers, on a "Spot Cash Guarantee" to refund your money if it fails to do as claimed. It is used by over Two Million Stockmen throughout the world. If you desire any further information write to M. W. SAVAGE, Proprietor of International Stock Food Co., International Stock Food Farm.

HIS TRAINER SAYS DAN WILL ASTONISH THE WORLD IN 1907. WATCH LEADING FAIRS.

## Dan Patch 1:55, The Pacing King, Cresceus 2:02 1/4, The Trotting King, MARVELOUS PICTURE OF WORLD CHAMPIONS.

THIS BEAUTIFUL PICTURE IN 6 BRILLIANT COLORS MAILED TO YOU FREE.

We have just published a large, colored lithograph of the above Photo-Engraving, which shows our World Famous Stallions, Dan Patch 1:55 and Cresceus 2:02 1/4 in an Exciting Contest and at Extreme Speed. The picture is 16 by 21 inches and shows both horses in their natural colors and as life-like as if you saw them racing on the track. You can have one of these Large and Beautiful Colored Pictures of the Two Most Valuable Harness Horse Stallions and Champions of the World, Absolutely Free and we will prepay the postage. This picture was made from life and every lover of a great horse should have one, as it is pronounced the best motion picture ever taken.

WRITE FOR ABOVE PICTURE AT ONCE.

1st, Name the paper in which you saw this offer. 2nd, State how much live stock you own. We will then mail the picture promptly.

INTERNATIONAL STOCK FOOD CO., MINNEAPOLIS, MINN., U. S. A.

### THE WORLD'S MOST FAMOUS HARNESS HORSE FARM.

International Stock Food Farm of seven hundred acres, owned by M. W. Savage, is generally acknowledged to be the most famous harness horse farm in the world. BECAUSE it owns the Four World Champions Stallions, DAN PATCH 1:55, Champion Pacer and Fastest Harness Horse in the World. CRESCEUS 2:02 1/4, the Champion Trotting Stallion of the World. ARION 2:07 1/4, the Champion 2 and 3-year-old Trotting Stallion to high wheel talk. DIRECTUM 2:05 1/4, the Champion 4-year-old Trotting Stallion. Also Roy Wilkes 2:08 1/4, the first stallion to beat 2:10 and World Champion for four years. All of these stallions and the one hundred brood mares and their colts are fed "International Stock Food" every day. You are specially invited to visit this farm at Savage, 10 miles from Minneapolis, and see the every day, practical results of feeding International Stock Food. 3 Feeds for One Cent.

AFTER EATING "INTERNATIONAL STOCK FOOD" EVERY DAY FOR FOUR YEARS DAN PATCH OPENED THE SEASON OF 1906 AS FOLLOWS: First Start, GALESBURG, 1:57 1/4. Second Start, DUBUQUE, 1:58. Third Start, MINNESOTA STATE FAIR, 1:58 1/4. Fourth Start, MINNESOTA STATE FAIR, 1:55.

ers make the mistake of hauling loads that are too small. I have seen men haul a thirty or thirty-five bushel load of corn ten miles when the same team would have taken fifty bushels without hurting them in the least. I like to load to the limit and let the horses take their time.

An eastern funnyman has solved an important house-wife's problem. Instead of having the men tracking mud into the house, he has them all trained athletes and as soon as they enter the door they walk in on their hands with their feet in air.

I wonder why it is that all the smart things are said by our neighbors' children and not by ours? Recently a little neighbor girl heard her father say that his father was an optimist, and surprisingly remarked, "Why, papa, I thought he was a farmer!"

A great many people think that a gray horse will do more work in hot weather than will a horse of any other color. The reason for this is that the gray hair does not absorb the heat rays to anything like the same extent as will dark hair.

The enthusiast or boomer in the live stock business is generally short-lived and a harm to the business. It is the conservative, thoughtful breeder who buys and sells for living prices that will leave the breed benefited when he retires.

There are a number of Iowa senators and representatives now in session at Des Moines who do not know how to vote on state fair appropriations. There is one item asked for, namely, \$75,000 for a swine pavilion, and if we mistake not, the people of Iowa want that pavilion. There is only one way to get it, namely, by politely informing your senator or representative by letter that it is your wish, if so it be, that the appropriation for the swine pavilion be not only favored, but fought for. Many of them are waiting for light on the subject, and we believe that our readers are the ones to shed the right kind of light on the situation.

### AMERICAN BERKSHIRE CONGRESS.

The annual session of the American Berkshire Congress was held at Springfield, Ill., February 20-21, 1907. The meeting was largely attended by the representative breeders residing in Canada and all portions of the United States. The most successful breeders, exhibitors and sellers of Berkshires, presented papers to the congress on every line of effort, in connection with the swine business, and the large number of prominent breeders present, freely participated in the discussion of every topic of interest to the practical and progressive swine breeder.

The four-day and one-evening session were devoted to the study of practical questions pertaining to the breeding, care, exhibition and sale of Berkshire swine.

The meeting can but give a great impetus to the effective campaign that has been conducted for some years past, by the more progressive breeders interested in the further improvement of the breed. A much greater increase in the demand for good Berkshires is likely to follow. A leading feature of the Congress was the enthusiastic exchange of congratulations on the present prosperous conditions and future prospects for still better demand for high class Berkshires.

There was a strong representation of breeders from the South in attendance and in recognition of the large number of good herds of Berkshires recently established in the southern states, it was unanimously voted to hold the next session of the congress at Nashville, Tennessee.

The trade of the past year has been the best on record and there was no lack of assurance in the minds of all present for a continued increase in the home and foreign demand for Berkshires.

The officers elected for the ensuing year are as follows: President, A. J. Lovejoy, Roscoe, Ill.; vice president, J. M. Overton, Nashville, Tenn.; secretary, Charles F. Mills, Springfield, Ill.

Directors: W. H. Coffman, Bluefield, West Va.; N. H. Gentry, Sedalia, Mo.; J. D. Kirk, Roanoke, Va.; G. S. Prine, Oskaloosa, Iowa; C. S. Sutton, Lawrence,

**HIDES TANNED** SEND YOUR HIDES TO US They are valuable. Don't trust them to unreliable tanners. We are the oldest, the largest and most reliable tanners in the Northwest. Write us for price list. J. H. Cowles Glove Co., Des Moines, Iowa

Kan.; C. D. Woodbury, Lansing, Mich. State Berkshire associations are in successful operation in the states of Illinois, Indiana, Iowa, Michigan, Missouri, Nebraska, Ohio, etc., and there is a provincial association in Ontario, Canada.

Why Not Visit California this winter? There will be an especially low rate during March and April—colonists' second-class one-way tickets \$33 from Chicago. A corresponding reduction in rates will be made from all points on the North-western Line.

Our daily and personally conducted tours offer many advantages to the traveler, among which is our service of Pullman tourist sleeping cars, through without change Chicago to San Francisco, Los Angeles or Portland, in which a double berth costs only \$7.

First-class round-trip tickets with very liberal return limits are sold daily. Consult the nearest agent of the North-Western Line for full information regarding rates, routes, etc.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscription, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

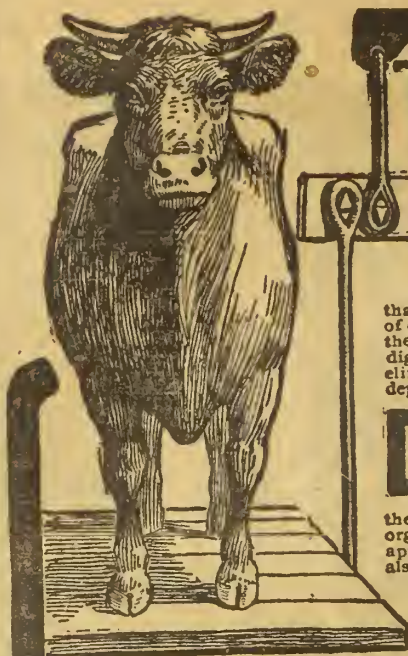

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## PREMIUMS ON HEREFORDS.

At the recent annual meeting of the directors of the American Hereford Breeders' Association the sum of \$20,000 was appropriated for premiums at the various 1907 expositions and fairs. Premiums will be paid in thirty-two states and in addition Mexico is embraced in the list. The American Royal held at Kansas City and the International at Chicago, were each appropriated \$4,000, while Ft. Worth is given \$1,000 and St. Joseph \$300.

Arrangements were made to hold sales under the auspices of the directors at Kansas City, Chicago and Denver. At the two former places fifty head will be sold and at Denver 100 head. Members of the association will be permitted to con-

## The FINISHING PERIOD

It requires more feed to produce 100 pounds gain on a fattening steer the second six months than it does the first, and more each month thereafter than the month previous. The advantage of early marketing is evident, but early marketing requires skillful feeding. Every function of the digestive apparatus must be kept in perfect condition. The matter of growth is a matter of digestion. Crowding is always dangerous unless certain precaution is taken to assist nature in eliminating or expelling from the system, waste and poisonous residue that is sure to be deposited under heavy feed.

## DR HESS STOCK FOOD

the prescription of Dr. Hess (M. D., D. V. S.) contains bitter tonics which act upon the digestive organs, strengthening and improving them so that the largest possible amount of nutrition is appropriated to building bone, muscle, milk fat, etc., and besides looking after the supply, it also takes care of the overflow—it contains the nitrates which assist nature in expelling through the pores of the skin, and in the urine, those elements that would be harmful if allowed to linger in the system. Furthermore, Dr. Hess Stock Food furnishes iron, the greatest known blood builder, and is mildly laxative, regulating the bowels during the period of dry feeding as though the animal was on pasture, and relieves the minor stock ailments. That bitter tonics, iron, nitrates of soda and potash produce the results above mentioned we refer to Professors Quitman, Winslow, Finlay Dun, and every medical writer of the age, and sell Dr. Hess Stock Food on a written guarantee.

100 lbs. \$5.00  
25 lb. pail \$1.60

Smaller quantities at a slight advance

Except in Canada  
and extreme  
West and South

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our government recognizes Dr. Hess Stock Food as a medicinal tonic, and this paper is back of the guarantee.

**FREE from the 1st to the 10th of Each Month**—Dr. Hess (M. D., D. V. S.) will prescribe for your ailing animals. You can have his 96-page Veterinary Book any time for the asking. Mention this paper.

DR. HESS & CLARK, Ashland, Ohio.

### The Week in Kansas.

To the Editor of The Homestead:

This is the ending of the second week of spring, for the year 1907, in Kansas. Just what the next week will be, no man can tell, but we have enjoyed spring-like weather ever since our last letter, and that, too, during the time when Mr. Hicks was going to have one of the severest blizzards of the winter sweep the state.

All sorts of work has commenced on all sides. No one has commenced sowing spring grain yet, but plowing has been started; work of building goes on, and grain is being marketed over the fast-becoming excellent roads. To all intents and purposes, it is spring, but we feel that it may be temporary spring—that it is still too early for this fine weather to come as a season.

Corn has gone up to forty cents; that is the feeders to the west of us are now offering this price. In other localities it is not so high, but very few are selling for less than a forty-cent price. Corn is now considered by most everyone the same as cash, and there is not the hurry to sell "before the price goes down," that was noticeable a few years ago.

The public sales are being crowded in as thick as ever. One could go each day until March 1st, and then not get far from home, but attending two or three in a year satisfies us, unless there is just nothing else to do, a rare thing on this farm. Everything continues to sell

## Will You Try Them at our Risk?

### OUTWEARS TWO PAIRS

READ THIS OFFER

If you buy a pair of Rubberhide boots and find that they do not outwear two pairs of best quality rubber boots, we will refund to you the money you paid for them.

We say two pairs, but experience shows that they outwear three and four pairs of ordinary boots.

## RUBBERHIDE BOOTS

The Rubber Boot With A Leather Sole

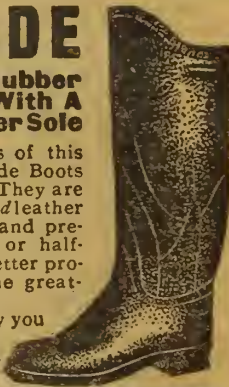

We want one thousand readers of this paper to try a pair of Rubberhide Boots at our risk. See our guaranty. They are the only rubber boots with a sewed leather sole; They keep your feet dry and prevent sweating. Can be tapped or half-soled by any cobbler. Give better protection, greater comfort and the greatest economy.

If your dealer cannot supply you

BAYER TANNING CO.

1206 W. 9th St. - Des Moines, Iowa.

for high prices. No one seems to have got enough, even though the chances to do so have been numerous. At some of the sales there is the usual amount of buying on time, but at many everything changes hands almost altogether on a cash basis.

It is now barely more than a week to the first of March. Much of the moving has already been done. There are no farms left to rent, as most all were spoken for during the fall. The renter has to hunt the farm here now, instead of the farm owner hunting the renter, and then there are a few who are being left without a farm. There is usually plenty of farm-land to lease, as many farmers will have from twenty to forty acres more land than they care to farm, but the houses out on the farm, in which to live, are scarce.

The weather this evening is cooler. The wind is in the northeast, a stormy quarter, and the few clouds in sight give warning of a possible storm to come.

Henry Hatch.

**CLOVER SEED** Famous Madison Co., Ia., grown over seed from any other section. A delight to the lover of pure seed. \$8.50 and \$9.00 per bushel. Fancy timothy, \$2.00 per bu. Shipper holding 2 1/2 bu. Be quick; supply limited. Write for samples. Miles Young & Co., Winterset, Iowa.

## What a Bare Spot Means

Watch closely for the first indication of lice on cattle. Don't wait till they are infested, and rub themselves bare in their misery. The wisest course is to dust Instant Louse Killer into the hair along the back, and at base of tail and horns, whether you see signs of lice or not. If there is a louse on the animal this powder will kill it.

## Instant Louse Killer

does it's work thoroughly—kills lice on poultry, horses, cattle, ticks on sheep, bugs on cucumber, squash and melon vines, cabbage worms, slugs on rose bushes, etc. It is also a standard disinfectant and deodorizer. Guaranteed. Comes in shaker-top cans, and being a powder, may be used in cold weather as readily as in hot weather. Look for the word "INSTANT" on can, as there are many imitations.

**DR. HESS & CLARK,**  
Ashland, Ohio.

## PROFESSOR HENRY RESIGNS WISCONSIN STATION DIRECTORSHIP.

At a recent meeting of the board of regents of the Wisconsin University, Prof. W. A. Henry tendered his resignation and asked that this be made effective at the close of the present school year. For two years Professor Henry has urged the regents to grant him this favor, but has always been dissuaded by the board in his desires. At the meeting referred to, however, the board

PROF. W. A. HENRY.

reluctantly accepted Professor Henry's resignation, so that in the future he will serve this great university in the capacity of emeritus professor.

There are but few of our readers who are not familiar, directly or indirectly, with the work of Professor Henry, who, for twenty-seven years, has been connected with the Wisconsin University, and who has, for twenty years, been director of the experiment station and for sixteen years dean of the college of agriculture.

There has been no investigator of agricultural and live stock problems who, during all this time, has been quoted more by The Homestead. Professor Henry's work began at a time when agricultural education was unpopular and was therefore not in demand. Indeed, it was scorned by the very class of our citizens whom it was destined to benefit. In few fields has pioneering been found so difficult as was the case in the field of agricultural instruction and agricultural experimentation, and our whole agricultural education system is deeply indebted to the great men who have been leaders in this work and who have persisted in it to the end. Among these men Professor Henry stands at the very top—at the top in what he has accomplished for sensible education in general and for what he has done for the agricultural interests of Wisconsin.

In a degree possessed by few in his line of work Professor Henry had the faculty of surrounding himself with strong men, than which there is no better or stronger evidence of a really great man. Such names as Babcock, Russell, King, Farrington, Woll, Craig and Carlyle are known to the world because of their work at the Wisconsin University and Experiment Station, and if Professor Henry had done nothing more during his administration than to create opportunities for these men to do their good work, his name would go down in agricultural history as one of the foremost men of his time.

But, independent of his co-workers, Professor Henry has pursued a line of investigation that has resulted in greatly benefiting the live stock interests of this country. We refer to what he has done in solving problems relating to the feeding of live stock. His work in this line culminated in the publication of his great book, "Feeds and Feeding," which has always been looked upon as the standard work of its kind. Professor Henry combined in a marked degree the rare talents of teacher and investigator, and as teacher he has done much for Wisconsin agriculture through the medium of the farmers' institute. As a worker along that line no man stands higher today and the hope of the Wisconsin people is that with the cessation of his activity, as applied to the duties of the great educational institution, there will be created only larger opportunities for him, as his health permits, to serve the people in this great and useful field.

E. J. Brown Averages \$81.

The sale of Duroc Jersey bred sows made by Mr. E. J. Brown, of Osceola, Neb., on February 21st was a decided success. Although the day was very cold and bad a large crowd of breeders and farmers gathered to see one of the best offerings yet put up before the public this year. The top sow sold for \$815, she going to Mr. Smith Brown, of Waterloo, Neb. This great sow, Fancy Maid, was second-prize sow at Nebraska in 1905, second also in 1906 and promises to make a stronger show this year than ever. The entire consignment was sold at an average of \$81. Below is a list of those selling for \$50 and over:

Lot.	Name	Price.
1.	Smith Brown, Waterloo, Neb.	\$815.00
2.	E. R. Danielson, Osceola, Neb.	77.00
3.	R. N. Youngquist, Stromsburg, Neb.	72.50
4.	O. Westberg, Osceola, Neb.	52.50
5.	O. C. Dorsey, Osceola, Neb.	60.00
6.	G. E. Samuelson, Osceola, Neb.	67.00
7.	Smith Brown	100.00
8.	Con McCarthy, Henderson, Neb.	70.00

## IMPROVEMENTS ON IOWA STATE FAIR GROUNDS.

Doubtless the great majority of our Iowa readers are aware of the fact that the state board of agriculture has asked the present legislature for an appropriation of \$160,000 for permanent improvements on the fair ground. Three items are included in this sum, namely, \$75,000 for a swine pavilion, a similar sum for a steel amphitheater and \$10,000 for the purchase of additional land.

Unless we stop to analyze the situation this lump sum may seem a little large, and yet when one considers the magnitude of this great institution and contemplates, in connection therewith, the fact that up to date the state has only appropriated during the last twenty-three years the sum of \$179,509 for permanent and temporary improvements and for contingent expenses, it appears as though here is a great state institution that has been seriously neglected up to this time. It almost places Iowa in a humiliating position when she looks to her neighboring states and finds that Illinois, for example, has appropriated for their state fair the sum of \$880,000; Minnesota, \$324,000; Ohio, \$880,000, and Missouri with its fair established only in 1901, the sum of \$472,000.

Last week the senate and house appropriation committees gave a hearing to members of the state board of agriculture and to representatives of the swine breeders' association. In pointing out the urgent need of better quarters for housing the swine exhibits, John C. Simpson, secretary of the state board of agriculture, said:

It is unnecessary for me to refer to the immensity of the hog exhibit at the state fair, but to simply tell you of the conditions and poor accommodations which exhibitors have to put up with. Of all the poorly-equipped, inconvenient and unsanitary quarters provided for the showing of hogs at any of our great state fairs or stock shows, Iowa stands in a class by herself, and this in the face of by far the largest and best show of its kind the world over. The swine breeders of Iowa, a state that produces annually one-eighth of the hogs raised in America, and one-seventeenth of the entire world's supply, to these men, I say, it is an insult to longer ask them to put up with the conditions and barns now at the grounds. Not only are the old barns unfit and unsanitary to show in, but the quarters are so cramped that it is impossible to get in with team and wagon to remove the daily litter when sleeping tents are put up and crates piled up beside the barns. Last year the department was so crowded that not even space could be had large enough to put up a tent to shelter one herd of hogs that had been brought in without the owner previously engaging his pens from the superintendent. The ground where the present sheds are located is so low that during the rainy week two or three years ago the exhibitors were driven out of their tents in the middle of the night by the water.

Mr. W. D. McTavish, president of the Iowa Swine Breeders' Association, appeared before the committees following Mr. Simpson. He pointed out the fact that the swine department, the greatest department of the fair, had never received the appropriation of a single dollar from the state, in spite of the fact that Iowa stands at the very head of the list as a hog producing state, the total value of her hogs being practically twice that found in any other state. Mr. McTavish, after dwelling on the inconvenience and unsuitability of the present quarters, referred to the unspeakably unsanitary condition of the present equipment. The floors are of such construction as to render thorough disinfection an absolute impossibility, consequently, although the annual display is mammoth, it is not as large as would be the case if there were less

## This is the Harness I Make and Sell You Direct By Mail for \$24. Your Dealer Would Ask You \$35 for It.

All Shipments On Approval

WHEN you were a boy you went 'cross lots when you wanted to get there in a hurry. You didn't care for fences—you went right over them.

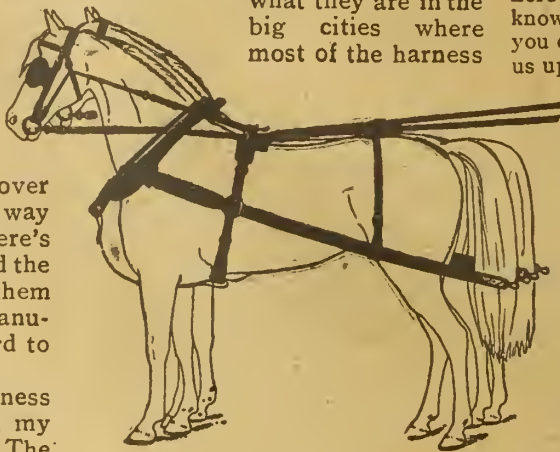

Now when you buy harness why don't you buy by the 'cross-lots method? In the old way there are a lot of fences and if you don't climb over them it's a long, round-about way from harness maker to you. There's the fence of the wholesaler and the fence of the retailer—jump them both and go straight to the manufacturer. You will save a third to a half.

I make 50 styles of good harness and I make them right here in my own factory in Waterloo. The whole business is under my own supervision. I know the men and I know what they can do. They are all skilled harness makers and I pay them enough so they feel right and do good work.

I use only the best oak-tanned leather—I buy every bit of it myself so I know what's going into my harness as well as how it is made.

There's cheaper harness sold than mine but as far as I've been able to find out there's no harness anywhere near as good as mine

that is sold for as little money. Our expenses here in Waterloo are low—very low compared with what they are in the big cities where most of the harness

sold by dealers and mail-order houses, is made.

And then, when you buy from us you are paying only one profit and that's not a very large one. We believe big sales at small profits are better than big profits and small sales.

I've told you about the harness—how good it is and how we save you money. Now I want to tell you about our firm. There's not a more reliable and honest concern in the country than the Western Harness & Supply Co. The men that

are associated with me are men who stand high in this community. You can ask any Bank or Express Company right here in Waterloo, where we are best known, what sort of fellows we are, or you can go to your own bank and look us up in Dunn or Bradstreet.

All our shipments are made on approval. If you are not satisfied with the harness when you get it and have examined it, you are to send it back and your money will be refunded together with transportation charges both ways.

As I said before we make 50 styles of harness—all are good and all are sold at a mighty low price but the set illustrated here we call our "leader." The cut gives you a fair idea of it. It's a genuine bargain—a splendidly made 1½-inch team harness, strong and stylish in appearance and made of the very best grade oak-tanned leather. It is actually worth more today than it was when we made it up, because leather is advancing in price, as you may know.

So, if you want this special harness value, please order promptly. Just send me the money, \$24, and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways, if you are not perfectly satisfied.

My big, free Harness book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address R. M. Knox, Pres.

Western Harness & Supply Co.,  
613 Main Street, Waterloo, Ia.

danger of spreading disease. Mr. McTavish stated that there have been many instances where men have lost their entire herd from disease which was contracted at the state fair, and he pointed out that with a properly constructed building it would be entirely practicable to so disinfect as to completely remove the danger of spreading disease throughout the state. He called attention to the fact that as president of the swine breeders' association he was importuned on every hand, by the breeders of pure-bred hogs as well as by those who raise swine for pork, to use every legitimate means to secure the appropriation asked for the swine pavilion.

The editor of The Homestead, James Atkinson, also appeared before the appropriation committees in the interests of the swine breeders. He stated that swine breeding and feeding was Iowa's most profitable industry and yet one that up to date has not been recognized by any appropriation from the state by way of encouraging the exhibiting of pure-bred swine. No feature of the fair, according to Mr. Atkinson, is more educational in its effect than the swine department, though conditions for sight-seeing and for instruction at the present time are deplorable. The great bulk of the people who attend the state fair come from the farms, and as every

farm in Iowa produces hogs, it is but natural that men, women and children alike should inspect this department. The state, therefore, should make sight-seeing in this department more educational and more pleasurable. Attention was called to the fact that the pure-bred swine industry of Iowa is the foundation stone on which the pork industry rests. The breeder of grade hogs must look to the man who raises pure bred for his males in order to keep up the stamina, feeding ability and quality of his stock, and therefore it is but reasonable that the state should come to the aid of all classes of swine breeders, both grade and pure bred, by appropriating the sum asked for this pavilion in order that the production of better hogs by the people of the state may be encouraged.

He stated that, after all, the greatest need for the new swine pavilion was due to the fact that in the future more must be done to prevent the spread of swine disease than in the past. Successful disinfection is impossible now, but with the plans prepared by the department of agriculture put into a structure it would be entirely feasible to absolutely suppress, stamp out and prevent the spread of disease. There is nothing, said Mr. Atkinson, that this legislature can do that will please the great majority of the people out on the farms in the state so much as the appropriation of the \$75,000 asked for this swine pavilion.

Just what the action of the legislature will be on these appropriations we cannot say, but we feel that our readers have a duty to perform if it is expected to bring these things to pass. If your legislators fail to favor the appropriation for the swine pavilion it will be simply because their constituents have not taken enough interest in the question to make known their views. We believe that all our Iowa readers would like to see this pavilion erected in 1907, and we believe that the present legislature would willingly grant the appropriation if they believed that there was a majority demand for it. Now, as a matter of fact, there is throughout the state a great majority who favor this appropriation, so that we suggest that communication at once be established between the farmers of Iowa and the state legislators relating to this swine pavilion matter. Let each man express his own views in his own way, but do not fail to express

## What Co-operation Has Done Farmer's Friend Separator

Costs You Only \$55 Delivered

WE farmers of Iowa have broken away from the creamery trust and are manufacturing and marketing our own dairy products. During the past eight months, we have forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa. Now we are saving money in another way—on farm supplies, and our offering of the Farmer's Friend Cream Separator gives you a fair idea of the saving.

This Separator is made for our members, in the best cream separator factory in the world, and we fully guarantee it to be as good as any \$90.00 Standard separator ever made.

Just think of the difference in price, \$35.—Thirty-five dollars just as good as thrown away as far as you are concerned. Thirty-five dollars—not of separator value and efficiency, but of big profits for the manufacturers. It was only by getting nearly 2,000 farmers together, (there are more of us now) that we could force this reduction.

But we have it now, and we want every farmer in this part of the country to know about it. We organized to benefit the farmer and we want to help just as many as we can. Space will not permit us to describe the "Farmer's Friend" fully here. Send for our catalog. We have selected a number of articles on which we are able to offer remarkably low prices. We save you from 20% to 50%. Write today.

Capacity, 450 to 600 Lbs.

FARMER'S CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.

February 28, 1907.]

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

THREE HORSE equalizers for wagons, manure spreaders, disk, etc. Patented June 26, 1906. Price, \$5.50 each. The patent is for sale W. F. Maas, Muskegon, Iowa.

CORNS can be cured without pain, says Mrs. J. Gustafson. Positively cured after 25 years of suffering. Address, 2103 Portland Ave., Minneapolis, Minn.

## USE IOWA Seed Corn If You Want Perfect Corn.

Iowa stands at the head as a corn growing state. The soil and climate here are specially adapted to it and practically all the best varieties have originated with us. Seed corn has been our great specialty for over 20 years, and we are the largest dealers in the U. S. It will pay you to try our

### BIG 4 FOR 1907

**New Golden West.** The nearest perfection of any corn ever offered. Notice cut showing depth of grain, smallness of cob and how well it rounds out over both tip and butt. Ears large and solid; bright golden yellow. Matures in 100 days. Per pk. 65c; bushel, \$2.00; 10 bushels, \$17.50.  
**Iowa Silver Mine.** Has the reputation of being the most productive of all. Yielded 215 bushels per acre in the great corn contest. Per peck, 60c; bushel, \$1.60; 10 bushels, \$14.00.  
**Iowa Gold Mine.** Deepest grained pure yellow variety. Matures in 95 days. A veritable mine of wealth for farmers. Per peck, 60c; bushel, \$1.60; 10 bushels, \$14.00.  
**Farmer's Reliance.** Earliest dent corn in existence. Matures in 85 days. Double the size of Pride of North, with deep grain. Every farmer should plant this extra early. Per peck, 60c; bushel, \$1.60; 10 bushels, \$14.00.  
**SPECIAL OFFER.** One peck each of above for \$2.00; one bushel of each, \$8.25. Above prices are for thoroughly tested seed from selected ears. Write today for a copy of our large, illustrated catalog, describing all the best varieties of Seed Corn, Oats, Wheat, Potatoes and all other farm and garden seeds. If you mention this paper in your request we will also send small samples of all of the above varieties. **FREE**

IOWA SEED COMPANY, Des Moines, Ia.

## BLIZZARD BELT FOUR HARDY EVERGREENS FREE

We grow our "Blizzard Belt" Evergreens in ten million lots. To advertise them and prove that they are healthy, well rooted and vigorous, we offer to send four fine sample trees 3 years old, free to a limited number of property owners. Mailing expense 5 cents, which send or not as you please. A postal will bring them. Last year we distributed 500,000 of these sample evergreens and gained thousands of new friends. This year we have

### Reserved 600,000 Trees

for this free advertising distribution and if you want your share of them write at once for they will go fast. W. H. Gibboney, Mandan, North Dakota writes: "Please accept thanks for the sample evergreens. They are doing fine." This is but a sample of thousands of letters. Our catalogue containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens, etc., with a mine of valuable information for fruit growers, is free for the asking. Write to-day.

THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.

## New Bavarian Oats

A great money-yielder for every farmer. It comes from Bavaria, Germany. It would be wise for you to put all your oat-land to this variety for it's a signal winner. Grows heavy, well-filled, fat grains full of meat and with small percent of nib. The straw is firm, rigid and persistently resists strong winds and soaking rains so that it does not lodge or get tangled. Price, 1 lb. 20c postpaid; Peck, 30c; bushel \$1.00; 3 bushels for \$2.50. Purchaser pays freight.

**Big Four Oats.** A medium early, white oats, sold by us for several seasons with satisfaction to all. Pound, 20c postpaid; Peck, 25c; bushel, 75c; 10 bushels, \$6.00. Special price for quantity. Headquarters for Garden, Flower and Field Seeds; for garden tools, etc. Write now for our free catalog.

The W. W. Barnard & Co., Dept. G, 161 Kinzie St., Chicago.

## KHERSON SEED OATS.

THE NEW KHERSON OATS were originally imported from Russia by the Nebraska State Experimental Station, and have proven one of the surest croppers and largest yielders, as well as best sorts ever introduced into this country. THEY DO NOT RUST OR LODGE as many other sorts do, and are fully two weeks earlier than others. In addition to these we have the New Sensation, Early Champion, Lincoln, Texas Red-Rust-proof and other extra early sorts. Prices 50 to 75c per bushel, bugs included. Write for our Big Illustrated FREE Catalog. A postal will bring it. Address,

RATEKIN'S SEED HOUSE SHENANDOAH, IOWA

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties. We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16 W. W. VAN SANT & SONS Farragut, Iowa.

## SEND US YOUR ORDER FOR CORN GARDEN SEED

WE are the most extensive Field and Garden seed growers in the middle west. All seeds thoroughly tested before shipping. Write us for our 1907 handsome illustrated catalog. A. A. BERRY SEED CO., Box 5X, Clarinda, In.

## BURPEE'S SEEDS

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### Some Garden Hints.

To the Editor of The Homestead:

The farmer who does not take the time to properly prepare a strip of ground for a garden, and even who does not go a little further and put it in, is generally very severely condemned for his thoughtlessness. It is right that he should be condemned and it would be even well if he could be punished. Nevertheless, on the average farm in the corn belt it is a very difficult matter to find the time to care for a garden properly.

It is not the actual money value of the produce grown in a garden that must be considered so much as it is the convenience of having all kinds of fresh vegetables and the necessity for same. Whether we like it or not, we must have gardens, and I propose to give my fellow readers a few hints that may save a little time.

Do not make the garden too large; take the time to figure out how much space it will require for each vegetable that you propose to grow. There is no advantage in having large quantities go to waste. This is one of the weakest points in the farm garden system, so I would say, first, cut down the size.

The next point I would emphasize would be to put it in rows far enough apart so that most of the work may be done with a horse. Last year we made a mistake and put the rows twenty-one inches apart and found that it was almost impossible to put a horse in between the rows after the vegetables had made any considerable growth. It is my intention to put the rows in the future at least twenty-eight inches apart, and where large horses are used I do not know but what thirty would be better.

Bear in mind that it is not necessary to put the same vegetable the entire length in one row. One can, for example, put parsnips in part of a row and possibly lettuce in the balance. Just as soon as you start using these vegetables you can put in more seed and keep the ground producing during the growing season.

When it comes to the matter of putting in peas and beans I have found it a good plan to plant two rows close together, say a distance of ten or twelve inches apart, and then leave a space between each pair of rows sufficiently wide so that a one-horse cultivator may be used. You can then put some kind of wire network in between the two rows for climbing purposes.

The Little Planet Jr. hand weeder is a tool that will pay for itself in one year in any garden. It can be used when the vegetables are too small for horse cultivation, and one will do as much with a little cultivator in five minutes as you will do in half an hour with the hand hoe. One had better not put in a garden unless he makes up his mind before doing the seeding that it will be kept clean, and if you plan it so that you can do the work with a horse and will, in addition, use the wheel hoe as referred to, comparatively few hours of work will put in and properly tend all the garden needed on the average farm.

### Blackberries.

To the Editor of The Homestead:

Blackberries have, perhaps, been given the lowest place in respect and attention in the fruit garden, but it is probable that a change will take place in the popular estimation of this fruit. It may be the reason is that it is found wild in such profusion and that the wild fruit is good enough to compete with tame in some degree. Another reason may be that it is so hardy and so easily grown.

But I, no doubt, as well as others, am coming to the opinion that they are as profitable, acre for acre, as almost any fruit that can be raised and that they are growing in favor with the public. On our own table I find that blackberry pie ranks second to none and that the jaded appetite turns to the tart and vinous flavor of this fruit in preference to any other. It is true that, box for box, they average cheaper than the raspberry, but the same cannot be said

## How Did Your Crops Turn Out?

### Were they Profitable?

No other Seeds are as reliable and productive as our renowned Faribault grown Seeds, which we grow ourselves from pedigreed Seed Stock. Through 15 years of scientific breeding and most painstaking methods we have produced the hardiest, earliest and the most productive Vegetable Seeds. They produce the largest yields regardless of soil and climate. Try our Glory of Enkhousen Cabbage, extremely early and large, round solid heads; also our Faribault Red Globe Wethersfield Onion Seed, a model in fine type and great productiveness. For 10c. we will send you a package of each.

If you want to produce the largest and best crops of Vegetables, Potatoes and Seed Grain, write for our large, illustrated catalog, English or German—sent free.

**HEALTHY TREES** HONEST IN QUALITY  
WE PAY FREIGHT  
Grafted apple 40, budded peach 40, budded  
cherry 100. Concord grapes \$2 per 100.  
Black Locust \$1 per 1000. Complete colored  
cat. free. Galbraith Nurseries, Box 82, Fairbury, Neb.

it, by no means, always does. The  
larger, later kinds always bring good  
prices if they are large and juicy. When  
we consider how easily they are grown,  
how sure a crop and how abundantly  
they bear, we cannot clear ourselves of  
the charge of not treating the black-  
berry with the care and respect that it  
really deserves.

The blackberry has rather lagged be-  
hind in the race for improvement, most  
of the prominent varieties of today be-  
ing the same as twenty years ago, but  
during the last year or two quite a  
number of new varieties have been  
brought out with more or less claims of  
superiority. Most of these I have tested  
one or more seasons. Blowers and  
Wards fruited for me last year and pro-  
duced large, fine berries, but it is im-  
possible to estimate the market value  
for a variety in one season. For example  
the much advertised Mersereau fruited  
the second time last year and one out  
of the half dozen bushes took the rust.  
That condemned it with me. A variety  
must be rust proof to have commercial  
value. I have never seen a better all-  
round variety than the Kittatinny, but  
its susceptibility to rust dooms it, al-  
though it is said to do well in favored  
localities. I fruited it three years be-  
fore it took the rust, but when it did,  
hardly a plant in the acre was exempt.  
The one new variety whose trial over  
the country seems to have verified most  
of the claims made for it, is the Eldorado.  
It is a berry of good size and extra  
fine quality, perfectly hardy and rust  
proof, and the only criticism I could  
make here is that it lacks vigor of  
growth, but I have it on thin, dry soil.  
On heavy moist land no doubt it would  
be satisfactory. The Erie is an older  
kind, but not well known, that I con-  
sider one of the best market berries.  
It is almost round and of the largest  
size. I do not hear that it ever rusts.  
It is very vigorous in growth and a  
heavy bearer, but it is not a good fam-  
ily berry because it is sour unless dead  
ripe.

A splendid berry is the Early King,  
not so early as the Early Harvest, as  
has been claimed, but a week later. It  
is one of the sweetest berries that grows  
and I strongly recommend it for fam-  
ily and market. It is a large, heavy  
bearer and so much like a good dew-  
berry in flavor that my customers mis-  
take it for that.

Another good berry is Taylor's Pro-  
lific, very sweet, hardy, vigorous and  
the latest of all. Plant it for late ber-  
ries. In conclusion I would urge to  
give the blackberry deep moist soil and  
it must be good enough to enable them  
to make a strong annual growth. I  
have never seen a berry overfed.

Missouri. L. R. Johnson.

### The Exposure of an Orchard.

To the Editor of The Homestead:

The following inquiry has been for-  
warded from one of our subscribers, Mr.  
Walter A. Hoffline, of Washington coun-  
ty, Kan.:

In a recent issue you published an article  
on horticulture by L. R. Johnson. It was  
just what I was wanting. In addition, I  
would like to ask if a northern exposure in  
this locality would be best for pears, and  
if they are as hardy as the peach as far  
as cold is concerned. What variety would  
you plant? Is the Worden Seckle pear an  
improvement over the Seckle? Is Wismer's  
Dessert apple a reality, and is it desirable  
to plant it in this locality? Also would the  
Apple of Commerce do well in this lo-  
cality? I have a piece of ground, about  
one-half acre, that is underlaid with water  
at a depth of three feet. It is on the east  
side of a stream and slopes to the west,  
about six inches to the rod. The ground is  
very rich, something like muck. What is  
the best for it? Would quinces or pears  
do well on it, provided I plowed it in ridges  
to drain off as much surface water as pos-  
sible?

In answer to these questions I will  
first say that a northern exposure is  
considered good for any variety of  
fruit, but especially for early bloom-  
ing kinds like the peach. Pears are  
usually hardier than the peach and do  
not bloom so early. Both Worden-  
Seckle and Wismer's Dessert apple are  
varieties of late introduction that have  
not yet been well tested throughout the  
west; I should not therefore advise to  
plant them for market purposes until  
they have been tried in your locality.  
Planting untried varieties is a very haz-  
ardous experiment. The same objection  
applies to the Apple of Commerce. The  
glowing descriptions of new varieties  
found in many catalogs are very al-  
luring, especially to beginners in horti-  
culture, but they should be stoutly re-  
sisted except to buy one or two speci-

## "True Temper Tools Mean Good Tempered Gardeners"

THE right tool for each kind  
of work is real economy in the  
garden.

A saving in time and labor.

It wouldn't take much argument  
to prove that the man who tries to  
do it all with a spade and hoe  
works a good deal  
harder and accom-  
plishes far less than  
his neighbor with a  
complete supply of  
Garden Tools.

And he thereby  
loses money, too.

Ask the garden maker. He will  
tell you that the man who can go to  
his toolhouse and get just the tool  
he needs for each kind of work, will  
soon save enough time at 15 cents  
an hour to pay for a good outfit.

Think of the pleasure of doing  
things right, too.

You not only want the right kind  
but the best kind of tools.

That's the True Temper line—  
"The best tools you have ever  
bought at the same prices you have  
always paid."

Not a tool is allowed to receive a  
True Temper label at our factories un-  
til it has shown un-  
der the most severe  
tests that it is true  
in quality, construc-  
tion, "hang" and  
temper.

A tool for every  
requirement—Forks, Hoes, Rakes,  
Hooks, Weeders, Cultivators, Gar-  
den Tools, Floral Tools, etc.

Write today for **FREE BOOK**,  
"Tools and Their Uses." Gives  
valuable pointers on the advan-  
tages of special-purpose tools. A  
postal card will do.

## A PRACTICAL SEED CORN SORTER

Delany's Seed Corn Sorter is within the reach of  
all and should be owned by every farmer.  
For a few hours work it practically makes him  
a present of hundreds of dollars.  
It reduces the time required for planting, it en-  
ables the planter to do its best work, it increases  
the yield per acre.  
Its use on one acre will more than pay for it.  
It is cheap, easy to operate, makes positive separa-  
tions and has large capacity.  
Used with remarkable results by hundreds of  
farmers.  
Send for free Seed Corn Booklet C, showing our  
line of sorters.

J. F. DELANY, COLONA, ILLINOIS

## SEED CORN SOLD ON APPROVAL

Test it any way you please for ten days. If not perfectly satisfactory, return at our ex-  
pense and money will be refunded. Best and largest yielding varieties: Sutton's Improv-  
ed Boone Co. White; Sutton's Favorite White; Reid's Yellow Dent; Gold Standard  
Leaming and Premium Yellow Dent. All corn carefully selected, placed in  
our mammoth dry house and perfectly dried with steam pipes and air shafts.  
From 600 acres we selected 8000 bushels of fine seed ears. When sold we  
quit, so order now. We handle no outside corn. Shipped in the ear (Bush-  
els) or boxed (crates) or shelled. All shelled corn nubbled at both ends and graded.  
Has highest germinating power, and stands cold spring rains better than  
common corn. Letters from Iowa, Missouri, Ohio and Illinois this year  
state that our corn out-yielded all other, making from 85 to 125 bushels per  
acre. Send for catalog and read these letters signed by the parties rais-  
ing the corn. The actual test is what talks. My seed corn may double your  
yield. Write for illustrated Seed Corn Book and samples. Free. Address  
my ad will appear every other week. C. D. SUTTON, Dept. D., Mason City, Ill.

## SEED CORN 146 BU. ACRE.

DIAMOND JOE'S BIG WHITE—A strictly new variety; none like it. It is the Earliest and Best Big  
White Corn in the World—because it was bred for most Big Bushels, not fancy show points; because  
grown from thoroughbred inherited stock; every stalk bears one or more good ears; because scientifically  
handled, thoroughly dried and properly cured and had the most rigid examination. Big Seed Catalog  
FREE. It tells about all best farm, grass, garden and flower seeds grown. Send for it today. Address,

RATEKIN'S SEED HOUSE,

SHENANDOAH, IOWA

## The New Ideal Seed Corn Tester.

NO more cigar box, tin plate and blotting paper seed corn testing. The New Ideal Corn Tester solves the  
whole problem. It is endorsed by Professor Holden and every other corn expert in the Central West.  
It tests thoroughly enough corn for forty acres each time. The season for testing is at hand. Write at  
once for catalog to

ULBRICH SEED CORN TESTER COMPANY,

424 Walnut Street,

Atlantic, Iowa

Prof. Holden of Ames College, Iowa, told us Feb. 7th that he regarded  
Goddard's "Silver King White Dent" as a remarkable corn. One of  
the very best. We control 1906 crop of "Silver King" grown in  
this county (Winnebago) by the man who perfected and named  
"Pride of the North." Let us send you history of this wonderful  
corn. We grow all standard varieties. Sow Northern Grown Seeds.  
Get our catalog. THE ADAMS SEED CO., Decorah, Iowa.

mens for experiment. For pears that  
can be depended upon wherever that  
fruit does well I would name the Keiffer  
and Garber, the latter earlier than the  
Keiffer and of better quality. These  
are almost blight proof. Pears of high-  
er quality are the Duchess, Howell, Rut-  
ter, Bartlett, Seckle and Tyson. Tyson  
is a summer pear. Bartlett is popular,  
but blights badly in some places. We  
cannot raise it here. Rutter has done  
finely with me, bears equal to the Keif-  
fer, but is of weaker growth. Fruit  
should be thinned. Howell is of delicious  
quality. Duchess is usually planted as  
a dwarf; as such it requires rich soil  
and cultivation, a treatment that would  
soon kill all the standards.

For an apple I have no hesitation in  
advising the planting, even in large  
quantities of Stayman's Winesap. This

**WM. ERNST & SON,**  
Tecumseh, Johnson Co., Nebraska.

**SEED CORN**

Our leader is Brown's Choice, which we years  
ago developed from Learning stock. **Yellow  
Dent, Iowa Silver Mine and Yellow  
Hose**, the latter one of the best early (30-day) va-  
rieties are the others. We grow all the corn we  
sell. We ship in the ear or shell and grade it as  
desired. Our seed will please you. Try it. Samples free.

**JOHN E. BROWN & SONS,** Mitchellville, Iowa

**CLOVER** New Crop  
IOWA GROWN  
Recleaned  
and Tested

Modern Red, Mammoth and Alsike Clover; also Alfalfa,  
Timothy, Blue Grass, etc., of superior quality. It will pay you  
to buy early this year. Ask for prices and one of our large, il-  
lustrated catalogs of farm and garden seeds. Mention this paper.

**IOWA SEED CO.,** Des Moines, Iowa.

for itself from the Atlantic to the Pa-  
cific. The prospect is that it will take  
its place as the greatest winter apple  
in existence. It has size, color, proli-  
ficacy, and above all, quality equal to  
the best.

Lastly, as to the half acre underlaid  
with water, I should not think that it  
would be at all suitable for pears.  
Whether quinces would do well if it  
were ridged up I would not undertake  
to say. If the soil be so saturated that  
air can not penetrate, the trees would  
be sickly or die for the roots have a  
process similar to breathing and if  
deprived of air by the presence of too  
much water, they cannot grow. I can  
only advise to experiment on a small  
scale to discover the capabilities of this  
land.

L. R. Johnson.

**Hardy Evergreens.**

To the Editor of The Homestead:

A subscriber at Osmond, Neb., sends  
the following inquiry:

I desire information regarding evergreens  
for this section of Nebraska. I wish to plant  
a number on my place in the spring and  
want information as to what varieties to  
plant, particularly those that will make quick  
growth.

The Jack pine and the Scotch pine are  
both hardy, rapid growing evergreens,  
and succeed well in the section named.  
Both of these species possess a spread-  
ing root system and are among the  
easiest of all evergreens to transplant.  
The Jack pine does especially well in  
Nebraska and has been widely planted  
in the government forest plantation at  
Halsey. Mr. Charles A. Scott, govern-  
ment forester in charge at Halsey,  
states that a number were planted on  
the ranch of Bruner Brothers in Holt  
County with excellent success. At the  
end of the fourteenth year many of  
them averaged above twenty feet in  
height. Mr. Scott states that the Jack  
pine have proven their adaptation to  
Nebraska conditions, and have made a  
remarkably thrifty growth. Even where  
planted in the sand hills in the govern-  
ment experiments on the Bruner ranch  
it outstripped all other species.

It must be borne in mind, however,  
that the Jack pine and in fact all other  
rapid growing species produce a rather  
inferior wood, and one that is not of  
the highest quality for timber purposes,  
though for fuel it does very well.

We would suggest that our corre-  
spondent plant two varieties of ever-  
greens, using one row for some quick  
growing sort such as the Jack pine, and  
planting the second row with a long-  
lived variety. In this way early results  
may be obtained and also a permanent  
effect secured. For the long lived va-  
riety the Austrian or white pine could  
be used to advantage. The latter forms  
a splendid tree and also makes a hardy,  
rapid growth after it becomes well es-  
tablished. However, when small it is  
rather tender and for this reason it  
should be planted on the lee side that it  
may receive protection from the severe  
winds when young. The Platt cedar or  
the Blackhills spruce and the Colorado  
Blue spruce are also excellent ever-  
greens of the long-lived class, and will  
do well in this region.

The average planter will have the best  
success by using rather small evergreens.  
We prefer those once transplanted and  
about eighteen inches in height. Plants  
of this size are very reasonable in price,  
and they are much easier to plant suc-  
cessfully than the larger size.

A. T. Erwin.

**All Knowledge Summarized in One Great  
Work.**

One of the great writers of France  
has said that "history teaches every-  
thing, even the future;" and a more re-  
cent American writer has declared that  
to study history "is to familiarize our-  
selves with the whole realm of literature,  
science, art, philosophy, conquest, explora-  
tion, romance and human biography."

This being true, a complete history of  
the world from the remotest antiquity to  
the present day would be a summary of  
all knowledge; and to master such a  
work would be, in a real sense, a liberal  
education.

Unfortunately, however, most of the  
great historical works of the past have  
dealt with a brief epoch of periods, so  
that many years of reading, covering  
numerous large separate works, were once  
necessary to give one a complete mas-  
tery of the world's history as a whole.

"Ridpath's History of the World" has  
supplied this long-felt want. This great

**THE OLD RELIABLE  
..Anti-Friction Four Burr Mills..**

Double the Capacity of other Mills.

TWO-HORSE mill has 24 ft. grinding  
burrs all grinding at once and grinds from  
25 to 50 bu. per hour. Four-horse mill has 30  
ft. of grinding burrs and grinds from 60 to  
80 bushels per hour.

**30,000 Bu. With One Set of Burrs.**  
I have used a Mogul No. 1 mill for 7 years  
and it has ground with one set of burrs more  
than 30,000 bu. of corn and the burrs are still in  
good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gear. Will earn cost  
price in three days. The largest ears of corn  
to these mills are like pop corn to other mills.  
We manufacture the most durable and fastest  
grinding line of mills sold, including our Fa-  
mous Iowa No. 2 for \$12.50. Send for free catalog.  
Bovee Grinder & Furnace Works, Waterloo, Ia.

**LITTLE STAR Grain and Seed Cleaner**

A money-maker for the farm. Increases yield of every acre 5 to 15  
bushels. Pays for itself every year with every 20 acres tilled. Has  
7 complete riddles, 4 double wire screens, 11 in. all, and does  
the grain and seed work for a 160 acre farm perfectly. Has  
double the screen surface of any machine of its kind.  
Separates, cleans and grades all kinds of seed, performs all  
three processes at once and will perfectly clean, separate  
and grade any four similar seeds at the same time no matter  
what proportion the mixture. The cheapest, most efficient  
grader made. Our "Corn Grader" screens No. 8 and 9 provide an  
absolutely even "drop" from the "Corn Planter," edge drop or  
otherwise. You are sure of the exact number of grains in a hill.  
Removes all weeds and noxious seeds including thistles. No  
shifting riddles nor change of adjustment. Does work of three  
machines, sells for the price of one. Price complete, freight paid,  
\$19.98. Order today. Every machine guaranteed.  
Hall Grain Grader Co., 224 Locust St., Winfield, Ia.

for sale right if taken at once. Write me now.  
Geo. W. Schwab, Clay Center, Neb.

**KHERSON** SEED OATS FOR SALE. Big  
yielder, will not lodge or rust. 50 cents a bushel.  
Aye Brothers, Blair, Nebraska.

work, charming as a delightful novel, yet  
historically accurate, embraces all his-  
tory from the earliest days down to the  
present. All the fabled greatness of  
Egypt, Assyria, Babylon; the more re-  
cent, but still remote wonders of Greece,  
Rome and Carthage; the marvels of  
medieval and modern times are unfolded  
with the skill of a master hand. Our  
own country, its colonization, its heroic  
revolution, its enthralling history as a  
republic, the growth of its possessions  
down even to the acquisition of Panama,  
its struggles over slavery, the tariff and  
other problems—all this is told, and in  
its true relation to all other events. The  
work—it embraces nine handsome vol-  
umes—is in every sense of the word com-  
plete. It is complete as a history and  
also as a review of science, art, litera-  
ture, politics, war and peace. To follow  
Dr. Ridpath through its luminous pages  
is to acquire that eminent scholar's  
broad grasp of human progress in all its  
aspects.

The Homestead heartily commends this  
splendid work to its readers. We wish  
that it might have a place on every  
farmer's book shelves. It will prove a  
mine of instruction to any family wise  
and fortunate enough to secure it. It is  
published by the Western Newspaper As-  
sociation, No. 204 Dearborn Street, Chi-  
cago, Ill., who make interesting an-  
nouncements respecting it on the last  
page of this issue.

**Agents:** Sell automatic self-cleaning curry comb. Money-making opportunity for hustlers. Write for introductory offer. Clean Comb Co., Dept. 10, Racine, Wis.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### OFFICIAL DUTIES.

A Subscriber, Comanche, Iowa.—I recently received a letter from a county treasurer in south central Missouri saying, "Amount of taxes on land referred to is \$9.57, my commission, \$2.00; total, \$11.57." The letter was on stationery of the county treasurer and signed by him. (1) Is he entitled to such a commission? (2) Is he rendering himself criminally liable for demanding it?

Answer.—(1) Probably so. Most likely you wrote the treasurer to look up the matter and give you the information. The law does not require him to do this without compensation. It is not his official duty to give out such information; it is the duty of the collector of taxes. You wrote to the wrong officer. (2) We think not.

#### MUTUAL TELEPHONE COMPANY.

A Subscriber in Iowa.—A mutual telephone company sold one share in the company to B for \$35. B is a tenant of C and the company agreed to buy the share back at the expiration of three years at a reduction of fifty cents per year. B has a chance to sell the share to C, his landlord, for \$50. There is no written contract between the company and B about buying the share back. Can B sell his share to C so that C will be considered and treated as a member of the company with like privileges as other members?

Answer.—We do not know. It depends on the rules and regulations of the company and its contract with its members. You have said nothing about these things; you have not even stated whether or not the company was incorporated.

#### LEGAL EFFECT OF DEED.

A Subscriber, Clarence, Iowa.—A owned a quarter section of land, his deed calling for 160 acres more or less. He sold 160 acres to B. After survey of the quarter section it was found to contain 162 acres. Each of the other quarter sections in the section contain a like area. (1) Will the two acres in excess be recorded to A for assessment? (2) Can A sell and give good title to the extra two acres?

Answer.—(1) It will not. (2) Unless the deed from A to B described the 160 acres by metes and bounds, or excluded the two-acre excess by specific description, the probable legal effect of it is to convey the whole quarter section to B. This is probably what it did. Any lawyer could tell you by an examination of the deed, and not without it.

#### INHERITANCE.

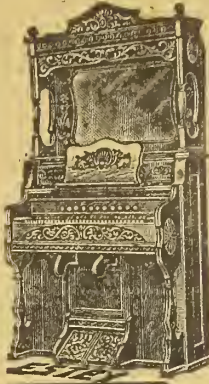

A Subscriber, Lisbon, Iowa.—A husband and wife own a farm in Iowa, part of which came to the husband by inheritance from his parents. The husband has brothers living, so also has the wife, but there are no children or issue of either husband or wife. (1) In case the husband should die first, who would inherit the property? (2) Do the laws concerning inheritance differ in the several states?

Answer.—(1) We assume that the title to the farm stands in the name of the husband. In such case the surviving wife would be entitled to one-half of it and the other half would go to the husband's brothers (and sisters, if any), his parents being dead, in equal shares—that is, the children, or issue of his parents, would get half the property, share and share alike. (2) The laws relating to inheritance in the several states differ very materially. Every state has its own law on the subject.

#### A DEAD CONTRACT.

A Subscriber, Perth, N. D.—A sold a farm to B on the half crop payment plan—that is, it was agreed that one-half of the crop grown on said farm, beginning with the crop of 1906, was to be delivered by B to the elevator to pay interest, and if there was any over it was to be applied on the principal of the purchase price, but should default be made in the delivery of said grain, or any part thereof, or in any of the covenants of the contract, then the agreement to be void at the election of A, time being of the essence of the agreement, and in case of B's default it was agreed that B should, upon demand of A, quietly surrender possession of the premises, and that until such default, B should have possession thereof. B had a poor crop last year and half of it only paid interest, and they agreed that B should farm the place next year and give up the contract. Can A hold more than enough to pay interest, or can he hold half the crop just as he formerly did?

Answer.—Why did you leave out the main and only fact necessary to an answer?—the rent which B is to pay next year—that is what A can hold. The old contract between them for one-half has been rescinded by mutual agreement and has no force whatever.

## You can now buy the Famous Estey Organ

Direct from the factory, at lowest factory prices, and we send you the Organ for 30 days' free use BEFORE you buy it.

You know what the Estey organ is—for 60 years the world's standard organ—used and loved and praised by the world's greatest musicians from Wagner and Liszt down. You know that you cannot secure a better organ anywhere at any price, for a better organ is not made. You know that the Estey is not only the best organ, but that your friends and neighbors and the world at large recognize it as the best. It's an instrument you will never have to apologize for. Let us send you one at our expense—freight prepaid—for 30 days' free use in your home. After you have used it for thirty days and had your friends use it, let us know what you think about it. If you don't agree with us that it has

- A sweeter, purer, clearer tone.
- A more sympathetic touch.
- A smoother, easier action.
- A better style and finish.
- A more durable construction

than any other organ of the same character, simply box it up, and return it at our expense. That's all we ask. But, if you want to buy it, after thoroughly testing it, we will sell it to you, at the actual factory price. If it develops any imperfections within a year, which we cannot rectify to your satisfaction, we will give you a brand-new organ, and we give you also, a 25-year guaranty—a guaranty with the name of Estey behind it.

Isn't that the kind of organ you want? The organ that has a known reputation—the organ you do not have to apologize for. But just let us send you one for 30 days' free use—that will tell the story! We will save you money—and give you the sweetest toned instrument in the world.

Send to-day for Catalogue No. 109, and select the organ you want to try.

## Increase Your Corn Crop

**THIS BOOK FREE**

**Will You Write Me a Postal for a 50c Corn Book?**

**Do it NOW—while they last.**

The book is from the pen of Professor A. D. Shamel of the Illinois Experiment Station—recognized everywhere as "the man who knows"—about corn.

It's full of photographic illustrations, and explains fully about selection—modern corn breeding and cultural methods. The American Corn Expert, Professor Holden, demonstrates his Seed-Testing Machine on page 17 of this book. The book should be in the hands of every up-to-date corn-raising farmer—it will help him double his corn crop.

**All I ask you for this 50c Book**

Is that you will give, on a postal, the names and addresses of three of your farmer neighbors whom you understand will be in the market for a riding plow this season. It will take only a few minutes of your time, and a postal, and I will send you the book prepaid by return mail.

**See that little girl lift her father with one foot?**

He weighs 196 lbs., and she is only 6 years old—yet she can lift him with only one foot. WHY—and what does the "WHY" mean to you? Simply this—it means that the Emerson Foot Lift Plows are the easiest handled in the field of any plow made. FOOT-CONTROL ALWAYS—in or out of the hardest soil. Manage the Plow with your Feet—your Horses with your Hands.

The same EMERSON means easiest to handle—lightest draft—and most durable. Every EMERSON Gang Plow is equipped with 2000-mile magazine box and axle. When you buy an EMERSON you buy for a lifetime, not for a few years, because an EMERSON will last as long as you live. I will send you, FREE, our Implement Literature, and the Corn Book if you act promptly and write the postal TODAY. I gave away 100,000 of these books—then the supply ran out. They went like wildfire. I've only a limited number this year, so don't wait till they're all gone.

Putting off may mean I won't have a single copy to send to you. Write TODAY—Now—while you think of it.

**S.H. Emerson,**  
Emerson Mfg. Co.  
Rockford, Ill.

## A STRONGER FENCE

Can be made of whole wire than of cut wire. That's why Advance is the strongest fence. Our stay wire is NEVER cut, but runs continuously up and down across the fence for many rods without an end. Thus we preserve ALL the strength of the wire, fully half of which is wasted in cut stay fences—sacrificed to convenience and speed in manufacture.

**30 DAYS APPROVAL.** Let us ship you what fence, etc. you need, on approval. After careful examination and comparison with other makes, if you don't like it, return it at our expense and get your money back. We have sufficient confidence in Advance Fence to make this offer.

**WE PREPAY FREIGHT** and guarantee safe delivery of your shipment. Write today for our Fence Book and Freight Paid Prices.

**ADVANCE FENCE CO.,**  
34 Old St., Peoria, Ill.

**Succeed with a Successful**

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## POULTRY PARAGRAPHS.

The four signs that point to success are grit, pluck, energy and perseverance.

Mistakes are object lessons. It is the wise man who will profit by them. Fools never learn.

Success is not measured altogether by capital. There is a profit in anything you take care of.

The broiler business is very exacting. It requires constant care, careful nursing, and eternal vigilance.

The British market prefers the American turkeys to those from any other point, claiming the flesh is whiter, sweeter and higher flavored.

When an egg has a hard, metallic sound when struck, it is claimed by some experts, it will not hatch. The egg with a dead, chalky shell, is equally worthless.

Filth is a stumbling block. The man who will not keep his poultry houses in a good, sanitary condition, must expect to have sickness in his flocks. Disease has driven many a man out of the poultry business.

Inbreeding is a crime. It degenerates stock, enfeebles the constitution, and cripples the egg yield. The fancier may find merit in it, but not the market poultryman. He is better off when he introduces new blood each year.

Don't become jubilant over the fact that you have a hen that lays double-yolked eggs. It is not to her nor your credit. It means that she is out of condition, that you are feeding to heavy of a feed of a very fattening nature. Cut it out.

Over on Long Island they place the feed for young ducklings on feed sacks instead of in troughs. After the meal is over the sacks are gathered up, and when very dirty are washed. The duck raisers are well pleased with its convenience and safety.

Credit is due the fancier for producing the good breeds we have, and for maintaining their characteristics, but it remained for the poultryer to develop in these breeds good egg records and a large winter production. These two factors in poultry culture must work together.

The game fowl ranks with the best for table purposes, and yet the game has taken no prominent place in market poultry culture. The reason for this is that as a class they are poor layers, and it would be too expensive to keep them in large numbers to produce stock.

Quality rather than weight fixes the price for dressed poultry. Do not blame the commission man if you do not realize on your shipment what you expected. Ten chances to one you have sent something that is hard to sell. Prime stock meets with ready sales at good prices.

Carrying chickens by the legs, heads down, is a cruel, barbarous practice, especially if the fowls are fat. The proper way is to have the body under your arm, with the head to the back of you, and feet firmly held with the hand. In this way they can be carried a long distance and with no discomfort to the fowl.

The refrigerator trade allows speculators to palm off frozen and thawed-out stock, to an unsuspecting public, as fresh. After being frozen solid for months, these chickens are brought out of the refrigerators and placed into cold water, where they are allowed to remain for a time. When they are taken out they look as fresh as just-killed stock, but the flavor is all gone.

An authority says that one of the causes of loss of customers and loss of confidence on the part of those who purchase strictly fresh eggs, is the fact that an occasional nest egg will find its way into the egg basket. Now it is admitted that such an accident may happen and occur only once, but that once is sufficient to destroy a reputation gained by years of care. Why have a nest egg? They have no influence on the hens' lay-

**Save 2/3 Expense**

More than 2/3 saved in oil and time by using the X-Ray Incubator. One filling of lamp makes the entire hatch. Egg tray not removed during the hatch. Glass top, and thermometer in plain sight. Lamp need not be removed during the hatch. Automatic wick trimmer, chimney need not be removed. Flame is turned down automatically when hot enough. Eggs aired and turned by simply lifting the lid. The X-Ray Incubator is entirely different from other incubators. You should know about this before buying. Catalogue free.

**THE X-RAY INCUBATOR CO.**  
28th St., Wayne, Nebraska

**OLD TRUSTY**

**WRITE TO US BEFORE YOU BUY AN INCUBATOR**

We Can Save You Money only \$7.90

We buy material to the best advantage. We manufacture at lowest expense. Victor machines give you most for your money. Just say on postal "Send Victor Book" and tell us the size machine you want and let us give you our special prices. Geo. Eriel Co., Quincy, Ill.

**BIG MONEY IN POULTRY.**

Our big Poultry Book with many new illustrations tells how to make it; also how to feed, breed, grow and market Poultry for best results. Plans for houses and a great mass of useful information. Tells how to start small and grow big. Illustrates and describes the largest pure bred Poultry Farm in the world; tells about our many varieties, quotes lowest prices on Fowls, Eggs, Incubators and Brooders. Mailed for 4c.

**FRANK FOY, BOX 9, DES MOINES, IOWA.**

breeds, and it is up to you to get it out of them.

Black-legged fowls for roasting; white-legged ones for boiling, was an English opinion expressed fifty years ago. The leading roasting fowls we have today are the black-legged Langshans, the yel-

low-legged Brahmas, and the white-legged Dorkings.

Don't let the "mental impression" theory worry you. There is nothing in it. The best impression you can get on your mind is to give the stock the best of care.

Talking of ducks, calls to mind the general belief that duck eggs are strong and not suitable for culinary purposes. In the household of the writer duck eggs are used in making cakes, omelets, cooking generally, and they are also relished fried. For making plum puddings, or any kind of puddings, they are more eco-

nomical than those of fowls, being larger in size and richer. One duck egg in this particular is equal to two hen eggs.

Pluck wins. A lazy man will have lazy fowls. A good poultryman never gets the "blues."

Poultry and horticulture make fairly profitable side lines, but I really think that it requires a specialist to make either one very remunerative.

Don't raise bones and feathers alone—get meat on the carcass. There are too many scrawny specimens shipped. The market is ready to pay the price for prime stock.

Never buy a "100 capacity" brooder with the expectation of rearing 100 chicks in it. You will never do it. No more than fifty chicks should be placed in any brooder.

Never eat a chicken the day it is killed. The tenderest fresh-killed chicken will be tough as soon as the animal heat has left the body. But in about twelve hours, when the muscles relax, it is fit for food.

It is better to buy the poultry farm on instalment than to pay rent. There is nothing so stimulating to success as the fact that each month you are accumulating something. It is the right way to true independence.

The farmer can produce a pound of chicken just as cheaply as he can a pound of beef, pork, or mutton, and it always brings a better price. Why, then, not give this branch of our business more attention? With good laying stock eggs can be produced at a handsome profit. Instead of a farmer having twenty-five or thirty hens he ought to keep 200 or 300, or more, as his fancy and the size of his farm permits. If hens are kept in this way in connection with other live stock, farming will be more of a business and the farmer will be better satisfied with the returns from his farm.

A pound of green cut bone is sufficient for sixteen hens one day, which, according to prevailing prices, means that one cent will pay for the bone for that number of fowls. If one quart of grain be fed at night to sixteen hens, and one pound of bone in the morning, it should be ample for each day in the winter. Of course a variety is high-

# Linofelt

It Keeps Your House Warm

## You Can Build Your House But Once

A little false economy in selection of materials will mean big losses in the years that follow.

# LINOFELT

keeps the heat in, and saves 40% of your fuel cost.

By actual test, 44 per cent. more heat passed through walls where building paper was used than through walls of similar construction using Linofelt.

Linofelt is a blanket of degummed Flax Fibre quilted between two sheets of rosin-sized paper.

It is clean, antiseptic, odorless and vermin proof.

To cover your house from foundation to ridge-pole with Linofelt will cost only a trifle when compared with the saving and comfort it will bring as long as your house stands.

If you are planning to build, by all means investigate the merits of Linofelt.

Send for booklets and reports of scientific tests.

Just the thing, too, for Barns, Poultry Houses, etc.

ly desirable. Such a diet provides starch, fat, nitrogen, phosphates, lime and all the substances required to enable the hens to lay eggs. As an egg is worth about three cents in winter, it is plain that it is cheaper to feed bone than grain, as the greater number of eggs not only reduces the total cost, but increases the profit as well.

### POINTERS.

—Mr. C. L. Cole, of Geneva, Iowa, is offering Mammoth Bronze turkey toms and Single Comb Brown Leghorn cockerels for sale in his advertisement that appears on page 14 of The Homestead.

—Mr. F. W. Johnson, of Luther, Iowa, is offering for sale Single Comb Brown Leghorn cockerels, scoring from 92 to 94%, on page 14 of The Homestead. He also has eggs for sale from pens properly mated.

—Mrs. R. Van Der Wert, of Lacey, Iowa, is closing out her Barred Plymouth Rock cockerels. Those she has left, so she advises us, will please her customers. Her new advertisement appears on page 14.

—The advertisement of Mr. H. M. Almy, of Greenwood, Neb., will be found on page 14 of The Homestead. He advertises fourteen Toulouse geese and eggs and will have White Wyandotte eggs for sale in season.

—Mr. C. G. Good, of Ogden, Iowa, writes: "I still have some nice Barred Plymouth Rock cockerels that will be sold at a great bargain, quality considered. Write your wants." Mr. Good's advertisement appears on page 14.

—Mrs. Anna Dockey, of Pilot Mound, Iowa, can still furnish Barred Plymouth Rock cockerels to Homestead readers. Those wanting something fine should write her, stating what is wanted. Mrs. Dockey's advertisement appears on page 14.

—Large, blocky White Wyandottes, great winter, as well as summer, layers, are advertised for sale in the North Western Poultry Yards' advertisement that appears on page 14. The company is located at Preston, Iowa, and will send free illustrated folder for the asking.

—Mr. H. H. Hiniker, of Mankato, Iowa, breeds fifteen different varieties of chickens, ducks, geese and turkeys. He also has incubators, brooders and poultry supplies. Send two cents for large incubator and poultry catalog as per advertisement on page 14.

—Eggs for hatching, from pure-bred White Wyandottes, White Holland turkeys and Toulouse geese, are offered for sale by the Forest Home Poultry Farm of Audubon, Iowa. Their advertisement appears on page 14 of The Homestead. Write them for circular.

—Mr. Robert Hunt, breeder of Barred Plymouth Rocks and Mammoth Bronze turkeys, of Earlville, Iowa, writes: "I have several trios of Mammoth Bronze turkeys I am closing out at \$11 per trio and also a few Barred Plymouth Rock cockerels that I am closing out at six for \$5."

—Mr. H. C. Clymer, of Bertram, Iowa, announces in his advertisement on this page that he has fifteen extra fine large young Mammoth Bronze turkey toms for sale. They will weigh from twenty-five to thirty pounds each and are of the noted Giant Jumbo King strain. Write Mr. Clymer your wants.

—Mrs. C. F. McLoehlin, of Gray, Iowa, reports that she is all sold out of White Wyandottes and that she is now ready to receive orders for eggs at the price named in her advertisement on page 14. She still has four fine White Holland toms, weighing eighteen to twenty pounds, and two trio of ducks which she is offering at \$3 per trio.

—Mrs. D. C. Molsberry, of Plymouth, Iowa, whose advertisement appears on page

For full information inquire of

J. W. TURTLE, T. P. A.,

313 W. Fifth St.,

Des Moines, - - - Iowa.

14, writes: "I have had good results from my advertisement in The Homestead. I am all sold out of turkey pullets, but still have some fine young toms that are well marked and large boned, weighing from twenty-eight to thirty pounds. One big fellow weighs thirty-two and one-half pounds. I have a few Silver Laced Wyandotte and Black

Cochin cockerels that I will sell, as I need the room."

—The Dean Swift Poultry Company, of Des Moines, Iowa, announce on this page that they wish to buy Buff Orpington and Rose and Single Comb Rhode Island Red eggs in large lots. Those of our readers who have eggs of either of these varieties for sale should write them, giving lowest price and the number they will probably have to dispose of.

—We start the advertisement this week of Mr. Orlando Jacobs, of Mediapolis, Iowa. Mr. Jacobs' Single Comb Brown Leghorns are of the Kulp strain. He writes: "My birds were winners of all firsts and specials at the Winfield poultry show. Every bird is a true Leghorn and all eggs shipped will be strictly fresh and all customers will be treated right."

—Mrs. Floy Collins, of Viola, Iowa, in furnishing copy for her new advertisement found on this page, writes: "I have some of the finest penciled, heavily feathered, well-shaped Partridge Cochins females I have ever seen. The males are just as good for size. They cannot be beat by the best. My White turkey hens weigh eighteen to twenty pounds each; toms, thirty-four pounds."

—We re-insert the advertisement of Mr. M. S. Helland, of Slater, Iowa, on this page of The Homestead. Mr. Helland breeds Single Comb Buff Orpingtons of the Cook strain. He has two pens from which he can furnish eggs this season. The scores of the fowls range from 92½ to 94 points. He is now booking orders for eggs and has scored stock for sale. Write him for circular.

—Mrs. J. C. Webber, of Montezuma, Iowa, writes that she still has some fine Barred Plymouth Rock cockerels for sale. She has been selling them at \$3 for choice, \$2 for second choice or three for \$5. She has others at \$1 each or six for \$5. The Light Brahmas she is selling at \$2.50, second choice \$2, others at \$1. Her Light Brahma pullets she is selling at \$1 each. See advertisement on this page.

—Mr. Samuel Bone, of Montezuma, Iowa, is quoting prices on Barred Plymouth Rock eggs in his advertisement that appears on this page of The Homestead. Mr. Bone's Plymouth Rocks are of the Thompson and Bradley Bros. strains. He can fill orders promptly and will guarantee satisfaction. He writes: "Our poultry are in the best of health and laying well. We are putting a very low price on eggs this season. We sell our own eggs and set from the same. Early orders will be promptly filled; send them in now."

—In advising us to start her advertisement, which will be found on this page of The Homestead, Mrs. J. H. Allen, of New Sharon, Iowa, breeder of Black Langshans, furnishes us the following from Mr. Henry Goedicke, of Spencer, Iowa: "The cockerels arrived yesterday O. K. We are well pleased with them. They are fine birds, better than we expected for the money. We shall certainly speak a good word for the way you served us." The price at which Mrs. Allen can furnish unscored or scored cockerels will be found in her advertisement.

—"My Barred Plymouth Rock cockerels," writes Mrs. James Cockerton, of Whiting, Iowa, in furnishing copy for her advertisement on this page, "will be quoted at bargain prices to make room for my breeding stock. My Toulouse ganders are extra large, deep-bodied fellows and I will give all letters of inquiry and orders for eggs prompt and careful attention. I guarantee my stock to be as represented and will satisfy all reasonable persons. I will be able to supply eggs a little later in the season from carefully-mated yards in incubator lots or by the sitting."

—Messrs. Whisler Bros., of Fairmount, Iowa, are offering choice Mammoth Bronze toms and hens for sale in their advertisement on this page. In sending copy they write: "We have a good lot of birds, all scored, good bone, long broad back and breasts with fine markings. They are the best lot of Mammoth Bronze turkeys we ever raised and will be quoted at reasonable prices. They are sired by the best tom we ever owned as to markings, bone, style, etc. He weighs forty-five pounds, scores 95½ as a young tom and we believe would score now 96½ or better. We think enough of him to keep him over."

—Mr. W. J. Applegate, of New Sharon, Iowa, in ordering a change in his advertisement this week, writes he has sold out all of his cockerels but six which are extra fine birds scoring from 90 to 91½ and is offering them at the extremely low price of \$3 each. Mr. Applegate has been a continuous breeder of Barred Plymouth Rocks for the past sixteen years and has built up a reputation for his stock which is seldom excelled. He believes in the theory of like producing like and by carefully carrying out this theory has produced one of the very best strains of line-bred poultry in the world. Judge J. L. Todd says: "Mr. Applegate has the best flock of Barred Plymouth Rocks I have visited this year." Mr. Applegate is advertising three dozen of his pullets at a very low price and assures all his patrons perfect satisfaction. His advertisement will be found on this page.

VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

BIG HEAD.

I have a twenty-months-old Belgian filly that began to split as if she had something in her nose. Along about the first of last July I examined her and found she had scarcely any air through her right nostril. About the latter part of August the bone began to enlarge under the eye, making the eye look smaller than its fellow. There is very little discharge and that only at times from the left nostril, resembling the white of an egg. The enlargement has gone down about one-third and seems to be drawing in the upper jaw bone, which is bulged out at quite an angle, giving her head a rather lop-sided appearance. She does not seem to have much air through that nostril yet. She was drinking water the other day and I noticed some of it came out of her right nostril, as it is apt to do with all horses. She had the distemper three times a year ago last spring. She has always been fat, and is full of life. I took her to a veterinarian and he told me he would have to cut a hole three or four inches long under the eye and chisel out the bone and also cut out or through the membrane of the nose; but as it was raining, said he would not operate on her until weather got settled. I have been putting off having it done, hoping that it might get well of its own accord. The colt has not been kicked to my knowledge. Any information you can give me in regard to this case will be appreciated.

There is a possibility that the disease may be "big head" (osteoporitis) in which case an operation would do no good, but if the disease is simply a thickening of the membranes lining nostril and sinuses of the face, with implication of the bones of parts involved, trephining proposed by the veterinarian will give per-

haps the only hope of recovery, although repeated blistering of the face under eye sometimes causes re-absorption of enlargements. As the veterinarian, whose card you enclose, is a competent graduate, we would, however, feel perfectly safe in leaving the proper method of treatment to his best judgment. All things considered the ease is a most unsatisfactory one to treat.

FEEDING COAL ASHES TO HOGS.

I should like to know if feeding hard and soft coal ashes to hogs will do them good or harm. Can they be given too much, or should they have all they want to eat?

Wood charcoal or charred corn cobs would be preferable to coal ashes which contain practically no carbon and some impurities which might prove injurious. When hogs have depraved appetite from indigestion, worms or sickness they might take more ashes than would be good for them and it is doubtless best to limit the use of the ashes by giving them but once or twice a week. Coal is better than ashes as a corrective for hogs; wood ashes have a stronger effect in ridding them of worms.

CALF CHOLERA.

What is the matter with my calves? They appear to be all right when born, but when one or two days old they are dumpish and do not care to get up or drink. After sucking or drinking they appear worse. Their eyes become sunken, the nose is blood red and they scour some. Those affected are sure to die in a few days. My cows have the same care that I have practiced for years.

The disease is due to germs born with the calves or introduced into the system by way of the raw navel cord at birth. The latter cause is most common. Clean up, disinfect and whitewash all stables and provide a new perfectly clean, sunny, perfectly ventilated pen for accommodation of new born calves. When calf comes, immediately wash its belly with a 2 per cent solution of coal tar disinfectant and wet its navel with a 1-500 solution of corrosive sublimate. Repeat the latter treatment twice daily until navel is completely healed. Cows should not be fed corn, but should have plenty of ground oats and bran along with other good food.

LAMENESS.

Can you tell me the trouble and remedy for my work mare seven years old? About eight weeks ago she got lame in her left hind leg and is still lame when she trots. I took her to a veterinarian who advised blistering on the stiffl joint. I did this and she is just as lame as ever.

We are unable to throw any light on this case of lameness, as you do not even tell us the symptoms of the trouble nor how it occurred. As the blister has done no good it probably has been put on the wrong place and a more careful examination will have to be made to locate the true seat of the lameness.

SNUFFLES.

Can you tell me what is the matter with my hogs and what to do for them? They sneeze and their noses grow crooked. They got this sickness when they were small. They eat and drink, but they do not grow. They are seven months old and weigh twenty pounds apiece. My shoats all sneeze. I disinfect once a week and have done so for over a year. I feed salt and copperas mixed; also feed turpentine in swill. I thought perhaps this condition came from the ground, so I put a floor in the hog house, but this did not help it any.

The disease is incurable and apparently hereditary and akin to rickets. It is best to destroy affected pigs as they fail to thrive. Your practice of disinfecting is first class, only coal tar is not effective and a coal tar disinfectant should be used instead, and in addition all woodwork of pens, etc., should be whitewashed at least twice a year. Hogs should be sparingly fed on corn while growing and should have free range on grass, clover, rape, etc., during summer. A change of blood is indicated and we would reject any sow that had produced affected pigs and use a new strong boar from a distant part where there is a more bracing climate.

THIN COLTS.

(1) Could you tell me what is the matter with my colts? I have three spring colts that were weaned in October. One of them is doing all right, but the other two are getting poor and their hair has commenced to lie the wrong way. They are fed twice a day three ears of corn and two quarts of oats apiece and have the run of stalk and meadow field through the day. Have fed them a bucket of stock food, but it has done no good. (2) I also have a ten-year-old mare that is in the same condition.

(1) Stop feeding corn to colts and keep them out of the stalk field; also stop feeding stock food. Substitute for corn a mixture of two parts oats and one part wheat bran and add gradually a little dried blood meal. Also feed well on best of hay and fodder. They should have the run of a sheltered yard and be allowed free access to a "lick" of common

Why Don't You Ride When You Harrow?

No Use Walking When You Can Buy a

Rock Island Harrow Cart

Delivered at your R. R. Station For.....

\$8

If Your Dealer Can't Supply You Send to Us.

REAL HARROW COMFORT

Plowing is about the easiest work on the farm, but how many successful Farmers to-day use *Walking* plows? You don't—do you? No; horses are too cheap and life too short to wear your legs out following a plow all day.

You ride when you plow; you ride when you plant; you ride when you cultivate. Well, then, why don't you ride when you harrow?

Is there any reason on earth why you should continue to make this work the hardest kind of drudgery by *walking* over plowed ground?

Or riding one of those crude carts that twist and turn and jerk you about until you wish you had walked?

No, Sir,—there is no longer any excuse for saying that "harrowing is the hardest work on the farm."

The new Rock Island Two-Wheel Cart has changed all that.

It offers you a pleasure you never enjoyed before—a ride behind a drag harrow that is just as comfortable as a ride on your Sulky or Gang Plow or your Cultivator.

LOOK at the man in the picture above. He's riding a Rock Island Cart, and he doesn't look a bit more comfortable and easy than he feels.

The feature that adds most to his comfort is the fact that he always faces the horses, no matter which way the wheels may be angled. Think what that means!

The swinging back and forth of the axle doesn't affect the driver a bit.

This is why: The platform for the seat is made of two circular plates, lower plate being bolted solidly to the axle.

Seat and foot-rest are both fastened to the upper plate which can turn on the lower plate.

An automatic locking device, similar to that used on the rear wheel of a Sulky Plow, holds the parts in position while the cart is being drawn straight ahead.

But permits the wheels to angle either way while making a turn, or when either of them strikes an obstruction, without disturbing the driver in the least.

This feature is exclusive with the Rock Island Cart. No other harrow cart has it.

AN IMPORTANT IMPROVEMENT

One serious trouble with two-wheel carts is that in striking an obstruction which throws one wheel behind the other, the wheels do not quickly return to their correct position, but frequently slide along for quite a distance. This is why nothing of this kind can possibly happen with the Rock Island Cart!

The draw-bars are crossed and pivoted at the axle. While the axle can swing freely when one wheel of the cart strikes an obstruction, or when making a short turn, the axle and wheels are always perfectly controlled by the draw-bars in the same manner as the front wheels of a wagon are controlled by the tongue.

SAVES YOU HIRED HELP

A boy at \$8.00 or \$10.00 a month with a Rock Island Two Wheel Cart will do as much harrowing as a man at \$25.00 or \$30.00 will do without the cart. You, therefore, actually save the price of this useful implement two or three times over in a single month.

And when you consider that the Rock Island Cart will last ten or fifteen years, you see that the price, \$8.00, means an investment of 50 to 75 cents a year. Can you point to any other labor saving implement on your farm that pays you as big a dividend as this? Think it over, Neighbor!

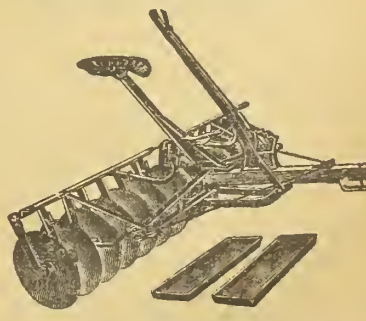

WE'LL DO THIS FOR YOU

We are manufacturers of all kinds of Farm Implements, selling only through **Regular Implement Dealers**. But we want you to have a chance to buy this Harrow Cart, and if your dealer won't get one for you, just send us \$8.00 and we will ship you a cart. We will pay the freight on it to your nearest R. R. Station ourselves. Send the price, \$8.00 at once, or if you want to know more about the Rock Island Two-Wheel Harrow Cart, before you decide to buy, we will be glad to send to you a

DESCRIPTIVE BOOKLET FREE

All levers within easy reach. Easy riding, lightest draft. Write for free description.

Strongest and simplest construction, deepest penetration, lightest draft. Description free.

We are spending thousands of dollars telling the Farmers about the Rock Island Two-Wheel Cart, and we want every one of them to know just how good it is. Ask us questions. Let us hear from you. Write today, if your dealer can't show you the cart.

Full information about the cart is absolutely **FREE**. If, in addition to information about the cart, you would like to have a pretty watch charm, enclose 6 cents in stamps to pay postage and *always* mention this paper.

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

## SOME FACTS ABOUT CREAM SEPARATORS.

The Indiana Station has been investigating the separator problem somewhat extensively, and as a result has arrived at a few facts. These may be summarized as follows:

1. The use of the hand separator in the place of the gravity systems of creaming will effect a saving of \$3.50 to \$7.00 worth of butter fat from one cow in one year.

With the hand separator a richer cream

and a better quality of cream and skim milk can be produced than with the gravity systems.

2. Of the gravity methods the deep setting system is the least objectionable. It produces a more complete separation and a better quality of cream than either the shallow pan or the water dilution systems.

3. Any neglect to thoroughly clean the separator after each separation reduced the skimming efficiency of the machine and lowers the quality of the cream and butter produced. Wash the separator after each separation.

4. A trembling machine, insufficient speed, sour, curdled, slimy, or cold milk, and over-feeding the separator caused a loss of butter fat in the skim milk amounting to from eight to twelve pounds of butter per cow in one year.

5. Other things being equal, high speed and a small rate of inflow tend to produce a thick cream. Insufficient speed, a trembling machine and a large rate of inflow result in a thinner cream.

The figures given in the first item, namely that the hand separator will effect a saving of \$3.50 to \$7.00 per cow enables one to estimate how large the herd should be before it is safe and profitable to invest in a separator. On the basis given, a separator in a herd of ten cows would save somewhere in the vicinity of \$50 per year. This, of course, would pay good dividends on the price of many separators.

But there is another factor which must be taken into account in computing the profit in the use of a separator. We refer to the condition in which the skim milk is left after being run through one of these machines. If calves or hogs are being fed this product it is a very important item, because in hot weather it frequently happens that the milk fed does more harm than good. In many cases it is impossible, no matter how effective the cooling system may be, to prevent milk from souring even in as short a time as twelve hours, and sour milk is not a good food for a calf and there are those who do not believe that it makes a satisfactory food for a growing pig.

When a separator is used the milk is fed not only in a sweet condition, but it may be used while the animal heat is still retained. In the case of the calf this is an important item and one that adds to the feeding value of the milk by contributing to the thrift of the animal. It is nature's way to feed warm milk, and the nearer we approach this in our feeding methods the greater will be our success, other things being equal.

Then, the separator greatly lessens the labor of washing cans and caring for the milk generally. It certainly lessens the labor of the women on the farm, because separator work naturally falls to the men. The separator, therefore, not only gives an economic problem from several standpoints, but really overcomes a household difficulty, because the work connected with dairying is a real difficulty in the average home. Women have enough to do without attending to every detail of that business, and it is fit and

# 1 1/2 more butter

## 1 1/2 lbs.

If you can increase your butter production without any increased cost or any more work won't it pay you to do it? And if you can get more butter from you milk with less work, that will be still better, won't it? That's exactly what you can do if you will do as Mr. LEITING did—buy a Sharples Tubular Separator. Here's what he says about the Tubular:

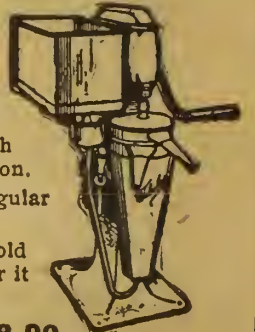

**MORE BUTTER  
MORE MONEY**

gets all the cream there is in the milk, does it so easy that it's not work to run it at all, and is so simple, with only one little part in the bowl to wash and keep clean that comparison is out of the question.

The extra cream it gets makes the Tubular a regular savings bank for its owner.

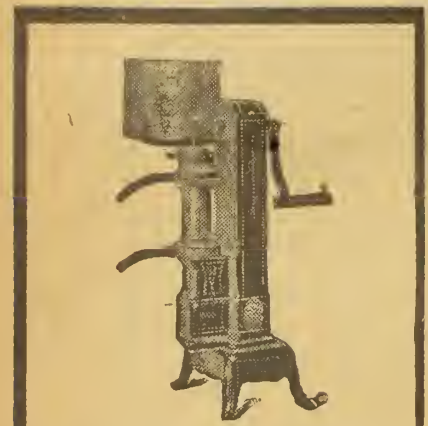

All the other good money-making points are told in book F-121, which you ought to read. Write for it today—we'll send it free to you.

**THE SHARPLES SEPARATOR CO.,**  
Toronto, Can. WEST CHESTER, PA. Chicago, Ill.

## The Sharples Tubular Separator

Randolph, Nebraska, Feb. 15th, 1906.  
Gentlemen:—On the 23rd day of January, 1906, I took a No. 4 Sharples Tubular Separator on trial. On learning that I was in the market for a cream separator, the agent for the disc style "bucket bowl" separator brought one to my farm and requested me to give it a trial before making a purchase. After giving both machines a fair trial, I concluded to keep the Tubular as I consider it far superior to the other machine. It skims closer, runs easier, and is very much easier to wash, there being so many less parts. From three skimmings of milk from 7 cows, we were able to make 1 1/2 lbs. more butter with the Tubular than we could with the "bucket bowl" machine. B. LEITING.

## A Cream Separator Without Cost

That is What We Offer You in the

## Iowa Dairy Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair, and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price, list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

## Why the Omega Cream Separator Will Give You the Best Results!

THE man who never heard of a horse, would think an ox-cart beat walking, a whole lot. Because he wouldn't know there was a better way.

Your great-grand-mother was perfectly content to spin flax by hand, because there wasn't any better way known at that time.

But that's no reason why you should shut your eyes to the better way, is it?

Now, we say to you that the Omega Cream Separator is as far ahead of other separators as sunlight is ahead of darkness.

A pretty bold claim, we will admit. But you can't really know whether our claim is the honest truth or more advertising clap-trap, unless you investigate.

We don't ask you to buy; we don't ask you to invest one cent. All we ask is the opportunity of proving to you the truth of our claims.

We are spending thousands and thousands of dollars in the farm papers of this country, inviting the farmers and dairymen of America to investigate our claims. And that's all we ask.

We would be pretty foolish to do it, if we couldn't "make good," wouldn't we?

Well, here's what we want to prove to you: We don't claim that the Omega, under ordinary conditions, will skim closer than all other separators;

We want to be fair and we admit that there are two or three machines that do as good work in this respect as the Omega.

But no separator ever built by man skims any closer.

And no separator ever made produces so fine a quality of cream.

You can get more money for cream from an Omega Separator—you can make better butter with cream from an Omega Separator—

Because the Omega Separator is the only separator that doesn't break up the globules of butter fat and whip them into a putty-like mass.

We can prove that to you.

Isn't it worth investigating?

Moreover,

By actual test no separator made turns nearly so easily as the Omega.

You can prove that by simply turning the machine.

But here's the explanation:

The Omega is the only separator that has a bearing at both the top and bottom of the bowl.

Other separators leave the top of the bowl—the place where the "wobble" is—without support.

Other separators are like your wheelbarrow

would be if you tried to use it with the axle supported at only one end.

Look at them! Isn't it true?

The Omega is able to have a bearing at the top of the bowl because it delivers both its cream and skim milk from the bottom.

It's the only separator that does this.

Others would imitate our method, but we hold the patent.

Moreover, again:

The Omega is the simplest cream separator made.

Now, we know that every manufacturer who ever made a machine of any kind, no matter how complicated it was, immediately got up and howled about its simplicity.

Sometimes, however, he was counting more on the simplicity of his heavers, than on the simplicity of his machine.

All we ask is that you investigate the Omega and compare it with any other under the sun.

You will find that others require as high as fourteen different tools, wrenches, punches, rods, etc., for their daily care, while you need nothing but

THE OMEGA SEPARATOR CO., 35 Concord St., Lansing, Mich.

your ordinary, every-day bowl wrench for the Omega. And this simplicity, of course, saves in repairs and makes the Omega long-lived. That's why the first separators we ever made and sold, 15 years ago, are still in use, and giving good service.

But good gracious!

It's costing us a lot of money to talk to you here. Let's cut out the talk and get together.

Summed up, all we want to say is the one word

**INVESTIGATE.**

You are just as anxious to get the best separator as we are to sell the Omega. We make stronger claims than any other manufacturer dare make and we stand ready to prove them. Make us prove them!

It won't cost you a cent to investigate and it means dollars to you. Send us your name, tell how many cows you keep and get our free book, "More Milk Money," with Omega Catalogue and proofs—Address—

THE OMEGA SEPARATOR CO., 35 Concord St., Lansing, Mich.

make a high-class product the churn must be stopped before the butter particles collect themselves together.

On this point McKay & Larsen say:

Different makers have various ways of ascertaining when the churning process has been completed. Some determine the proper churning stage by the size of granules. Others by the height at which the butter floats in the buttermilk. Others, again, depend upon the appearance of the buttermilk. It is well to let all of these factors influence the operator in deciding when the churn should be stopped. Any one of these factors may not be sufficient indication to insure the proper time to stop.

The size of the granules is the most common factor that determines the time when the churn should be stopped. It has been a general rule in the past to stop churning when the granules are a little larger than wheat kernels. As a rule, it is safer to carry the churning on a little further until the granules increase to the size of corn kernels, irregular and flaky in shape. At this stage the buttermilk will usually appear bluish in color, and the butter is raised above the buttermilk a considerable distance. When the butter is churned to too small granules, many of them will go through the strainer into the buttermilk and cause considerable loss. When butter in such shape is washed in medium cold wash-water, the granules continue to remain in a separate state. When salt is added, the moisture is extracted from them, and the water is likely to be caught in holes and crevices during the working, and cause leaky butter. If the churning is carried on a little further, the granules will not escape into the buttermilk. The churning is more complete, and the moisture will be incorporated in a better condition.

Overchurning should be avoided as much as underchurning. If butter is overchurned in the buttermilk, it will retain a large amount of the buttermilk, which will be very difficult to remove by washing. Overchurning butter, especially at a medium high temperature, is very effective in increasing the moisture content of butter, and should be guarded against for that reason. Butter containing more than 16 per cent water is not permissible on the American market.

We desire to call special attention to the change which these authors note in recent times, namely, that of carrying the churning process a little past the point when the butter granules are the size of wheat grains, it being preferable now to allow the particles to become the size of corn kernels before stopping the churn.

To carry it beyond this point means that a difficult task will be involved in working out the butter-milk, and even though the water-content could be reduced to the right amount there is still a disadvantage, inasmuch as the texture of the butter is liable to be injured in the working. This is the common fault with old-fashioned butter—butter

February 28, 1907.]

## Before You Buy Your Next Lot of Stock Food, do these Two Things:

- 1st—Examine several different kinds—smell them and taste them;
- 2nd—Read carefully the feeding directions and figure out how long a dollar's worth of each kind will last. You will find that

## Standard Stock Food

looks better, smells better, tastes better and is better than any other, because it is richer, purer and more concentrated.

You will also find that because it is so much better, you need use but a very little of it at each feeding, so that a dollar's worth of it lasts longer, goes farther and does more good than a dollar's worth of any other. Not only the best, but also costs you the least. Sold on our square-deal, money-back guaranty.

### Go to Your Dealer

and ask him to supply you. If he cannot, do not take a substitute but send us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

### Free to You.

Our big book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy it equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

**STANDARD STOCK FOOD CO.**

that is churned until it is a lump. You will find it somewhat greasy in character, and when this is the case it presents anything but a desirable appearance.

The principles of good butter-making apply alike in the factory where thousands of pounds are made daily and in the home where only a few pounds are churned at a time. In either case, to produce the best product the churn must be stopped before the particles of butter accumulate into a large mass. This is a fundamental principle, though a visit to the average grocery store and an examination of the butter will indicate that it is a principle too often lost sight of in the making of butter.

### REMOVING HORNS WITH CAUSTIC POTASH.

The following communication has been received from a subscriber, Mr. Andrew Strausmyer:

Some time ago I noticed a recipe in your paper for removing horns from young calves by chemical means. I had no use for it at that time and consequently did not save the recipe. I shall therefore consider it a favor if you will kindly give it again for my benefit, and there are no doubt others who would be pleased to have it called to their attention.

Reference is here made to the caustic potash treatment. At a very small cost one can purchase a small stick of caustic potash at a drug store and make use of it before the calves' horns break-through the skin. Clip the hair from the little spot where the horn will appear and apply a little grease around so that the caustic will not spread. Then moisten the stick of caustic and rub thoroughly. It will be necessary to wet the end of the potash stick from time to time in order to do effective work. One thorough rubbing should be sufficient to completely interfere with the growth of horns on a calf.

Grand Junction, Iowa, Poland China Sale.

The three days' combination sale at Grand Junction, Iowa, February 19th to 21st, inclusive, brought a good gathering of breeders and farmers together. Those who were in attendance found plenty of good material to study and few there were, indeed, who found it possible to leave without some of the good numbers that were offered. The five consignors, Messrs. George F. Freie, C. C. Healy, C. M. Howard, J. L. Hudson and J. W. Wampler, fully demonstrated their ability to put up a good sale offering. Owing to the failure of the railroad to deliver the tent, there was some inconvenience experienced; however, the crowd kept in good spirits from start to finish. Prices in good steady throughout, though some late ruled sows reduced the final average somewhat. The mature part of the offering was especially creditable and the top price, \$62, was paid by Mr. J. H. Bahrens, of Ft. Dodge, Iowa, for No. 29, a Perfection-bred sow owned by Mr. C. M. Howard. Mr. J. O. Thompson, of Maxwell, Iowa, secured a plum in No. 91, for \$56, consigned by Mr. J. L. Hudson. She will undoubtedly make good. Cols. C. E. Luther and W. W. Stewart, of Tingley, Iowa, did the selling, much to the satisfaction of all concerned. The average, which was close to \$31, makes a good record, considering the number of head sold. The attached list shows where the offering went:

Lot.	Name	Price.
35	I. K. Eaton, Grand Junction, Iowa	\$ 30.00
32	Sherman Moore, Perry, Iowa	36.00
45	J. F. Higgins, Grand Junction, Iowa	39.00

## — CAPACITY OF — CREAM SEPARATORS

Capacity is an important consideration in the purchase of a cream separator. It enters largely into the cost and value of the machine, and there is no way of properly gauging either without reference to it.

A large capacity machine separates the same amount of milk in just so much less time. This saving of time means something in dollars-and-cents every time the machine is used. It counts up in the course of a month or a year. Then the wear of the machine is just so much less and it lasts that much longer.

But capacity must always be determined with CLEAN SKIMMING under PRACTICAL, EVERY-DAY USE CONDITIONS,—with ordinary speed, milk cool as well as warm, cows as they come, and thick cream. Capacity means nothing if any of these conditions have to be sacrificed to obtain it.

Thus capacity marks one of the BIG DIFFERENCES between the "ALPHA-DISC" DE LAVAL and other cream separators. The DE LAVAL machines fully meet these conditions. All other machines either lack the capacity "claimed" for them or can only reach it through the sacrifice of one or other of the important considerations named.

The DE LAVAL catalog makes plain the reasons for this difference and is to be had for the asking.

### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

## Why You Should Have A Cream Harvester

If you are keeping three or more cows, it will pay you to own a Cream Harvester, because its use brings greater returns in the form of increased quantity and better quality of products, and because it removes much of the drudgery connected with dairy work.

It makes no difference whether you are making your cream into dairy products on your own farm or are shipping to a creamery. In either case the separator is equally important. It gives you more cream and leaves you the skimmed milk to be fed while yet warm to pigs or calves. If ground feed is added to this skimmed milk it becomes as valuable for feeding purposes as whole milk. This is one of the great advantages of a cream separator.

Then, the three big advantages of a separator are—more cream, less work and fresh skimmed milk for feeding, and these are sufficient to pay the cost of a separator in a short

time. But not all separators will do the same for you. Some make more work instead of less work, for they are so hard to operate and so hard to clean. Watch out for these things when you buy a separator.

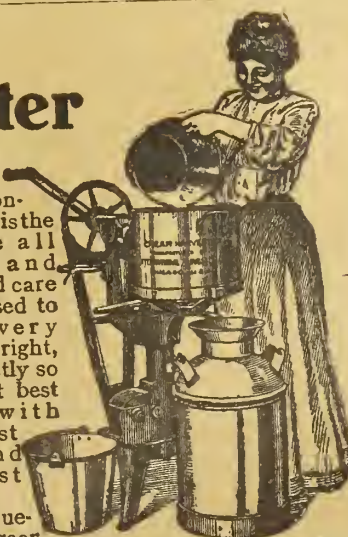

It will pay you to call on the International local agent and examine The Dairymaid and Bluebell Separators. There you can see by actual test how they will skim down to the one thousandth part, whether the milk be warm, cold, rich, viscid or old.

You can try for yourself, and see how easily they are operated. Notice in the illustration how the handle is at just the right height, and that the supply can be low while the milk and cream spouts are high.

You can see the excellent gearing, and how, though all the parts are covered to prevent dirt getting into the bearings, each is easily accessible; how strong and simple they are, and how this will give them great durability.

You can see how simple construction is the key note all through, and what rigid care is exercised to make every part just right, and exactly so as to get best results with the least work and the least trouble.

The Bluebell is a gear drive machine, and the Dairymaid is a chain drive—you can take your choice. If it isn't convenient for you to call on the agent, write for catalogs. These tell in concise descriptions and in many excellent illustrations what you will wish to know.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A.**

## OUR HOME DEPARTMENT

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 727, Kansas City, Mo.

## WITH THE EDITOR.

Although American women enjoy the privileges of full suffrage in a few states and limited suffrage in quite a large number, and although there are perhaps a hundred thousand club women in the country at large, there seems to be no disposition on the part of women to neglect their homes or rush into public life.

At this stage of the game it is probably just as well that it should be so. There are still many persons who hold the good old-fashioned idea that the place for woman is at home minding the babies. In the minds of quite a number of persons women and babies are as inseparably connected as flowers and a garden. They know that there are seasons when there are no flowers in the garden, but it never seems to occur to them that there is any time in a woman's life when she is without babies.

An eminent English scientist in a recent interview, published in Great Thoughts, expresses himself as of the opinion that society loses immeasurably in failing to avail itself of the services of a class of women whose numbers are constantly increasing in consequence of the advance in medical science. He refers to women of forty or fifty whose children are growing, or already grown, and passing out into the world.

Dr. Saleeby claims that this class of women is not only fitted for public service, but should be given opportunity for public service. He holds that society needs them and that they need society. Absence of outlet for their energies and interests induces senile decay in large numbers of women at the very time when society stands badly in need of just such service as they are eminently suited to give. As he justly remarks a wiser society would rectify this double wrong.

Unlike many men Dr. Saleeby is not afraid of woman suffrage. He frankly declares that, personally, he has never heard an argument against it that was not ridiculous. Moreover he honestly thinks that "the arguments commonly heard should be allowed to retire to obscurity; that they cannot stand the wear and tear of public appearance." Continuing, Dr. Saleeby said: "Consider for a moment, the argument about taking women from their domestic duties. So far as the mere recording of a vote is concerned it takes no more time than an afternoon's shopping. It has only to be laughed at. And as for continuous work, whether on county councils, or elsewhere, no one who knows women at all will imagine that the attraction of such work will take away from motherhood the normal woman, and the women whom it would tear away are just the very women whose natural gifts do not lie in the direction of motherhood."

One point in Dr. Saleeby's position deserves special attention—it was referred to at the outset of the article—he makes a strong point of the foolishness of society's failure to utilize the services of the older women of the community. His words are: "I should welcome the day when society recognizes that the domestic duties of a woman, by the time she is fifty, have usually become very light. Her eldest children are married and independent, and even her youngest may be so, or at any rate needs very little of her time. This is the

## TWO PIANOS! CASH! BIG PRIZES FREE!

If this chart gets destroyed another printed upon heavy paper will be sent upon receipt of 2c stamp for postage.

**CONDITIONS**—50 cents pays for a year's subscription to **SUCCESSFUL FARMING** and one count; \$1.00 pays for two years and three counts and makes you eligible for the special \$50.00 prizes given to winners of 1st prizes if they have three counts. See below.

**AWARDS** will be made as follows—The person giving corrector nearest correct count will get first prize. Next nearest second, etc.

**\$50 PRIZES**—We believe everybody should have three counts so they can have one each side of what they think is correct to be more sure to hit it. To encourage this we will give \$50.00 extra to winners of 1st prizes if they have three counts. Remember if you have one count you get piano only, but if you have three counts you get \$50 extra.

**TIME PRIZES**—\$25.00 Extra. We feel early counters should be rewarded and we will give \$25.00 to the person sending best answers by Feb. 28th.

**OUR RESPONSIBILITY**—We are a responsible business house, and every prize must be and will be paid as stated. We refer to Iowa National Bank, Central State Bank, German Savings Bank; in fact any Bank, Express Company, business house or individual in Des Moines, as well as Dun or Bradstreet's Agency, or the publisher of this paper.

**JUDGES**—We have wholly disinterested judges to award prizes. Here is what they say:

**TO WHOM IT MAY CONCERN:** We have been asked by the publishers of **SUCCESSFUL FARMING** to act as judges in their contest and see that prizes are all awarded fairly. This we will gladly do guaranteeing each contestant absolute fair treatment. Signed—W. W. MORROW, Treasurer State of Iowa; HUGH BRENNAN, Judge District Court; Rev. A. J. WILLIAMS.

In case of tie we will write each person so tied asking them to make as few words as possible from the letters of the alphabet, using each letter of the alphabet twice and only twice, and no one word more than once, each letter left over counting as one word. To the one tied in the counting who gives us the fewest words as above will be awarded first prize. This practically eliminates all question of tie, but if there should be any possibility be a tie in this prize will be divided equally between those so tying.

Subscription without counts is 25 cents per year, additional counts after you have three entered as per our terms in paragraph "condition" above may be entered at 25 cents each.

This contest is not to be confused with the guessing or estimating contests. Our contest is a test of skill in planning and counting and the best man wins. Nobody connected with our paper will be allowed to compete. Contest closes June 30, but get your counts in at once. See about time prize above.

Address all letters to **SUCCESSFUL FARMING, 381 Tenth St., Des Moines, Iowa.**

## CAN YOU COUNT THESE DOTS?

SUCCESSFUL FARMING WILL GIVE TO THOSE WHO CAN COUNT THE DOTS IN THE PIANO CORRECTLY OR NEAREST CORRECTLY, THE FOLLOWING LIST OF PRIZES: CAN YOU DO IT?

Two Elegant Pianos, one to a lady and one to a gentleman.

2nd. Two Hundred Dollars Cash.

3rd. One Hundred Dollars Cash.

4th. Fifty Dollars Cash.

5th. Twenty-five Dollars Cash.

Next 5. Ten Dollars Each.

Next 10. Five Dollars Each.

Next 25. Two Dollars Each.

**CONDITIONS:** 50 cents pays for one year and one count. \$1.00 pays for two years and three counts. You get \$50 extra if you have three counts. It will pay you to have three. See conditions below.

## DON'T DELAY!

IF YOU WANT A PIANO OR OTHER PRIZES SEND YOUR COUNTS AT ONCE

**PRIZE WINNERS IN PAST CONTESTS**

A Piano for \$1.00. Surely people may enter your contests knowing that they will receive fair treatment. How glad I was to win a piano for so small an amount and wholly unexpected. The paper alone is worth all I paid.

MRS. L. W. NOTT, Marion, Ia.  
He Won a Piano. Refer people to me if they are honest. I got a piano for a prize and never heard of you until I answered your ad. Your paper is worth twice the subscription price.

W. C. ELLIOTT, Audubon, Iowa.  
I got my \$100.00 prize the easiest I ever earned. The dots are hard to count but I know the prizes go to those who win them fairly.

AMY R. BARNES, Van Horn, Iowa.  
To Whom It May Concern: I won grand prize of \$350.00 Cash in last contest. I was much surprised. I won \$350.00 Cash in last contest. I was much surprised. I won \$350.00 Cash in last contest. I was much surprised.

JOHN A. GOODWIN, Richmond, Va.  
Way nphere in Canada I won \$50.00 for Canada. I never knew there was such a paper until I answered ad. Now I will never be without it again.

MISS E. FURNIER, Mantano, Quebec.  
I received the elegant piano which I won in your recent contest, and all was perfectly grand. I am recommending you to all my friends and you are at liberty to use my name as reference any time you wish.

ISAAC SHOTWELL, Rockland, Ohio.  
**OTHERS WHO HAVE WON:**

Myra A. Fursman, Panola, Ill. E. L. Jones, 82 Cottage Ave., Ansonia, Conn. Mr. Libble Greulich, St. Paul, Minn. W. B. Keever, 817 Freeman St., Cincinnati, O. J. Gemachlich, Kensington, Kan. Edith Hutchinson, Leonard, North Dakota.

I enclose \$..... for subscription to **SUCCESSFUL FARMING**. and I wish to enter the..... (write ladies' or gents') Contest. If \$1.00 is paid send three counts; if only 50c is paid send ONLY ONE count. The extra \$50.00 go only to those having THREE or more counts entered.

My Count is: (1)..... (2)..... (3).....  
NAME.....  
P. O. .... State.....

woman whose knowledge and experience and moral discipline can be turned to the utmost national service. She has no private interests to serve; she will be extremely conscientious, hard-working and faithful in her devotion to matters concerning the young generation—which matters are the only vital matters for any nation."

## HOME AND HOMEMAKING.

**LITTLE HELPS BY THE WAY.**  
"Even here," says Phillips Brooks, "every man may claim his own life, not for himself, but for his Lord." Even here and now one may live as unto the Lord; live with tenderness and consideration and care for others; live with dignity and fortitude through his own trials and keep in spirit touch with divine and beautiful things. He who contributes as best he can to the happiness of the world is the practically religious man; who does so in the name of Christ is the practical Christian.—W. B. Smith.

But the question is not what experiences you have had, but what use you have made of them, whether you have read them aright, and learned wisdom by the things you have suffered; whether you went on and on, still trying to find God's star, which was your one guide, still trying to read aright the sealed order which was continually being opened up to you.—Oscar McCulloch.

**A SMILE OR FROWN.**  
Which do you think is prettiest, girls, A smile or a frown?  
There may be beauty in crimps and curls, And a neat, dainty gown;  
But if your face has the slightest trace Of a frown thereon, it has less of grace. Beauties within are beauties that stay; Those from without will soon pass away.

Which, now, is sweetest, a frown or a smile? Now tell us the truth.  
Which do you think is really worth while? A frown is uncouth.  
But if your face has the faintest trace Of a smile thereon, it has more of grace. Beautiful souls shine out through the eyes,

Clear as the light from cloudless skies. —W. S. Whitacre

## SMILES.

"I have often stood in a slaughter house," observed the fleshy man from Chicago, "while the butchers were killing hogs on all sides of me."

"Oh," exclaimed the tender-hearted, but tactless girl, "weren't you dreadfully afraid?"

"Are you willing to chop some wood for me," asked the kind lady, "if I will give you a good dinner when you've done?"

"Dat depends," replied the hobo. "Depends on what?"

"On whether yer'd let me look over de menu card before I starts in workin'."

## OUR WONDERFUL LANGUAGE.

Baby Powder—Powder to put on babies after bathing them.  
Insect Powder—Not a parallel case.  
Fish Food—Food for fishes to eat.  
Seafood—Different.

Horseshoes—Shoes for horses to wear.  
Kid Gloves—Rule doesn't hold.  
Baby Buggy—Buggy for baby to ride in.  
Top Buggy—Not a buggy for a top to ride in.

Boot Tree—A tree to shape boots on.  
Apple Tree—Not a tree to shape apples on.  
Milk Cart—A cart to haul milk in.  
Pushcart—Not a cart to haul the push in.  
Kitten—A small cat.  
Mitten—Not a small mat.—Chicago News.

## HOUSEHOLD HINTS.

After continual use the lamp burners will get dirty and dingy. I think the following a good way to clean them. Put the burners in a stew kettle and cover them with boiling water. Add a tablespoonful or so of wood ashes and a lump of lye soap. Set on the stove and boil half an hour. Take off and dry the burners, then brighten them up by the use of powdered charcoal or brick dust.

The following recipe is highly recommended for its efficacy in cleansing fabrics without injuring the texture or "starting" the color, however delicate: Grate two potatoes of ordinary size into a bowl containing one pint of clean, cold water; strain carefully through a sieve, allowing the liquid to fall into another vessel containing an additional pint of cold water. Let it settle and then

pour off the water and bottle it for use. It may be put into a clean fruit jar. Rub the soiled garment softly with a sponge dipped in the potato water, after which wash it in clean water. Dry carefully in the shade and then iron it. Use the sediment left after pouring on the water for cleaning heavy cloths, rugs and carpets.

Essence of cinnamon, when exposed in a sick room, will kill the bacilli which are floating around. A decoction of cinnamon is recommended as a drink to be taken freely in localities where malaria or fevers prevail, for cinnamon has the power to destroy all infectious microbes.

## GOOD HOT SUPPER DISHES.

More than one housekeeper I have heard say, "Supper is the hardest meal in the day. Do tell me of something new in the way of a relish!" Or, if a late dinner is served, there must be a substantial luncheon smoking on the table when the children come in hungry at "noon recess," for this want is, of course, particularly felt in cold weather. Of the following recipes, a few are dainty enough for "company tea," but most are meant for plain, every-day use, and all are appetizing, nourishing and easily prepared:

**Creamed Eggs**—Pour into a saucepan half a pint of milk, three tablespoonfuls of butter, a saltspoonful of salt, a little celery salt and a dash of pepper; thicken with a little flour made smooth in milk, and allow it to boil up once. Have prepared five or six eggs that have been hard boiled, crumble one of them into the mixture, arrange the others in thick slices in the center of a hot platter, turn the cream over them and garnish with three-cornered pieces of toast and an occasional sprig of parsley. Serve very hot.

**Cheese Balls**—Are made of one cupful grated cheese, half a cupful of fine bread crumbs, five drops Worcestershire sauce, and one egg well beaten; mix together; roll into balls and place in a wire frying basket, and just before time to serve, plunge the basket into boiling fat and allow them to remain until a delicate brown.

**Codfish Souffle**—Pick into flakes and soak over night half a pound of salt codfish; drain and add one pint of light mashed potatoes, four tablespoonfuls of milk and the beaten yolks of two eggs; mix and fold

500

NEW YORK, N.Y. CO. LONDON, U.S.A.

in the well-beaten whites of the eggs; put into individual cups or a baking dish and bake in a quick oven for ten or fifteen minutes.

**Sour Milk Muffins**—Measure two-thirds of a cupful of sour milk and fill the cup with sour cream. Beat two eggs well, add the milk and cream and one and one-half cupfuls of flour in which half a level teaspoonful each of salt and soda have been sifted. Turn into hot greased iron gem pans and bake in a quick oven.

**Batter Bread**—Beat two eggs light; stir a cupful of cold boiled rice into a liberal pint of milk and add to the eggs, rice and milk a tablespoonful of melted butter; sift a teaspoonful of salt into two cupfuls of Indian meal; stir all together and bake in a pudding dish. Eat hot. Should the meal thicken too much, add more milk. I sift a teaspoonful of baking powder with the meal, but that is an innovation. Brands of meal differ in the matter of thickening when wet, as much as different barrels of flour. The mixture should be of the consistency of pound-cake batter, and beaten hard at the last. Some cooks scald the meal and let it cook before mixing. They say it takes off the raw taste. Then less milk is required.

### AMONG OURSELVES.

A Home Department should mean a place for men as well as women. It greatly pleases me that we are hearing from the men much more than in the past. I hope to hear from men as well as women, perhaps in even greater numbers than the women, concerning the topic for discussion about to be introduced by two of our members living in quite different parts of the country—Mrs. Custer County, and Mrs. Massey, friends:

We have four boys, the oldest respectively twenty and fourteen years, who are hoysish as boys usually are, and wish to go to the base hall games on Sunday. Now, while I do not particularly object to hall games, although it is generally a gathering of toughs, yet I do object to such things and their attendant surroundings on Sunday. We live two miles from a small town which has two nice churches—our two girls attend regularly—and the boys do until they "get too big" to go to Sunday School. Then they are just the right size to run to hall games and races, as all the neighbor hoys do. Now, I do not want you to tell me I should take them to church every Sunday, for I cannot go myself—as dearly as I should love to—after doing all the work for a big family with lots of comers and goers. For myself and husband we have to consider Sunday our day of rest, but the hoys—what are we to do with them on Sunday when they have the base hall craze? Will some of those wise fathers who have graced our page come to my rescue? Shall the hoys be allowed to put in their Sundays running miles to hall games?

Should our children play hall, etc., skate, visit the neighbors' children and have a romping time on the Sabbath day or should we keep them quietly at home while they are not at Sabbath school, and encourage them to spend the Sabbath quietly? For myself, I prefer that my children should stay at home and read some nice book or play Sunday school with their dolls (if the children are small), playing out doors quietly part of the time. If they are older and do not wish to read all of the time, buy them some Bible games and let them play them, which will both amuse and instruct all who are old enough to read.

This is a very important question. Let

us bring to it our best judgment and endeavor to discuss it broadly and helpfully. Please make the letters quite brief, friends.

Mr. A. J. Secor craves the privilege of the floor today as a man who believes that the boy is father of the man:

There seems to be great interest in this department, perhaps because united by sympathy aroused by personal difficulties. Now, there are men and women, and girls and boys. I write for the hoys. They have been neglected in this department, as well as outside of it. From the girls and men and women we have heard, but where is the boy? In a very large number of cases he is spending his spare time either alone trying to make the most of himself or off with the crowd making the worst of himself. The young men that read this may ask, "What should he be the aim, then?" I say, he a man—not what some people call a man; a man according to the best definition the world has produced, which, however, is not found in the dictionary. The former writers have not judged wrongly when they place the blame for much of the social trouble and misery upon the boy, but whose fault is it—not all the hoys', I claim. The father must hear the second blame and perhaps his father the third. But to the hoys I say no matter who your great-grandfather was, you are here now to do the very best you can. Where shall you begin? Begin just where you left off doing what you knew was right. There seems to be a common notion among boys that it is far below their caste to be seen at church. You sometimes talk about being brave. The bravest boys I have known are those who passed base ball games and fishing crowds to go to church. Not the boy, though, who always told everybody that he had not missed a Sunday, etc. Not a word would be said about church going if it were not for the fact that you cannot become the man you should without the Great Example. Of the evil ways of boys such as the "sowing wild oats" phrase describes, it is needless to speak, for we all know that is the "wrong way." Let the hoys now speak for themselves.

We shall be pleased to hear from the boys on their own behalf. We are sorry if their interests have seemed to be neglected here Among Ourselves. Perhaps the discussion of Sunday amusements will bring some of them to the fore. We shall hope so.

And now to resume the discussion precipitated by Lady June Bug concerning the wedding of June and December. Sunny Jim's Wife missed connection last week, but she is here today to finish her "say."

Contrary to "June Bug's" expressed opinion, men who wed girls younger than themselves usually do so for love alone. If they didn't want love above everything else they would marry some rich widow or old maid older than themselves (as mercenary men often do) and hire a "chore boy" or "chore girl" with the rich widow's money. It is natural for men to love women as old or older than themselves, for which reason when a young man weds an old woman it is for her money, every time. The girl who marries a man several years her senior is nearly sure of getting a devoted husband who will almost worship her, for men appreciate youth as well as beauty in women. If the girl returns his love they are sure to be happy. Girls, you need not marry a rich man, but try to get one who has the ability to support you, combined with plenty of health and no bad habits. When it is a choice between love and money, take love every time. But try to get a little of both if you can. Never marry for money alone. Alas for you if you do!

While individual experiences cannot be considered as furnishing conclusive arguments, they are nevertheless a valuable and interesting contribution to a discussion of this kind. It is with pleasure that we present two such for the consideration of the circle this week. Mrs. Phoebe will be followed by "A Dakota Farmer's Wife."

I wed a "December." Unhappy? No. Husband is ten years older than I am, and, June Bug, he did not turn my head, but my heart. Why? For his sterling qualities and well-formed habits. Yes, he had his day, but that was well spent. He formed his habits for a purpose. Some day he might have a wife. He would have a clean page for her to read; he would acquire habits that would be of benefit to both; and when I knew him I recognized these traits, and was willing to walk in confidence by his side. I gave no regard to "age." I looked beyond and deeper. I found good judgment, sympathy, respect for woman and her duties, one who read and could converse intelligently on all topics, and I considered that as a wife I would be safe with such a man. As a rule a wife becomes a mother and she should choose character and the above qualities, rather than "age" in the father of her children.

Unlike "June Bug," I believe in the old saying, "Better be an old man's darling than a young man's slave." I am speaking from experience, also, and in the six years of my married life I have never regretted the day I married a man fourteen years older than myself. It is my opinion that ten years or more, if love be the object of marrying—and there should be no other, is not too much difference in the ages of husband and wife. Girls, if you love a good man and are sure he loves you, though he be twenty years your senior, marry him by all means, and I don't believe you will ever regret it. Neither husband nor wife can make home happy without the aid of the other. It takes all hands.

We are still waiting for the men to give us leaves from their life book. We hope they will not disappoint us.

One of our young people who has not,

## GREATEST PREMIUM OFFER EVER MADE

Six Beautiful Roses Given by a Well-Known Farm Journal!

Every person in America who loves flowers will be interested in this wonderful offer. To introduce our popular farm publication into new homes we have secured a splendid collection of six of the most beautiful roses ever offered the public. They are not cheap, common varieties, but the choicest and most famous roses; are well-rooted, strong and healthy plants, guaranteed to give satisfaction or money refunded. We are giving this entire collection of six choice, ever-blooming roses, together with a six months' subscription to our popular farm journal, for only 25 cents. The roses, which are carefully packed and are sent prepaid are as follows: The wonderful new Climbing Rose, the Crimson Rambler, the grandest Climbing Rose in existence; the Meteor, a magnificent, velvety red ever-bloomer; Madam DeWitteville, a remarkably fine shade of creamy yellow of striking and beautiful appearance; Star of Lyon, a charming Tea-Rose, of rich golden yellow and an immense bloomer; the Frances Willard, finest pink Rose ever offered; the Queen Victoria, snowy white, with rich full flowers. This liberal offer is made solely for the purpose of advertising our big farm paper, which already has a quarter million circulation. Remember, we send all the above collection of six fine roses, with six months' subscription for only 25 cents. Order at once before they are gone. Remit by money order, silver or stamps. Address THE VALLEY FARMER, Rose Dept., 512 Jackson St., TOPEKA, KAN.

## YOU FURNISH THE HIDE

We'll do the rest

We are tanners of Horse, Cattle and other Hides and manufacture same into coats, robes, rugs, etc. Hides shaved down and tanned by our process are light, even in thickness, pliable and are moth proof. We are tanners and manufacturers, not merely agents. We own and operate one of the largest and best equipped tanneries in the middle-west and guarantee the high quality of our work.

## SMOKE YOUR MEATS IN THE NEW WAY, USING WRIGHT'S CONDENSED SMOKE

A liquid made from hickory wood. Imparts the delicate flavor that is peculiar to meats smoked with hickory wood. USED BY APPLYING THE CONDENSED SMOKE WITH A BRUSH. Send 10c and names of five who cure meat and we will mail you sample free. Sold only in square quart bottles with metal cap. Never in bulk. At druggists, 75c per bottle. Bottle smokes a barrel on curing meats. BE SURE TO GET "Wright's Condensed Smoke." Made by WRITE FOR FREE BOOKLET THE E. H. WRIGHT CO., LTD., 109 W. FOURTH STREET, KANSAS CITY, MO.

I judge, lived very long in the country, is moved to an unburdening of the mind:

I live in the country, and though my father owns our beautiful home, oh, I do just get so lonesome sometimes. I think country people are much more selfish with each other than the town people are. Don't you think if anyone ought to be brotherly and sisterly it is the country people? When we have some bad luck and need sympathy and encouragement with our work it is such a help if you know one of your neighbors is like a brother to you and you can talk things over with him. I think country people ought to cultivate the spirit of brotherhood and be more helpful when sickness or trouble comes.

Is there not room for improvement in the direction hinted at by this young friend? Is it not true that farmers are sometimes careless about making newcomers feel at home? Sometimes so absorbed in work that they take less time than they should to cultivate their neighbors? Sometimes forgetful to be

sympathetic during times of sickness and bereavement?

Next week we shall probably begin the discussion of dancing. Meantime, Miss Annie Hoffarth wishes to ask a question prompted by the proposed discussion:

In discussing the subject of dancing, those who oppose it will doubtless produce convincing arguments to prove conclusively the evils resulting from it. But cannot someone suggest some kind of entertainment for our young friends that we may substitute for dancing? Young people must have some means of amusement, and we should endeavor to provide such as will entertain and be uplifting, too. But how to do so is the problem yet unsolved by me. The young people here in the country who are fond of dancing are a sociable, fun-loving, kind-hearted set. Usually, they care but little for reading or study, though all are bright and intelligent. This makes any kind of a club or society for study out of the question. Card parties are no improvement over dancing, and the play parties with their promiscuous kissing are no better, either. Dancing is growing less frequent than it was a few years ago, and the introduction of some bet-

ter means of entertainment would cause it to be relegated to the past. Why not sign your full name and address to what you write if you are not afraid or ashamed to publicly acknowledge the authorship of the article. When I read such good, sensible letters I feel disappointed to see only a nom-de-plume signature, when I should like to know the real name of the author.

A man who holds that the men should have more to say in the Home Department sends a letter which he clipped from an exchange, with the request that we give it place Among Ourselves and ask that the men discuss it:

#### HOW ABOUT THE HUSBAND?

I have been reading so much about how the wife should keep herself neat and tidy lately that I could not help wondering if the same rule would not work real good both ways and if a man should not try just as hard to retain the wife's love as the wife the husband's. Now we will suppose it is Saturday morning. The husband goes to the field; the wife at her Saturday's work. She scrubs and does some extra nice cooking and baking, for tomorrow is Sunday and they are in the habit of going to church Sunday morning and may get home late. Well, noon comes, and the husband comes from the field. We don't expect him to be clean then, but he washes carelessly and wipes the rest on the towel. They have decided to go to town in the afternoon. So he lies down some place to rest a little while his wife gets herself and baby ready and packs the eggs and butter. She tells the boys they can clean up and go along, but the father says, "They are good enough the way they are. We are just going to town." Well, the wife gets ready, combs her hair and puts on a neat-fitting light dress. The husband drives up; he is ready, too—with a few hay seeds in his hair and his old bib overalls and shirt that he wore all the week, with an old slouch hat having part of the brim torn off. But he is

just going to town, he says. Do you wonder if that wife feels a little ashamed of that man? And do you wonder if she doesn't look as young and happy as she might? Do you blame her if she stays on the other side of the street and if she meets a friend that she can't be proud to introduce her to her husband? Sunday morning comes and it is raining. They can't go to church. So the husband does his chores up and dops himself down on the sofa among the pillows, with the same old duds and whiskers on that he wore last week; but the wife must clean herself up, you know—to please her husband. She gets the good dinner on the table at noon and calls him. He gets up, comes to the table, gets his head in his plate, and feeds his face with both knife and fork, finishes his dinner a little before the family gets through, pushes his chair back, takes a chew of tobacco, maybe spits some tobacco juice into her cook stove, and goes off to enjoy his dirt again. He didn't know his wife was clean; all he knew was he had something good to eat. And if his wife speaks to him about cleaning up, he says: "Well, this is the only day in the week I have to rest, and I am going to rest." Is he lovable or kissable? What would you do if he wouldn't change, even at night, without a fuss? Is it easy for the mother to teach the children, especially boys, to be clean and have good table manners, as they almost always will pattern after father, and the girls after the mother? Do you blame her if she loses courage sometimes and doesn't care if she is loved by such a slouch or not, even if he is good in some other ways? Maybe he hasn't bathed his body or washed his teeth for six months. When he said, "Cleanliness is next to godliness," did he mean it just for the women and children, or did he mean it for men, too?

The man who sends this suggestive letter propounds several questions which he wants the men, not the women, to answer. "Why," he asks, "is it so easy for men to slip off their shoes when going to see their sweetheart, and so awful hard to do it for the same girl when she becomes his wife?" Also, "Why do the majority of farmers always grumble when their wives want them to put on a clean shirt when they go to town?" These are pertinent questions; answers to them ought to be decidedly interesting. We are all attention, gentlemen; let us hear from you at your very earliest convenience.

#### Dressmaking and Millinery, No. 558.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

The over-waists in the various styles that came into favor to a considerable extent a year ago are promised even more extensive vogue through the coming season. In fact, many of the spring costumes will have one of these instead of a shirt-waist as its body garment. These over-waists have various forms and are designated as "jumper" waists, skeleton waists, guimpe waists, etc., and may be of material like the skirt, or in the skeleton form they are frequently of ribbon or of velvet matching the skirt in color only. The jumper waist is almost always worn over a lace or lingerie blouse, but those of the skeleton form may be worn over a silk waist of a harmonizing color, or when of material different from that of the skirt the waist worn under may be of the skirt material. Some designs of these

## "Better Than Gas!"

SAYS THIS NEW YORKER:

"I have used The Angle Lamp far beyond the time set for trial and find that one cannot be too enthusiastic over it," writes Mr. Granville Barnum, of Cold Springs, N. J. "It certainly gives the brightest and at the same time the softest illumination one could desire."

"We lived, for some years, in New York City, and used the latest and most improved appliances, devices, etc., in connection with gas or electricity and yet I must sincerely urge the superiority of this simple yet wonderful method of illumination. One can hardly say too much in its praise."

Notice, please, that Mr. Barnum has used gas and electricity with all the most improved devices for years. He, like thousands of others who use these systems, would probably have pooh-poohed the idea that an oil-burning lamp (or any other system for that matter) could be more satisfactory—until he tried The Angle Lamp.

He now admits that The Angle Lamp gives him all that either gas or electricity can give in convenience, and something more—kerosene quality light. It floods his rooms with the finest, softest, pleasantest of all artificial lights. Yet The Angle Lamp pays for itself.

For where the ordinary lamp with the round wick, generally considered the cheapest of all lighting methods, burns but about five hours on a quart of oil, The Angle Lamp burns a full sixteen hours on the same quantity. This, even where oil is cheap, soon amounts to more than its original cost. But in another way it saves as much, perhaps more.

Ordinary lamps must always be turned at full height, although on an average of two hours a night all that is really needed is a dim light ready to be turned up full when wanted. A gallon of oil a week absolutely wasted, simply because your lamps cannot be turned low without unbearable odor. All this is saved in The Angle Lamp, for, whether burned at full height or turned low, it gives not the slightest trace of odor or smoke.

## Why White Light Causes Blindness

We have given you several good reasons why you should use Angle Lamps for lighting your home, reasons that appeal to your pocket-book, to your common sense and to your love of a well-lighted, attractive home.

There is one more reason and it is the most important of all—the health of your eyes. The light of The Angle Lamp, while more brilliant than ordinary lamps and intensified by being all thrown directly downward upon your book, table or work, is of the soft, warm, restful quality for which kerosene oil is so justly noted—the quality which causes even the people who use gas or electricity for general lighting, to stick to oil lamps for reading or working.

There are, you know, really but two kinds of light for home use. One is this splendid, soft, kerosene light. The other, the thin, penetrating, colorless, white light, such as comes from the use of a mantle with gas or gasoline, and the acetylene light.

A few years ago this white light was quite the rage. City people had all their gas jets fitted with mantle burners, and country people tried gasoline. But they only used them for a little while. Then they went back to the open tip burner and kerosene lamp. Not because the breaking of mantles caused a great deal of annoyance and expense, although that did have its influence. No, people went back to these older systems because they found that the penetrating mantle light was fast ruining their eyes.

Do you know that the most conscientious American manufacturers no longer manufacture what is known as the "pure white" mantle? Simply because they have found what all students of illumination have found—that the pure white mantle develops a light so thin and colorless and penetrating that it pierces the retina of the eye,

and, like the X-Ray, paralyzes the optic nerve, soon causing blindness.

Yet this pure white mantle, at first heralded as the perfect imitation of sunlight, is merely the highest development of the kind of light which some people still use because of penetrating qualities that enable them to read a long distance from the fixture. They either forget or fail to appreciate the destructive effect of this very quality on the eyes.

Now, that fact contains another thought for you about lighting—look out for any light that imitates the light of the sun too closely! For such lights are dangerous.

Because when you read or work by sunlight you use only the diffused, softened light; never the direct rays of the sun, which so quickly dazzle the eyes. But when you work under artificial light you must always use the direct rays of light; for you know that you can't read with someone "standing in your light."

Consequently, artificial light must be of softer, warmer quality than the sun's direct rays.

And that is just why kerosene is the most perfect illuminant; the direct rays of the oil light contain just enough of red and yellow to give the softened, diffused, indirect rays of the sun.

Now, Reader, if you are interested in a satisfactory lighting method—a method which will cause your friends and neighbors to exclaim, "How beautifully your home is lighted!"—that will save you one-third to one-half of what your present system costs you, that will give you the operating convenience of gas and a light of the soft, warm quality which fully rests and relaxes the tired nerves of the eye—then write for our catalog "33" and our proposition to prove our statements about The Angle Lamp by

## 30 DAYS' TRIAL

Yes, write for catalog "33" and do it now. For, surely, when such people as Ex-Pres. Cleveland, the Rockefellers, Carnegies and thousands of others find, after trying The Angle Lamp, that it is profitable to rip out gas and electricity, to throw away gasoline and acetylene outfits or ordinary lamps, it is worth your while to send a penny postal to find out about it.

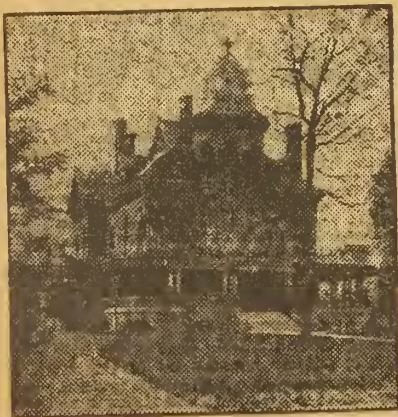

Our catalog "33" listing 32 varieties from \$1.80 up, and our booklet, "Lighting and Common Sense," which gives you both the benefit of our ten years' experience and experiments with all known lighting methods, are free on request.

THE ANGLE MFG. CO., 78-80 Murray Street, New York.

## Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Mrs. Miller's New Residence, Earned in Less Than One Year.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was beset by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dollars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

#### Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell any sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000.00 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 5402, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000.00 worth is all gone.

[5583—Blouse or Shirt-Waist, 32 to 42 bust.]

will be shown later on, and meantime you can be planning for them. Or if wanted at any time, orders for them can be filled.

Another "last year's" fashion that has been carried over and that promises to lead in the spring fashions is the short jacket in the Eton and also in the pony shapes. These are built on almost exactly the same lines as heretofore, with perhaps a slight decrease in the size of the sleeve, as all sleeves are promised to be smaller, but in the very early season almost imperceptibly so. The Etons are still made with the elbow or the three-quarter length sleeves, and it may be added that about the same modes in sleeves in all garments will prevail that were favored a year ago, slight changes as to full-

## The Acme Harrow

Well pulverized soil is the most important requisite of a good seed bed. No field—no matter how rich—is well prepared for seed unless the ground has been thoroughly pulverized. Does the old fashioned spike or spring toothed harrow do that? It does not. It does tear up the grass, weeds and trash the plow buried, and which should stay buried. What you need is the ACME All Steel Riding Harrow—the only harrow built on scientific principles. Flat steel spurs go ahead of the Acme coulters or teeth, crushing and leveling every clod.

Then the coulters like long plowshares follow, turning the soil both ways and mixing it. When they get through with it the soil is as fine as a Harrow can make it and presents all its food to the seed.

Think how much easier on the team the Acme Harrow is! The old harrow dragged bluntly against the soil. The Acme cuts smoothly through. Then the Acme is very convenient to move from one field to another, as a lever raises the coulters from the ground. One man can put the harrow in a wagon or sled with ease.

The Acme is the lowest priced harrow made and is built to last. Write for free book, "A Perfect Seed Bed." Written by distinguished agriculturists. A postal to me and it will come.

**Try the Acme FREE.**

## Cancer Cured at Home

I have so perfected my Mild Combination Treatment that patients may use it at their home with as good results as though it were applied at my offices. I will gladly furnish to every sufferer positive and indisputable proofs that my treatment does cure Cancer. I will furnish ample evidence of my integrity, honesty and financial and professional ability. No matter how serious your case may be—no matter how many operations you have had—no matter what treatments you have tried—write for my book, "Cancer and Its Cure." It will cost you nothing and will tell you how you can be cured at home. Address,

**DR. O. A. JOHNSON, SUITE 371, KANSAS CITY, MO.**

137 Have you a friend suffering from Cancer? Do them a favor they'll never forget by sending them this ad

ness, finish, etc., stamping them as being up to date.

No. 5583 illustrates a shirt-waist in which some of the season's special features are to be noted. By the arrangement of the tucks the broad-shoulder effect is given in a manner suggestive of the Gibson type that had such vogue some seasons ago. The

fulness of these tucks or pleats extends to the waist line at back and front, but they are stitched only to yoke depth across the shoulder. Corresponding tucks turn toward the center front and center back, those at the front stitched to yoke depth, while at the back the stitching is carried to the waistline. The center front closing may be ar-

ranged by means of buttons and buttonholes, but newer is the use of studs for this purpose, and they will be used very generally on wash waists. The sleeves may be made in the full length bishop style, or in elbow

[5584—Tucked Kimono, 32 to 42 bust.]

length, the finish in either mode being novel turn-back cuffs held by cuff buttons. The collar may be a high turn-over or a low roll-over in Peter Pan style. The pattern

# Famous SPLIT-HICKORY Vehicles

Sent to Responsible People Everywhere on  
**30 DAYS FREE TRIAL**

You Pay Us Nothing Until Satisfied

**Send No Money** But write me at once for full information about this most liberal offer. Remember, you can have 30 days free trial on any of my famous Split Hickory Vehicles, and you don't have to pay any money unless satisfied.

**Write for BUGGY BOOK Mailed FREE**

Don't buy a buggy or vehicle of any kind from anyone until you get my valuable Buggy Book. It is the most wonderful book about Vehicles ever published. Just write me a postal card and say "Send me your free Buggy Book," and I will send it to you by return mail absolutely free. Write me now before you forget it. **H. C. PHELPS, Pres.**  
**THE OHIO CARRIAGE MFG. CO.,** Station 31, Cincinnati, O.

provides for a fitted lining which may be used or omitted. Pattern No. 5583 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure. Give size when ordering pattern.

The tucked kimono shown in No. 5584 is entirely new and so nobby that I am glad to be able to give it to you while you are busy with your "home wear" garments, and so interested in such designs. The tucks at back and front provide just the right amount of fullness, and for those who like these garments with a closer adjustment at the back, as many do, a band slipped through openings in the under-arm seams, and tied beneath the fronts is just the thing. The trimming band carried across the shoulders gives the fashionable breadth. The sleeves may be made as shown, or cut slightly longer and finished with a wristband. Pattern No. 5584 is cut in sizes for a 32, 34, 36, 38, 40 and 42-inch bust measure. Give size when ordering pattern.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## LIFELONG CURES BY A TRUE SPECIALIST

J. BOYD, M. D.

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

**A SAFE CURE** is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and proves that my Pelvic Methods cure when others fail to even benefit.

**Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.**—My patients receive a written agreement that I shall return what they pay me for services if they do not receive a complete and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 6 p. m. Sundays, 10 to 1. Address or call on

**J. BOYD, M. D.,** 505 Locust Street, Marquardt Block, Corner Fifth and Locust Streets, DES MOINES, IOWA

SAVE for my daily range  
Among the pleasant fields of Holy Writ  
I might despair.  
—Tennyson.

### The International Sunday-School Lesson.

First Quarter. Lesson IX. Genesis xviii, 16-33. March 3, 1907.

#### Abraham Pleading for Sodom.

Under the grateful shade of the oaks of Mamre the patriarch's camp was pitched. It stretched afar; for his vast flocks and herds required an army of attendants. Under the crimson folds of the sheik's pavilion, on her rich divan, the venerable Princess Sarah reclined, while at its silken portico the centenarian Abraham rested in the heat of the day. Perhaps he was indulging in the pleasures of memory, and was back again in thought to the banks of the Euphrates—now at Ur, where God first called him; or at Charran and his father's grave; or perhaps he was treading once more the banks of the Euphrates' great rival, the Nile; or he was looking down the long vista of the future, and wondering when the blissful promises, of which he was heir, should be fulfilled.

His reverie was suddenly broken by the approach of strangers. At once there was a sensation in camp. The monotony incident to pastoral life was broken by its chief and most welcome diversion, the arrival of a passing traveler. In that age, before posts and newspapers, this was the chief means of communication with the outside world. This

was how the nomadic tribes heard of the rise and fall of monarchies and kingly projects in war or peaceful arts of commerce and architecture. We have an analogy to it in modern times in the welcome arrival of the pioneer preacher at a "clearing" in log-cabin days. He brought more than theology in his saddle-bags. . . . Literature does not contain a more naive and fascinating bit of Oriental life. We fairly see the patriarch running to greet his guests with profuse Eastern salutations—adroitly making himself their debtor in that they allow him to entertain them; courteously discounting in advance what he proffers them, "a little water," "a morsel of bread." In an incredibly short space of time the appetizing meal is spread—a roast of veal, with butter and milk and delicious cakes baked by Sarah's own deft hand—and Abraham stands to serve.

From the very first Abraham may have had an inkling of the supernatural character of his visitors. The hour of their arrival was so unusual; no one travels in the East in the heat of the day. But whether the host suspected it or not, the guests soon cast off all disguises and Abraham knew that he was entertaining the Lord and his two attendant angels. . . . They were bearers of a blessing and of a curse. A blessing to righteous Abraham—the blissful assurance that the long-delayed advent of His promised son was near at hand. Here is a glimpse at the ministry of the holy angels. These two were possibly rewarded for fidelity by being allowed to see Abraham's face when the good news was broken to him. And if angels attended the Lord on this errand, why may they not be going with him on others, or going for him? . . . While Abraham, with courtly hospitality and grace, was going a pace with his departing guests, the Lord revealed the curse to him. Excess of joy over the blessing was tempered by grief over the impending curse, and vice versa. It was natural God should tell Abraham of what would befall Sodom. Proximity would suggest it. Then, too, the patriarch had fought for the Sodomites, and his nephew dwelt among them. . . . But this vitally important information would never have been given to any human being of less exalted character than the patriarch possessed. This is the plain inference from the words with which the revelation is prefaced. The very fact that he was worthy to be chosen the progenitor of the chosen race signified that he was

worthy to be the Lord's confidant. The greater included the less. "Why, indeed, should the thing be hidden?" By this very act of confidence the Lord lifted Abraham, as he intended to, from the plane of servitude to that of friendship. The servant knoweth not what his Lord doeth, but the friend does. . . . As the Lord had assumed a human form, so he also accommodated himself to the fashion of human speech, and described himself as on the way to make a personal investigation of the wickedness of Sodom—to see whether the reality of it was as great as the fame of it—and thus qualify himself to pass judicial sentence, all of which was of the nature of anthropomorphism. . . . As the angel trio started on their dread mission, Abraham's generous, compassionate heart prompted him to throw himself between the Lord and the doomed cities. All unconsciously he makes himself a striking type of the great Intercessor of the race. He prays for sinners. Their awful fate touched his heart to pity. He had once gone to battle for them; now he goes to his knees in their behalf. He is a daysman, a mediator. With consummate skill he handles their desperate case. "Shall this be a wholesale slaughter? Will there not be a discrimination between the good and the bad? Might not the sparing of the bad on account of the presence of the good among them have a striking, exemplary influence? If so, what shall be the ratio between the good and the bad? Might it not be as fifty to the whole population? Or (with extreme deprecation of himself as an intercessor) forty-five? or forty? or thirty? or twenty? or ten?" . . . Abraham displayed no "bargaining temper, striving only to get the best possible terms," but was climbing the ladder of hope and faith, with each promise taking courage to ask for more. When he felt that he had reached the uttermost verge of Divine forbearance, then only he rested his case, and returned unto his place with mingled emotions—joy at the blessing that should soon be his; grief at the curse that should next day fall upon the cities of the plain.

#### Analysis and Key.

1. The patriarch's camp at Mamre. Pastoral scene pictured.
2. Approach of visitors. Substitutes for newspapers. Modern analogy—"Circuit Rider."
3. Fascinating bit of Oriental life. Greetings—preparation of meal. Serving and eating.
4. Angel character of guests. Discovery. Bearers of blessings and curse.
5. Abraham's intercession. Consummate skill. "No discrimination between

good and bad?" "Saving the bad on account of the good"—Exemplary advantage. Ratio proposed in descending scale. Abraham: Type of Divine Intercessor.

#### The Teacher's Lantern.

From various angels Abraham has been viewed in the preceding narrative: as a pilgrim; as prince of a growing tribe; in war; in worship; receiving promises; entering into a covenant; but here he appears in an entirely new capacity—in the lovely and holy office of intercessor. Picture the disinterested quality of his intervention on the part of the Sodomites; compassion for the erring was his chief motive. Here is the first great outstanding instance of intercessory prayer in Scripture. Abraham is here a type of Him who "ever lives to intercede."

The duty, privilege, value, importance, efficacy of intercessory prayer, here has a striking exemplification. We are here encouraged to pray for our fellow-creatures en-masse. Much of our prayer is too circumscribed. It is selfishly personal. It abounds in personal pronouns. It may well be satirized by the prayer ascribed to the hide-bound deacon: "Lord bless me and my wife, my son John and his wife; us four and no more. Amen."

Setting ourselves to study the condition and needs of others, masses, classes, individuals, and to present them in petition at the mercy-seat, has its reflex advantage in broadened sympathies. Richest blessings often come to us not when we are praying for ourselves, but for others.

The value to the world of the good people who are in it here has a conspicuous illustration. They are the salt that saves it. There are things that God might do to the world which He does not do because of the presence of His saints. These are ever increasing in number, so the world grows proportionately safer. "Never again will the poverty of the world in righteous men be so as in the case of Sodom."

The modern fascination for city life has a remarkable analogy in the case of Lot. He must live in a city, even if it is only Zoar!

That Banquo's Ghost, the city problem, will "up" in this lesson. Within the lifetime of some readers the population of the cities of this country will equal its entire present population; and De Tocqueville affirmed that the cities are a real danger threatening the Republic.

The first bunch of hot-house lambs to appear in Chicago were sold January 8th at \$12 per hundred.

"Stunted lamp-light"—smoky chimney, poor draught, imperfect fit, cracking chimney, clouded glass—why do people put up with this when good lamp-light is the best light to read by?

I make and put my name—**MACBETH**—on lamp-chimneys that are clear as crystal, never break from heat, and fit perfectly.

**MACBETH** lamp-chimneys give lamps new life.

Let me send you my Index to tell you how to get the right chimney for your lamp; it's free.

Address, **MACBETH**, Pittsburgh.

ADVERTISING NOTES.

Two hundred acres of land are offered for sale by Mr. George W. Blair, of Ottumwa, Iowa, in his advertisement that appears on page 24 of this issue of The Homestead.

An energetic and experienced young man is wanted to work on a stock and grain farm. The advertisement of Mr. D. W. Nickerson, of Marble Rock, Iowa, appears on page 23.

The South Side Realty Company, of Petersburg, Va., advertise 500 special bargains in Virginia farms. Write them for catalog and learn about that country. The advertisement appears on page 24.

The advertisement of Messrs. Perryman & Linden, of Morrison, Okla., appears on page 24 of this issue of The Homestead. They have a long list of improved farms in the famous Black Bear Valley for sale.

The Northern Iowa Land Company, of Independence, Iowa, are offering three farms ranging in size from 246 to 640 acres for rent. The advertisement containing further particulars will be found on page 24 of this issue.

Mr. F. S. Bennett, of Emporia, Kan., has three well-improved Kansas farms he will sell at reasonable prices on easy terms. Possession can be obtained March 1st. The advertisement appears on page 24 of this issue.

Mr. W. G. Griffith, of McNabb, Ill., can supply Homestead readers with Reed's Yellow Dent and Improved Pride of the North seed corn. This corn has been scientifically bred and carefully selected. The advertisement, in which Mr. Griffith says that in case the corn is not satisfactory it may be returned and money refunded, will be found on page 10 of this issue.

Mr. Asherry Singleton, of Gladstone, Manitoba, Canada, makes announcement on page 24 of this issue of The Homestead that he will send free a beautiful book of western Canada. The Homestead is in receipt of one of these books which is issued by the Board of Trade of the above city and it contains many illustrations of buildings and other interesting sights in that vicinity. Those of our readers who contemplate or

# Don't Delay A Minute!

## Write today for prices and terms of the Celebrated Detroit Tongueless Disc Harrow

That's the only sure way you have of getting one for your Spring work. I will send you my Free Disc Catalogue, which fully describes this Harrow, and will quote you direct prices delivered at your station.

If you accept my proposition and order at once, I can probably supply you with a Detroit Tongueless Disc—but if you delay in getting in touch with me NOW on this Harrow for 1907—it may be impossible for me to fill your order when it comes—and I'll tell you why.

We have a big factory and are working every available man on these

Discs, but the best we can hope to do is to turn out about twice the number we did last year.

Now here we are way in advance of the Spring season, and yet nearly half of our factory output on this Disc is sold—and orders are simply pouring in every day.

The present indications are that long before the frost is out of the ground I will have sold every Harrow we can possibly make this season. THAT'S the reason why I say DON'T DELAY A MINUTE in writing me for catalogue and prices.

## The Detroit Tongueless Transport Truck Disc Harrow

### Sold On 30 Days' Free Trial—All Freight Allowed—For Cash Or On Time

Is the greatest selling implement of the age.

There are reasons for this—several of them.

First—the TONGUELESS idea meets with the approval of every thinking farmer—he wonders why it wasn't thought of before.

Using a Forward Truck and doing away with the Tongue saves the horses' necks—does away with all side draft—crowding of the team on turns—and permits a steady, even pull by both horses straight ahead all the time.

Don't think of jamming up your team just at the time you need them most, with an old style Tongue Disc.

The DETROIT is the only Disc Harrow built on correct principles. Every part of the very best quality—ball bearings take the end thrust—double levers make it easy to handle—steel scrapers set by hand or foot.

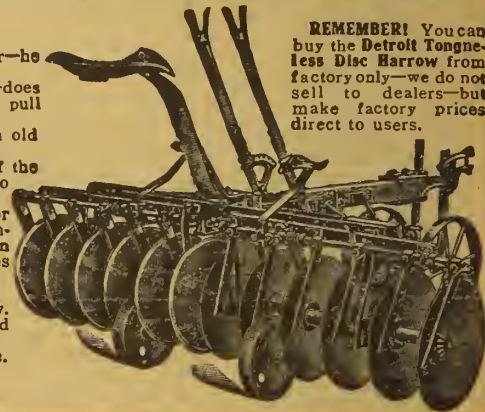

See the TRANSPORT TRUCKS at the rear? This is a new patented invention for 1907—and it's found only on the DETROIT. By attaching, in a moment's time, the entire Disc Harrow can be raised from the ground on front and back truck—and driven over rough roads from house to field or from farm to farm, without the Disc edges touching the ground. No dulling of the Discs in transportation.

Strong Foot-brake makes driving down hill perfectly safe.

Space in this advertisement won't permit telling any more about this Harrow. You should send AT ONCE for my Big, Free Catalogue, giving full descriptions, and get my special price to you direct.

Let me say again DON'T DELAY A MINUTE. Write for catalogue and direct price.

W. W. Collier, Gen'l Mgr., American Harrow Co.,  
148 Hastings St., Detroit, Mich.

REMEMBER! You can buy the Detroit Tongueless Disc Harrow from factory only—we do not sell to dealers—but make factory prices direct to users.

## Free Hair Remedy

Quickly Removes Dandruff, Stops Falling Hair and Itching Scalp, Changes Gray or Faded Hair to its Natural Color. Grows New Hair.

TRY A FREE PACKAGE AT ONCE.

Nothing Quite So Nice as a Beautiful Head of Hair.

Remember, Foso actually grows hair, stops hair falling out, removes dandruff, insures a new growth of eyebrows and eyelashes, and changes gray or faded hair to its natural color. I don't ask you to take my word for it. Fill out free coupon below and mail it today.

### FREE PACKAGE COUPON.

Fill in your name and address on dotted lines below and mail it to J. F. Stokes, Mgr., 6723 Foso Bldg., Cincinnati, Ohio, and by return mail you will receive prepaid a free ten-cent trial package that will delight you.

Give full address—write plainly.

wish to invest in Canadian lands should write Mr. Slugleton.

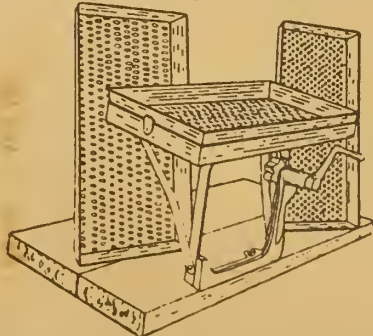

Mr. George C. Hunter, of Des Moines, Iowa, is offering for sale on easy terms, sixty-eight acres of land located ten miles north of Des Moines.

Mr. C. Williamson, of Sylvia, Kan., is offering a 320-acre stock farm, highly improved, for sale in his advertisement that appears on page 25 of this issue. At the price asked, Mr. Williamson considers this farm a bargain.

We know of no advertiser who has pursued a more honorable course in any and every way than Macbeth, the maker of "pearl glass," "pearl top" and "tough glass" lamp chimneys that get good light from a lamp without smoke or smell, provided you use the chimney made for your lamp, and he prints an index to lamps. We are glad to record his success. After having enjoyed the cream of the American trade for many years he is sending his chimneys abroad. Has won Australia, strangely enough, almost before beginning in England.

We are placing an advertisement in The Homestead this week of Mack's Lump Jaw cure, one of the oldest remedies on the market for this disease. One bottle will cure from three to six head. The price at which it can be obtained is named in the advertisement of Messrs. Mack Bros. & Co., of Spencer, Iowa, that appears on page 23 of this issue. We would suggest that if any reader of The Homestead has lumpy jaw cattle they write the firm for full information or order a bottle at once. The remedy has been tried and has given general satisfaction.

Mr. Charles Kohen, another solid farmer of Henry county, Ill., whose postoffice address is Osco, says: "I used a Delany Seed Corn Sorter for part of my planting this season and part went into the ground unsorted. Anyone can go into my field and

at once detect the sorted and unsorted corn. Where I used sorted corn I have a much better and uniform stand; in fact, a nearly perfect stand." See advertisement on page 9.

### ONLY TWO FARMS LEFT.

The farms in Cedar county, Missouri, which Mr. Geo. Gallup, of Kansas City has been advertising in The Homestead, are all disposed of but two now. Those who are interested in a good grain and stock farm at the low price of \$20 an acre should read Mr. Gallup's advertisement in this issue on page 24.

### THE AMERICAN FORK & HOE COMPANY'S EXHIBIT.

Our readers are familiar with the illustrated advertisement of the American Fork & Hoe Co., of Cleveland, Ohio, and we know that many are already familiar with the splendid goods manufactured by this company. Their display last week at the Iowa Retail Hardware Association meeting, held in Des Moines, was of no mean proportions and, like most of the company's advertisements, was designed to be educational. This company never does things by halves, as was attested by their exhibit last week, and if further evidence is required we call special attention to their handsomely illustrated catalog which has recently been published, the title of this catalog being "Tools and Their Uses." The illustrations

WRITE A POSTAL CARD FOR LARGE ILLUSTRATED CATALOGUE V-139. It is the most complete catalog of vehicles and harness ever printed. The cuts are made large so as to show you just how each vehicle is made. The two center pages show a colored plate 9x11 inches, of our CHICAGO SPECIAL BUGGY, reproduced in the actual colors just as it is painted and finished. The descriptions are complete and plain. All vehicles are shipped direct from our factory. Our prices are the very lowest. Be sure to see our astonishingly low prices and the most liberal terms ever offered. Marvin Smith Co., Chicago, Ill.

**\$100 Reward**

**\$100**

**The ONLY HOG and SHEEP WATERER.**

The ONLY will not run over or clog and will run all winter. If it fails we will forfeit \$100.00. Write and ask us about it. Enclose 10 cts. for booklet on hog-raising. Write to-day.

Price \$5.00, Worth twice it.

**ONLY MF. CO., Hawarden, Ia.**

are largely taken from photographs and the catalog contains much useful and valuable information. A card addressed to the American Fork & Hoe Co., Cleveland, Ohio, will bring this beautiful catalog free by return mail. If you write for it do not forget to mention The Homestead.

### LIKE ROASTED CHESTNUTS?

One nice thing about many farms is a liberal sprinkling of nut trees, especially sweet chestnuts. No farmer can have too many. The Gardner Nursery Company at Osage, Iowa, want to increase their circle of acquaintances and will send a one-year-old, hardy sweet chestnut tree to every property owner who will write for it. They say they're going to give away 10,000 of these trees. See advertisement on page 8.

### AMERICAN SCALES.

The Homestead wishes to call the attention of its readers to the advertisement of Messrs. Beckman Bros., of Des Moines, Iowa, which appears on page 17 of this issue. They are manufacturers of the American Scales, made either with pit or pitless, on wood or steel frames. They have made scales of such quality and for so many years that they are known the country over as manufacturers of a scale second to none in the country. The Homestead takes pleasure in suggesting that its readers write Messrs. Beckman Bros. for their prices, etc. They are a firm of excellent financial standing and well worth any trust you may place in them.

### GOOD FARM LAND IN TEXAS.

There certainly can be but small excuse for an Iowa farmer wanting land when such an excellent opportunity to buy "his kind of a farm" is open—as is now offered in the cutting up of the L. S. ranch near Amarillo, Texas. There are farm lands and farm lands being offered for sale in Texas, but this really seems to be the sort of a proposition that will please a farmer who comes from Iowa, northern Missouri, eastern Kansas, Nebraska and western Illinois. In other words, it is land adapted to general farming and stock raising. It is now covered with a thick, luxuriant growth of grass. You can dig down into the black soil and press it into balls; there is no dust and dried clods here. The rainfall in this region will average twenty-three inches a year. All of this means a certainty of crops. It is not land that will have to be cleared. Neither is it a country too hot for the white man. The altitude of this plateau is high enough to make the climate not only even and healthful, but enjoyable as well. Another feature that will sound good to the corn belt farmer is the presence of good, sweet water which can be found at a moderate depth. This ranch is situated in what is known in Texas as "the shallow water belt." It is located near the Santa Fe at Hereford. The grade for the Rock Island's new extension

runs alongside the ranch for ten miles. The postoffice is Vega, a new town which will at some not distant date be the county seat of Oldham county. Read the advertisement on page 24 of this issue of Messrs. Boyer, Peterson & Co., who represent the new owners of the tract.

### THE MIDLAND TWO-ROW CULTIVATOR.

The Midland Manufacturing Company, of Tarkio, Mo., has recently prepared the most attractive catalog that it has ever published. This catalog is illustrated, not with pen drawings, but with photographs of the Midland Two-Row Cultivator from every possible angle, and among other things there is given the illustration of forty of these cultivators lined up on the farm of Mr. David Rankin, of Tarkio, Mo. With this force, Mr. Rankin can cultivate 600 acres a day and do it thoroughly. Most of our readers are aware that Mr. Rankin is the most extensive farmer in the corn belt, and his success has been so marked that the average quarter section man need have no hesitation about imitating or following his methods. This catalog will be furnished free upon application to the Midland Manufacturing Company, Tarkio, Mo., and please mention The Homestead when writing.

### DES MOINES TANNING COMPANY.

The accompanying illustration shows how to ship your hides and furs to the Des Moines

Tanning Company, of Des Moines, Iowa. They are an old, reliable firm that is doing an ever-increasing business. The establishment

is complete in itself, doing all the work from tanning the hides to making the finished article. The Homestead takes pleasure in calling the attention of its readers to their advertisement on page 19 of this issue, and would suggest that you write for their special booklet No. 54, which gives details as to the method of shipping hides, and all details necessary to warrant satisfactory service from them.

#### A FREE TRIP TO ARKANSAS.

Why not go with them on their next excursion on March 19th and investigate the wonderful opportunities in their Locksburg Colony lands? Write for full information, pamphlet and beautiful map free. E. N. Brown, president Kansas City Southern Land Immigration Company, 708 Beals Bldg., Kansas City, Mo.

#### POSSIBILITIES IN VIRGINIA.

Every state has its own peculiar advantages. There are no two individuals in this great wide world with similar likes and dislikes. Every state and locality differs a little from any other state or locality. As a state, Virginia has grand possibilities in the line of agricultural pursuits. Just what these advantages are you will never know until you investigate. A great many home-seekers are now and have in years past found this state exactly to their liking. All that you desire to know about Virginia lands will be gladly answered by writing to Messrs. C. M. Bergh's Sons & Gaede, of Richmond, Va. On page 24 will be found further details. Mention The Homestead when you write.

#### WHERE TO BUY SEED CORN.

One of the best places to get seed corn for this year is at McNabb, Ill., the home of Mr. W. G. Griffith, one of the oldest growers of seed corn in this country. He is a member of the Illinois Corn Growers Association and has for several years been selected as expert judge at many of the largest corn contests. He is offering Reid's Yellow Dent and Improved Pride of the North varieties for sale in his advertisement on page 10 of this issue. Mr. Geo. Gregory, of Ralston, Iowa, bought his seed corn from Mr. Griffith and wrote him as follows: "The Improved Pride of the North I got of you last winter did fine for me. It would have been cheap to me if I had paid \$10 a bushel for it. At the Carroll County Institute I took sweepstakes with this early variety in hot competition." Order seed corn at once from Mr. Griffith, kindly mentioning The Homestead.

#### IOWA'S OLDEST TANNERY.

The Bayer Tanning Company, of Des Moines, Iowa, enjoy the distinction of being the oldest tanning company in the West. They boast of having been in that business for over thirty-five years when they began by tanning buffalo, cattle and horse hides for robes for the eastern markets. From that time on they have devoted their entire time to the business, studying and making improvements continually. Their tanning of robes, coats and rugs is a chemical process that enables them to bring out all the beauty and gloss in a hide that nature has put there, and at the same time render the hide as pliable as cloth, and puts aside the possibility forever of having its appearance and condition endangered by an attack of moths or worms. Their plant is always equipped with all modern machinery for tanning and is always open for your inspection. Write them, mentioning The Homestead, and we assure you that you will receive a response concerning the process a hide goes through in the process of tanning, also prices, etc. Their advertisement appears on page 4 of this issue.

#### HIGH-GRADE TOP BUGGY FOR \$50.

As an example of the big saving that can be made by dealing with the manufacturers instead of middlemen, take the famous White Hickory Flyer Top Buggy. The equal of "The Flyer" would cost \$75 to \$100 of any retail buggy dealer. But the Consumers Carriage Manufacturing Company, makers of the White Hickory Flyer, sell direct to consumers, and only ask \$50 for this splendid top buggy. You can have the White Hickory Flyer sent for a thirty days' free road test, and you are not expected to keep it unless it proves to be equal to huggies that retail at \$75 to \$100. The company agrees to take it back and pay freight both ways if "The Flyer" is not as fine a vehicle as they claim it is. The "Flyer" is an exceedingly handsome vehicle, designed and finished in the latest style. White hickory is used exclusively for

wheels and gear. White hickory (the outer part of the hickory log) has 50 per cent more elasticity, life and lasting qualities than the yellow heart of the log, which is the old, lifeless wood. Every subscriber who thinks of buying a top buggy should write to the Consumers Carriage Manufacturing Company, Dept. BA, Chicago, Ill., for their large vehicle catalog, and full details of the liberal thirty days' free road test.

#### CEMENT POSTS—TEN CENTS EACH.

That cement fence posts can be manufactured at a cost of ten cents each is a statement made by the Moore Post Mold Company, of Sterling, Ill. This company are ready to stand behind any assertions that they make. The proposition which they are placing before our readers is certainly a good one and worth investigating. The cement post is the coming post. They are economical and are rapidly being improved to a high degree of efficiency. Their lasting qualities make them highly desirable. Any of our readers interested in this matter should by all means write at once for descriptive circular to the above company. They will be glad to answer any of your inquiries. Kindly mention The Homestead when writing them.

#### AN ORGAN AT FACTORY PRICES.

You can now buy the famous Estey organ direct from the factory, and at the same time have the benefit of a thirty days' trial before paying for it. This sounds like a first-class proposition and undoubtedly it is. For sixty years this make of organ has been the world standard. It has been used and loved and praised by the world's greatest musicians. There are a great many qualities to be desired in an organ, and among these are most important its tone, touch, action, finish and construction. For sixty years these points have been given special attention in the construction of the Estey organ. This is the reason why it has a known reputation. Nothing has been left undone to make a first-class instrument out of the Estey. If you are about to select an organ you certainly want to try one of these instruments that is manufactured by the Estey Organ Company, at Brattleboro, Vt. Complete illustrated catalog will be sent on request.

#### SEEDS AND WHERE TO BUY THEM.

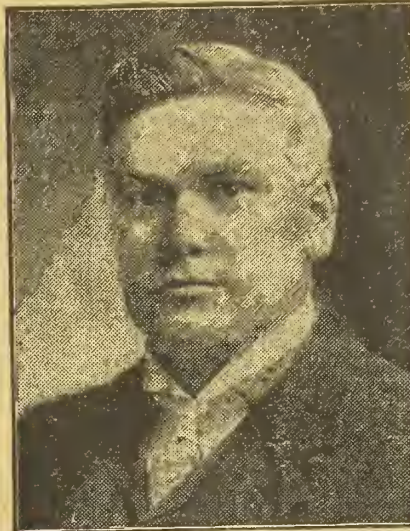

One of the duties of the farmer which has to be attended to at this time of year is the selection of seeds for the garden and farm. There are often better varieties in some one line of farm produce to be secured. The farmer who has his various farm and garden products up to their highest degree of perfection must be on a constant lookout for good varieties. The only way by which he can keep himself informed on the improvements that are taking place in the plant world is by the study of all the best seed catalogs that are to be secured. One of the seed catalogs which is worthy the attention of any farmer or gardener is that recently put out by the Barteldes Seed Company, of Lawrence, Kan. They carry a full line of western seeds for corn-helt planters. The catalog is complete in every way, including a price list and descriptive matter. If you do not have this catalog included in your list we would advise you to send for it. At the same time, kindly make note of the fact that you saw the advertisement in The Homestead.

#### SUTTON'S SEED CORN TEST OFFER.

"Test my seed corn. If it does not germinate as it is guaranteed to germinate, send it back and I'll refund your money." This is what Mr. G. D. Sutton, of Mason City, Ill., is writing to all his patrons. If the corn is not everything that is promised, the buyer may return it to Mr. Sutton within ten days and he will receive every cent of the price back. Mr. Sutton is offering Sutton's Improved Boone County White, Sutton's Favorite White, Reid's Yellow Dent, Gold Standard Leaming, and Premium Yellow Dent, the pick of lines that "make good" so satisfactorily that Mr. Sutton has not been obliged to return any money to purchasers. These perfect seed corns were selected from the product of 600 acres. Every ear was critically examined by an expert and had to pass in every point before it was included in the lot for sale as seed. Eight thousand bushels were thus obtained, and when this is sold there will be no more to offer, as Mr. Sutton positively refuses to handle any cheap seed corn bought to supply the demand. The corn may be ordered in the ear or shelled. All shelled corn is nubbled at both ends and afterwards graded. Write today for an il-

## FREE CATARRH TREATMENT

Did I not know that I am able to cure Catarrh I would not make this offer. When I have thoroughly examined your case I will tell you the

T. F. WILLIAMS, M. D.  
Consulting Physician

truth, whether I can cure you or not. I have hundreds of testimonials from grateful patients that have trusted me and been entirely cured.

JOSEPH ZARN, Harrisburg, Neb., writes: "I am feeling better than I have for years, and believe your treatment has cured me. I feel satisfied that I will need no more medicine."

WM. BECKETT, Sharpshurg, Ia., writes: "I am feeling well and will not need any more medicine. Your medicine certainly has done all you claimed. I will recommend your treatment to other catarrh sufferers."

I could not offer ONE MONTH'S MEDICINES FREE OF CHARGE if I did not feel sure that it would positively cure Catarrh. In order to prove to every person afflicted with Catarrh in any form that my treatment will effect a cure even though other remedies have failed, I am willing to stand the expense myself for the first month's medicines. I will also send you my Free Illustrated and Descriptive Book, "Catarrh and its Cure." Address as follows:

**DR. T. F. WILLIAMS,**

211-218 Flynn Building

DES MOINES, IOWA

#### MACK'S LUMP JAW CURE

Oldest Remedy on the Market.  
One bottle cures three to six head.  
\$2.00 per Bottle.

MACK BROS. & CO., Spencer, Ia.

WANTED—An energetic and experienced young man to work on stock and grain farm. State wages wanted. D. W. Nickerson, Marble Rock, Ia.

Illustrated seed corn book. Address Mr. G. D. Sutton, Dept. D, Mason City, Ill.

#### 1,200-ACRE IOWA FARM FOR SALE.

What is considered one of the finest large Iowa farms is offered for sale this week by Messrs. Kinkadee & Fessler, of Des Moines, Iowa, in their advertisement that appears on page 24 of this issue. It is well improved with a good nine-room house having hard floors, furnace, hot water heat, bath, etc. There are large horse and cattle barns and hog houses and other buildings on the place. It will be sold for cash and some cheaper land or income property would be accepted as part payment. For full particulars address the advertisers who also have a great many other Iowa farms on their list, as well as improved and unimproved South Dakota land.

#### LIGHTNING AND TELEPHONES.

Mr. W. E. Ashby, of the Ashby Telephone Cut-Out Company, Chariton, Iowa, has a device which he calls "The No Risk Lightning Arrestor and Cut-Out." It is attached to the country telephone in a very simple manner, and is so arranged that by pulling a lever, the main wire of the telephone line is disconnected from the telephone and connected with ground wire; thus absolutely cutting out the telephone so that lightning on the main wire will run into the ground. By this device the heaviest lightning stroke is switched away from the telephone, switched away from the house. The telephone is protected and the house is practically made lightning proof. This "No Risk Lightning Arrestor," while very remarkable, is at the same time very simple. It sells for \$2 and will be sent to any address on receipt of that amount, with full instructions and materials for installing it. Full details and particulars will be sent to anyone on application. Address W. E. Ashby Company, 199 Square St., Chariton, Iowa.

#### "GO WEST, YOUNG MAN."

"Go west, young man," is the advice that has lasted and proven its soundness for a good many decades. The West is teeming with possibilities, especially along the line of agriculture. The young farmer is right in line to reap the wonderful profits that await him in the new lands of the North and West. In southern sunny Alberta is one of the finest live stock countries perhaps on the whole face of the earth. The summers are grand, while the winters are as mild as those of the central states. This is the coming wheat, alfalfa and sugar beet country on the continent and the markets for beef, mutton, pork, grains and all other farm products are unexcelled. It is a land of irrigation, and the Canadian irrigation laws are the best on earth; in fact, never in the history of that country has there been a suit over water rights. Contrary to the opinion of many, the Canadian government stands behind the farmer and is ready to shield him from oppression. This means much. If you are interested in new land here is your opportunity to get some very desirable information regarding the best land on earth in the last great West. Write at once to the

Canadian Pacific Irrigation Colonization Company, Calgary, Alberta, Can. See page 25 for further particulars.

#### THE RELIABLE NURSERYMAN.

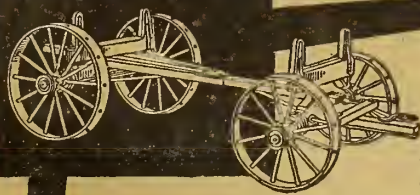

The most of the readers of The Iowa Homestead will know the person referred to in the head line of this article is Mr. M. J. Wragg, even before they read his name. Mr. Wragg has been in the nursery business for many years and, to our best knowledge, has always proven reliable, so much so that The Iowa Homestead can call attention to his advertisement on page 10 of this issue and recommend him to its readers. In connection with his nursery business, Mr. Wragg enjoys an extensive patronage as a landscape gardener. In this business he is one of the pioneers, having specialized along this line for over twenty years. He keeps in his employ constantly, an expert engineer, who assists him in his labors. Why not write him about plans for beautifying your home? A letter will reach him addressed to M. J. Wragg Nursery Company, 330 Good Block, Des Moines, Iowa.

#### STARK BROS.' ELEGANT NURSERY CATALOG.

The Stark Bros. nursery have always been noted for their elegant and complete nursery catalogs. Their new catalog for the season of 1907 is no exception. It is richly illustrated with cuts of the various fruits of the corn belt in actual colors. Messrs. Stark Bros. were among the pioneers of Missouri, and their business has been steadily growing since those early days. At present it has assumed a magnitude that is certainly gratifying. Judge Stark, the original founder of the business, came from Kentucky to Pike, one of the richest counties in Missouri, where at present is located this nursery which is perhaps one of the largest in the world. Every year thousands of travelers pass through by rail the extensive reserves of this nursery adjoining Louisiana, Mo. We can refer any of our readers who are intending to buy fruit trees, small fruit and ornamental trees and decorative plants to this nursery, for we are quite certain that their complete stock will contain anything you might desire. The catalog is a beauty. A postal card will bring it.

#### GOOD HAYING MACHINERY.

The Loudon Machinery Company, of Fairfield, Iowa, manufacture a full line of haying machinery, such as hay forks, pulleys, carriers, slings, door hangers, in addition to feed, ensilage and litter carriers, as well as cattle stanchions and many other similar articles. The company have recently issued a beautiful catalog illustrating and describing their entire line of goods, and those of our readers who are in need of anything enumerated in the above list will make no mistake by sending in a request for this catalog. We would like to call special attention to the Loudon Self-Acting Litter Carrier. This is designed of course to reduce the labor of removing litter and manure from stables. It is hung from an overhead track and is therefore absolutely out of the way at all times, and whether loaded or unloaded it is moved along its track with but little effort. Dairy men and stockmen generally will find this carrier a labor saver in the cleaning of cow and horse stables. However, as said before, the catalog describes the carrier in full, as well as every other line of machinery manufactured. For further particulars address the Loudon Machinery Company, Fairfield, Iowa, and mention The Homestead when you write.

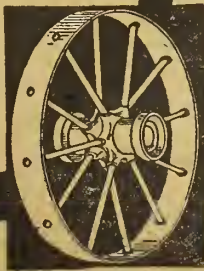

**What Every Farmer Should Know**

Economy is but another name for profit. If you want to learn how much extra profit your farm can be made to yield you, send for the Empire Wagon Book. It shows what real saving of time, labor and money means. This book sets forth the true value of Empire Steel Wheels and tells how to convert an old narrow tire, high wheel wagon into a new indestructible one by fitting it with

**EMPIRE**

Steel Wheels. This book shows how a fresh plowed field makes as easy hauling as a macadamized road. Tells how to save horse flesh and man labor; it explains why the Farmer's Handy Wagon costs nothing for maintenance but the price of the axle grease. This book will put money in your pocket—will more than save the price of a wagon. Send for a copy to day. It's free.

EMPIRE MFG. CO.,  
Box 103-M, Quincy, Ill.

## A QUESTION FOR TOM, AND A SUGGESTION.

Tom, you are twenty-one; where are you going to farm this year? Are you going to stay with "the old man" or will you rent a forty and put it in corn? Now, Tom, let's ask you a question—one to figure over before you sign that lease. Wouldn't it be better instead of paying the landlord two-fifths of the crop to put that money in a farm of your own? That is, put the rent into the purchase price of a good forty for yourself. You can't afford land about home, but you are a man now, and here is one of the questions you will have to meet and solve for yourself. If you can get a good farm for say \$40 to \$50 an acre on time, with the certainty that the crop will not fail you, that one year will be as good as another, will you let the thought of home ties—dear as they are—stand in the way of your making a man of yourself, just as your father did when he came from the old home down East? There are hundreds of good opportunities awaiting every active young man of this land who is willing to work. One of these is in southwestern Kansas in the Arkansas valley near Garden City. Years ago this was all ranch land. It was cheap, and the "short grass" which grew wild upon the prairie land made good pasturage for great herds of stock belonging to the cattle kings. Then the government took a turn. The soil is as rich as can be found anywhere, being the deposits brought down from the mountain sides for ages by the Arkansas river. But drouths visited the country occasionally. It was along this line that the government got busy. Deep test wells were driven, and it was found that there was unlimited water underneath, and all that was necessary was to get it on top. The result was the starting of an irrigation plant. It was a new proposition, as the farmers of western Kansas knew nothing of irrigation; but they were willing to try and the government was willing to show. Some failures were encountered at first because mistakes were made; but nowadays irrigation is reduced to as sure a proposition as making coffee—so much coffee, so much boiling water, and there you are; likewise, so much water at a certain time for a certain crop; for another crop more water at a different time, and no water at all when the crop gets so far along, and again there you are. It is not a hard proposition. It will be new to you, but you can learn it. You don't have to wonder whether you will have a crop to pay taxes, interest and the instalment on your loan; you know when you plant that the land and the water will do their work. "It's up to you." Then there is alfalfa. Any land that can grow alfalfa means a fortune for the owner. There is no better hog feed known. As a hay crop, it yields at least three crops a year and averages above eight tons per acre, which will sell in stack at from \$6 to \$9 a ton. But why sell it to the other fellow? If he pays you say \$8, it is worth every cent of \$8 and more to him. He intends to make a profit on it. Feed the alfalfa to your cattle and hogs. You will get the profit, for it will bring you \$10 a ton on the Kansas City stock market when it stands on four legs. This is a great sugar beet country. The United States Sugar & Land Co. have a million dollar beet sugar plant at Garden City and will pay you \$5 a ton for your beets. The land will raise twenty tons of beets per acre. If you are too busy with your stock or alfalfa or fruit crops (cantaloupes will net you \$125 per acre, and there is good money in all tree fruits and berries), the factory company will furnish you labor at about \$30 an acre for both hand and team work. That will leave you a net profit of at least \$70 per acre; many are making more than that. The beet tops and the pulp returned by the factory completely round out alfalfa as a feed. Your stock will top the market without a hush of corn. Read the advertisement of the Great Western Land Company on page 25 of this issue and write them for literature.

## THE KEEN KUTTER TOOL DISPLAY.

One of the attractive booths installed at the annual meeting of the Iowa Retail Hardware Association, held last week in Des Moines, was that of the Simmons Hardware Company, of St. Louis, Mo., the manufacturers of the well-known Keen Kutter goods. Their exhibit was composed of practically every edge tool that is used in the home, on the farm and in the shop. It was designed in detail to show the superior composition of the Keen Kutter goods. Their motto, "The recollection of quality remains long after the price is forgotten," was prominently in view.

Included in Mr. A. C. Lund's Duroc sale at Kearney, Neb., March 8th. See field notes.

## New Tongue Truck

## FOR DISK HARROWS AND OTHER MACHINES

No need of buying a new Harrow, Mower or Seeder to have the new tongueless implements. Your old implements can be made modern and up to date by buying one of our inexpensive *Famous Tongue Trucks*. Can be attached as shown in picture to any implement, old or new, and is the simplest and most practical truck made. **Takes the weight from the horses' necks**, prevents bruises and galls. Only truck made which permits raising or lowering of tongue and hitch at the same time, thereby causing direct draft and even cut of disks. Write postal for particulars.

Crescent Furnace and Foundry Co., 600 Madison St., Des Moines, Iowa.

**\$6.50**

**Free**

WRITE FOR  
Circular containing large pictures of different style trucks with full description of each, and our proposition to send either style truck on ten days' approval.

## FANNING MILLS

We build both Side and End Shake Cleaners for farm use. Let us tell you about the "Expert." It has stood at the head for many years. Will grade your Oats and Barley, and is the very best in Timothy, Clover, etc. Select seed on the Double Feed principle.

## SMUT MACHINES

The Export Smut Destroyer will stop the smut in OATS and BARLEY as well as wheat, and will increase your yield 5 to 10 bu. per acre. A boy can operate it. Write and see whether our claims are reasonable.

## CORN GRADERS

We have the grader that is Expert in its work. Sacks all grades. Capacity 15 bu. per hour. Operator is seated. Folds for storage. Costs less than inferior machines. Write.

ANDREW CLELAND, Inventor and Mfr., 30 Years' Experience, 80 Western Ave., MINNEAPOLIS, MINNESOTA

## LANDS AND HOMES FOR SALE

**DONT FREEZE** COME TO VIRGINIA! 500 Special Bargains in Farms. Northern farmers send for new catalog. Learn about this country. Southside Realty Co., Inc., (Successors to Percival Bros.) Petersburg, Virginia.

## ASK ME

We are selling the finest body of

## Texas Panhandle Lands

ever put on the market

Best of location and best in quality and price, on very easy terms. Our location, Dallam county. Write us for full information and maps.

Next Excursions March 5th and 19th.

J. C. MEHAN &amp; CO., 328-29-30 UTICA BLDG., DES MOINES, IOWA

## GET A SLICE OF TEXAS

Do you know that the State of Texas is six times as large as the State of Iowa? The Panhandle of Texas contains about 25,000 square miles. This is not all good land; some sand, some rough land only fit for grazing, and some as fine land as the sun ever shone on. In some portions of the Panhandle it is very deep to water, some places 300 to 450 feet. Our land is in what is known as the shallow water belt. The owners have recently purchased 30,000 acres of the L. S. Ranch, directly west of Amarillo, the very choice of this immense property. All good black soil, and covered with the thickest and best growth of grass that can be found in the Panhandle.

Our land lies ten miles along the New Rock Island grade, and nearly five miles wide, in Oldham County, and adjoining the town of Vega, which is destined to be the new County seat.

GOOD SOIL, GOOD WATER, GOOD CLIMATE, located within a few miles of the greatest railroad in America, (The Rock Island) and all for \$10.00 to \$15.00 per acre.

Here is a chance to get some of the CREAM and on good terms. You deal direct with us. Write us. Next excursion March 5th, leaving Kansas City morning of March 6th. Buy ticket to Hereford, Texas, via Santa Fe.

Come to our office 8th and Walnut Streets, five minutes from Union depot at Kansas City.

**BOYER, PETERSON & CO.,**  
408 - 410 Gumbel Building, KANSAS CITY, MO.

## FREE

## A Beautiful Book of Western Canada.

WRITE ME FOR IT.

ASBERRY SINGLETON,  
Gladstone, Manitoba, Canada

## A FREE TRIP TO ARKANSAS

NEXT excursion March 19. You can buy land in our Locksburg colony, near Locksburg, Sever county, at \$4.00 to \$6.00 per acre, that will rent from one-fourth to one-half the cost each year. Write us for free pamphlet and map.

**E. N. BROWN,**  
President Kansas City Southern Land & Immigration Co.,  
708 Beals Building, Kansas City, Mo.

## VIRGINIA Welcomes the Northern HOMESEAKER

No other State offers such opportunities. The climate is mild and healthy, the soil is rich and a little money will purchase a fine place with good buildings and every convenience. Write us. We will answer all questions. You'll wonder why you never investigated us before.

C. M. BERGH'S SONS & GADE,  
1439 Main St. Richmond, Va.

## MR. RENTER

STOP MOVING. Buy a farm in St. Louis County, Minn., on terms easier than renting and settle down. Good agricultural land at reasonable prices and easiest terms ever offered. For full information address Land Commissioner D. & T. R. R. Co., 325 Wolvin Bldg., Duluth, Minn.

## FOR SALE, RENT OR EXCHANGE:

Northern Iowa Land Co., Independence, Iowa.

**TO SETTLE ESTATE.** 200 ACRES near city of 24,000, nice house, big barn. Price \$70.00. Address, Geo. W. Blair, Ottumwa, Iowa.

68 ACRES ten miles north-west of Des Moines court house. Easy terms. Geo. C. Hunter, 317 I. L. and T. Bldg., Des Moines, Iowa.

# LANDS AND HOMES FOR SALE

## SOME ..SUGAR BEET PROFITS..

Made at Garden City, Kansas.

	Acres.	Tons per acre.	Net profit per acre.
Jas. Renick.....	40	32	\$125
Geo. Eiler.....	15	25	80
Alf. White.....	10	24	85
G. G. Baker.....	15	20	65

These Figures are taken promiscuously from the records of the beet sugar plant of the United States Sugar and Land Company at Garden City.

You can do just as well as these beet growers are doing. Before raising beets, they were the same kind of everyday farmer that you and the rest of us are. Not all of the growers made \$125 an acre—the records show the average to be \$70 per acre. One man made but \$35 per acre, but he took care of 205 acres which made him \$7,175 in one year. It is a question of work. This land in the Arkansas Valley is all rich soil. The water can be turned into the fields from the irrigation ditch when needed; the rest is up to the grower.

Quite as interesting as sugar beet growing is alfalfa raising. This wonderful foreign crop was grown here before beet growing was taken up. It yields three and four crops a season, averaging eight tons per acre. The hay sells in stack at from \$4.50 to \$8.00 per ton. Fed to stock, it will net you over \$10 per ton. Alfalfa fed with beet tops and beet pulp (returned free by the factory) makes the most perfectly balanced stock ration in the world. Your alfalfa harvest is on between working periods in the beet fields. Fruit growing is another highly profitable industry. All kinds of tree fruits and berries thrive profitably in the Arkansas Valley. Cantaloups equalling the Rocky Ford, make \$125 an acre. One settler made \$600 on an acre of onions. You can practically grow what you want in the Arkansas Valley.

The reasons of this success are soil and irrigation. The soil is the choice loam, washed or stolen for ages from the mountain sides by streams and deposited along its valley by the Arkansas river. The country is under five great irrigation ditches, fed from an underflow proven by the government to be inexhaustible. A great storage reservoir built by the national government is nearing completion.

Excursions From Eastern Points March 5th, From Kansas City March 6th.

**\$40 to \$75  
AN

The real estate business has assisted many men without capital to become independent for life. Full particulars FREE. Write us to-day.

**AMERICAN CO-OPERATIVE REALTY CO.,**  
3070 New Nelson Bldg., Kansas City, Mo.

**THE MILD CLIMATE IN VIRGINIA**

OFFERS SPLENDID opportunities for farming, stock raising, fruit growing and general farming. Winters are mild and short. Climate healthful. Markets near. Lands are advancing. Write for information to

**G. W. KOINER,**  
Commissioner of Agriculture,  
RICHMOND, VIRGINIA

**TO EXCHANGE:** Have a good improved farm, well located, to exchange for registered cattle or stallions. Write giving description and prices. Box 81, Independence, Iowa.

## Turn On The Rain When You Need It

**I**F YOU are a farmer you have seen your crops suffer for lack of moisture. Did it ever occur to you when the drouth came what a fine thing it would be to have a stream of water running through your field, which could be turned onto the thirsty ground.

If this thought never did occur to you just stop and think a minute—water always there—no danger from dry spells—no possibility of crop failure, for when you have good land, good seed and warm weather all you need to make a perfect crop is moisture—we furnish the moisture and there is absolutely no failure in the supply.

You believe in irrigation—you can't help it, for it marks the difference between absolutely sure crops and uncertainty.

Certainty is always to be preferred—therefore you believe in irrigation.

That being the case it only remains for you to choose the best spot under irrigation in which to invest your money and make your home.

All things considered, Sunny Southern Alberta is the best district in the world for the man seeking sure returns.

In the first place, the Canadian irrigation laws are the best on earth—in the history of

Canada there has never been a suit over water rights—the Government stands behind the farmer and settles disputes free of cost in case there should be any, but there are none because the Government sees to it that no irrigation ditches are built unless there is ample water to supply them.

To the farmer who has had endless water litigation this means much.

The land is good in Alberta—there is no better and the constant deposit of silt and other suspended matter continually improves it.

Southern Alberta is without question or doubt the finest live stock country on earth—the summers are grand and the winters are mild as those of the Central States.

Almost any crop can be raised in Southern Alberta. It is the coming wheat, alfalfa and sugar beet country of the continent, and the markets for beef, mutton, pork, grains and all other farm products are better than those of the western states.

If you want to verify what we say by seeing Sunny Southern Alberta, we will be glad to make the trip cheap and easy for you—send your name and address and learn how to get here the best way and how to get the best land on earth in the LAST GREAT WEST at prices so low that they are hardly to be considered. Address,

**THE CANADIAN PACIFIC IRRIGATION COLONIZATION CO.,**  
71 9TH AVE. WEST, CALGARY, ALBERTA, CANADA.

### FARMERS, READ THIS!

If you want to buy a farm this year in Minnesota, South Dakota, North Dakota or Canada, either for cash, or on the crop payment plan, send ten cents for postage, tell us where you want to go and we will tell you all about the land, our easy terms of selling and how you can get a free ticket to see it. We will also tell you how you can make \$100 per month working for us.

**GILLILAN BROS., 354 Temple Court, MINNEAPOLIS, MINN.**

## Government Land.

1,000,000 Acres Soon Open.

TWO Indian Reservations and four U. S. Government Irrigated districts soon to be thrown open in Washington, Oregon and Idaho—over 1,000,000 acres in all. These lands are valuable for agriculture, fruit raising, stock raising and dairying. The climate is unexcelled. President Roosevelt in a speech in Seattle three years ago said that if he were twenty years younger he would settle in Washington. The western states contain the last of the government lands and when new districts are thrown open the best land is soon taken. I have prepared maps and descriptive booklet of the resources, etc., of these Reservations and Irrigated lands, containing also statement of the laws for taking up lands and water rights which I will mail postpaid on receipt of price, \$2.00. Address,

**JOS. MCCARTHY,**  
Hyde Bldg., - Spokane, Wash.  
References: Fidelity National Bank, Spokane, Wash.; Floyd L. Daggett, Mayor of Spokane, Wash.

## WE SELL THE EARTH.

YES, we sell the earth. If you don't believe it, please send for our new price list of Central and Western Nebraska Lands. We have the best land for the money in the West, located in Buffalo, Dawson, Custer, Lincoln and Keith counties, from \$2.50 to \$8.00 per acre. Don't forget to write us for our list of Nebraska Lands.

**W. F. Smith Realty Co., Kearney, Neb.**

### Dodge County Acres For Sale.

320, all tillable, improved, well located, \$40.  
320, mostly seeded, improved, farther out, \$38.  
450, all tillable, fine set buildings, new, \$55.  
530, all tillable, two good sets buildings, \$50.  
I have all sizes of farms. Let me tell you more about southeastern Minnesota farms. Address,

**J. L. GRISWOLD, Dodge Center, Minn.**

**IOWA FARMS:** Send for our new illustrated list of improved Iowa farms. This is the finest list we have ever issued, gives full descriptions with good pictures. Also offers some good places for exchange and rent. Northern Iowa Land Co., Independence, Iowa.

GOOD farming and grazing land in Lincoln county, Nebraska, \$3.00 to \$25.00 per acre. For land lists and full particulars, address Buchanan & Paterson, Land and Immigration Agents, U. P. R. R., North Platte, Neb.

## The CANADIAN West is The Best WEST

**160 ACRE FARMS IN WESTERN CANADA FREE.**

THE testimony of tens of thousands during the past year is that the Canadian West is the best West. Year by year the agricultural returns have increased in volume and value and still the Canadian Government offers 160 acres free to every bona fide settler.

**GREAT ADVANTAGES**

The phenomenal increase in railway mileage—main lines and branches—has put almost every portion of the country within easy reach of churches, schools, markets, cheap fuel and every modern convenience. The ninety million bushel wheat crop of this year means \$1,000,000 to the farmers of Western Canada, apart from the results of other grains as well as from cattle.

For literature and information address  
Superintendent of Immigration  
Ottawa, Canada,  
or the authorized Canadian Government Agent,  
W. V. Bennett, 801 N. Y. Life Bldg., Omaha, Neb.  
E. T. Holmes, 815 Jackson St., St. Paul, Minn.

## MILD WINTER

Protected by great hills and warmed by almost perpetual sunshine, Lewiston-Clarkston Basin has the ideal climate for profit and comfort. No blizzards. No cyclones. No floods. No malaria. No consumption. No asthma. No serious thunderstorms. At the head of river navigation from Pacific ocean, Lewiston-Clarkston [pop. 12,000] is the commercial and transportation center for an immensely productive fruit, grain, lumber & mining territory. Write today for detailed and authentic information about new fruit and vine lands just being brought under irrigation, within mile of city limits. Tracts close to and same lake-bed soil as fruit lands now paying \$250 to \$1000 per acre. Easy terms. Land pays for itself while orchard is growing. Why live amid dreary surroundings, far from neighbors, when a few acres in delightful Lewiston-Clarkston make you independent and prosperous, with all advantages of fine schools, churches, libraries, daily papers, neighborly city activity! Address **DEVELOPMENT LEAGUE, at LEWISTON, IDAHO or CLARKSTON, WASH.** Send list of neighbors who may move west. Write names and addresses very plainly and kindly mention this paper.

## AWFUL PSORIASIS 35 YEARS.

Terrible Scaly Humor in Patches All Over the Body—Skin Cracked and Bleeding—Cured by Cuticura.

"I was afflicted with psoriasis for thirty-five years. It was in patches all over my body. I used three cakes of Cuticura Soap, six boxes of Ointment, and two bottles of Resolvent. In thirty days I was completely cured, and I think permanently, as it was about five years ago. The psoriasis first made its appearance in red spots, generally forming a circle, leaving in the center a spot about the size of a silver dollar of sound flesh. In a short time the affected circle would form a heavy dry scale of a white silvery appearance and would gradually drop off. To remove the entire scales by bathing or using oil to soften them the flesh would be perfectly raw, and a light discharge of bloody substance would ooze out. That scaly crust would form again in twenty-four hours. It was worse on my arms and limbs, although it was in spots all over my body, also on my scalp. If I let the scales remain too long without removing by bath or otherwise, the skin would crack and bleed. I suffered intense itching worse at nights after getting warm in bed, or blood warm by exercise, when it would be almost unbearable. W. M. Chidester, Hutchinson, Kan., April 20, 1905."

## The Commodore Sale a Success.

The combination sale made by several prominent breeders of Durocs in Kentucky, Indiana and Ohio, at Louisville, Ky., on Friday, February 22d, resulted in one of the best averages of the season. The stock offered was in keeping with the prices received. Females bred to Commodore, the champion boar which heads the good herd of Messrs. Amos W. Harris & Sons, at Waverly, Ky., were in demand and sold readily at nice figures. This firm were the principal consignors to the sale and their lot of thirty-four head made an average of \$179.48. The top figure was \$530, at which price a yearling sow, daughter of Orion, bred to Commodore, went to the Whitehall Farm, Yellow Springs, Ohio, Mr. J. F. Crum, of Sellersburg, Ind., being the competing bidder. He secured a daughter of Top Notcher bred to Commodore at \$500, and a daughter of Junior Jim went to Mr. H. E. Browning, of Hersman, Ill., at \$500. She was bred to Commodore and this cross should result in something good. Col. H. L. Iglehart, of Morganfield, Ky., called the assembly to order and introduced Col. Tom Vinndge, who sold the principal portion of the offering, and was assisted by Colonels Iglehart and West in the ring. List of sales follows:

Lot.	Price.
AMOS W. HARRIS & SON'S CONSIGNMENT	
1 T. W. Stoner & Son, Henry, Ill.,	\$210.00
2 M. M. Bardwell, McHenry, Ky.,	100.00
3 John Hess, Ripley, Ill.,	65.00
4 A. E. Stutt, Avoca, Neb.,	300.00
5 F. L. Yantis, Lancaster, Ky.,	93.00
44 Thos. Johnson, Columbus, Ohio,	101.00
6 W. R. Warren, Seaford, Ind.,	190.00
7 J. Chilton, Campbellsburg, Ky.,	100.00

## AN INDIANA MAN'S OPINION OF THE FALFURRIAS DISTRICT OF THE GULF COAST COUNTRY.

A few days ago a representative of this paper met Mr. Fred McManis, of Richmond, Ind. Mr. McManis had just returned from a visit to Falfurrias, Texas, in the famous gulf coast country. He stated that he had gone to Falfurrias with a view to becoming interested in land there, if conditions were right. When questioned as to the opportunities for homeseekers and investors Mr. McManis said they were excellent. In the first place, he said that the country and the land was 50 per cent better than had been rep-

**J. M. AULD, M. D., 80 DEARBORN ST., Dept 11, CHICAGO, ILL.**

resented to him. This is certainly a very remarkable statement, considering the fact that Mr. McManis thoroughly investigated the soil, crops, climate, etc. However, this only goes to show that the Falfurrias Immigration Company, which has been selling land around Falfurrias, has represented the proposition absolutely fair, and in fact has not made it appear so good as it really is. Mr. McManis went to Falfurrias with an unbiased mind and had no interest in the country whatever, but was simply investigating for his own satisfaction. If the northern farmers could be made to believe that the coast country is as good as represented, more of them would go there, for the facts are that many farms in the North have been cut up to give the sons or daughters a piece of land, and in many cases these farms are now in such small tracts that they cannot be cut again. The neighbor's farm cannot be bought, as the price is too high. Again, the northern winters are so severe that it costs the farmer all he has made in the summer to live through the winter. Then, again, where the northern farmer loses one crop he loses the use of his land for the entire year. Where the farmer in the Falfurrias country loses one crop he has two more chances, for the land will produce three crops a year. The man who rents land in the North and pays \$5 an acre rent could buy land in the Falfurrias district with a payment of \$5 an acre down, and can pay for his land in three years. Isn't this better than paying some landlord rent for high-priced land that only returns you

a bare living for your family and a receipt for your hard-earned money? And if the renter buys high-priced land and can only make a small payment down and if he has a little bad luck he will lose all. The Falfurrias Immigration Company is strong financially and is made up of men of integrity and high standing, and they want settlers on this land. The company stands back of those who buy land and assists them in case of need; in fact, the company will not let them fail. These points are certainly worth considering to the man who wants to provide for the future, who wants a home for his family. Surely it would be a good thing to go where failure is unknown. If you want to know more about Falfurrias, see the advertisement on page 26 of last week's issue or write the Falfurrias Immigration Company, Kansas City, Mo. They will gladly send you free maps and literature.

## A RELIABLE SEED HOUSE.

If you want to try a new seed house this spring, try, on our say so, Mr. R. H. Shumway, of Rockford, Ill. We have a good deal of confidence in the Shumway seeds and certainly all confidence in Mr. Shumway himself, who has been growing and selling seeds perhaps as long if not longer than anybody else now in the business. By adhering strictly to the plan of selling only such seeds as he knows must prove satisfactory to his customers, Mr. Shumway has built up a very satisfactory business. It is not as large as some seed businesses, but Mr. Shumway places a limit on it himself by declining to buy and sell seeds, the goodness of which he cannot be absolutely certain of. In his forty years' trade this course has drawn to him an exceedingly valuable list of patrons who look to him and to no one else to supply them with seeds year after year. He will be found very liberal in his dealings. You not only get good seeds, true in variety, but you always get a lot of extra packages. He publishes a fine catalog. Look up his advertisement on page 9 and write for it.

## Homeseekers' Rates.

Homeseekers' tickets are on sale via the North-Western Line from points in Wisconsin the first and third Tuesday of each month at very low rates for the round trip to points throughout the West, Northwest and Southwest. Also special low rates for one-way colonists' tickets same dates in February and March to Colorado, Wyoming and the Black Hills, and to Pacific coast points daily during March and April.

Ask agents of the North-Western Line for particulars.

Many misunderstandings could be avoided if men were a little more free with the use of ink and paper. Put all agreements down in black and white and then you will have something to refer to. This is especially true in the case of hiring help and renting property.

**FREE  
PIANO**

**Can you count these dots? Two pianos, big cash prizes Free.**

In this issue will be found on page 13 an advertisement of Successful Farming, of Des Moines, Iowa, which is one of the best and most successful agricultural papers in the United States. They are making a remarkable offer to our readers of two pianos and some large cash prizes to those who count the dots correctly in the picture of a piano, which appears in their advertisement. Full conditions are given and we would suggest that our readers should look this up and go after these prizes. We would be more than pleased if some of these big prizes should be won by readers of our paper, and, while it is not so easy to count these dots as it may seem from first glance, we see no reason why readers of our paper should not be the fortunate ones. Successful Farming is responsible and refers to every bank and business house in Des Moines and awarding of prizes will be wholly in the hands of disinterested judges, among whom is the treasurer of the state of Iowa, a judge of the district court, and a minister. It would seem this is an opportunity for somebody to get large prizes free. We publish above for the benefit of our readers an extra copy of the dot picture. Look up the offer and get in your counts.

A Scottish terrier, the great ratter, such as is owned and bred by Mr. S. W. Harr, of Riverside, Iowa. See advertisement on page 7.

## DEAR EDITOR:

You no doubt know that nearly all last season our company sold the best 600-pound per-hour capacity hand cream separator made for about one-third the price generally asked, and gave everyone a free trial.

As you are interested in the welfare of your readers, I wish you would say to them, one and all, through the columns of your paper, that for this season our separators have been improved to a point of perfection, still further outclassing any other separator made, still easier to operate, still larger capacity, and impossible to get out of order or give trouble, and any reader who will write to Sears, Roebuck & Co., Chicago, and ask for their 1907 Cream Separator Catalog, will receive the big book by return mail, postpaid, free, together with the lowest prices and the most astonishingly liberal offers and inducements we have ever made.

Yours very truly,

R. W. SEARS, President Sears, Roebuck & Co.

### Money Back—An Idea of Recent Development.

Back in the eighties when the Wheeler & Wilson Sewing Machine Co. in a frantic effort to regain a foothold in England, began their offer of "shipment on approval," it created something of a stir in the commercial world. Since that time this idea has been developing, until today it is applied to almost every conceivable business transaction. For many years, all of the better class retail stores have maintained this policy, and it is interesting, indeed, in looking over farm papers and magazines to note what a large percentage of advertisers are agreeing to refund the purchase price, together with transportation both ways in case entire satisfaction is not given. The particular thing which has called this matter to our attention in the present instance is the advertising of the Western Harness & Supply Co. Mr. R. M. Knox, president of this concern, began by making an offer of this kind and we infer from the largely-increased size of his advertisements this year, that he has been successful. We know that many of our readers have taken advantage of his offer, purchasing harness from him, and we have never heard of anyone who has been dissatisfied. The frank and open manner in which Mr. Knox makes his statements in regard to his product, his methods of doing business, etc., have appealed to us as they doubtless have to many others who have read his announcements. We would suggest that any who are contemplating the purchase of harness this year write the Western Harness & Supply Co. for their catalog. We understand that they manufacture a full line of high-grade harness, and the catalog would doubtless serve as an excellent basis for comparison of prices with those of your local dealers. See advertisement on page 6.

### Men Wanted.

There is no doubt that some of the read-

### HORSE OWNERS! USE GOMBAULT'S CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all bunches from horses. Impossible to produce scar or blemish. Send for circular. Special advice free.

THE LAWRENCE-WILLIAMS CO., Cleveland, Ohio.

era of this paper would like to get into some business that would be pleasant and at the same time profitable. The real estate business has made thousands of men rich during the past few years. The American Co-operative Realty Company, New Nelson Bldg., Kansas City, Mo., are offering a chance to get into real estate business that should interest those who would like such work. The company conducts a large business and are fair in their dealings. Write them. See their advertisement on page 25.

### Big Improvement of Disk Harrows—The Transport Truck.

The American Harrow Company, of Detroit, Mich., manufacturers of the celebrated Detroit Tongueless Disk Harrow, are this year putting on the market a most excellent improvement in the way of an attachment for their disk harrows. This attachment is their Transport Truck, which can be attached to any of their tongueless disk harrows in a few minutes, and when attached raises the disks off the ground and the harrow rides on the forward and rear trucks. This really converts it into a wheeled implement which can be driven over the roads without dulling the blades. We believe every farmer will realize at once the importance of this splendid feature. It is provided with a convenient foot brake, which makes it perfectly safe in going down hill. When disked, the truck can be removed and entirely out of the way in a moment's time. The American Harrow Company have been doing a good many remarkable things during the past two years. Last year they changed their entire selling organization and, although for twenty-five years they had been selling through dealers and jobbers they took all of their implements out of the hands of dealers and jobbers and sold the entire output of their factory direct to farmers. This, of course, enabled them to give a good saving in price, and as a result they were unable to fill all of the orders received last year and they advise us that they are already being flooded with advance orders for spring. They sell this implement on thirty days' free trial, allowing time payments, when desired, and also pay all freight charges. We are of the opinion that their Detroit Tongueless Disk Harrow is an implement every farmer who uses a disk harrow should know about, and now with the addition of the Transport Truck, they have a disk harrow proposition that every one of our readers should look into. We would suggest that you write them for a catalog and other printed matter. Their address is American Harrow Company, 148 Hastings St., Detroit, Mich.

### The Los Angeles Limited.

Electric-lighted train, Chicago to Los Angeles every day in the year, less than three days en route, via Chicago & North-Western, Union Pacific and Salt Lake Route. Splendid equipment of the most modern and complete character, accommodating all classes of travel.

Pullman drawing room and private compartment sleeping cars, Pullman tourist sleeping cars and composite observation cars. Double berth in tourist cars only \$7 from Chicago. Close connection with trains of the North-Western Line from Wisconsin points.

For full information apply to nearest agent of the North-Western Line.

## Two Crops Per Year Corn Eight Feet Tall

IN THE

### Texas Gulf Coast Country

Two corn crops are raised each year in this wonderful land and the richest, biggest, finest ears of corn you ever saw. The farmers of that section market from 40 to 70 bushels per acre with very little irrigation.

Why not take a trip down there and see this land which

**you can buy now for \$25 an acre?**

Talk to owners who clear from \$300 to \$500 per acre per year in vegetables—who net \$90 per acre in alfalfa—who raise

**24,000 pounds of Onions from one acre**

and sell at 2 1-2 cents per pound.

That is what is actually being done to-day, now, in this "Winter Vegetable Garden of America." Double yield, because the soil is rich and new and the climate right every month in the year.

### Perpetual Summer

dry, healthy—an ideal place to live—you can be out of doors the whole year around.

Right now, while your farm is idle, drop me a postal for an 80-page book on the Texas Gulf Coast Country. Read up on it. Write to those people whose addresses I will gladly give you on request. Then go and see it for yourself on a low-rate round-trip excursion ticket.

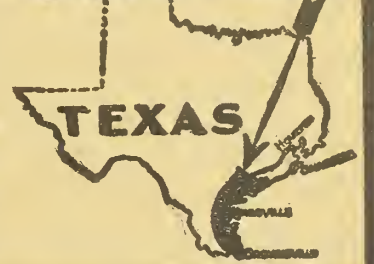

Save this ad and write me to-day and I will give full particulars.

JOHN SEBASTIAN, Pass'r Traffic Manager,

Duroc Jersey bred sows and young Short-horn bulls are offered for sale by Mr. J. T. Dollison, of Sac City, Iowa.

Mr. E. H. Dancer, of Lamoni, Iowa, is closing out Hereford cattle at private sale and is offering some real bargains.

Record number 183289—Ringbone that had lamed the horse for twelve years; all the ordinary treatments had failed; Fleming's Spavin and Ringbone Paste cured the lameness completely. Write Messrs. Fleming Bros., 210 Union Stock Yards, Chicago, for a

## Increase Your Corn Yield

## By sorting your seed corn

A uniform stand can never be obtained unless your planter drops the same number of kernels in every hill. If it is set to drop three kernels it should drop three, not two, four or any number but three **everytime**. Almost any good planter will do it if the seeds are of a uniform size but **no planter has ever been made that will adjust its plates to fit the kernels—the kernels must fit the plates. Seed corn cannot be properly sorted by hand—this is demonstrated by the fact that four, five and sometimes more stalks appear where there should only be three. The result is stunted stalks and stunted corn and therefore a waste of your good ground. There is only one possible way of securing seed corn of a uniform size—to use a**

## Morecorn Sorter

which will sort **every** kernel for length, width, and thickness—every kernel will fit the plates of your planter. After your corn is sorted by the "Morecorn Sorter" if your planter is set to drop three kernels it will drop three, 100 times out of every 100. What does this mean to you—three healthy stalks in every hill—an **increase in your corn yield of from five to eighteen bushels per acre**. Doesn't this mean enough to you to write for our catalogue and know more about this wonderful new sorter? Write for it today.

The "Morecorn Sorter" is doing away entirely with hand sorting. It is not a complicated, expensive machine, just a simple well-made sorter that will last a lifetime. Your increase in yield will pay for the sorter twice over, the first year. Many farmers make considerable extra money by sorting their neighbors' corn.

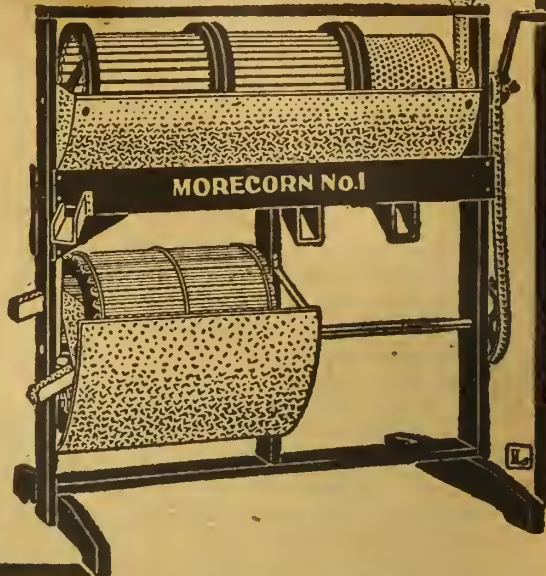

Send for the booklet. Better do it today.

Messrs. Chandler Bros., of Kellerton, Iowa, are offering some imported and home-bred Shropshire rams and ewes for sale. Read their advertisement and write them.

Imp. Fashion Favorite, a royally-bred Scotch bull, is offered for sale by Mr. J. D. McDermott, of Wiota, Iowa. He also has a few good young Scotch bulls for sale.

One express car of imported Percheron stallions to arrive at my barns March 8th. Your choice—but one—\$1,000; 1,800 to 2,100 pounds each. A. Latimer Wilson, Creston, Iowa.

Mr. G. J. Anstey, proprietor of the Fairview herd of Hereford cattle, of Massena, Iowa, claims the date of April 2, 1907, for a sale of Hereford cattle, which will be held at South Omaha.

Mr. John Schmieder, of Remsen, Iowa, is offering some good Poland China sows for sale at \$30 per head. These are all right and Mr. Schmieder is one of the good breeders. If you want one write him at once.

Large Improved English Yorkshire boars and sows are offered for sale by Mr. F. Raber, of Leigh, Neb. This is one of the best herds in America, and this is one of the most reliable firms. If you want Yorkshires you cannot find a better place to buy.

Mr. Frank L. Pim, proprietor of the Prairie view herd of Red Polled cattle, of Lucas, Iowa, in sending in copy for advertisement that appears on page 29 of this issue, writes: "I am on the market now with a fine lot of young Red Polled bulls, also some choice heifers not related to the bulls."

Mr. Milton E. Jones, of Williamsville, Ill., writes under recent date: "My Short-horns are wintering nicely and I will have a very desirable lot for my sale June 4th. I have not selected the sale cattle yet from the herd, therefore they will not be overfed, but I am carrying the entire herd the same as though I were not going to have a sale, believing they will give better satisfaction to buyers than if they were overfed, as many sale cattle are."

Mr. F. H. Herring, of Iowa City, Iowa, breeder of Duroc Jersey hogs, in furnishing copy for his advertisement found on page 37 of this issue, writes: "My herd is in the best of shape. The gilts I am offering for sale are mated to the good boar, Crimson Wonder H. 18467, he by Crimson Wonder Jr., and to Sunshine Jim 18469 by Perfection Chief, the winner at St. Louis and Iowa fairs. They are mated on principles of breeding that will result in profit to the buyers. Something always doing in the red hog business here."

Mr. M. G. Arnold, of Strawberry Point, Iowa, breeder of Poland China swine, writes: "Our sales on bred sows are quite good. We just added sixteen sows bred to great boars; some of them will weigh over 700 pounds and are as smooth as a rhinoceros. In view of this fact we will spare ten more Justice sows, bred for March and April farrow. They will weigh 260 pounds each, also ten 260-pound Justice and High Look sows, bred to farrow in May. We are making especial low price on them on account of being bred late. Every one has extra smooth, fine black coat, extra back and ham, good bone and feet, in fact as to breeding and quality are a credit to any herd. Our herd is in the pink of condition, not fat, were grown mostly on shorts and oats; some silage was fed the same as our herd sows and believe they will produce large, strong litters for which our sows are

## A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs; look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings, and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.

noted. Also a few extra good Justice fall boars of great promise, in fact, herd headers." See advertisement on page 35.

Mr. W. H. Webb, of Spencer, Iowa, is offering 500 grade ewes for sale in his advertisement on page 29 of this issue. They range in age from two to six years and all are supposed to be with lamb.

The Lorimer Nurseries, of Lorimer, Iowa, request readers of The Homestead to send for their wholesale prices. They are selling direct to customers at these prices until their surplus stock is reduced. The advertisement will be found on page 10 of this issue.

Mr. H. E. Peterson, of Lyons, Neb., the well-known Percheron horseman, writes: "I have just sold my black stallion, Fountain, to Mr. T. M. Sheridan, of Bradish, Neb., and the gray two-year-old, Tiger, to Mr. Peter Johnson, of Bassett, Neb. Both of these men have been all over the country looking for horses before they came to my place, and they say that my horses are better than I recommended them. I am selling horses worth the money and I have some more good bargains for those who are looking for stallions."

Messrs. J. L. Slick & Son, breeders of Poland China swine and Short-horn cattle, of Lanark, Ill., write: "We are having ideal winter weather. There is an unusually strong demand for registered stock. We have sold all of our Short-horn bulls of serviceable age. Today we sold to Mr. J. L. Sims, of Woonsocket, South Dakota, the three-year-old Percheron stallion, Superior W. S. 45714. We now have orders for twelve Poland Chinas ready to be shipped. The tried and useful brood sows that we are offering Homestead readers are well in pig and are fine individually, royally bred and safe in pig to our trio of great herd boars. These sows will do the breeder and farmer good." See advertisement on page 35.

The advertisement of the Black Hills Duroc Jersey Breeding Farm, Mr. Walter Lloyd, proprietor, and Mr. G. L. Reed, manager, of Sumner, Neb., will be found on page 29 of this issue of The Homestead. They are offering for sale fifty top-quality Ohio Chief bred brood sows, a few gilts and fall males now ready for service. The dams of these animals were sired by sons of Orion, Top Notcher, Echo King, Nebraska Belle's Get and Ohio sows bred by Messrs. S. S. Puckett and S. E. Morton & Co. They have for sale a few old sows bred to Ohio Chief Sr., son of Ohio Chief, the \$2,000 boar. Mr. Reed expects to be at Mr. Holt's sale at Kearney, Neb., on March 5th, with a few choice animals.

He will also receive orders for fall delivery. He guarantees satisfaction or will refund the money.

Mr. J. T. Scarff, of Salem, Iowa, writes that he is sold out of bred gilts, but that he has some May gilts, open, for sale at \$20 each. His new advertisement appears on page 35.

Trumans' Pioneer Stud Farm, of Bushnell, Ill., claim Wednesday, March 27th, as a date on which to hold a public sale of Shire and Percheron stallions at Kansas City, Mo. The offering will consist of thirty imported animals.

Mr. O. P. Hendershot, of Hebron, Neb., is offering fifty-five American-bred black Percheron stallions and mares for sale in his advertisement that appears on page 30. The sale is to take place on March 5th. This is the only opportunity we have for calling attention to it.

We call the attention of our readers to the advertisement of Mr. G. W. Koerner, commissioner of agriculture, of Richmond, Va., that appears on page 25. Those interested should write Mr. Koerner for full information in regard to Virginia, its climate and the opportunities presented for farming, stock raising and fruit growing.

Mr. E. Fugier, breeder of Percheron and Shire horses, of Creston, Iowa, whose advertisement appears on page 39 of this issue, writes us that after March 1st his postoffice address will be Yates Center, Woodson county, Kan. Mr. Fugier has sold his farm at Creston, Iowa, and has bought one near Yates Center, where he will move his horses about the date above mentioned.

The Condor Cure Company, of Los Angeles, Cal., advertise on page 3 of this issue that they will send a trial treatment of the Condor Inhalation Consumption, Catarrh, Bronchitis and Asthma Cure free to any one afflicted with any of these diseases. The announcement is made that this remedy quickly and directly reaches the affected parts and will permanently cure a long list of ailments as named in the advertisement.

Mr. S. J. Miller, of Kirksville, Mo., importer of Percherons, is the man who practically was the first to adopt the plan of selling at the barn door, and he has made such a success by this method that he continues to sell stallions at \$700 to \$1,200 at the barn door that are the superior of those \$2,500 and \$3,000 stallions sold on the company plan. Mr. Miller has a number of those three and four-year-old stallions that go at the above prices and the stallion buyer should investigate. See page 39 for Mr.

Miller's advertisement and write him that you are coming.

Read the advertisement of the Gabel Manufacturing Company, of Hawkeye, Iowa, that appears on page 15 of this issue, if you are interested in raising pigs.

The sale of Mr. O. P. Hendershot, of Hebron, Neb., takes place on March 5th. He will sell Kentucky Mammoth, Spanish and Tennessee black jacks and jennets, as well as American-bred black Percheron stallions and mares, American-bred black French draft stallions and American-bred bay Clydesdale stallions. His advertisement appears on page 30.

In a field note in our last week's paper, in speaking of the herd of Angus cattle, the property of Messrs. H. E. Eveland & Son, of Jamaica, Iowa, we said their herd bull, Patriot Boy, was purchased a year ago of Mr. W. A. McHenry, of Denison, Iowa. In this we were in error, as Messrs. Eveland & Son secured this bull from Mr. McHenry two years ago.

In ordering the re-insertion of his advertisement which will be found on page 29 of this issue, Mr. G. C. Harrison, breeder of Percheron horses, of Blencoe, Iowa, writes: "I am making a few satisfactory sales; most of the buyers are looking for good horses and I don't experience much trouble in satisfying them. Among my recent sales is a cracking good three-year-old to Mr. J. A. Kelly, of Larrabee, Iowa; a black three-year-old, weighing 1,900, and brought the nice price of \$1,600. I have others equally good and am offering some extra bargains to reduce my stock. I haven't got all of the prize winners at all of the state fairs and the International, too, but my horses were shown at the county fair and won first in every class shown, including sweepstakes, amid strong competition, including some \$2,500 and \$3,000 horses that I had to show against, beating their imported horses with my home breeds. When in need of a good stallion come and see my stock. Prices from \$500 to \$1,000."

Mr. A. O. Stanley, of Sheridan, Mo., writes: "The four yearling Short-horn bulls I am putting in the Sioux City sale on March 8th, are the same kind that I sold in the combination sale at Corning, Iowa, a year ago. They have plenty of scale and are very thick-fleshed fellows, and the finest reds I ever saw. Three of them are by old Rosemont, a splendid Scotch bull, bred by Mr. Charles C. Norton. He was by Imp. Banker and out of a dam by the famous Golden Rule, breeding that could not be excelled. There is not much choice in these three yearlings. They are all herd headers. Belmont 3d is a very short-legged, wide out fellow, fine head and horn. He has two older brothers at the head of good herds, and is just as good as they are. Scottish Banker was a year old in October and is a wonderfully thick-fleshed, lengthy, short-legged calf, fine head and horn. His dam is of Mr. Cruickshank's famous Marsh Violet family. The fourth bull is Valley Godoy, an October yearling, a grandson of Godoy, and his dam the fine Cruickshank cow, Rose Victoria." See advertisement on page 33.

#### POLLED DURHAM BULLS.

Anyone wanting good Polled Durham bulls can get them of Messrs. James Wilson & Son, of Anita, Iowa. This is one of the most reliable firms in Iowa and they have some excellent young bulls for sale.

#### CRUICKSHANK BULLS.

Anyone wanting a good Cruickshank bull should go and see Mr. C. C. Norton, of Corning, Iowa. He has a few Duchess of Glosters sired by Imp. Bapton Admiral and Banker's Victor. He also has some Victorias, Lavenders and a few other choice-bred bulls. If you want a herd bull it will certainly pay you to go and see Mr. Norton and his bulls.

#### GIANT CARNATIONS FREE.

You can have the seeds as premiums and grow the largest giant carnations in the world. Besides you can get ten other vegetable and flower seed package premiums of your own choice, free, if you first write a postal for this free 132-page "Sterling Seeds" catalog. You have to read page 2 of this interesting catalog to make your selection of the eleven varieties of seeds you want and to get them free. So send for it first. The catalog contains descriptions and il-

Chandler Bros., Kellerton, Ia.

## Ewes for Sale

THE Iowa State College is offering twenty Shropshire, Oxford and Southdown ewes for sale at very moderate prices. Address,

#### DIVISION OF AGRICULTURE,

AMES, IOWA.

#### Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

FOR SALE, 500 grade ewes from two to six years old, mostly all black face and all supposed to be bred. First come, first served. W. H. Welb, Spencer, Ia.

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Anita, Iowa.

15 Registered Shropshire ewes, bred to imported Minton ram. W. C. Frazier, Atlantic, Cass county, Iowa.

Illustrations of all the best farm, field, garden, vegetable and flower seeds. Write a postal or letter for it today, addressing Northrup, King & Co., seedsmen, 10 Wilder St., Minneapolis, Minn.

#### WHEELS SHOULD TRACK.

The front and rear wheels of a manure spreader should track the same as a farm wagon, as the machine will pull easier than it would if it made four tracks. Then, again, if the wheels don't track you can't dress corn or spread on corn stubble successfully because either the front or rear wheels or horses will walk on the rows. The front axle of a spreader should be set back under the machine so it will carry its share of the load and so the horses can be hitched close to the load.

#### SUFFERED FIFTEEN YEARS.

To suffer with piles for fifteen years is surely a terrible affliction. Below we give a letter which was written to Drs. Thornton & Minor, of Kansas City: "Holden, Mo., Dec. 7, 1893. Drs. Thornton & Minor, Gentlemen:—I was afflicted with piles for fifteen years. About ten years ago I was treated by you and was completely cured. I also know of a great many cases in this neighborhood that were cured by you. Of your ability and reliability I have no doubt. Respectfully, Wm. Steele, President Farmers and Commercial Bank." The above letter is surely conclusive evidence that the Thornton & Minor system of treatment is doing all that is claimed for it. A record of thirty years' successful practice in Kansas City is behind Drs. Thornton & Minor. Read their advertisement on this page and write them.

#### PREPARE FOR WET WEATHER.

Were you ever unexpectedly caught in the rain without a good rain coat or with even what you thought was a good one? Do you remember how you felt when the rain water began to feel its way to your skin on your shoulders? Didn't say or think anything did you? No, of course not, the opportunity to say and do what you should have done was past. Just the same there is a chance to prevent the recurrence of such an undesirable circumstance as getting soaked. That is with rain water and with buying a poor rain coat. Next time you buy get one of those garments advertised on page 18 in this paper. Oiled waterproof clothing such as Tower's brand is free from leaks; impervious to moisture. Just the thing for hunting, fishing, driving and for the farmer every day. Either in black or yellow. Sold everywhere. Write for free booklet to A. J. Tower Company, Boston, Mass., if you are unable to find their goods in town.

#### A MOVEMENT IN THE INTEREST OF BETTER MARKETS.

Present methods of marketing farm produce are as yet crude and expensive. Fully realizing this fact a company of Illinois men have incorporated at DeKalb, that state, for the purpose of establishing a business that will have for its purpose the improvement of present methods of marketing from the farm. The policy of the company is to combine the business of marketing in fewer hands, thus eliminating much of the unnecessary expense that is involved in present methods of getting produce to the consumer. More direct connections between producer and consumer is to be established. Sales in car load lots are to be encouraged. The best markets will be located. Should you be a producer of stock, grain, fruit or any other farm produce this movement will interest you. Interesting details regarding this company's plan and business will be forwarded on request. Kindly mention this paper when writing.

#### 146 BUSHELS PER ACRE.

Professor Holden says he took seed corn from the corn planter boxes of 100 farmers in 100 different fields near the state agricultural college at Ames, Iowa, two years ago. All were planted on the experimental grounds of the college and all had the same cultivation and were grown under identical conditions. The difference in yield was a surprise to all. Some made a yield of less than twenty bushels per acre, while other sorts made almost 100 bushels, thus proving beyond doubt the superior value of good seed and good varieties. We don't understand why farmers plant scrub corn when they can get such varieties as "Diamond's Joe's Big White" that made a yield of 146 bushels per acre last year in an experimental test. We want every reader of this paper to grow

# PILES NO MONEY TILL CURED.

FISTULA, Fissure, Contraction, Ulceration and all Rectal Diseases treated on a positive guarantee of permanent cure.—Established 29 Years.—See thousands of prominent names with statements that they paid nothing till satisfied of a cure in our free 352-page illustrated treatise, also our 132-page illna. book for women; both sent free and postpaid.

DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.

#### TOO LATE TO CLASSIFY.

## 40 RICHLY BRED POLAND CHINA SOWS AT PRIVATE SALE.

SURED by such noted sires as Chief Perfection 2d, Top Chief, Ideal Tec. and other noted sires. Most of them are bred and safe in pig to Immense, a prize winner at Ohio State Fair. Others bred to Perfection Grand. Write for description and prices.

E. H. ANDREWS,

KEARNEY, NEBRASKA.

#### CHESTER WHITES.

ALL sold out but still in the ring. Sales made this season, 67 Boars, 75 Sows and Glits. If I have a displeased customer in the world I know not where he is and would be pleased to hear from him. Nothing preventing, you will hear from me later. Here's success.

J. L. BARBER,

HARLAN, IOWA.

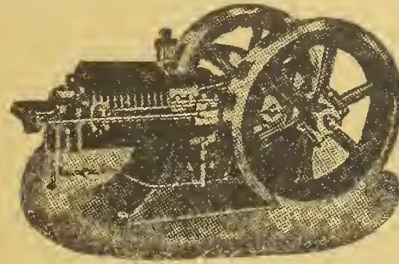

the most bushels and the best corn, and would advise all who are interested in the crops they grow to send at once for the great book on corn and corn growing just issued by Ratekin's Seed House, of Shenandoah, Iowa. It will be sent free if you mention this paper.

#### FREE TREATMENT FOR CATARRH.

Dr. Williams, of Des Moines, Iowa, makes this offer for one month to all who have never tested his treatment. He makes this exceptional offer to you as a catarrh sufferer so that you may have an opportunity of testing his new method of treatment and satisfy yourself that he can do all he claims he can do for you. One month's treatment has permanently cured many cases of catarrh; however, long-suffering and chronic cases require a regular course of treatment and this one month's treatment will enable you to decide intelligently whether you wish to continue or not. Dr. Williams is so confident of the benefits you will receive that he does not hesitate to make this exceptional offer. Read his announcement on page 23.

#### AIR-COOLED GASOLINE ENGINES.

The Gade air cooling (patent) system is entirely different from any other air cooler on the market. Their six-power engine will

keep cool and run in a satisfactory manner for one hour to twenty-four hours when loaded to their full rated horse power. One Gade gasoline engine in a community means more. The Gade engine is a result of actual experience. It is made of the highest grade materials by expert workmen. It is of the four-cycle principle, the greatest care being used in the manufacture of every part. Read carefully their advertisement on page 5 of this issue and write them for catalog and prices. Mention this paper.

#### YOUNG PIG TROUBLES.

It's time to think of trouble. The spring pig season is at hand. This always brings

Black Hills Duroc Jersey Breeding Farm, Sumner, Neb. WALTER LLOYD, Proprietor G. L. REED, Manager

For Sale at our Breeding Farm 50 Toppy Ohio Chief Jr. Bred Brood Sows, a few glits and Fall males ready for service. Their dams sired by sons of Orion, Top Notcher, Echo King, Nebraska Belle's get, and Oh. Sows bred by S. S. Puckett and S. E. Morton & Co. Ohio Chief Jr. sows are bred to Reed's Hustler, sired by Puckett's Chief, dam Lady Besumont, bred by S. E. Morton & Co. G. C. HARRISON

Blencoe, Iowa

#### 25 Duroc Jersey Bred Glits 25

I HAVE for sale 25 bred glits for March, April and May farrow of best breeding and individuality for sale at bargain prices.

F. M. Erschen,

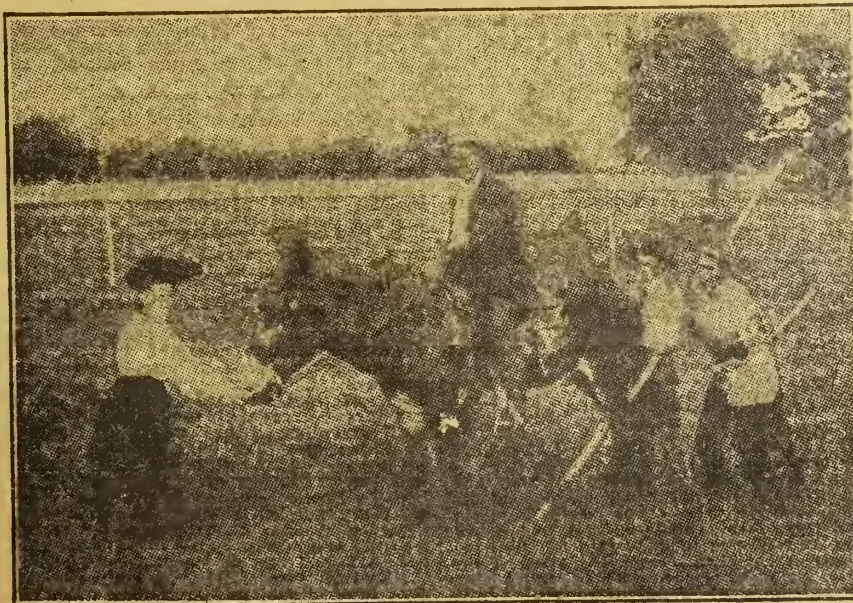

Odell, Ill.

RED POLLED CATTLE FOR SALE. Both sexes, at reasonable prices. Frank L. Piza, Lucas, Iowa.

trouble to a large number of farmers and breeders. These pig troubles are known as sore mouth, scours, skiu diseases resulting from bad blood, and later on worms and lice. Where these things are permitted, the pig crop is a failure. Why permit such things? The Snoddy treatment administered immediately after farrowing will put the sow in good health, cause her to give plenty of rich milk, protect the pigs against the many ailments which kill so many each spring, and will give the pigs a start in life that will make big hogs out of them. A large number of the most successful breeders and feeders use and endorse this treatment. Men who have used it ten years say it is a real cure for cholera, the only complete worm exterminator and the greatest thing in existence to make the runty pigs grow into fine hogs. Write to the Snoddy Remedy Company, Box 852, Des Moines, Iowa, for a free book of valuable information on hog troubles and also full particulars of this treatment. These pig troubles are an important subject and everyone should write for this book. Do it now.

#### BUSHNELL PUMP COMPANY'S WATERING TANKS.

If you buy a Bushnell Pump Company stock watering tank, such as is pictured in the advertisement on page 28, it is not likely that you will ever have further trouble on that score. It is just such a farm necessity as it will pay a farmer to put good money in and have done with. It is the poorest economy to get anything frail or poorly built in a watering trough or tank. All well-posted stockmen recognize this fact. It is in use all day, every day. When you install it, you hope to have it last many years. Whether it will or not depends altogether on whether you see to it that you get the right kind of goods when you buy. These Bushnell Pump Company tanks are not only made of the right kind of materials, but they are made right. Here is one thing that is greatly to the credit of the Bushnell people: They are not making tanks as a side line. That is, they don't use the best part of their lumber to make something else and then put the waste, short pieces and sap-edged stuff into tanks. Making tanks is their chief business. They put into them the very best lumber they can get. They use the kind that will last longest when kept constantly wet. The staves are made specially heavy, perfectly jointed and tongued and grooved. The hoops are made of steel, very heavy, and provided with patent draw lugs, so that if the tank should remain empty or partly empty for a time, there would be no trouble about keeping the staves drawn up perfectly tight. To our mind, if such a tank as the Bushnell is kept painted, which of course is the proper thing to do, there is no reason why it should not last as long as the average farmer or feeder will have use for it. The Bushnell tanks can be had in about any size anybody wants up to sixteen feet high or sixteen feet in diameter. Anyone wanting a good tank for stable, yard or field service cannot do better than to read the Bushnell Pump Company's advertisement and then get into correspondence with the concern in regard to his particular wants.

#### "On our way to Success."

Would probably never have been used in connection with the advertising of the Limestone Valley Farm's jack and jennet business were it not suggestive of the push and energy shown by the Monsees family. Remember that Messrs. Monsees & Sons, of Smithton, Mo., sell jacks and jennets on next Tuesday, March 5th. If you wish to share their success in the jack business be with them and buy some of that famous Limestone Valley Farm stock.

# MY COMPLETE HERD OF Aberdeen Angus Cows, Heifers & Bulls

Will be sold on my Farm 6 miles north of Grinnell, Iowa, March 15, 1907.

Fifty-five Head in all consisting of excellent individuals of the Mayflower, Waterside Bessie and Boghead Rose families, got by such noted sires as Black Knight of Estell Second, Jack of Cottage Grove Second by Blackbird King, Heir Laddie by Longbranch Heather Lad 4th and also Toledo Innocence.

**46 COWS AND HEIFERS** consisting of fourteen choice yearlings, six two-year-olds and cows mostly ranging from three to six years. A goodly number with calves at foot got by herd bull, Clark Nigger 50363. All old enough and not with calves at foot are bred to Lou Dillon R. **NINE BULLS**, including the herd bull and young bulls from nine to eighteen months, and got by Toledo Innocence. Promising youngsters. This offering is in excellent shape. Prospective show stuff, though nothing in heavy flesh. All our stock has been kept growing. There is nothing that need go at a sacrifice on account of its individual merit. Send for catalog and accept our hospitality sale day. Twenty-two grade Percheron mares will be sold at 10 o'clock a. m. Also the first twelve volumes of the Angus herd books.

Cols. Igo, Hense and McIlraith, Auctioneers.

**E. T. RICKARD, PROP., - GRINNELL, IOWA.**

## High-class Angus in the Sioux City Auction.

The cattle for the McGavock auction at Sioux City, Iowa, on March 6th, consist of consignments of noted breeders and the offering is very strong in imported blood fresh from the best herd of Scotland. These should prove attractive to Angus breeders throughout the country. Mr. J. V. Arney, of Leon, Iowa, consigns the double Pride bull, Proud Poet, whose sire and dam were both imported and represent the best of Ballindallock blood. He was got by Imp. Proud Duke of Arndale, a high-class Erica bull that was sired by Proud Duke of Ballindallock, a Highland Society champion, and out of Imp. Poetess of Seabam by a son of the Erica bull, Esmond of Ballindallock. One of the best Blackbird bulls to be offered recently is Arndale Blackbird, sired by Imp. Proud Duke of Arndale and out of a cow whose grandam is a sister to the celebrated bull, Black Monarch of Emerson. Arndale King 2d and King Que 2d are both Queen Mother bulls sired by Imp. Proud Duke of Arndale. Proud Envoy, a three-year-old that has been used with good results by Mr. Arney, is an Erica-topped Pride sired by Imp. Envoy of Benton, and out of Imp. Poetess of Seabam. He is from the same strain of the Prides as the K's at Ballindallock and is strongly topped with the best blood of this famous herd. Mr. Arney also consigns some exceedingly well-bred females. The yearling heifer, Queen of Arndale 5th, is a Queen Mother whose dam was bred by Mr. McFenry, and she was sired by Gay Baron, a son of Gay Lad. Another daughter of Gay Baron is found in Janny of the famous Gipsy family and out of a dam by the highly-bred double Blackbird bull, Black Top. Imp. Proud Duke of Arndale is also represented by several good daughters in this consignment. Messrs. Anderson & Findlay, of Lake Forest, Ill., consign sixteen cows and heifers of the Erica, Lady Ida, Queen Mother, Coquette, Westertown Rose and other famous families, and they are all sired by the imported bulls, Elberfeld, bred at Ballindallock; Monitor of Glamis, bred by the Earl of Strathmore; Pacific, bred by Col. Geo. Smith Grant, and Conqueror of Aberlour, bred by Mr. Findlay. They will justify the attendance of the best breeders at this auction, as their individuality is in keeping with their pedigrees. The Lakeside Farm Company, of Storm Lake, Iowa, managed by Mr. L. H. Lamar, and who succeeds the late William Miller, consigns five good, well-bred bulls to the auction. It is one of the most attractive auctions of the breed to occur in the Northwest and we trust it will be duly appreciated.

## The Wayne Short-horn Sale.

Readers of The Homestead in western Iowa and Nebraska will be interested in the joint breeders' Short-horn sale to be held at Wayne, Neb., on March 13, 1907. This sale will be made by Messrs. A. B. Clark and W. M. Lessman, both well-known and responsible breeders in northeast Nebraska. They have selected twenty head of females and twenty bulls from their herds, and they have drawn on some of the best they have. The bull offering is particularly strong. Mr. Lessman is selling his Cruickshank herd bull, Scotch Fashion, considered one of the best-bred bulls in the West. He is a son of Imp. King James and his dam is Imp. Northern Light; second dam by Imp. Duke of Lavender. A lot of his get will also be sold in the sale and breeders can see how he breeds. He is a red bull and has done good service in the Lessman herd. Mr. Lessman is retaining so many of his heifers in the herd that he has decided to sell him. Anyone wanting a good herd bull should buy this fellow. Mr. Clark also sells a good young bull called Fame's Hero. He is a son of Imp. Fame and his dam is sired by Imp. Nonpareil. He is a Scotch-topped Young Mary, a red in color and a good one. The cows that will be sold in this sale are nearly all of good milking strains and they will make their way either at the pail or for beef animals. There are a lot of good Young Marys, Rose of Sharons, Josephines, Miss Ramsdens, Arabellas, Rosemarys and several Francies in the offering. The last named family was the one that did so much to bring the Robbins herd to the front, and there will be some good representatives in this sale. Many of the cows will have calf at foot and others will be well along in calf. Nearly everything in the sale will be sired by a Scotch bull, many having five and six Scotch tops on the very best of Bates foundation. It is an offering that reflects credit on both these breeders and anyone who wants good Short-horn cattle will be able to buy

them in this sale. They are selling a good bunch of bulls and a car load could be easily secured at this sale. See advertisement on page 33 and write for catalog at once and mention The Homestead.

## The Hendershot Sale.

First and last call for Mr. O. P. Hendershot's sale of stallions and jacks at Hebron, Neb., Tuesday, March 5, 1907. The entire offering is owned by Mr. Hendershot and he will guarantee every animal sold to be just as represented at the sale. They are bred right and have had the run of large pastures, giving them splendid muscle and smooth bone. The stallions are Percheron, French draft and Clyde. The mares are Percheron and are the broad-backed, full-chested, high-beaded kind, fine style and action, good flat bone, good hoofs and absolutely sound. This coupled with quality and weight should satisfy the most critical buyer, and Mr. Hendershot will fully guarantee each and every animal to be just as represented at his sale. We think every animal offered in the horse line will mature close to the ton mark. Did you ask what we thought of the jacks? We are glad you did, for they are the best lot we ever saw any place. They are the Mammoth Kentucky black jacks of the big kind, some Spanish jacks, with all the style you want. Mr. Hendershot fully guarantees these jacks to be prompt and all right in every way, and to be producers of a good class of mule colts. The stallions that are matured will weigh a ton. The two and three-year-olds weigh from 1,800 to 2,000 pounds, the yearlings from 1,600 to 1,700 pounds. The jacks are from fourteen and one-half to sixteen and one-half bands high, and heavy-built black boys. The entire offering in stallions and jacks are black (with three exceptions). Read the advertisement on this page and send for a descriptive catalog, mentioning this paper.

## E. T. Rickard's Dispersion Angus Sale Near Grinnell, Iowa, March 15th.

Twenty-five years of experience in breeding Aberdeen Angus in Iowa is a claim that cannot be made without attracting a considerable amount of attention and respect. The men that had sufficient faith in the future to found a herd a score or more years ago and pay big prices for foundation stock and herd bulls right through that period should have something to be appreciated. In 1882 Mr. E. T. Rickard, then a young man, with his father founded the present herd. Their first purchase was Waterside Bessie, a cow with a ten-months-old bull calf at foot, for which pair \$1,000 was paid. This policy of buying first-class sires was repeated again and again, and the results have been marked. The present herd numbers over sixty head and is largely the breeding of the farm, so that the herd stands absolutely on its own merits. Visitors to the herd will be shown several generations where the uniformity of the group is of high merit. The female part of the offering will bear considerable inspection, and it will pay those looking for something absolutely reliable as breeders to visit this herd, either on sale day or previously. The older cows have proven their value beyond any doubt and have never failed to produce good, strong calves every year. The heifers are a grand lot and contain some specimens of great thickness and sweet character. The bull offering includes a good herd bull and a number of blocky, good-handling young ones ranging in age from nine to eighteen months. Next week watch for further particulars. Suffice it to say that this will be a dispersion sale of doddies that are of biggest grade individual merit. Write for catalog.

## Lund's Durocs.

On March 8, 1907, Mr. A. C. Lund, of Kearney, Neb., will offer his entire herd of Duroc Jersey hogs at public auction, and among them are a number of very choice brood sows. Mr. Lund has always kept the most noted strains and has bred and shown some very choice individuals. At the head of this herd is Red Knight Jr., a son of the great sweepstakes boar, Red Knight; dam Western Ella by Western Breeder. This hog will be included in the sale and should be picked up by someone looking for a herd boar. He is assisted by Red Chip by Lund's Choice. One of the great attractions of the sale is the great sow, Lund's B. This sow won third prize at the Nebraska State Fair last fall in the aged sow class. She is a great breeder and as an individual is hard to beat. She has extra good length, a won-

### 55 American Bred Black Percheron Stallions and Mares.

American Bred Black French Draft Stallions  
American Bred Bay Clydesdale Stallions  
Kentucky Mammoth, Spanish, and Tennessee Black  
Jacks and Jennets.

**Sale at Hebron, Neb., March 5, 1907**  
At 10:00 A. M.

**TERMS** One-half cash, 16 months on deferred payment, with bankable paper. Send for catalog.

**O. P. HENDERSHOT, Hebron, Neb.**

derful back with good side lines, splendid ham, good bone and extra good feet. This sow is worthy the attention of breeders and should demand their consideration. Lund's Choice by Glendale Prince is another of the good ones and is a sow that could not be bought except for the fact that Mr. Lund is selling his entire herd. There are three extra good two-year-olds, namely, Miss Queen, Kearney Belle and Kearney Queen. They are by Lund's 1st, dam Lucy by Reed's Banker, and are very attractive sows. These three composed Mr. Lund's yearling show herd last fall at the state fair. They are all safe in pig to Red Knight Jr. He also has an Obio Chief gilt in this sale and two Obio Chief boars. Arrange to attend this sale, as you are sure to find something that will please you. Catalogs are now ready and can be had by dropping a card to Mr. A. C. Lund, of Kearney, Neb. Those who cannot attend can send a bid to the auctioneer, Col. Ray Page, and it will receive proper attention. When writing please mention The Homestead.

## John E. Brown & Sons' Seed Corn.

On page 10 of this issue will be found the advertisement of Messrs. John E. Brown & Sons, of Mitchellville, Iowa. A careful reading of this advertisement will reveal the fact that all the corn sold is grown on their own farms, and this is absolutely the case. For forty years the head of this firm has been building up the fertility supply of one of the best farms in the state of Iowa, and as a result the yield today is better than ever before. Of course, maintenance of fertility and the improvement of seed have gone hand in hand, so that the public have every reason to have absolute confidence in all the corn that comes from this firm. All seed sold has been stored during the winter in one of the most up-to-date seed corn houses that we know anything about, so that there is absolutely no fear but what the corn will give a high germination test. The varieties being offered are Brown's Choice, an exceedingly heavy-yielding variety; Reid's Yellow Dent, Iowa Silver Nine and Yellow Rose. The latter variety requires only about ninety days to mature and is indeed one of the heaviest-yielding, short-season corns on the market. For further information address Messrs. John E. Brown & Sons, Mitchellville, Iowa, and please mention this paper when you write.

## William Lentz's Poland Sale.

Mr. William Lentz, of Ankeny, Iowa, held his annual sale February 8th as advertised, on which date he made an average on forty-

four head of \$52.67. Prices were not sensational, but were wonderfully uniform throughout. Mr. Lentz has been emphasizing the matter of size and prolific qualities in his herd and the result of his efforts is being appreciated by breeders generally. His record last year was 156 pigs from sixteen sows. Among the buyers were Messrs. Geo. Marshall, Monroe, Iowa; A. W. Mally, Des Moines, Iowa; John Burk, Ankeny, Iowa; J. O. Thompson, Maxwell, Iowa; Jno. M. Pease, Colfax, Iowa; T. J. Hitt, Lincoln, Neb.; J. E. Hull, Maxwell, Iowa; W. H. Hutton, Ankeny, Iowa; G. F. Holland, Elkhart, Iowa; Wm. Miller, Ankeny, Iowa; J. C. Witmer, Des Moines, Iowa; J. C. Harris, Panora, Iowa; Sabe Parmenter, Ankeny, Iowa; J. C. Wall, Polk City, Iowa; Bergren Bros., Stanton, Iowa; T. J. Boggle, Madrid, Iowa; P. C. Thompson, Ankeny, Iowa; C. W. Davidson, Polk City, Iowa; J. E. Burge, Decatur, Ill.; W. S. Criswell, Boone, Iowa; Harris Thornton, Ankeny, Iowa; John Bell, Wellman, Iowa; F. E. Cogswell, LeRoy, Minn.; W. P. Wolf, Kewanee, Ill.; S. N. Hodgson, Parker, Kan.; L. M. Pettit, Dallas Center, Iowa, and Roy L. Morgan, Sham- baugh, Iowa.

## CHEAP RATES TO THE PACIFIC COAST.

Commencing March 1st and continuing until April 30th the Iowa Central Railway will have on sale reduced one-way tickets to Arizona, California, Oregon, Washington, British Columbia, Utah, Montana, Idaho and Old Mexico. Rates \$15 below regular fare. On Wednesdays through tourist cars to Los Angeles and San Francisco are run via Kansas City and the popular Santa Fe System. Call on agents for particulars, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## CHEAP RATES TO THE PACIFIC COAST.

# 103 "DODDIES" 103

## AT AUCTION

AT SOUTH OMAHA, NEBRASKA, MARCH 12 AND 13, 1907

65 COWS---38 BULLS---FOUNDATION STOCK AND HERD HEADERS

All the leading families are represented such as Blackbirds, Queen Mothers, Prides, Heather Blooms, Ericas, Abbesses, Barbaras, Coquettes and others equally as good. They are choice selections from the herds of Parrish & Miller, Hudson, Kan.; Oliver Hammers, Malvern, Iowa; Wheatley & Ward, King City, Mo.; C. D. Hooker & Son, Maryville, Mo.; Davis Bros., Maryville, Mo.; N. M. Pettit, Overton, Neb.; R. L. Milton, Stafford, Kan.; Robinson & Chappell, Maryville, Mo.; J. H. Mayne, Council Bluffs, Iowa. Another such an opportunity to buy Aberdeen Angus show and breeding cattle will not be offered soon. There are first and second prizewinners and sires and dams of prizewinners in the offering. Write today for catalog of this, the greatest sale of the season in the West. Address,

**HAL. T. HOOKER, MGR., - - MARYVILLE, MISSOURI.**  
COLS. WOODS, IGO AND HARDING, AUCTIONEERS.

### C. R. Steele's Short-horn Sale.

On March 12th and 13th an exceptional lot of Short-horn cattle will be offered at public sale by Mr. C. R. Steele, at his farm near Ireton, Iowa. It will be an unusual offering because of the fact that there will be forty head of the very best Scotch cattle in the sale, including three imported cows, two of which will have calves at foot by the celebrated show bull, Ceremonious Archer. The Scotch families represented are the most popular and most noted tribes of the breed, and from the standpoint of individual merit are in keeping with their breeding. Imp. Coral Countess, an eight-year-old cow imported from Scotland by Messrs. Cargill & Son, goes into this sale with a heifer calf at foot by Ceremonious Archer. Miss Clarence, her two-year-old heifer sired by Sittytown Lad, also goes in. Imp. Fortuna 3d is a six-year-old red cow and an excellent breeder, and she is safe in calf to Ceremonious Archer. Imp. Queen Elizabeth is one of the best breeding cows in the herd. She will have a calf at foot by Lord Banff 3d at sale time. She has had four bull calves before and every one was a good one. Pleasant View Mysie 10th is a five-year-old cow, sired by the Scotch bull, Challenge, and her dam was a daughter of Victor Mysie 2d. Here is one of the most richly-bred Mysies in the sale. Mysie of Ploverdale 6th is a daughter of Baron Lavender, the bull that formerly headed the Brodsky herd at Plover, Iowa. This is a nice two-year-old roan heifer and will be one of the good young things in the sale. There will be several other well-bred Mysie cows and heifers in the sale, and this popular tribe was never better represented than they will be on this occasion. Mr. Steele is selling some excellent Duchesses of Glosters in this sale. One of these is 67th Duchess of Gloster by Imp. Favorite and she has a bull calf at foot by Lord Banff 3d. The other is Duchess of Gloster 28th by Roan Gauntlet, tracing to Imp. 12th Duchess of Gloster by Champion of England. This heifer is one of the most choicely-bred Duchesses of Glosters in the sale. He has selected one very choice Victoria heifer for this occasion and she is a daughter of Lord Banff 3d. There is not a better bred heifer in the sale, and she is No. 18 of catalog. Lady Archer is a two-year-old daughter of Ceremonious Archer and is out of a daughter of Imp. Golden Fame. One of the good Canadian cows is New Year's Gift 2d by Sittytown Hero, and she will have a calf at foot by Ceremonious Archer. Orange Lady is a two-year-old daughter of Gloster's Valentine and her dam is Imp. Fair Maid by Scotland's Fame. She is one of the most richly-bred Orange Blossoms in the sale. Nonpareil Lady is a four-year-old Canadian cow and was bred by Mr. W. D. Platt. She belongs to the celebrated Nonpareils and is a very thick, short-legged cow of decided Scotch character. There will also be a good Dorothy heifer in the sale, one Mary Ann of Lancaster and one Aairy Buckingham. There will be other Scotch cows and heifers in the sale, and among these will be some very good ones by Mr. Steele's present herd bull, Lord Banff 3d. Of the plainer sorts there will be a great number, and all will be well Scotch topped and will be bred to Scotch bulls. Besides putting in a splendid lot of cows in this sale, we also want to call Homestead readers' attention to the class of heifers he is offering. We know such a lot has never before been sold from this herd, and never before has a better lot been sold in western or northwestern Iowa. The bull offering will also be very attractive. Mr. Steele is selling about twenty-five head, and eight or ten of these are Scotch bulls. Some of these show great promise for herd bulls. He is selling a good Miss Ramsden bull, a year old last August. He was sired by Earl Victor by Scottish Victor and is out of a Fitz Eustice dam. Contessa Lad is sired by Gauntlet's Hero and his dam is Imp. Contessa. This is one of the best young bulls in the sale. He is a half brother to the great herd bull, Lord Banff 3d, now conceded by all breeders the best living son of Imp. Lord Banff. There will be two good young Mysie bulls in the offering, one by Lord Banff 3d, the other by Grand Baron 2d. Banff 6th will be twelve months old by sale day and is a well-bred Scotch bull. His sire is Lord Banff 3d and his dam Imp. Queen Elizabeth. There will be a Lavender bull in the sale. He is a ten-months-old calf

and was sired by the Harris-bred bull, Godwin, a half brother to the noted Godoy. There will be two young bulls in the sale sired by Fearless Victor and one of these is a straight Scotch bull of the Matchless tribe. Besides these there will be some older bulls, all of which are well Scotch topped and some of these are strong, lusty fellows. A man could easily secure a car load here, should he want that many. There will be bulls in the sale that should be purchased for herd bulls, and there will also be plenty of bulls for the farmers. Write for a catalog of this sale at once and kindly mention The Homestead when doing so.

### Superb Show Cattle in the Short-horn Sale at Sioux City.

Sale Manager McGavock considers that he is very fortunate in securing such attractive entries for his Short-horn sale at Sioux City, Iowa, on March 8th. Rather late he induced Messrs. W. T. & H. R. Clay, of Plattsburg, Mo., to send a car load of selected cattle for this occasion. Mr. W. T. Clay catalogs seven head of females that are absolutely show cattle. They include the straight Scotch yearling heifer, Mona, a Cruickshank Orange Blossom got by Victor Barmpton, bred by Mr. W. T. Clay and out of Miss Orange 2d by the Norton-bred Courtier 2d. The next two crosses are Orange Blossom's Perfection and Imp. Antiquary, and this takes us back to Imp. Orange Blossom 30th, a Cruickshank-bred cow by Pride of the Isles. Mona is a show heifer and three of her half sisters, all of which are show animals and long yearlings and two-year-olds, are also included by Mr. Clay. These daughters of Victor Barmpton are such as are rarely seen in an auction ring and are good enough for the best show rings of the country. They are in calf to a straight Scotch bull that was bred by Mr. Clay and recorded as Romney 262550. Romney also has two heifers in the auction that will be difficult to defeat if shown the coming year at the fairs. They will be eligible to the yearling class. The five-year-old cow, Frances, sired by 176th Duke of Wildwood and out of a dam by The Baronet, a bull that was bred by Colonel Harris and sired by Baron Victor. These seven head complete the entries of Mr. W. T. Clay and it will be a rare occurrence that seven such females will go through any auction of the breed this season. Mr. H. R. Clay is consigning four heifers, two yearlings and two two-year-olds. The yearlings are both Scotch of the Orange Blossom family and are both sired by Courtier 4th, a Marsh Violet bull by Courtier 2d and out of Rosedale Violet by Imp. Thistletop. The two-year-olds are by Courtier's First, a son of the Norton-bred bull, Courtier 2d. They are well along in calf to the Scotch bull, Courtier 4th, and are strongly topped with the best of Scotch blood. There are other high-class consignments to the auction and it is Manager McGavock's boast that there is not a cull in the offering. There are six young Scotch bulls cataloged from which can be selected several superb herd headers, and the occasion is one that should attract Short-horn breeders and farmers to Sioux City at this time.

### High-class Herefords at Auction at Sioux City.

The largest consignor to the Hereford auction at Sioux City, Iowa, on Thursday, March 7th, is Mr. G. W. Harness, of Galveston, Ind., a man who has bred some of the best cattle of the breed. He is sending seven bulls and eight cows and heifers. They are sons and daughters of Perfect Dale, a son of the champion and sire of champion, Dale; Beau Donald's Pride, a grandson of the great Beau Donald; Benefactor by Sir Bredwell, the \$5,000 son of the celebrated Corrector; Wallace, a bull that combines the blood of the famous bulls, Kansas Lad and Beau Real; Tubalcane, a son of Benjamin Wilton, and we mention lastly the bull, Corker, which is represented in this offering by a half dozen of his get. He was rightly named, being a corking good bull and a corking good sire and unites the blood of The Grove 3d, Anxiety and other celebrities. Mr. Harness is sending out good specimens of the breed with the best of blood lines and we trust they will merit the appreciation that they de-

## W. H. McLAUGHLIN'S SHORT-HORN SALE

Scotch and Scotch Topped

Shelby, Iowa, March 18, 1907

40 HEAD

28 COWS AND HEIFERS, :: :: 12 YOUNG BULLS

There will be 8 Scotch cows in this sale and one good young Scotch bull, of the Duchess of Gloster, Nerissa, Jasmine and Lavina tribes.

Baron Kear 3d, 158073

Dark red, calved February 15, 1900.

Banner Pro. 124047.....Cookson Bros.  
Mysie 52 ..... Imp. Prince President 77023.....A. Cruickshank  
Mysie 47th ..... Imp. Goldstick 86748.....A. Cruickshank  
Mysie 45th ..... Imp. Earl of Aberdeen 45992.....A. Cruickshank  
Mysie 43d ..... Crown Prince of Athelstane 2d 16585 David Christie  
Imp. Mysie 36..... Scotland's Pride 25100.....A. Cruickshank

This splendid Cruickshank bull is the sire of most of the young stuff in the sale and is also bred to most of the older cows.

I am selling one of the best drafts of cattle that has ever gone under the hammer in Shelby county. I am putting in some of my best Scotch cows and I also sell twelve good young bulls. One of these is a pure Scotch sired by Baron Kear 3d and he is a herd header. The other bulls will have four and five Scotch tops on them and are a splendid lot. The Baron Kear 3d heifers are bred to the Scotch bull Nonpareil Courtier 3d 238981. There will not be a cow in this sale that is not strictly all right in every way. No shy breeders nor barren cows will be sold. That kind I sell on market. Write for catalog. Address.

Col. BELLOWS, Auctioneer.

## W. H. McLaughlin, Shelby, Ia.

Shelby, Iowa, is forty miles east of Omaha on the C., R. I. & P. Ry. Parties coming to sale can stop at Tennant, Iowa, on C. G. W. Ry. My farm is 1½ miles from Tennant.

serve. There are forty head cataloged for the auction and the animals are about equally divided as to sex. A full list of the consignors will be found in the advertisement, and when good, well-bred steers are commanding the prices that they are, pure-bred bulls should not lack for bidders. The females that produced these bulls should always be in demand and there was never and there probably never will be a better time to invest in them than now. Whether you are wanting bulls or females, you will do well to attend this auction.

### Wheatley & Ward Sell Fourteen Angus in Omaha Sale.

Messrs. Wheatley & Ward, of King City, Mo., have consigned fourteen head of Angus cattle to the Omaha sale to be held at South Omaha, Neb., March 12th and 13th. Ten of the number are bulls and five of the ten are Queen Mothers. The others are of good reliable families. Six are sons of their Pride bull, Maplehurst Proteros, a bull of great scale and plenty of quality. Messrs. Wheatley & Ward have selected these bulls

from a string of twenty head and they are only selling such bulls as will do the purchasers good. Two of the number were shown at St. Joseph Interstate Show last fall and in practically their every-day clothes stood right up next the money. Those who are looking for bulls for immediate service should look to this consignment. They are bred right and are good ages. Only four females are consigned by Messrs. Wheatley & Ward. These are all young cows and are safe in calf to Gardner's Pearl Rosegay, a half-brother to the champion Vala's Rosegay. Two are Queen Mothers, one a Morlich Isabella and one a Lydia. The number of Queen Mother cows in the Wheatley & Ward herd makes it possible for these gentlemen to sell such a number from this reliable family. See this page for advertisement of the Omaha Angus sale and write Mr. Hal T. Hooker, of Maryville, Mo., for catalog.

A few choice Suffolk fillies are offered for sale by Messrs. Peter Hopley & Son, of Lewis, Iowa. They also have a grand lot of Percheron, Shire and German coach stallions for sale. It will pay anyone wanting stallions or mares to go and see them.

# C. R. STEELE'S Great Two-Day Short-horn Sale

112

40 HEAD STRAIGHT SCOTCH CATTLE---90 COWS AND HEIFERS AND 25 BULLS

IRETON, IA., TUESDAY &amp; WEDNESDAY, MARCH 12-13, 1907

112

Never before has such an offering of Scotch and Scotch-topped cattle been offered in the Northwest. The Scotch families in the sale are Victoria, Duchess of Gloster, Orange Blossom, Mysie, Dorothy, Lavender, Nonpareil, Airy Buckingham, Miss Ramsden, Matchless, Louisa, Butterfly, Mary Ann of Lancaster, and other families. There will be three imported cows in the sale, two with calf at foot, by Ceremonious Archer, the other by Lord Banff 3d. There will be eight Scotch bulls in the sale. There will also be a lot of Scotch-topped cattle in the sale. In fact I am offering cattle for both the farmer and the breeder. They will be bred to Lord Banff 3d, Ceremonious Archer and Imp. Sittyton Fame. Write me at once for catalog. Address.

COLS. BELLOWS AND JONES, AUCTIONEERS.

C. R. STEELE, IRETON, IOWA.

Kindly Mention Iowa Homestead When Writing.

## Lone Retreat's Jacks, Jennets and Stallions Sell March 15th.

The sale of the Lone Retreat jacks, jennets and stallions owned by the late J. C. Ray, of Lawson, Mo., should be well patronized by the men who want high-class stock. Twenty jacks, six jennets, four colts and the stallions owned by Mr. Ray go and at your own price. Among the jacks is the great Bryan 280, one of the greatest jennet jacks in America. For bone and scale he has few, if any, superiors. He stands sixteen hands high and is absolutely sure as a foal getter. Among the other high-class jacks is Kentucky Chief, a five-year-old that stands sixteen and one-quarter hands, Sloan, a seven-year-old and a big, strong-constituted fellow; Monster, a great-boned jack, and Mullins, sire of the fifth and sixth prize mules at the St. Louis World's Fair. Here is one of the greatest mule getters in Missouri. Four coming three-year-olds show great bone and much substance. Among the stallions is the great saddle stallion, Jarvis, a five-year-old, jet black, weighing 1,100 pounds. Jarvis is a horse of great style and is a well-proportioned fellow. Spion Kop 32864 is a Wilkes-bred trotter, a beautiful brown, weighing better than 1,250 pounds. Two Percheron studs are to be sold. One, Turc 44093, is a black, coming two years old and weighs over 1,400 pounds. He has great bone, is well quartered and a desirable stallion. The other, Ben Hur, is a bay yearling that weighs over 1,100 pounds. Nothing but first-class stock was kept at Lone Retreat and buyers will find this an excellent opportunity to get high-class stock. See page 34 for advertisement and write today for catalog. Address C. F. Chamberlain, manager.

## A. C. Berry Sells Another Mutineer Bull.

Mr. A. C. Berry, of Unionville, Mo., breeder of Short-horn cattle, reports the sale of a yearling son of Imp. Mutineer to Mr. A. W. Kincade, of Moravia, Iowa, at a price well up in three figures. Mr. Kincade writes Mr. Berry that the bull pleases him better every day and is admired by all who see him. It is the same old story—good breeding will tell. Imp. Mutineer is a half-brother to White Hall Marshall, the 1906 champion of America, that recently sold for \$10,000. He is out of Missle 167th, the dam of White Hall Marshall, and was got by Bapton Chief, he by the same sire and his dam by the same sire as Bapton Diamond, Mr. Dan Hanna's great breeding bull. Mr. Berry has on hand a number of these Mutineer bulls that should go to head good herds. Among them is a Victoria, a beautiful all red fellow that is growing into a great bull. A number of daughters of Mutineer will also be priced worth the money. Here is an opportunity to get something extra in females. See page 36 for Mr. Berry's advertising and when writing him kindly mention this paper.

103 Doddies at South Omaha, Neb.

On Tuesday and Wednesday, March 12th and 13th, at South Omaha, Neb., there will be held under the management of Mr. Hal T. Hooker, of Maryville, Mo., one of the best sales of Aberdeen Angus cattle to be held this season. Thirty-eight bulls and sixty-five cows and heifers are listed for this sale. They are choice selections consigned by the following breeders: Messrs. Parrish & Miller, Hudson, Kan.; Oliver Hammers, Malvern, Iowa; Wheatley & Ward, King City, Mo.; C. D. Hooker & Son, Maryville, Mo.; Davis Bros., Maryville, Mo.; N. M. Pettit, Overton, Neb.; R. L. Milton, Stafford, Kan.; J. B. Robinson & Co., Maryville, Mo., and J. H. Mayne, Council Bluffs, Iowa. The leading families are represented and each contributor is offering such cattle as will do the purchasers good. There are herd bulls of great merit in the offering; some have been winners and sires of winners. Then there is a long string of breeding bulls of much merit. It will be an opportunity seldom found for both the breeder and the ranchman. In the female part of the offering there is listed enough material for foundation herds to satisfy several who may be contemplating such a move. It is not every day that a string of cows bred to as many great herd bulls are found in a single sale. This will afford an opportunity to get stock

by some of the most noted sires in the West, as each contributor to this sale has included several cows that are well along in calf to their leading herd bulls. There are a number of females that should go to herds needing show material. Write Mr. Hal T. Hooker, of Maryville, Mo., for a catalog and arrange to attend. See other field notes for notes on the various consignments. The advertisement will be found on page 31.

## Real Dual-Purpose Short-horn Bulls at Hughesdale.

On page 36 in our Short-horn department will be found the advertisement of the Hughesdale dual-purpose Short-horns owned by Mr. H. J. Hughes, of Trenton, Mo. Mr. Hughes is an advocate of the milking Short-horn, yet he believes that even though a heavy milker, the Short-horn should have scale and quality. This he has demonstrated in his herd to a degree seldom seen, as there are a whole herd of cows quartered at Hughesdale that weigh 1,500 pounds or better and give great quantities of milk. They are true Short-horns and are the easy-feeding kind so much in demand. The breeding of these Hughesdale dual-purpose Short-horns is up to date, as we find in their pedigrees some of the best sires known to the breed, both Scotch and American-bred sorts. The great championship winner, Viscount of Anoka, heads the herd. Among the females are daughters of Grand Lavender, a pure Scotch bull got by the great Grand Victor; Baron Bishop, out of a daughter of Imp. Chief Baron; Spartan Chief, Alice's Prince, Choice Goods, etc. This is, of course, the home of the great Rowena 2d, yet there are other cows there that are her equal. Mr. Hughes is offering some desirable herd bull material, among which is a son of Rowena 2d, that has for his sire Grand Lavender. At thirteen months of age this calf weighed 1,200 pounds and is right every way. Everything at Hughesdale has stood the test for tuberculosis and buyers need have no fear of disease of this sort. Mr. Hughes invites you to visit the herd and inspect his stock. When writing him kindly mention The Homestead.

## Tuesday, March 5th, the Day the Limestone Valley Jacks and Jennets Sell.

On next Tuesday, March 5th, at the Limestone Valley Farm, near Smithton, Mo., and six miles east of Sedalia, Messrs. L. M. Monsees & Sons, of Smithton, Mo., will hold their thirtieth semi-annual sale of jacks and jennets. For weeks the advertising has been before the public and it is now up to the buyers of high-class jacks and jennets. Do you want them? If so, be on hand sale day, as there will be sold sixty head, the superior of which has never been offered at either public or private treaty. See page 36 for the last announcement.

## Wardell & Catty Buy Helen's Sister.

In our report of the sale of Durocs held by Messrs. Maupin & Applegate, of Shelby, Mo., we in error gave the address of Wardell & Catty, of Macon, Mo., as Macon, Ill. These gentlemen purchased the top sow of the sale, Helen's Sister, a litter mate to the great Helen Blazes, that produced the first Duroc gilt that ever sold for \$1,000 or over.

## Grand Jack and Mule Sale, Savannah, Mo., Next Week.

On March 7, 1907 the Quiet Glenn Farm will hold their third annual sale in the limits of Savannah. This establishment are so well and favorably known that we scarcely need say that the quality of the offering is first class throughout. Past sales have demonstrated that the kind of jacks and mules produced at Quiet Glenn Farm are good ones. This time there will be offered twenty-five jacks, twenty-two three-year-old mules and one draft and one harness stallion. Those who are interested in this kind of stock should by all means write for the sale catalog. By the way it is most elegant in get up and should be highly appreciated as it contains fifteen full-page illustrations taken from actual photographs of the numbers to be offered in the sale. The farm is six miles east of Rea, Mo., and if you

## GREAT DISPERSION

# Duroc Sale

TO BE HELD AT

..KEARNEY, NEB., MARCH 7, 1907..

30 AGED SOWS, 20 YEARLINGS  
AND GILTS.

ON this date I will offer at my farm near Kearney, Neb., my entire herd of Duroc Jersey sows, including Lund's B., the third prize sow at Nebraska State Fair. They are in good breeding condition, are from the most fashionable strains and bred to such boars as Red Knight Jr. by Red Knight. Others are bred to Red Chip by Lund's First. Everything must go. If you cannot attend send a bid to Ray Page of The Homestead.

A. C. Lund, Prop., Kearney, Neb.

RAY PAGE AND L. A. KUPPE, AUCTIONEERS.

## The Tops of Two Herds

Col. F. F. LUTHER, Auctioneer.

are unable to be at the sale you will be welcomed at the farm to look over the stables and leave bids if you desire. When writing for this catalog address Mr. G. M. Scott, Route 2, Rea, Mo. Sale commences at 10 o'clock a. m.

## ONE HUNDRED AND TWENTY HIGH CLASS

## Aberdeen Angus, Herefords, Short-horns

..... AT AUCTION AT SALE PAVILION, STOCK YARDS, SIOUX CITY, IOWA, MARCH 6, 7 AND 8, 1907 .....

Comprising the Greatest Auction of Breeding Cattle of the Beef Breeds to be held in the Northwest this Season.

Forty Aberdeen Angus are cataloged for Wednesday, March 6th, from the well-known herds of Anderson & Findlay, Lake Forest, Ill.; J. V. Arney, Leon, Iowa, and L. H. Lamar, Storm Lake, Iowa. The sixteen cows and heifers consigned by Anderson & Findlay are sired by the imported bulls, Elberfeld, Conqueror of Aberlour, Monitor of Glamis and Pacific, and are from dams of the Erica, Coquette, Lady Ida, Westertown Rose and Garline Beauty families. Other consignments include representatives of the Blackbird, Queen Mother, Pride and other noted strains. It is a choice offering, grandly bred and a full attendance of the friends of the breed is asked.

Forty Herefords will be auctioned on Thursday, March 7th. They are consigned by G. W. Harness, Galveston, Ind.; H. J. Stinger, Allen, Neb.; W. A. Bichel, Glenwood, Iowa; C. W. Morse, Sioux City, Iowa; Jesse Engle, Sheridan, Mo., and J. N. Neal, Jr., Lambertson, Minn. The fifteen entries consigned by Mr. Harness are strong in the blood of the famous champion and sire of champions, Dale, the grandsire of the only two bulls to sell for as much as \$1,000 at public auction within the last few months. All of the strains that have contributed to the greatness of the breed are represented and the best of individual merit is maintained throughout.

Forty superb Scotch and Scotch-topped Short-horns will be sold on Friday, March 8th. They are consigned by A. O. Stanley, Sheridan, Mo.; J. L. Smith & Son, Minier, Ill.; Louis Clouse, Galva, Iowa; G. P. Simpson, Blockton, Iowa, and J. N. Neal, Jr., Lambertson, Minn. The twelve bulls include the Scotch herd headers, Valley Godoy 275195, a Cruickshank Victoria; Scottish Banker 275194, a Marsh Violet; Lancaster Lad 262183, a Cruickshank youngster of great merit, and other good ones suitable for breeders or farmers' use. The females include the show heifer, Miss Signet 2d, a daughter of the Harding-bred Scotch Hero; and her dam and granddam and also a daughter of the latter cow. The quartet comprises the greatest family of show cattle that I have ever offered at auction and there are many other show and breeding females cataloged that will well repay the attendance of Short-horn breeders and farmers.

SEPARATE CATALOGS OF EACH BREED WILL BE MAILED ON APPLICATION TO

W. C. MCGAVOCK, SALE MGR., SPRINGFIELD, ILL.

Col. Geo. P. Bellows and Assistants, Aucts.

### Dissolution Sale of the Famous Morrison Herd of Duroc Jerseys.

On page 34 of this week's issue of The Homestead will be found the dissolution and removal sale advertisement of the famous herd of Messrs. Jno. M. Morrison & Sons, of College View, Neb., on March 15, 1907. This sale comes now as a great surprise, but the sons of Mr. Morrison desire to retire from the business and therefore the whole herd will be sold at public sale. It will be held at the farm and it promises to be one of the greatest Duroc Jersey sales that has ever been held in this country. This herd broke the world's record for 1906 when they averaged \$135.40, and again the same year on boar sale which averaged \$95.50. This year they again broke all records when they made an average of \$228. We simply call our readers' attention to these things at this time to show what the breeders have been thinking of the Morrison herd. Now everything goes, and this will include the one-half interest in the great Kan't Be Beat, one of the greatest sires living or dead, having to his credit fifty-seven first and sweepstakes prizes, and whose get have already won eighty-one first, champion, grand champion and sweepstakes prizes, while Kan't Be Beat's get have either topped, or sows bred to him have topped the following sale: Jno. M. Morrison & Sons, College View, Neb.; Arch Brown & Son, Waterloo, Neb.; Peek & Putnam, Tecumseh, Neb.; Grant Chapin, Green, Kan.; Kirkpatrick & Wilson, Lincoln, Neb.; Fagan, Browning & McCabe, Hersman, Ill.; and Watt & Foust, Xenia, Ohio. All of Messrs. Morrison's noted brood sows will be sold, including the Iowa and Nebraska sweepstakes sow, Alix II., considered one of the greatest sows of the breed. She is a daughter of the noted boar, Proud Advance, and was one of the highest priced sows sold in 1906. Her dam, Alix, was the highest priced gilt sold in 1904. This sow is one of the greatest of the breed and no man will go wrong who buys her. Among the other great sows that they will sell is Van's Lady, a Nebraska State Fair first-prize winner; Ida M., Miss Bob, Parnell B., Victor's Banner and in fact every brood sow they have in the herd. These were the greatest sows that could be secured at the time they were purchased, but they all go now. Seven of the best Ohio Chief gilts reserved by this firm will also be sold and they are all bred to the great Kan't Be Beat. It will be a sale that every breeder in the land will be interested in. The most complete catalog that has ever been issued will be printed for this occasion. No Duroc Jersey breeder should fail to get one of these. It will be sent free to readers of The Homestead provided they mention this paper. Mr. M. T. White, of The Homestead, will represent this paper at the sale and will look after any bids to him. If it is not possible for you to get there send a bid on what you want and it will be looked after.

C. D. Hooker & Son Sell Blackbird Benton at Omaha, March 12th or 13th.

Heading the list of Aberdeen Angus cattle consigned by Messrs. C. D. Hooker & Son, of Maryville, Mo., to the South Omaha sale, to be held on March 12th and 13th, is their great show and breeding bull, Blackbird Benton 69611. They are not parting with this bull for any fault, but because they have so many of his daughters, half sisters and older ancestors that they cannot use him longer without too much inbreeding. Blackbird Benton was calved September 3, 1903, and in 1905 he won second at the American Royal; in 1906 he won first at the interstate show at St. Joseph, Mo., and second at the Missouri State Fair. Messrs. Hooker & Son have never fitted him highly, or other and higher honors would undoubtedly have been won. As an individual Blackbird Benton is true to the Angus type, is low down, thick from end to end, an easy keeper and carries as even a coating of mellow flesh as is often found on any animal. The writer has been familiar with the get of Blackbird Benton for some time past and as a breeding bull he has few superiors. He gets good stock of either sex and all are true Angus and feeders from the start.

Messrs. Hooker & Son consign a son and a daughter to this sale to show how Benton breeds. They have not been selected and fitted for this purpose and breeders will see that in this animal one of the good bulls of the breed will go and at your price. He is a safe investment, no matter what the price, as such bulls are not often exposed at public treaty. He is one of the very surest breeders, a fine dispositioned bull and should go to some good herd. If any of our readers are looking for an absolutely high-class herd bull they should be on hand March 12th and 13th. Messrs. Hooker & Son sell two other bulls, one a son of Blackbird Benton, the other a son of their senior herd bull, Eraste. Eleven females are consigned by them and all are good, useful young cows and of good families. Write Mr. Hal T. Hooker, of Maryville, Mo., for catalog of this sale. The advertisement will be found on page 31 and you will favor us by mentioning The Homestead when writing.

### McLaughlin's Short-horn Sale.

On March 18th Mr. W. H. McLaughlin will make a public sale of Scotch and Scotch-topped cattle at his farm, four and one-half miles north of Shelby, Iowa, and one and one-quarter miles southwest of Tennant, Iowa. Mr. McLaughlin is one of the best breeders in Shelby county and a more reliable man never bred Short-horn cattle. He has one of the best herds in western Iowa and he has always been a good buyer of the best Scotch tribes. At the head of his herd stands the great Cruickshank bull, Baron Kear 3d 158073, and he is the sire of most of the young bulls and heifers in the sale, and he will also be bred to the cows that will be sold. This is one of the best Scotch bulls ever used in the state of Iowa. He formerly headed the herd of Messrs. C. W. Daws & Son, of Harlan, Iowa, and they paid \$1,000 for him. He is a richly-bred Mysie, his sire being the great Banner Pro 124047. Then in unbroken line comes Imp. Prince President, Imp. Goldstick, Imp. Earl Aberdeen, Crown Prince of Athelstane 2d, Scotland's Pride and Champion of England. He has always been a great breeder and he is the sire of a grand lot of young heifers and young bulls in this sale. Mr. McLaughlin will sell forty head on this occasion and it being his first annual sale he has therefore drawn upon some of the very best things he has in the herd. He will sell twenty-eight head of cows and heifers and twelve young bulls, ranging in age from ten to twenty-four months of age. Among the females will be seven or eight Scotch cows and there will also be a splendid young Scotch bull in the sale. The rest of the offering will have from three to six and seven Scotch tops on some of the best Bates foundations. The Baron Kear 3d heifers will all be bred to the young Scotch bull, Nonpareil Courtier 3d 238981, a son of Imp. Nonpareil Courtier, and the older cows to Baron Kear 3d. Mr. McLaughlin is selling a good Duchess of Gloster cow in the offering and she will have a calf at side by sale day to Baron Kear. Her sire is Nonpareil Champion and her dam is a daughter of the noted King James. Nerissa 18th of Maine Valley is another one of the good things. She is a daughter of Royal Prince of Maine Valley and her dam is a daughter of Imp. Confessor. Mr. McLaughlin also sells Violet's Flower, a daughter of Imp. Scottish Pride, and her daughter, Violet's Flower 3d by Baron Kear 3d, will also go in. The dam of Violet's Flower was sired by Imp. Guardsman, the sire of the noted St. Valentine. This cow has six imported Scotch bulls at the top of her pedigree, and every one is a good one. She is one of those Lavinias and this family has been among the best of the breed. There are many other excellent things in this sale and the catalog will give the breeding. He is selling a splendid bunch of young bulls. One of these is a Scotch bull and a son of Baron Kear 3d. He is a roan in color and an excellent young bull. This bull is good enough to head some of our best herds. The rest of the bulls are well Scotch topped and have been well developed. They are in nice condition and are ready for service. We urge all our readers who are interested in Short-horn cattle to write for catalog and then go to the sale. Kindly mention The Homestead when writing.

## Joint Breeders' Sale of Scotch and Scotch-Topped Short-horn Cattle

... to be held at ...

Wayne, Neb., Wednesday, March 13, 1907  
40 head, 20 Cows and Heifers, 20 Bulls

from the herds of A. B. Clark and W. M. Lessman.

This offering is the pick of our two herds. The cows are mostly of the milking strains and are good individuals. The bulls are a grand lot. Never has a better lot been sold in northern Nebraska. Included will be the great Cruickshank bull, SCOTCH FASHION 135959. He is a son of Imp. King James 120945 and out of a daughter of Imp. Northern Light. If anyone wants a herd bull, here is one that is strictly all right. FAME'S HERO is another good one. He is a son of Imp. Fame 222065 and out of a daughter of Imp. Nonpareil. The bull offering is particularly strong. The offering throughout is a most excellent one. Write at once for catalog. Address,

Col. Cunningham, Dennis and Walker, Auctioneers.

A. B. Clark, W. M. Lessman, Wayne, Neb.

EVERYTHING GOES . . . . CLOSING OUT SALE

## Angus and Polands

To be held at Farm near Paton, Iowa, March 7, 1907.

Seventy head Angus males and females representing leading families. Many valuable producing cows, some with calves at foot by King Ito by Prince Ito. SCHNEIDER BROS.,

GRAND JUNCTION, IOWA

F. F. LUTHER & SON, Auctioneers.

# Administratrix Sale Of "Lone Retreat" Stock Farm's

**Jacks and Jennets and Stallions--Friday, March 15th, at farm near Lawson, Mo.**  
**20 JACKS---YEARLINGS TO 9 YEARS OLD. PAST YEARLINGS ARE 14 1-4 TO 16 HANDS HIGH. 6 JENNETS FROM 3 TO 9 YEARS OLD, 4 COLTS**

Bryan 280, one of the greatest jennet jacks in America, is included. Among the stallions is the famous Jarvis 2578, a black beauty, Spion Kop 32864, a Wilkes-bred trotter. Ture 44093, a black Percheron, and Ben Hur, a bay yearling Percheron. This stock must be sold to settle the estate of the late J. C. Ray. Sale starts at 1 p. m. Lawson—On C. M. & St. P., and Santa Fe Rys., 42 miles northeast of Kansas City and 48 miles southeast of St. Joseph. Farm located in northeast corner of Clay county, 4½ miles east of Holt, on C. B. & Q., and C. R. I. & P. Rys. For catalogs, write

Harriman & Sparks, Auctioneers.

MRS. LENA M. RAY, ADMX., OR C. F. CHAMBERLAIN, MGR., LAWSON, MISSOURI.

## Closing Out Angus and Poland Sale—Paton, Iowa.

Seventy-eight well-bred Angus and a half hundred Polands should make an attractive sale offering. This is what Mr. C. H. Seibel, one of the prosperous breeder farmers of Green county is going to sell at his grand closing out sale to be held at the farm, four miles east of town, March 7th and 8th. The cattle will be sold the first day. Mr. Seibel is going to give his son a chance and takes this method of relieving the farm of some of its stock. One-third of the offering will be young bulls ranging in age from nine months to two years. They are well grown and promise some very excellent herd bull material. It will be a first-class place for the buyer of car load lots. About ten of them are out of Dimple cows and sired by Monarch 2d of Quietdale 47575. The rest represent quite a variety of breeding, including some Princess, Waterside Bessie and Queen Mother bulls. The female part of the offering is composed of cows and heifers. What the cows have produced may be seen on sale day and we will say for Mr. Seibel that no one will be disappointed, for in the ten years of experience as a breeder some very enviable results have been attained in this herd. From this herd the Iowa Agricultural College selected some of the show stuff that won ribbons at the recent international in Chicago. Suffice it to say that there will be some choice picking among the Queen Mother, Princess, Oak Leaf, Dimple and other matrons that will be a part of the sale. Everything is guaranteed to be as represented and there will be no postponement for weather, as such contingencies have been provided against by a large tent. The swine offering will be sold March 8th and it will include all the breeding herd. A good opportunity will be afforded those who attend the cattle sale to remain over for this feature of the sale. There will be some very well bred sows and gilts, as good blood has been generously added to the herd from time to time. Write for catalog and kindly mention The Homestead. For further particulars see page 33.

## Andrews Has Forty Good Ones At Private Sale.

Mr. E. H. Andrews, the noted Poland China breeder of Kearney, Neb., wishes to announce to the many readers of The Homestead that his public sale has been called off and he will offer forty head of richly-bred sows, all safe in pig, at private treaty. After a careful inspection of this herd we are safe in saying to our many readers that this is a grand opportunity to secure some choice individuals. Among them are several daughters of Chief Perfection 2d; others by the noted Top Chief and some by Ideal Tecumseh, a son of Big Chief Tecumseh 2d. In buying a boar to mate with this grand bunch of sows Mr. Andrews, after a careful search for the proper animal, secured the great boar, Immense, a winner at the Ohio State Fair. He is a son of Golden Rule, the hog that sired a portion of the prize winners at this great fair, and a litter of pigs from Immense is liable to be in great demand before another year rolls round. Write Mr. Andrews in regard to these sows and mention this paper.

## Choice Polands at Redfield, Iowa.

At the above place, March 13th, Mr. E. P. Whittington, proprietor of Bear Creek Poland China Farm, will offer a select bunch of boars and sows at public sale. Mr. Whittington has been planning for this sale for some time and expects to have all the stock at its best. It is a good collection all through and much of it has already proved a valuable kind. Large litters have not been uncommon in the least and careful culling has brought the herd to a high degree of uniformity. Much of the good stock owes its existence to the herd boar, Dietrich's Darkness 91453 by Perfect Perfection by Chief Perfection 2d 42559. He is a good representative of his breeding and has impressed the characteristics of the Perfection blood quite strongly on his progeny. The gilts are largely by him and are of the type that combines early maturing qualities with a nice amount of bone. The yearlings and two-year-olds are a strong number of the sale and we will refer to them in the next issue. For the convenience of buyers and visitors the sale will be held in the town of Redfield on the C. M. & St. P. R. R. Good train service is afforded and the sale will be held in a comfortable place. Send for catalog, as they will be sent only on application. Kindly refer to The Homestead when making inquiry.

## Redfield, Iowa, Has Joint Poland Sow Sale.

One of the pleasant gathering places for breeders of Poland Chinas will be at Redfield, Dallas county, Iowa, March 13th, where the tops of two herds, namely, that of Messrs. B. P. Whittington, of Earham, and J. C. Harris, of Pandora, will be offered at public auction to the breeding fraternity. Both gentlemen have taken this opportunity to make a showing of choice female stuff that will receive the highest indorsement from supporters of this breed of swine. The offering will consist of fifty head in all of mature

sows and gilts and only the very tops of each herd has been selected. The offering is strong in the blood of noted Perfection and Tecumseh sires. A goodly number of the gilts are sired by Dietrich's Darkness 91453, a grandson of Chief Perfection 2d. There are also a number of good yearlings by him, while the older sows are of good Perfection sires also. Others of the gilts and a very choice lot are a number sired by the sweepstakes boar, Young Tecumseh 3d 94101 by Chief Tec. 3d, dam Viola 2d 119142. This boar is one of the long, deep, wide-backed kind with lots of flesh, and a gilt by him should be coveted. The offering is bred to Longfellow Jr. 121403, sired by the noted Tec. Longfellow, and this kind of breeding will surely result in some valuable produce. There are other of the gilts bred to Osborn's Perf. 2d, bred by Mr. A. R. Fox. This hog has worlds of bone and stretch. Right here will be an exceptional chance to get some good Polands, both young and mature. Write for catalog to Mr. B. P. Whittington, Earham, Iowa, at the same time kindly mentioning The Homestead. Mr. Whittington wishes us to call attention to the sale of Mr. Geo. Vader, of Churdan, Iowa, on March 12th, the Short-horn sale at Jefferson, March 14th, and the Jackson-Patrick Poland sale at Jefferson, March 15th.

## Schneider Bros.' Short-horn and Poland Sale—Last Call.

On Wednesday, March 6th, at the farm of Mr. W. A. Schneider, three miles northeast of Grand Junction, Iowa, will be held a sale of Short-horns and Poland Chinas that deserves more than local support. Messrs. Schneider Bros. have held five annual sales and they have been successful ones in every sense of the word. As breeders they have not been satisfied to have anything but the best that could be afforded. Generous purchases from the Flynn Farm near Des Moines have given them some high-grade foundation stock. By the purchase of Winsome Duke 238237, the highest priced bull of his age in the Flynn Short-horn sale of 1905, a notable addition was made to the herd. The female part of the offering is largely bred to this grand Bates bull and anyone getting a cow in calf to Winsome Duke will have something of more than ordinary merit. There will be heifers, as well as cows, and of the good kind that the farmer as well as the breeder can depend upon to make money. The bull offering has been inspected by a representative of this paper and it is without a doubt one of high-grade merit and worthy of the attention of the best breeders. They range in age from eight to eighteen months and include Boni de Castelan, red in color, a very sappy handler and coming two years in October. His sire is Koran 194797 and dam is White Rose of Wildwood 16th of the noted White Rose family. Another good one is Scotchman 2d, a yearling in May, by Imp. Scotchman 207626, out of a Scotch dam. Yet another is Baron of Walnut Hill, calved September, 1905, got by Walnut Hill Baron 221799 out of the Rose of Sharon family. He promises to be nothing less than a herd header of high merit. One of the choice females is Bertha of Willow Grove, a regular breeder and well along in calf to service of Winsome Duke. The cow was got by Gaveston 2d 128049 and she is worth going to see, for though a six-year-old, she promises many years of usefulness. Now this is a good sample of the offering. You will not be disappointed in what is offered, for it is as good as represented. The swine offering is a worthy one of mature sows and gilts of the Perfection and Nemo L. Dude breeding. They are a business lot from end to end and are bred to two good boars. One is Schneider's Sunshine 117523 by Iowa Sunshine. The other is a good Perfection boar. Write for the catalog and look up this offering in detail. It is worthy of your attention. Kindly mention The Homestead when writing.

## The Percheron Stallions at Carroll, Neb.

Carroll, Neb., is in Wayne county, which is about sixty miles west of Sioux City. At the former place is located the breeding establishment of Messrs. Billeter, Burress & Billeter. On March 14th these gentlemen have chosen to sell a very choice bunch of registered Percheron stallions and five Polled Durham bulls. The horse offering will undoubtedly attract a great many buyers, as from past experience buyers have learned that this firm keep the type of horse that is in demand by individual breeders, as well as by farm companies. The kind of horse that will produce draft colts that will sell around the \$300 mark is the kind that has plenty of size and substance. In color the offering is black or dark gray and by reference to the advertisement it will be seen that there is nothing under standard weight in the bunch. Those looking for some young Polled Durham bulls should post themselves on the breeding of the five that are offered as a part of the sale. They are registered and are the kind to do a herd some good. Write for catalog of the offering. See this page for further details.

If any of our readers want registered French draft mares or fillies they should write to Mr. F. J. Svoboda, of Snyder, Neb., who has a few good ones for sale.

## Dissolution of Partnership and Removal Sale.

March 15, 1907 at College View, Neb.

This offering of Duroc Jerseys is without a parallel in one auction for these ten reasons:

First, this breeding stock broke the world's record sow sale of 1906, averaging \$135.40.

Second, these sows again broke the world's record in fall or boar sale, averaging \$95.50.

Third, this herd again broke the world's record of 1907, averaging \$228.

Fourth, this herd produced the highest-priced pig of age from Alix II., October 16, 1906, sale.

Fifth, Alix II., acknowledged out-classer of the show yard, having the distinction of being the only sow taking first and sweepstakes at both Iowa and Nebraska in one year.

Sixth, Miss Bob, acknowledged one of the greatest brood sows of the breed.

Seventh, the greatest string of sensational prize-winning and producing brood sows and out-standing gilts in one herd.

Eighth, the greatest sire, living or dead, having fifty-seven firsts and sweepstakes prizes, and whose get have already won eighty-one firsts, champion, grand champion and sweepstakes prizes, while Kan't Be Beat's get have either topped, or sows bred to him topped the following 1907 sales: John M. Morrison & Sons, College View, Neb.; Arch Brown & Son, Waterloo, Neb.; Peek & Putnam, Tecumseh, Neb.; Grant Chapin, Green, Kan.; Kirkpatrick & Wilson, Lincoln, Neb.; Fagan, Browning & McCabe, Hersman, Ill.; Watt & Foust, Cedarvale and Xenia, Ohio; all these sales together averaging through Kan't Be Beat's value as a sire, \$113.14, while the average of the top sows directly effected was \$565.

Ninth, the only Proud Advance, Orion and Ohio Chief sows bred to Kan't Be Beat this year are from this herd.

Tenth, this one sale includes tops of more other sales than any one offering, as one-half interest in the great Kan't Be Beat and the following sows to be sold absolutely for what they will bring: Alix II., Miss Bob, Van's Lady, Ida M., Parnell B., Victor's Banner, Foust's Pride, seven Ohio Chief gilts and other topy gilts reserved for this farm, bred to Kan't Be Beat, Morrison's Bell Top and Ohio Chief Banner.

Free entertainment at Royal Hotel, Lincoln, Neb., one of the best hotels in the West. Send for catalog.

## John M. Morrison & Sons, College View, Neb.

Col. T. C. Callahan, Auct.

College View, Neb.

M. T. White, Homestead representative, will attend this sale and will care for all bids sent to him.

## FIRST ANNUAL SALE Percheron Stallions

Carroll, Wayne Co., Neb.

March 14, 1907

## 12 HEAD PERCHERON STALLIONS

Consisting of six imported, from four to six years old, 1,800 to 2,100 pounds; six American bred, consisting of three yearlings, two two-year-olds and one five-year-old, 1,400 to 1,800 pounds. Extra heavy bone and good action will be found in every number offered. They are all blacks and dark grays. Every horse goes without reserve. Everything guaranteed. Farmers, form a company and buy one of these good kind, that produce \$200 to \$350 drafters.

Also 5 choice Registered Polled Durham Bulls from 10 to 17 months old. Send for catalog.

## Billeter, Burress & Billeter

Geo. Bellows and E. Cunningham, Aucts.

## PINE RIDGE STOCK FARM

Has the biggest and best barn in the United States and it contains the BIGGEST and BEST lot of Percheron and French Draft Horses.

The last chance to obtain a colt by SAMSON 2723, as his last colts are now yearlings. Over 150 head of horses showing more home, size and quality than any similar number in America. TAVERNIER P. 35719 and F. D. 12610 now at head of the stud. Prices below competition. Barn at Moose Jaw, Sask., Can., in charge of E. F. Maxey.

L. M. HARTLEY, SALEM, IOWA.

## PETER HOPLEY & SON

LEWIS, IOWA

Percherons, Shires, Suffolks, Belgians and German Coachers.

The best of these great breeds always to be found and our prices are the lowest. If you are in need of a Stallion of the above breeds or contemplate buying, write us. BARN AT FARM.

A FEW CHOICE SUFFOLK FILLIES FOR SALE.

**FOR SALE:** Imp. Shire Stallion Test Right Stamp 5704, ten years old, 2,250 lbs., in show shape. A prize winner in England, 1st at Illinois State Fair, and 2d at the International, 1900. "Peaches and Cream." Come or write. Address: T. A. Stevenson, Shannon City, Iowa.

### CLYDESDALE STALLION FOR SALE

I have a choice pure bred three year old stallion, 1 sired by the great MacGregor horse Imp. McLure, and out of the Cedric horse, Prince Darnley, for sale at reasonable price. Come and see him. Laban Harrison, Prescott, Iowa.

## HORSES.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs was the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 150 Percherons, Belgians and Coachers 150.

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

IKKEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "huts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or Interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. REFERENCES: St. Paul State Bank and Citizen's National Bank.

## ST. PAUL, - NEBRASKA

## TAYLOR & JONES,

IMPORTERS AND BREEDERS OF PERCHERON, SHIRE, HACKNEY AND BELGIAN STALLIONS.

We are selling our Stallions direct from our barns and are selling better horses at from \$700 to \$1,400 than any firm in America. We have a few sensational show horses that will come a little higher. Special prices to dealers wishing to buy from 3 to 15 stallions.

We have won more prizes at the Illinois State Fair, "the greatest fair on earth," for the last three years on draft horses than any firm, and we have always been at the top at the Chicago International.

We are located on main line of the Chicago & Alton R'y., 12 miles north of Springfield, Illinois, also on new Interurban railroad that is now running cars every hour between Lincoln and Springfield, connecting with lines from St. Louis, Edwardsville, Carlinville and Decatur. Handsome illustrated catalog free. Address,

WILLIAMSVILLE, BOX 68, ILLINOIS.

## PERCHERONS AND PERCHERONS ONLY.

L. H. Humbert & Son, Corning, Ia.

ARRIVED home with their twenty-seventh annual Importation of Percheron stallions this year. 80 HEAD STALLIONS and MARES now on hand. We can sell you a good horse for less money because we are natives of France and buy our own horses without the aid of an interpreter. Write or come and see our horses. Be sure to see OUR Percherons before buying. Telephone service. L. H. Humbert & Son, Corning, Ia.

M. L. AYERS - SHENANDOAH, IOWA.

Importer and Breeder of

## PERCHERON HORSES

100 Stallions and Mares, Big ton stallions and a fine selection of young two and three year-old home bred stallions, home bred and imported. The imported Brilliant bred stallion Blande (36577) at head of stud. Thirty years draft horse breeding. Red Oak Branch C. B. & Q. R. R.

## PETERSON'S BLACK PERCHERONS.

FOR \$700 to \$1,000 you can buy of me the best Percheron Stallion that can be bought anywhere. Proven breeders can show colts. Come and see the horses and you will never go away without buying. Good colors, extra bone, and not an unsound horse in the lot.

H. E. PETERSON,

LYONS, NEBRASKA

HORSES.

# Watson, Woods Bros. & Kelly Co. Lincoln, Neb.

One of the oldest importing firms in America have in their stables, at Lincoln, Nebraska, 60 head of the best Percheron, English shire, Belgian and Hackney stallions. Mr. Watson is in Europe constantly buying. 50 head more will arrive soon. This firm are careful in their selections, buying only the best stallions and selling them at a very small profit. We give our customers the lowest possible price, the very best of stallions and a guarantee that you know is absolutely good and backed up by a reliable firm. Write for pictures.

**Lincoln, Neb.**

## THE LAFAYETTE STOCK FARM

**J. CROUCH & SONS, Props.**  
Lafayette, Ind.

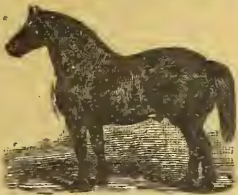

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

**J. CROUCH & SON.**

Departments:

Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.

## MILLER'S IMP. PERCHERONS AND FRENCH COACHERS.

Among the Percherons are coming three and four-year-olds that weigh 1,900 pounds. They have the quality and bone; all dark colors. I am selling these stallions at the barn door at from \$700 to \$1,200. Nothing better brought over this year. I also have some first-class Mammoth jacks. Come to my barns and let me show you, or write me describing what you want. If I cannot fill the description I will say so.  
Also fine litter of smooth-coated fox terrier puppies \$3 to \$7.50 each.

**S. J. MILLER,**

**KIRKSVILLE, MO.**

Champion American-Bred Percheron Stallion at the American Royal.	Champion Shire Stallion at the Chicago International.
First Best Five Percheron Stallions at the Kansas state fair.	Best Imported Shire Stallion at the Chicago International.
First Best Five Belgian Stallions at the Kansas state fair.	Best Five Shire Stallions at the Chicago International.
First Best Five Shire Stallions at the Illinois state fair.	Reserve Champion Belgian Stallion at the Chicago International.

Our aim is to give our customers the entire benefit of the profits which have been going to the salesmen and to the helper who is assisting in placing the stallion in your neighborhood, who usually is one of your own neighbors (the most influential man of the neighborhood), whose influence is obtained by a large commission paid to him by the seller placing the stallion. The long-time notes, from three to five years, have to be discounted heavily or carried by the seller, making the cost of the stallion from TWENTY-FIVE HUNDRED to FOUR THOUSAND DOLLARS. The quality of our stud, mind you, is the same standard as heretofore, the best that money can buy, selected by the senior member of our firm, who is conceded by all to be the most competent man in the business. WE KNOW WE CAN SAVE YOU AT LEAST 50 PER CENT. IF YOU HAVE TO HAVE A COMPANY TO HAVE A HORSE IN YOUR NEIGHBORHOOD, FORM YOUR OWN COMPANY and come to the barns. BE CONVINCED THAT YOU CAN SAVE from \$1,000 to \$1,500 which has to be paid to this influential neighbor or neighbors to sell you a horse.

Good American-bred stallions, \$800 to \$1,000. First-class imported stallions, \$1,200 to \$1,600. Choicest stallions a little higher.

We ask all intending purchasers to visit our stables, where we have over 300 head of stallions to select from—SHIRES, PERCHERONS, BELGIANS and HACKNEY STALLIONS. Come to Wenona and deal with Bob Burgess, who has been in the business over thirty-two years—longer than any one man in the stallion trade—and we guarantee to make every deal satisfactory to you. Get your guaranty and insurance direct from headquarters. Visit our barns and see the class of horses we are selling for the money. The reason that we ask the above of you is that Bob Burgess is the oldest importer in the business, the largest importer, and has the quality of stock that will suit the people, is perfectly good for the guaranties and will sell to you more good horse quality for less money than any one. Come to the barns and get the most reasonable terms that can be offered.

Send for illustrated catalog and calendar.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconceived effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftstrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produce. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

**OLTMANN'S BROS.,** **Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.**

## Rhea Bros., Arlington, Neb.

**Breeders of Percheron Stallions.** We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pumped with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## H. LEFEBURE'S BELGIANS.

Best and largest collection of Belgians in America, imported and home bred; 8 mi. west of Cedar Rapids on 2 railroads. The greatest Belgian horse market in America. Cedar Rapids and Iowa City elec. car passes 3 mi. E. of farm every hour. Come and see or send for catalog.

PRESIDENT WM. MCKINLEY SAID:  
"I am familiar with Ridpath's History of the world, and cordially commend it to the scholar as well as to the plain people generally."  
PROF. W. F. WARREN, Pres. Boston University, said:  
"I should be glad to see it placed in the library of every young person in the United States, and even in the English-speaking world. In families where there are bright children it will render excellent service."

## THE Publishers Failure IS Your Opportunity

PRESIDENT BENJ. HARRISON SAID:  
"Dr. Ridpath's labors are deserving of the highest praise. I most heartily recommend his History of the World for study and convenient reference."  
Prof. E. H. LONG, Supt. Public Schools, St. Louis:  
"I unhesitatingly commend Dr. Ridpath's 'History of the World' as the ablest work on that subject which I have ever examined."

Iowa Homestead Readers are Offered the Opportunity of a Lifetime  
To place in your homes The World Famed Publication

# Ridpath's History of the World

Brand new, latest edition brought right down to date, including Peace Treaty of the Russia-Japan War, beautifully bound in Half-Morocco. We are selling them while they last, first come first served,

**At LESS than even DAMAGED SETS were ever sold**

The Homestead in reviewing this great work said: "Ridpath's History of the World may be regarded as a complete library in itself. In those nine volumes may be found the equivalent of thousands of ordinary books. Right in this statement lies the value of such a set of books. The average individual desires to have his library as well stocked as possible. To select from the maze of books of numberless subjects now on sale, those which will be the most useful and cover the most ground is a task not for an ordinary person. Dr. John Clark Ridpath is generally admitted as America's greatest historian. We cheerfully recommend this famous History of the World to our readers. It is a work that should be in every home."

Here is your opportunity to secure Ridpath's History of the World at the lowest price ever offered—and on easy terms. It will cost you nothing to inspect the beautiful specimen pages and let us give you full particulars of our offer.

Dr. Ridpath is dead, his work is done, but his family derive an income from his History, and to print our price broadcast for the sake of more quickly selling these few sets would cause great injury to future sales. We will name our price only in direct letters to those sending the coupon below. Tear off the coupon, write name and address plainly, and mail now before you forget it.

9 massive royal octavo volumes, encyclopedia size, 11 in. tall; 8 in. wide; 2 in. thick; weighs 55 lbs.; 4,000 double-column pages; 2,000 superb illustrations.

**RIDPATH'S** enviable position as an historian is due to his wonderfully beautiful style, a style no other historian has ever equaled. He pictures the great historical events as though they were happening before your eyes; he carries you with him to see the battles of old; to meet kings and queens and warriors; to sit in the Roman Senate; to march against *Saladin* and his dark-skinned followers; to sail the southern seas with *Drake*; to circumnavigate the globe with *Magellan*; to watch that thin line of Greek spearmen work havoc with the Persian hordes on the field of Marathon; to know *Napoleon* as you know *Roosevelt*.

**RIDPATH** in your home means you need never spend a lonely evening. You can associate with the world's heroes; you can cross the Rubicon with *Cesar*, after which Rome was free no more. You can sit at the feet of *Socrates*, the loftiest genius of the ancient world. You can kneel at the shrine of *Lincoln*, "the greatest character of all time; the gentlest memory of our world." It is ennobling to commune with these children of destiny. To be associated with great men and events is to be great one's self, and you will add to your store of knowledge, which is power, and to the richness of your life. You owe it to yourself and family to place this working home.

Send Coupon To-day.

**RIDPATH** takes you back to the dawn of history, long before the pyramids of Egypt were built; down through the romantic, troubled times of Chaldaea's grandeur and Assyria's magnificence; of Babylon's wealth and luxury; of Grecian and Roman splendour; of Mohammedan culture and refinement; of French elegance and British power; of American patriotism and religious freedom, to the dawn of yesterday. He covers every race, every nation, every time, and holds you spellbound by his wonderful eloquence. Nothing more interesting, absorbing and inspiring was ever written by man.

**RIDPATH** throws the mantle of personality over the old heroes of history. *Alexander* is there; patriot, warrior, statesman, diplomat, crowning the glory of Grecian history. *Xerxes* from his mountain platform sees *Themistocles* with three hundred and fifty Greek ships smash his Persian fleet of over a thousand sail, and help to mould the language in which this paragraph is written. Rome perches *Nero* upon the greatest throne on earth, and so sets up a poor madman's name to stand for countless centuries as the synonym of savage cruelty; *Napoleon* fights *Waterloo* again under your very eyes, and reels before the iron fact that at last the end of his gilded dream has come. *Bismarck* is there, gruff, overbearing, a giant pugilist in the diplomatic ring, laughing with grim disdain at France, which says, "You shall not." *Washington* is there, "four-square to all the winds," grave, thoughtful, proof against the wiles of British strategy and the poisoned darts of false friends; clear-seeing over the heads of his fellow-countrymen, and on into another century, the most colossal world-figure of his time.

### ASSESSMENT OF PEDIGREE FOR TAXATION.

The present season is, in many of the states, the time established for assessing real and personal property for taxation. How to secure a just and equitable assessment, fairly distributing the burdens of taxation among the people, is one of the most difficult practical and theoretical questions statesmen have to deal with. It is conceded that much personal property is overlooked by the assessors everywhere, especially in cities and towns; and unfortunately for honest taxpayers and those whose property cannot be concealed, the burden thus avoided falls upon those who are already paying their full share of the taxes. The farmer's property, consisting largely of lands, buildings and other visible improvements, machinery and live stock, cannot be hidden from the assessor, and the result is that its relative burden of taxation is often far greater than it should be.

Aside, however, from the possibility of concealing the farmer's property from the tax-gatherer, there are numerous questions arising from the valuations put upon property for taxation which call for most careful attention from both assessors and those whose property is listed by them. Not the least of these is the question of assessing live stock, and the relative values to be put upon pure-bred stock and grades. The laws of different states on the subject of assessments are extremely varied, some calling for the full cash value and others for a certain percentage of the cash value. But various as are the laws, the practice in different communities is still more so, causing great inequalities as between individual taxpayers. In some places, pedigreed stock is assessed on the basis of the market value for slaughtering purposes; in others, a small percentage is added or a small fixed amount per head, thus recognizing to a certain extent the real or supposed value for purposes of breeding. A few assessors insist on valuations which include the full supposed value of the pedigree which in effect imposes a heavy relative burden on one breeder over others with whom he is in competition as well as a penalty upon enterprise and the disposition to do something for the elevation of the live stock industry to a higher plane.

There are many who take the position that it is absurd to tax pedigree, thereby placing a higher valuation on pure-bred stock than on grades, for the reason that when sale is forced to compel payment of taxes, debts, etc., the owner cannot be required to throw pedigree into the scale whereby prices are determined. We regard this argument as somewhat fallacious, although we have much sympathy with the object aimed at by those who use it.

The true ground of reasonable objection to taxing pedigree is that it is the imposition of a penalty upon progressive methods. The records show that in the most progressive western farm communities, less than 2 per cent, on the average, of all animals listed for taxation are subject to registry. Why should those who are putting money, time, energy, thought and, in many cases, personal sacrifice into the raising of the standard of the live stock industry, be made to feel that their enterprise is not appreciated in the communities in which they live? Could not any county well afford, by a liberal policy toward

its breeders of fine stock, to let the world know that it desires to encourage the breeders of the best? Such a policy would, in time, result in a great increase in the percentage of good stock in proportion to grades.

Assessors are fully justified by the prevailing practice in many localities in pursuing a liberal, not to say generous policy on this question. By fixing high valuations on pedigreed stock, they simply aggravate and accentuate the injustice which already exists in our system of taxation; for the policy which exempts the immensely valuable franchises of great corporations from taxation, but lists pure-bred horses, cattle, hogs and sheep at fancy prices is surely as short-sighted as it is inequitable.

### BLACK LEG—ITS CAUSE AND PREVENTION.

Nearly every stockman is more or less acquainted with black leg, either from hearsay or from experience with the disease in his herd. Every now and then there is an outbreak of this fatal, infectious malady in some herd, and, for the reason that it is necessary to take immediate and proper action to get the matter under control, we take this method of setting down a few points regarding the disease which should be known by every owner of cattle.

In accordance with general experience, veterinarians tell us that the disease generally breaks out in cattle that are under two years of age. It is apt to appear year after year among cattle on certain pastures and along certain valleys. The reason for this is that the disease is caused by a germ which is very resistant and is able to remain virulent from year to year. The bacillus

is generally found on lowland pastures, since it is in such places that carcasses of animals dying from this disease are deposited, and also for the reason that drainage waters carry these disease germs from barnyards and high lands to these lowland pastures.

Often the first indication of this fatal disease in the herd is the sudden death of some of the calves or yearlings. The young stock seem to be the most susceptible. The first indication of the trouble will be a swelling of the quarters of the animals, which is due to an accumulation of gas under the skin. If the trouble is taken to remove the skin from the limb of an animal dying of black leg, there will be found in the loose tissues covering the muscle dark and frothy blood of a foul odor. The animal contracts the disease by becoming infected with the disease germ through the skin or mucous membranes of the body.

The medical treatment for stock affected with the malady is not generally considered satisfactory, or, as a rule, worth while. It is a case in which an ounce of prevention is better than a pound of cure. The prevention is vaccination with some one of the black leg vaccines on the market. Directions usually accompany the vaccine, which is generally a brownish powder put up in pill form. Directions for the injection differ slightly with the different preparations.

It might be well to emphasize the necessity of doing a clean job when injecting the vaccine. The syringe should be sterilized in some good disinfecting solution, such as carbolic acid, and the area on the shoulder of the animal where the injection is to be made should also

be sponged over with the disinfecting solution. Accompanying the vaccination the cattle should be changed to high pasture, if possible, and if it is possible to improve the ration by making it more palatable or nourishing the same should be done.

### DESTROYING OAT SMUT.

Mr. J. E. Lyons, of Lafayette county, Mo., sends the following communication:

I wish you would give me an effective remedy for destroying smut on small grain, particularly oats. I understand that there is a simple and yet comparatively inexpensive plan by which smut can almost absolutely be killed out so that it will not make its appearance in the crop. If this is true I wish you would give us the formula, because farmers of Missouri could effect an immense saving if they could keep their grain from running to smut.

The simplest and one of the most effective methods for destroying oat smut is to treat the seed with formalin. This is a liquid compound, which, from the chemical standpoint, is 40 per cent formaldehyde. Druggists who do not keep it in stock should be able to obtain it from the wholesaler on short notice.

For treating seed, mix one pound of the formalin with forty or forty-five gallons of water. Where only a small quantity of oats are to be treated a fraction of a pound of formalin may be used and a corresponding proportion of the amount of water. We have found it convenient to buy the formalin in four-ounce bottles, the contents of which are mixed with ten gallons of water.

Place the seed on a close barn floor and make a trench along the center of the pile. Pour on your mixture of formalin and water and stir the grain with a scoop shovel, keeping this up until the pile is thoroughly wet. It will require nearly a gallon of water per bushel of grain. It may be necessary to turn the grain two or three times before it is all thoroughly saturated. When this point is reached, shovel the oats into a deep pile on the center of the floor and cover with horse blankets, gunny sacks or any other similar material. Leave in that condition for a period of two or three hours and then spread out thinly on the floor. It may be necessary to stir the grain a few times after it is first spread out in order to hasten drying and therefore lessen the danger of the grain swelling, which might lead to germ weakening. Of course in some instances the grain is sown just as soon as it is treated, but we do not advise this for the reason that there are few drills or few broadcast seeders that will handle moist grain satisfactorily.

We would like if something could be said that would induce all our readers to go to the trouble to treat their oats. The expense or cash outlay would scarcely amount to more than a cent or two per bushel, and even the labor coming as it does at a slack time of year is but a trifle. It is our opinion that concerted action on the part of farmers in treating their grain for smut for a few years would eventually kill out this pest altogether. Of course we cannot say absolutely whether this would hold true or not, but we do know instances where the practice has been in vogue for a number of years and as a result it is reported that treatment is not necessary more than about one year in three or four. In this case, of course, the seed is taken from the crop grown from treated seed.

### FACTS ABOUT THE ANGLE LAMP.

Our readers have noticed the advertisements of the Angle Lamp in these columns. To say that this lamp is as far ahead of the common lamp as the common lamp is ahead of the tallow candle is not putting it strongly enough. Three or four tallow candles will make as much light as a common lamp, but you could not place enough candles on an ordinary table to produce the beautiful lighting effect that comes from one Angle lamp. There is "quality" in light just the same as in fabrics. Ordinary kerosene is used in the Angle lamp, but combustion is perfect, which is by no means the case in the common lamp. This being true, there is no odor and no smoke. The lamp itself and the use of it for a week or two is its own best advertisement, and the Angle Manufacturing Company, 80 Murray St., New York, will send one on trial free to responsible people. Read the advertisement on page 20 of last week's issue and send to the above address for catalog 33. Please mention this paper when you write.

## THE PROBLEM OF GRADING SEED CORN.

It may seem a little early to take up this subject, after all it will be only a few weeks until some of us will be sorting over our corn to get it ready for planting. The grading of corn has been given more attention during the last five years and it has been talked about more than during the quarter century previous to that time. This is because men are more particular today about their stand of corn than they were when land was cheap.

The modern corn grower's motto is, "To get a stand." Seeing that it is impracticable to drop the required number of kernels in each hill by hand, machinery must be resorted to, and up to date no one has been smart enough to invent a planter that will put the same number of grains in each hill if the seed is irregular in size and shape. The manufacturer of no planter would claim that this could be done.

There are two steps necessary in the grading of seed corn. In the first place, matters can be hastened a little by discarding the tips and butts, either by cutting off the ends with the hatchet or taking the time to shell them by hand. When this is done the grain is shelled, either by machine or by hand, and put through a so-called corn grader. The graders now on the market are of various designs—each one the best, of course, according to the word of the manufacturer, but all, so far as we know, designed to effectually screen out all small, exceedingly large or irregular kernels. If a grader will not do this it certainly falls short of the requirements.

If one has, say, twenty bushels of good seed corn and only sixteen bushels are needed for seed, nothing better can be done than to spend the time with a good grader to take out four bushels of the seed and thus get rid of all grain that would give trouble when placed in the planter boxes.

If corn is graded in this way it is not too much to expect of a good planter that it will drop the required number of kernels anywhere from eighty-five to ninety-five times out of one hundred. In other words, if the aim is to drop three kernels per hill a good planter with graded seed should drop three kernels at least eighty-five times out of every hundred, and we have seen instances where three kernels were dropped the field over ninety-five times out of every hundred. If good seed is used and one will give his crop this kind of a start there should be no complaint later on about not having a stand.

### Alfalfa Experiences.

To the Editor of The Homestead:

I remember, when a boy, hearing a man telling my father that a man down on the Republican river—Southern Nebraska—had sown a new and wonderful plant named alfalfa, and that on an alfalfa pasture with the addition of one ear of corn per hog per day he was raising hogs as big as a cow. That to my childish mind was a pretty "tall story." But in the light of subsequent experience I am almost ready to believe any big story I hear about alfalfa.

Soon after the incident referred to we sowed alfalfa and now handle three to four crops from seventy-five acres and have three pastures where the hogs do their own harvesting.

We find that by running them on alfalfa pasture and adding about 2 per cent of corn ration, that is two pounds of corn to 100 pounds of hog per day, we get a thrifty, vigorous and healthy shoit, strong in bone and muscle and large of frame, ready in the fall to go on a full feed of corn and finish in six weeks weighing from 250 pounds to 300 pounds in nine months at a far less cost than with any other feed known to the farmer. I cannot see where a farmer can make or hope to make any money feeding hogs on a straight corn diet.

In a general but indefinite way these things have been known a good while, but it is only in the last few years that farmers generally have come to recognize the exceptional value and to know why it is so valuable. A neighbor who perhaps had never heard of the balanced ration found that by feeding his fattening steers alfalfa instead of prairie hay for roughness, that he could make better and cheaper gain, the cattle being more thrifty and looking almost as sleek as though fed oil meal. So many found by experience, without knowing

The great advantage which accrues to the breeder of pedigreed live stock from "keeping everlastingly at it" with his advertising—in other words, from taking regular space and keeping his herd before the purchasing public, is well illustrated by the success of Mr. J. L. Barber, of Harlan, Iowa, in finding a market for the high-class product of his well-known West River stock farm, situated one mile west of Kirkman, Iowa. Mr. Barber is a regular advertiser in The Homestead, generally using a space of fourteen lines, or one inch. In three weeks recently, as the result entirely of his Homestead advertising, he sold \$1,335 worth of Chester White hogs. The business was all done on mail orders and the buyers represented the states of Iowa, Illinois, South Dakota and Colorado. Mr. Barber has sold since last fall eighty-seven male hogs and seventy-five sows. "The Homestead is now the only paper I use," he writes, "and that is enough. I say, hurrah for The Homestead!" The Harlan papers say that Mr. Barber has received many orders he cannot fill.

Mr. J. T. Scarff, breeder of Improved Chester White swine, Salem, Iowa, writes under date of February 17: "I have sold every hog through The Homestead for good prices."

Another breeder of Chester White swine who reports fine results from his advertising in The Homestead is Mr. W. H. Swan, of Atlantic, Iowa, who wrote recently: "My advertisement in The Homestead has brought me excellent results. It has been a real winner. I have only three animals left and think they are sold. Am more than pleased with the results and with your courteous treatment of me. Please accept my hearty thanks for both." This letter brings out the two cardinal points of Homestead service, viz., generous results and courteous and accommodating treatment of the advertiser. With its circulation of 100,000, concentrated mainly in the very heart of the great, rich corn belt, The Homestead can hardly fail to bring numerous customers to any breeder who has good pure-bred stock to sell. To say that it really has no rival in its field is no exaggeration. The Homestead has many thousand more circulation in Iowa alone than any other agricultural weekly published in Des Moines has in all the states of the union combined.

The Duroc Jerseys and the Poland Chinas have a good account to give of Homestead results, as well as the Chester Whites. Says Mr. Roy E. West of Churdan, Iowa, breeder of Duroc Jersey swine: "The Homestead brought me numerous buyers and sold all my boars at private sale at a good average price." And Mr. A. C. Lanham, of Battle Creek, Iowa, owner of the Premier herd of Poland Chinas, writes of most satisfactory results from The Homestead and adds: "Please accept my thanks, my congratulations to you on putting out the greatest paper of its kind on earth, and my best wishes for your abundant success."

"The Homestead has been a great salesmaker for us," write Messrs. Chandler Bros., of Kellerton, Iowa, proprietors of the famous Clover Hill flock of Shrop-

shire sheep, "hence we are obliged to ask you to change our advertisement. We have sold all the bred ewes which we can spare." This strong firm, whose annual importations from England's most noted flocks have given them a high reputation as prize-winners, enabling them to offer their customers leaders for size, type, quality and breeding, are excellent judges of the merits of advertising mediums, and their statement as to the value of The Homestead to breeders and importers of pure-bred sheep will be accepted as conclusive by intelligent buyers of publicity. The success of Messrs. Chandler Bros. is another evidence that it pays live stock advertisers to keep their cards standing in The Homestead all the year round.

Among scores of commendatory letters we have recently received from breeders whose sales have been successfully advertised in The Homestead is one from Mr. E. F. Rogers, of Union, Iowa, breeder of Percheron horses and proprietor of Sunset Hill farm. Mr. Rogers encloses draft in payment for his advertising and adds: "The Homestead was the paper that brought the inquiries. Many thanks." We are receiving so many assurances of this character from so many quarters that we feel justified in saying that no other paper devoted to the interests of farmers or breeders or both of them can compare with The Homestead as a medium for selling fine stock. The Homestead reaches more farmers and stockmen, and of a better class, than any other paper circulating in the middle West; and its supremacy as a medium for live stock advertising is not questioned by those who are familiar with the situation.

Of the many splendid, friendly letters we have received from breeders of Short-horn cattle, we can find room this week for only brief extracts from two. Dr. J. E. Guernsey, of Keosauqua, Iowa, declares the sensible conviction that "results are what count in advertising;" and goes on to say that he has sold all his Short-horn heifers, although he has some fine Duroc Jersey sows left, and adds: "I can recommend The Homestead for results to all who want to reach good buyers of fine stock." Messrs. A. J. Graves & Sons, proprietors of College View herd of Short-horn cattle at Ames, Iowa, write under date of February 18th: "We have had excellent results from our advertisement in The Homestead and are well pleased."

Poultry advertising has always been productive of extremely satisfactory results when placed in The Homestead; and the publisher's desk is heaped with glowing testimonials as to actual records of such results. "The Homestead has made lots of sales for us," writes Mr. J. H. Campbell, of Manning, Iowa, who advertises Barred Plymouth Rock cockerels and Mammoth Bronze turkeys. "The Homestead gave us grand results last season," writes Mr. W. S. Gregory, of Keota, Iowa, breeder of White Wyandotte chickens, and encloses an order for the present season, expressing the hope that it will do as well this year. With a circulation of 100,000 as against 75,000 a year ago, Mr. Gregory certainly ought not to be disappointed. We shall be disappointed if his results are not

better than ever before. Mr. O. J. Viland, of Slater, Iowa, placed an advertisement of Barred Rock cockerels in The Homestead in January and reports splendid results, inquiries coming by every mail. "I disposed of my stock in a short while," says Mr. Viland, "and have had to return orders after being sold out. I shall have occasion again this spring to use your columns in advertising for egg trade." Once an advertiser, always an advertiser, is the rule with Homestead patrons.

"I had fine results with my Homestead advertisement," writes Mr. J. C. Watts, proprietor of Cloverdale stock farm, Berwick, Iowa, whose specialties are Mammoth Bronze turkeys, Barred Plymouth Rock chickens and registered Poland China hogs. "I sold 200 cockerels and all but four of my fifty Mammoth Bronze turkeys, and I think I have enough inquiries to close those out."

Although his sale of Poland China hogs last month was held on a very bad day, with the mercury 10 or 15 degrees below zero, Mr. Ernest S. Babcock, of Manning, Iowa, writes us that he was well pleased with the results of his advertising in The Homestead, as it brought good men to the sale, and the average prices were very fair, considering the unfavorable weather conditions.

Mr. J. F. Stahl, of Altoona, Pa., is so well pleased with the Red Letter combination that he does not want to miss a number, and not only renews in advance of the expiration of his subscription, but sends the subscription of his neighbor, Mr. Joseph Brandt, along with his own. "Candidly," he writes, "I think this is the biggest value in reading matter that I have ever invested in; and I heartily wish long life and success to these publications." This eastern opinion is in exact agreement with thousands upon thousands of like favorable reports from western subscribers. We are in receipt of an enormous number of both renewals and new subscriptions; and with them come great numbers of friendly expressions, many of them accompanied by the subscriptions of neighbors, relatives and friends.

Have you noticed the growth of our department of classified advertising? The success of this attractive feature has been unparalleled in agricultural journalism. For five cents a word, we insert your classified advertisement in The Homestead, and give you the benefit, without additional charge, of inserting it at the same time in The Farmer and Stockman, of Kansas City, with 56,000 circulation, and The Wisconsin Farmer, of Madison, with 34,000 circulation, or 190,000 circulation in all. These papers reach the best farmers in Iowa, Illinois, Wisconsin, Minnesota, North and South Dakota, Nebraska, Missouri, Kansas and Oklahoma. No single insertion is accepted for less than \$1.20, even if less than twenty-four words. No display type or illustrations are admitted. Every number, abbreviation and initial letter, including your name and address, is counted as one word. To insure insertion, copy should be in our hands on or before Saturday of the preceding week. Terms, cash invariably with the order.

And then when you realize that the possibilities are more than doubled by a combination of hogs and alfalfa pasture, can you afford to be without it?

And then you cannot afford to be without it in your crop rotation to build up your land. Instead of a soil robber alfalfa is a soil renovator and soil enricher. The roots penetrate deeply, loosening the subsoil and by decaying add humus, but it is much more valuable for the needed and expensive supply of nitrogen that it adds to the soil which greatly benefits the succeeding crops. The most productive fields that I can conceive of are old alfalfa hog-pastures that have been broken up. Can you afford to be without it?

Keith county, Neb. H. D. Lute.

Experience, again, has proved that alfalfa hay fed to brood sows during the winter in lieu of about 25 per cent to 40 per cent of corn, gave a far cheaper maintenance ration, larger litters of lusty pigs, with no trouble at farrowing time and no danger of the sows eating the little fellows, as the sow will not be in the feverish condition that a heavy corn diet would put her.

If you can raise three to five tons per acre, worth \$8 to \$10 per ton, with no work or expense after the first year, except harvesting, can you afford to be without it?

Then when you realize that it will save you twice the amount of money in bran, oil meal or some other protein feed, can you afford to be without it?

## Farm Furrows

Turned by a Practical Farmer.

Present horse prices read like fiction.

Without faith in the future farming would be an impossibility. Nearly every operation which we attend to is largely at the mercy of the elements.

Those who fan their seed oats for the first time this year will find that a good fanning mill will discard from one-third to one-half of the grain in the bin.

Without either clover, alfalfa, pea hay or some leguminous forage for roughage the farmer is poorly equipped for handling sheep in the winter.

A few weeks ago we asked our readers, if they ever tried to write a Furrow, and one of them replied, "Does this look like a furrow? When a dozen eggs look like thirty cents it makes one sit up and take notice." This is one that passes without any harrowing.

Many of those who leave their wives and children at home to do the chores while they stay in town to discuss the child labor question and other national questions should study up on the duties of township trustee and school director so as to be able to fill the office if elected.

A great many people make the mistake of not beginning to smoke the summer meat supply soon enough. We like to get a good tan on the hams and shoulders before flies and warm weather come. Moreover, the meat tastes so much better in midsummer when it has had more time to cure.

It is a serious mistake to tie oneself up in business with his relatives. I have seen so many young men make the mistake of taking the bride home to the parental roof, and I rarely, if ever, have seen an instance where things turned out well. No roof is large enough to cover two families. Rely on your own resources and be independent, even though you haven't a dollar that you can call your own.

A short time ago the Furrows man stated that cold weather was hard on disease germs. A subscriber, Mr. C. O. Mell, calls our attention to the fact that freezing does not kill germs. He states that typhoid fever germs have been found active and virulent after having been frozen within a block of ice all winter. He asks every boy and girl to remember this fact before sucking a piece of ice in the summer.

After all, how exceedingly human legislators are! I am reminded of this by the conduct of the present Iowa legislature. When each man carried a pass in his pocket the Iowa legislature usually adjourned Friday night and met again Monday afternoon or possibly Tuesday morning. Now that each has to pay his railroad fare the wood-sawing continues until sun-down Saturday night and begins again right after breakfast Monday morning.

There is a great deal of sickness throughout the country at this time of year that to us seems absolutely needless. Why any person living in pure air, with an abundance of good food and clothing, should be sick is beyond my power to realize. Of course most of this sickness is due to the fact that people disregard the laws of health. Poor ventilation is one of the chief causes of debility, and not until country homes are better and more properly ventilated can

# The Great Western

## Endless Apron

## MANURE SPREADER

### Made For the Man Who Wants the Best

**THE GREAT WESTERN ENDLESS APRON MANURE SPREADER** is absolutely guaranteed to stand up under **50% more strain** than any other spreader of same capacity, and to have less than one-half the breakage. The cost to build it is 10 to 15 per cent more than any other. Take its strength and durability into account, and it is by far the cheapest machine for you to buy

#### A Giant In Strength.

The extra strength and durability that we give in the Great Western costs us many thousands of dollars a year. It represents only a few dollars to you in the purchase price. When you are putting over \$100.00 into a machine a few dollars extra in cost is a small item, if for every dollar extra that you pay you receive \$5.00 in value. That is what we give you—and More Too. In fact, the difference in the price between the Great Western and the cheaper machines will be more than made up within a short time in repairs alone.

#### Strong, Oscillating Fifth Wheel

The fifth wheel is extra strong and heavy. It is 16 inches in diameter, made of malleable iron. It is braced both front and rear. The brace runs from the lower part of the fifth wheel to the lower part of the axle, so that there is positively no give either forward or backward. It is fastened absolutely stiff and rigid to the axle. It is oscillating so that if one wheel of the machine drops into a rut or dead furrow, the frame, body and working parts are not twisted out of shape. With non-yielding fifth wheel when one wheel drops into a rut or hole, the machine twists out of shape and causes friction and binding, and makes the machine run hard, and reduces the life more than half.

This is a very important point and is one of the reasons why the Great Western is of such easy draught. Every working part of this machine is always in line so that there is no undue friction or binding.

#### Double Oak Bolsters

Which support the front end of our machine, makes it almost as strong as a box car. There is absolutely no give or twist to it. With this construction it is not necessary for us to carry all of the load back of the front axle. The load is nearly equally balanced, both front and rear. On almost all other spreaders the entire load is carried back of the front axle, thus making the draught of the machine heavy, and giving you a front end that will invariably break and give trouble.

#### The Main Frame of Oak

Every stick of timber is the very toughest oak. The two side sills are 2 inches by 6 inches. There are four cross sills which are mortised into the main sills. The two middle sills which carry the center row of rollers run the full length and are securely fastened to both end cross sills and to each center cross sill. In addition to this, there are **Two Diagonal Wrought Iron Braces and Truss Rods** which hold the frame from skewing or twisting out of shape. This is by far the strongest and most substantial construction ever put onto a manure spreader, but as the

main frame is one of the most important features of the machine on account of its carrying all of the machinery, it is very important that it should be extra strong. This construction adds at least 50 per cent to the life of the machine. If this frame was made of pine or maple, and light material as some manure spreaders are made, the frame that carries the machinery would twist out of shape and cause the machine to go to pieces very soon. A few dollars added to the grade of the material and general construction, we consider of very great importance.

#### Durability All Over

Durability appears all over in the Great Western Spreader. Our whole energy and thought has been to see how good we could make it. We know absolutely that every part is equal to the duty required of it. The side-boards are one inch thick and are set on top of the side sills and securely screwed to the twelve upright oaken stakes of the main frame. The 75 rollers that carry the Great Western apron are closer together and are larger in diameter than are used on any other make of spreader. This is another reason why the Great Western is of such easy draught.

#### Our Famous Endless Apron

This is one continuous apron (not a half apron), therefore, is always ready to load. You don't have to drive a certain distance to pull it back into position after each load or wind it back by hand, nor are there any reverse gears, trips, springs or contraptions to get out of order; in fact, it is always ready to load; it is always up and out of the way of obstruction, as it does not extend below axle; spreads evenly from start to finish and cleans out perfectly.

#### The Hood and End Gate

This is one of the many valuable features of the Great Western Spreader. In its most valuable form it is practically exclusive in our machine. While loading and driving to the field it serves as an end gate and keeps manure away from the beater. It prevents choking and avoids the throwing out of a pile of manure at starting up, as some spreaders do, and it acts as a wind shield while spreading.

#### Go and Talk with Owners

You will find Great Western Spreaders at work in your locality. More are now being made and sold than any other spreader made. Just talk with some of the owners. They will tell you it is a spreader you can put your confidence in—that it is never found wanting in any way—that it is the strongest, the simplest, the most durable and the best spreader in every way on the market. There is no question but that it is your kind of machine. It is made for the man who wants the best.

lonesome, empty house. There is also a needless amount of work in keeping up the many unused parts.

Surgical operations on human beings are altogether too common nowadays. We wonder how soon it will be before some young fellow of a doctor will be practicing an operation for the grippe.

If boys forget the little odd chores occasionally don't be hard on them. We have known boys that were more faithful and thorough than a great many men. Too many fathers do not appreciate their own help until they are obliged to hire.

# THE HOMESTEAD

A Practical Journal for the Farmer, Stockman, Fruit Grower, Poultryman, Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscription, \$1 a year; ten copies one year, \$10, and an extra copy to get up a club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance, \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## POSSIBILITIES OF ALFALFA.

We are of the opinion that men in every state of the corn belt should be a little more enthusiastic over the growing of alfalfa. It seems as though nature intended this crop to grow on land adapted to corn, because corn and alfalfa make an almost ideal balanced ration for horses, cattle, sheep and swine. It may even be utilized for poultry.

A case was called to our attention a short time ago where 250 pigs were brought through from spring until fall on a seventeen-acre alfalfa pasture. Of course they were fed a little corn in addition, but the man who raised these pigs claimed that by the time they were six months old he had at least \$3 profit on each pig. This means an item of \$750 realized from seventeen acres of land. In this case the man who owned the land did not think that he had done anything extraordinary, and expressed himself as believing that any man who knew how to handle hogs could do the same. As a pasture for hogs it is doubtful if alfalfa is excelled by any crop that grows out of the ground in the corn belt.

When it comes to the production of hay we have a little different proposition throughout a large part of the central West. The first crop and some-

times the second comes in at a time when the weather is very catchy, and as a rule good alfalfa hay is made with difficulty. At the same time when one considers the extreme richness of alfalfa hay it is worth the effort required to get a stand. Certainly one is not taking much risk by putting in a few acres if he will prepare the seed bed sensibly.

A bunch of steers now on feed at the Nebraska station are making daily gains each of 2.7 pounds and are being fed only fourteen pounds of corn each daily, in addition to roughage composed of equal parts of alfalfa and corn fodder. This is an exceedingly good gain, and men who have had experience in feeding cattle will see at once that the gain is being made on a cheap ration. When we consider that good corn land will produce all the way from three to five tons of good alfalfa hay a year, and when you can make gains like this on so small an amount of grain when fed in conjunction with alfalfa and corn stover, it becomes apparent at once that as a practical proposition alfalfa should be given a trial.

We know of instances where men failed repeatedly to get a good stand, and yet who have stood by it until they have succeeded, and these are among the strongest advocates of this great legume today.

## Short-horn Herd Book.

Vol. 67 of the American Short-horn Herd Book is now ready for distribution. It contains the pedigrees of bulls numbered from 257709 to 263114 and the pedigrees of 6,504 cows. The cost of the volume is \$3.00, at the office of the association or \$3.30 prepaid.

Vol. 68 is now in press and Vol. 69 has been closed and the current receipts of pedigrees are now being filed for Vol. 70. Make application for current volume to John W. Groves, Secretary, Union Stock Yards, Chicago, Ill.

## The Week In Kansas.

This is written at the beginning of duck weather. For two days wild ducks have been coming up from the South, coaxed on by a drizzling rain. The ponds and creeks are alive with them early in the mornings, and through the day they take toll from each farm by a visitation in the fields where some grain can be had.

We were just at the commencing of spring grain sowing when the change came. We have heard of one neighbor

having a field of speltz sown. There has been considerable plowing done where the land is naturally well drained, but that is about the sum and substance of the work that has been accomplished.

It seems that all the worry that some have burdened themselves with, over the winter wheat crop, has been just that much worry for nothing, as the spring weather of the past few days, and the warm showers, have brought out the wheat fields to a bright green color, making every wheat field a beauty spot on the landscape. In all our territory of observation we know of very few fields that do not promise well, these being the ones that were sown very late, on poorly prepared ground.

Stock is coming into the trying weather of spring in good shape. Rough feed has been in abundance. There is absolutely no excuse for poor stock this spring, and there is little of it. Stock cattle are scarce and cheap. No one wants the kind that will raise calves, because there has been no money in calf raising in the past half dozen years. Some day this will be changed, but the farmers have grown tired waiting for the change to come.

Of course there are those who are "afraid" this warm weather means the killing of the peach crop. They say the buds will be swelled, and a freeze in the month all but here will continue the possibility of getting a crop of peaches another season. It is not unlikely that some of these failure predictors would feel more disappointed if we have a peach crop this season than if we don't.

Tomorrow will be the first day of March. Most of the moving of renters and of those who have bought farms, has been done. The weather of the past two weeks has been fine for this, so advantage has been taken of it. This morning there is mist flying in the air, slanting southward, with a north breeze behind it. It is one of those damp, disagreeable days. It is duck weather. That is the best description of it we can give.

Henry Hatch.  
Coffey Co., Kan., Feb. 28, 1907.

## THE VALUE OF DIP TO THE FARMER AND STOCKMAN.

In spite of the fact that the immense loss annually caused to live stock interests by lice, mites, ticks and similar parasites has been frequently pointed out in the columns of the agricultural press, a further word along that line will not be amiss. No sane man would harbor a lot of wolves, foxes or other destructive animals on his premises, knowing that they were destroying or awaiting an opportunity to destroy the animals he was rearing, but did it ever occur to you, Mr. Farmer, that in neglecting to destroy the ticks, lice and disease germs which infest the live stock of the farm, you are pursuing exactly the same policy? These minute creatures annually cause the farmers of this great country millions of dollars of loss by their ravages on farm animals. If the farmer will but think a bit, all this loss is preventable at small cost and with comparatively little trouble.

\$21

**Farmers' Cement Machines**

These machines are complete and guaranteed to give satisfaction. UNITED CEMENT MACHINERY MFG. CO., 100 First National Bank Bldg., Waterloo, Iowa.

A dipping tank and a few dollars' worth of a good dip, taking little time and effort, will keep hogs or cattle free from lice of all kinds from one year's end to another. The saving of food alone, to say nothing of the animals' comfort, will in a short time pay for the expense involved. With the present high prices of farm lands and consequently the high price of feeding stuffs, no farmer can afford to harbor any insect or germ which will in any way interfere with the health and growth of his animals. As a matter of fact, a majority of diseases which are at present the dread of the live stock raiser, are directly traceable to the ravages of parasites which sap the life blood of the animal, or germs which weaken its constitution and make it more susceptible to disease. By the use of disinfectant fluids which may be brought into direct contact with these foes of the farm animal, it is possible to entirely destroy them and prevent the harm they would otherwise do. By their removal the danger of cholera, swine plague, tuberculosis and similar maladies is greatly decreased and it is possible to rear large herds successfully without any appearance of these troubles. This use of dip for this purpose is of invaluable assistance. The method is simple, and as before stated, the expense is small. The great advantage of dipping over other methods lies in the fact that every part of the animal's body is thoroughly disinfected. The application requires less time and works no injury to the animals, and is by far the best method where large numbers of animals are to be treated. On the average sized farm, a dipping tank, yards and draining pen can be installed at a cost of a few dollars. The expense for the fluid itself is comparatively slight when the great benefit derived from its use is considered, and there is no reason why any farmer should allow his stock to be bothered by the pests and his pocket-book to suffer in consequence. Dipoleum, the dip manufactured by the Marshall Oil Company, Marshalltown, Iowa, is a most effective and economical article for the purpose. It completely destroys all lice and vermin which infest live stock without doing the animals the slightest injury. On page 27 you will find their advertisement and it will pay you to look it up. We also urge you to send for their booklet and "Budget" of real letters from farmers, telling actual experiences in the treatment and cure of these pests, also how these farmers have stamped out cholera, how they have prevented it. The Marshall Oil Company will be pleased to furnish any further information in regard to their dip and dipping tanks. Address them at Marshalltown, Iowa, Dept. D3. Kindly mention this paper when writing.

Mr. James E. Stephenson, of Alburnett, Iowa, writes that he has five very choice Scotch-topped Short-horn huffs for sale, ranging in age from ten to twenty-four months. Very smooth, low down, thick-meated fellows. They are of good color and from heavy milking families, such as the Blossoms, Netherby and Rose of Sharon. See advertisement on page 43 and write him your wants or call on him.

## SETTLERS' RATES TO MINNESOTA, NORTH AND SOUTH DAKOTA AND CANADA.

On every Tuesday during March and April the Iowa Central will place on sale special second class settlers tickets at extremely low rates for benefit of settlers to the Northwest. Call on agents for rates, or address A. B. Cutts, G. P. & T. A., Minneapolis, Minn.

## HEALTH AND STRENGTH

OBTAINED FROM THE AIR YOU BREATHE  
Gained by a Deeply Scientific yet Simple Treatment with Oxygen from the Air

Positively no drugs or medicine, no dosing of the stomach—just the simple OXYDONOR treatment, the treatment that has cured thousands—the treatment that will cure YOU if you are willing to be cured.

## OXYDONOR

DOES AWAY WITH DRUGS AND MEDICINE.  
It acts on the new scientific principle which is now being endorsed by the best authorities in the world—the principle of instilling oxygen into the system.

OXYDONOR TREATMENT CARRIES THE VITAL FORCE OF ANIMATION INTO EVERY PULSE BEAT

and thus it is made to throw off any disease, causing the process of life to prevail. Oxydonor treatment does not work against nature (as drugs and medicines do), but it works with nature, and aids nature in restoring the natural vital forces of the human system. A new discovery in physical science has been applied by Dr. Sanche to the healing art.

ASTONISHING? HARD TO BELIEVE?

Not when you see the cures Oxydonor accomplishes. Investigate this—do not let doubts keep you from perfect health, life-giving strength. When the telephone, the phonograph and other modern wonders were invented, people doubted and denied. The truth was proven to them, as the truth of Oxydonor treatment is being proven today.

BEAR IN MIND THAT THIS OXYDONOR TREATMENT works on a newly applied physical law—vital animation—and is not a battery or electric treatment. OXYDONOR PAMPHLET FREE.

WE APPEAL TO THE INTELLIGENT THINKING PEOPLE.  
Many high-grade physicians recommend Oxydonor treatment in spite of the fact that it does away with the use of drugs—for Oxydonor can be applied without cost by any sick person in any house.

WE APPEAL TO ALL PEOPLE WHO WANT TO REASON THIS OUT.  
people who want to know about the correct method of curing disease without medicine, to send for the free Oxydonor pamphlet. It tells you how Oxydonor treatment operates; it cites case upon case of remarkable cures with Oxydonor. No obligation to purchase anything; we merely want you right now to send for the pamphlet and study it. You who need it—we want you to have it free. Write at once.

Case after case has been cured of Stomach Trouble, Rheumatism, Nervous Prostration, Insomnia, Kidney and Liver Trouble, Dropsy, Blood Diseases, Ulcers, Abscesses, Tumors, Scrofula, St. Vitus' Dance, Lung Diseases, Catarrh of Head, Throat or Stomach, Blood Poison, Appendicitis, Female Diseases, etc. HUNDREDS AND HUNDREDS OF CURED PEOPLE FROM ALL PARTS OF THE COUNTRY WRITE US LIKE THE FOLLOWING. READ WHAT THEY SAY:

George P. Goodale, Secretary Detroit Free Press, Writes:

I know of no other discovery whose value approaches Oxydonor. I have a sure conviction, founded on actual personal experience, that it is one of the greatest boons within human reach, and it seems to me the most important step toward healing human ills in 3,000 years.

Wm. Converse, Hancock, Iowa, Writes:  
I would not take \$1,000 for my Oxydonor and do without it; it cured me after the best medical skill in western Iowa failed.

Mrs. Sallie M. Hindsell, of Turner, Mo., Writes:

I was a total wreck when I procured your Oxydonor, having long suffered with curvature of the spine, stomach and heart trouble, rheumatism and various troubles, and I lived for 40 years on drugs and never knew what it was to be well or free from pain, but since using Oxydonor I scarcely know what pain or sickness is, and I have cured two cases with Oxydonor of St. Vitus' dance and one case of bone cysts of 40 years' standing.

The full history of above cases and scores of other remarkable cures given with our free book. Call or write for our free book and learn about this, the greatest of all healing methods.

DR. SANCHE OXYDONOR CO., ROOM 559, 67 WABASH AVE., CHICAGO, ILL.

W. W. Mitchell, of Wood River, Nebraska, Cured of Stomach Trouble after Doctors said there was no Hope, Writes:

I was advised to prepare myself for the Grim Reaper, and commenced to close up my business affairs. About this time I heard of the Oxydonor and I sent and got one, and I commenced to improve immediately, and in a few months I was as well as ever and have been healthy ever since, weighing now 195 pounds.

Dr. Thomas Clarkson, Lineville, Iowa, Writes:

I have been 33 years in the practice of medicine and have had very good success in my practice, but search all the materia medica, there is nothing to be found in the world to compare with the Oxydonor in the cure of disease.

Conrad Sauer, R. F. D. No. 2, Vinton, Ia., Writes:

Oxydonor is our family doctor. We use it with great success, and would not do without it at any price.

## Get the Paint You Pay For

The State of North Dakota has shown many of the paint mixtures on the market to contain worthless adulterants instead of the pure white Lead and Oil they should contain. There is no safe way for the farmer but to buy White Lead known to be pure, and secure perfect paint of any color, at least cost, by thinning with pure linseed oil.

## CARTER Strictly Pure White Lead

contains 92 per cent. Pure White Lead and 8 per cent. Pure Linseed Oil. Every atom is paint. Will spread better, cover more, look better and wear longer than any other paint in the world. Will never crack, scale or fade.

Our Booklet, "Pure Paint," exposes the fraud of selling clay and chalk for the price of paint, and tells how to test and detect adulterated lead. Sent FREE with six beautiful color schemes.

Address Dept. D.  
CARTER WHITE LEAD CO., Chicago, Ill.  
Factories: CHICAGO, OMAHA.

### MAKING GOOD LARD.

Lard is one of the absolute necessities on the average farm, yet there are a great many people who experience trouble in making a first-class product. Just as sure as the spring months come on there is more or less complaint regarding the poor keeping quality of the lard. The trouble seems to be that a very strong and penetrating odor is developed which gives a bad taste to meat or vegetables which are fried in the lard.

A conversation which we recently had with a man who is unusually clean about his butchering and who makes a large amount of lard every year, for his own use as well as a number of private customers, might interest a number of our readers. His plan is to keep the leaf lard separate from the intestinal lard. Both of these are tried out separately. He thinks that as a rule the fat is not cooked long enough to make it keep properly. He does not believe in hurrying the process of cooking, but let it continue for a number of hours until the small cubes of what originally was fat are reduced to nothing but a very much contracted piece of brown material. In straining the hot fat he uses eight or ten thicknesses of cheesecloth. This removes absolutely every bit of sediment. We found the lard at the bottom of his jars as white as that on the top. Whether the sediment has anything to do with giving the lard a bad odor was a question with him. However, he believed it paid to use every precaution possible to secure a good product.

While there is a good deal of opposition to lard as a food, the fact that it has been found indispensable in a great many homes should make people be still more careful in making it.

### The Seed Corn Problem.

To the Editor of The Homestead:

If conditions have not materially changed since I left the farm, it seems to me that the seed corn problem, which is being so liberally discussed through the agricultural papers of late, is one of easy solution.

I farmed for myself from the time I was twenty-three until I was forty, and during all those years I do not remember of having to replant an acre of corn on account of bad seed, nor do I remember of ever having failed to put up my seed in the fall.

My plan of saving seed corn was simply this: As soon as husks began to get brown and the kernels pretty well hardened up, say about the last days of August or the first of September, I would go into the field with a bushel basket and gather out such ears as I thought desirable for seed, leaving enough husk fastened to each ear to tie two ears together. I would then hang them across poles in some place where they would be under shelter and in the open air. If it happened to be a dry time, I would usually hang it in the barn, but if it was wet and the corn seemed not to be drying out right, I would hang it in an old open smoke-house that I kept largely for that purpose, and keep fire under it until it was thoroughly dried out. The best way to manage the fire is to have a couple of large sticks of good solid wood that will hold fire for a day or two. There is not much danger of getting the corn too hot.

When I wanted to take it down, which was sometimes not until spring, I would shell and put it in any dry place where it was secure from rats and mice. A few times when the corn was late and did not ripen properly, I have put a handful in a box of dirt and tested it, but usually I paid no attention to it until planting time and never felt at all uneasy about it.

In this way I could put up my seed corn in one-half the time it would have taken to pick it out of a crib at planting time, and then I had the satisfaction of knowing that I would have a stand, if it were not molested. The last years that I farmed I fire-dried my seed every fall and thought it paid me well, because of the stronger growth and greater freedom from the ravages of worms.

I think about nine-tenths of the bad seed is made so by letting it heat soon after being gathered. It takes quite a bit of artificial heat to kill seed corn, but if piled up while sappy and allowed to heat the least bit, it is ruined.

After having left the farm and gone into other business, I remember having seen two of our best farmers drive into town and tie up shortly after noon, hav-

## THE SIGN OF A PERFECT ROOF

Discriminating people will find in Ruberoid Red Roofing a lasting weather-proof, fire-resisting covering combined with a lasting beauty.

### THE ONLY PERMANENT ROOFING WITH A PERMANENT COLOR

The well known qualities of Ruberoid Roofing serve as a protection from the heat of the summer and the cold of the winter, while its deep red hue lends a touch of color to the surroundings. Suitable for all buildings. Color guaranteed for five years.

ing the bottom boxes of their wagons about two-thirds full of very fine seed corn. It was early in the fall and a very warm day. They let their wagons stand there in the hot sun until about 4 o'clock. I told my daughter, who was with me at the time, that those men would have their corn to plant over the next spring and that we would make a note of the circumstance and see how they came out. Sure enough, they had it every bit to plant over.

I suppose a majority of the farmers pick their seed and lay it up on slats in the barn while they are cribbing. This is better than not to pick until spring, and does fairly well if care is taken not to have the ears touch. However, if I were farming I would rather pay a man \$10 a day to put up my seed in the way I have indicated than to risk any other. Another advantage I think I can see in my plan of saving seed corn is this: I get not only the largest and best ears, but the earliest maturing as well, and this last is no small matter.

My advice to every corn raiser would be to pick his seed from the field early and dry it out immediately over a wood fire, and then he need never lie awake nights wondering if he will have his corn to plant over. J. M. Watkins.

Marion county, Iowa.

### S. P. Briggs' Sale.

Mr. S. P. Briggs, of Seward, Neb., held a very successful sale of Durocs on February 20th, in which he sold thirty-six head at an average of \$60. The offering was in the very best of breeding condition and the best stuff was stubbornly fought for. The top was \$207.50, paid for No. 1 in catalog, a daughter of Proud Advance, that was surely a good one, she going to Mr. D. A. Retticker, of Milford, Neb. List of sales of \$40 and over follows:

Lot.	Price.
1. D. A. Retticker, Milford, Neb.	\$207.50
2. J. Morgan, Seward, Neb.	47.50

### "Working Out" the Road Taxes.

To the Editor of The Homestead:

In view of the fact that so much progress has been made during the past year in road improvement, it is to be hoped that no serious change will be made in the present laws. During the last session of the Iowa general assembly several bills contemplating a return to the old labor tax method of working the roads never left the committee rooms, and the uniform success of the money tax system during the past year has been such that surely a quietus has been placed on the old system for all time.

The passage of such a bill now would mean a most discouraging backward step, as it is entirely contrary to the trend of the road legislation of the past four or five years, and would put a serious stumbling block in the way of further progress.

It might be argued that the bill now pending is hedged about with the provision that to be effective in a township a petition of two-thirds of the voters must first be filed, but it would be a comparatively easy matter for a few dissatisfied men to have a petition signed by two-thirds of the voters in a township even in the localities where splendid work is being done under the present system. This provision has the semblance, but lacks the inherent strength of a safeguard. The attempt is constantly being made to interest the highway commission in petty neighbor quarrels apparently over the road work, but really over some little personal grievance against the road superintendent. In these cases, were such a statute in force, a petition would soon be started to go back to the old labor tax system. But this is only one of the many conditions which exist in many townships that would bring into being such a petition.

There is no call in a state as uniform as Iowa to have road laws passed for the whole state that are the outgrowth of local conditions in a few counties or townships and meant to be applicable only to these. Such laws would soon result in a distressing non-uniformity of road building and maintenance within the limits of each county.

As the law now stands four superintendents can be appointed in each township. The average road tax available per township is not far from \$1,200. Divide this amount into four parts and each district will have \$300 to expend besides the poll tax. In the rolling districts of the state, \$300 will grade one mile of road in fairly good shape and take care of the small culverts necessary. In the more level districts the same amount will grade one and a half to two miles of road. These amounts are not given as the cost for the mere scratching of the surface with a road machine, but for putting up good grades such as have been built in the southern part of Carroll county or in Dallas county, and these figures are furnished from actual work done in these counties. It is not to be hoped, however, that with four superintendents in a township each one will content himself with building one or two miles of well graded roads, but will attempt to make it go further than this and thus secure no fairly permanent improvement. The road machinery of each district is used perhaps ten to twenty days during the year and the rest of the time lies idle, notwithstanding that its value in most cases amounts to more than the entire road tax for any one year. This condition of affairs is bad enough and so it is hard to understand why anyone would wish to divide the townships into more than four districts. In direct contrast to this policy of division is the consolidation of not only each township into one road district, but practically the whole county into one road district, as has been done in Dallas county.

At a meeting held at Adel on the 15th inst., the county supervisors and township trustees indorsed and voted to continue the policy of doing the road work with regularly organized county road gangs, after six years' trial of this plan. In 1906 one gang built thirty miles of road and the results are so satisfactory that a second gang will be started this year. This will do away with most of the township work as both the county and township road funds will be needed to support the two gangs.

The 1907 Report of the Highway Commission says, "The most encouraging feature of the work during the past year has been the entrance of young men into

**I TOLD YOU SO!**

**"Cobalt Mutual" Advanced 40% in Price on February 20th**

**COBALT**

**The Block of Stock Offered at 25c Was Greatly Over Subscribed**

—and NOW comes another opportunity to buy "Cobalt Mutual" at 35c—and get the advantage of another 40% advance in price—for on April 25th "Cobalt Mutual" will GO UP again. If you lost the chance of buying at 25c—you should not NOW lose the chance to buy at 35c. "Cobalt Mutual" will go to 50c a share at least on or before April 25th, 1907.

Don't forget that I predicted that this stock would advance 40% on February 20th. IT DID.

Don't forget that I predict that it will advance 40% again—that it will go to 50c a share on April 25th. IT WILL.

**W. V. Coons**  
PRESIDENT.

**W. V. COONS & CO.**  
Bankers,  
Bond Dept. A6  
Williamson Bldg., Cleveland, O.

Write Us TODAY for Special Report and free stockpin of Cobalt Ore. For a limited time we will send to everyone who writes, giving their business or occupation, a sample of Cobalt Silver Ore, mounted in an attractive stockpin. One will be sent YOU if you write at once before the supply is exhausted.

### Cobalt Ores of Great Value

Here is the actual value of ores taken from a few of the Cobalt mines:

LaRose mine ores run \$60,000 to the carload.	Trathewy mine ores run \$48,000 to the carload.
Jacobs mine ores run \$60,000 to the carload.	Silver Queen mine ores run \$42,000 to the carload.
Foster mine ores run \$54,000 to the carload.	Drummond mine ores run \$36,000 to the carload.
Nipissing mine ores run \$51,000 to the carload.	Nova Scotia mine ores run \$37,000 to the carload.
University mine ores run \$45,000 to the carload.	

There is every reason to believe that our five tracts covering 560 acres will be as productive as any others in the entire Cobalt mining district.

the field of highway improvement. This is absolutely the essential factor and the more encouragement and headway we can make in this direction, the sooner we will obtain better results generally in the work." We do not wish to destroy the incentive for young men to take up the serious study of road improvement. This is the only way by which it can be raised to the plane on which it belongs.

"That we are not making any improvement under the money tax system, as has been inferred or charged by some of the opponents of this system, is simply not true. We are making an improvement and a marked improvement in almost every section of the state, but the greatest factor which is hindering the development is the personal equation—the personal equation of the old-time road builder whose knowledge and methods have come down to him through a long line of predecessors, and the personal equation of the community that scoffs at the man who attempts to introduce new methods and new ideas into

## Another Chance To Make 40% On Your Money

ONE month ago I invited you to join me in making a fortune on "Cobalt Mutual" Stock.

I told you that the price would advance 40% on February 20th.

My prediction came true.

Subscriptions for this stock were received from all over the country, from business men, bankers, lawyers, professional men, everyone. The public recognized the fact that the Cobalt Mutual Mines Company was different from any mining proposition ever put before it. It recognized the stability of the men behind the enterprise. It recognized the fact that "Cobalt Mutual" was being handled along business lines—that the men interested in the enterprise had gone into it with the same determination to make a big success for the stockholders that they would have in going into any manufacturing or other enterprise.

### Work Being Pushed—Machinery Being Installed

Crews of miners and engineers are now at work night and day, double shifts, opening up the ground—and work will be pushed even more vigorously after the opening up of Spring.

We are going to have a great big proposition in COBALT—we're not going to stop at little achievements. We have the mineral land to develop—that's our stock-in-trade—a big acreage of rich mineral ground in the heart of the COBALT district. The Cobalt Mutual Mines Company is not basing its future prosperity on a 20-acre tract of land—it has

### 560 Acres

—enough land to keep us mining on a big scale for a generation.

When the President of our Company, Mr. W. V. Coons, returned from a long visit of inspection of Cobalt, he had this to say: I saw

### Nuggets of Silver

eighty to ninety per cent pure, weighing 300 to 400 pounds. I saw many carloads of ore running from \$30,000.00 to \$60,000.00 and one car of picked ore that actually sold for \$90,000.00. The whole region seems to be one vast rock covered with a thin skin of earth, filled with mineral deposits. In places the rock crops out of the top, and shows the silver veins of almost pure silver so rich that you can see the metal shine as though the rock were plated with it. I examined the entire region, saw the miners at work, talked with conservative men whose experience, ability and recognized standing placed them in a position to give me unbiased advice—and then I made up my mind that Cobalt offered the greatest chance in the history of mining for a great big, well-conducted, business methods mines company to make a vast amount of money.

Our stockholders—directors—and officers are all enthusiastic about the prospects of "Cobalt Mutual." Old stockholders are subscribing for more of the stock—taking every share that they can carry.

Now why don't you look us up—why not find out the responsibility of the men behind this enterprise? You can ask any bank anywhere of the standing of W. V. Coons & Co., of Cleveland—or look us up in any of the commercial agency books. Then decide. We invite the most careful investigation.

As soon as the weather permits we are going to invite our stockholders to take a trip to COBALT—and see for themselves, just the same as the President and some of our stockholders have seen, the great holdings of the Cobalt Mutual Mines Company.

Will you go up as a stockholder at 35 cents a share, or will you wait until it's too late to take advantage of this next raise in price and pay 50 cents a share for "Cobalt Mutual"? You'll surely buy if you go to COBALT and see our proposition.

### Installment—Payment—Plan

To accommodate numerous investors who have requested it, we have decided to accept monthly payments on "Cobalt Mutual" stock as follows:

25% of the total subscription with order—the balance in four equal monthly payments drawing 6% interest.

### Cobalt is Truly the Field of Fortune

You are going to be interested in COBALT some time. There's going to be a rush into that mining district the like of which the country has never before experienced. Will you join in the enterprise NOW—or wait until the price is much higher and thereby lose the increase in the price of stock?

### Directors and Officers

The officials of the company are all well and favorably known, and are men of substance, character and standing in the community. An investigation will reveal to any investor the fact that the directors and officers are eminently reliable and can be depended upon to conduct the affairs of the company fairly and honestly.

the road or bridge work. When these can be eliminated, if such is possible, a long step will have been made toward the end sought."

There are certain changes in the road laws that could profitably be made, but the Highway Commission has recommended only two of these this year. It has recommended that the county road fund be increased by one mill, making it two mills in place of one as heretofore, and decreasing the township road tax by a like amount. This is to secure a more centralized and better systematized administration of the road funds. That such a plan would prove successful has already been demonstrated in Dallas county. The second change recommended is an act substituting a county engineer, appointed by the board of supervisors or elected by the people to hold office as long as competent and satisfactory service is rendered, for the present county surveyors. Such an engineer would have general direction of the bridge and road work under supervision of the board of supervisors, and

be held responsible for carrying out the plans adopted, and the contracts made by the board of supervisors. The success of such a plan as this has already been demonstrated in Lee county.

The whole tendency of modern legislation is toward more centralized forms of administration, and the securing of competent men and trained outfits to do the actual work. By dividing the resources into many parts, the strength of the whole is lost.

Thos. H. MacDonald,  
Iowa Highway Com., Ames, Iowa.

### Only One "BROMO QUININE"

That is LAXATIVE BROMO QUININE. Similarly named remedies sometimes deceive. The first and original Cold Tablet is a WHITE PACKAGE with black and red lettering, and bears the signature of J. W. GROVE, E. 25c.

### EXCURSION RATE TO PACIFIC COAST.

Daily during March and April, the Minneapolis & St. Louis R. R. will sell one-way excursion tickets to points in Montana, Idaho, Washington, Oregon and British Columbia at \$15 less than regular rate. Ticket offices 512 Walnut St., and Union Station. **LEARN OPHTHALMOLOGY**—a new profession, by mail. Earn not less than \$2,000 annually. Diploma in six weeks. Address Box 512, Guthrie Center, Iowa.

**GIVE** a new device for your farm implements to whip up the lead horses from the driver's seat. Circular free. Robert Schroeder, Morrisonville, Wis.

**MANURE** AUTOMATIC GATE. Semi stamp to secure valuable souvenir free. Manure Gate Co., Milton, Ind.

## HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

A handy hog trough and one which will always be right side up is made as follows: Spike a 2x8 on each edge of the 2x12. Fit in four end pieces, say 2x4's, and you have a trough on each side of the 2x12 plank. If a hog tips the trough over there is a trough always right side up. H. D. C., of Craig, Neb., sends this hint and states that he finds these troughs handy in so many ways that he always has a good supply of them on hand.

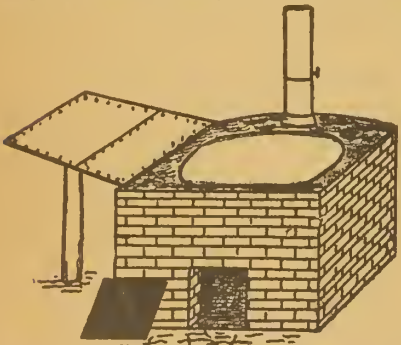

An Illinois farmer writes in one of the exchanges that a very simple and convenient rack for hauling fodder may be made according to the diagram. The hind part of a wagon is used and a temporary pole tongue is made to fit

A SIMPLE RACK FOR HAULING FODDER.

where the reach usually does. The rack is then attached, by means of a cross-piece which extends past the hounds of the bolster and hold the rack to the wagon. The poles are attached at the rear with a cross-piece and a stand completes the affair. One man can place a good load of fodder on this rack in a short time.

J. R. S., Danville, Iowa, writes: "I have seen almost all kinds of schemes for heating slops for hogs, but have seen none in your paper like I am using. I bought a ninety-gallon east-iron kettle or caldron, around which I built a brick furnace, then plastered it well with cement and left an opening for a fireplace and chimney. The total cost

was about \$20 and I cannot see why it will not last a life-time. Very little of the heat ever escapes and when once the contents of the kettle are warm they cool off very slowly, since the brick surrounding the kettle act as a non-conductor. I build a fire under the kettle in the morning and when once a good bed of coals is started the furnace will supply enough heat to keep the slop from freezing on the coldest day. For a door to the furnace I use a piece of sheet iron. To regulate the draft the sheet iron door may be placed tight or loose over the opening. Any kind of fuel can be used, but I find coals, old posts and lumber perfectly satisfactory."

### Soft Harness

You can make your harness as soft as a glove and as tough as wire by using Eureka Harness Oil. You can lengthen its life—make it last twice as long as it ordinarily would.

## EUREKA Harness Oil

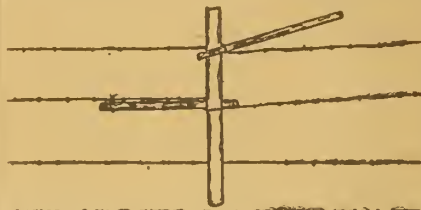

makes old harness like new. Made of pure, heavy-bodied oil, especially prepared to withstand all weathers.

For all axle troubles use **Boston Coach Axle Oil**. Better and more economical than castor oil. Will not gum or corrode. Lasting, reliable, satisfactory. Highest Award, World's Columbian Exposition.

**SOLD EVERYWHERE—ALL SIZES**  
Made by Standard Oil Co.  
Incorporated

Some form of cover for the kettle should be provided to conserve the heat in the slop. An ordinary wooden cover papered on one side with a good roofing paper makes a very satisfactory top. It is surprising how much longer the slop will remain warm when covered than when exposed to the air.

"In building wire fence," writes W. B., Gordon, Neb., "a great many people use small stays between the posts. I find these stays are very handy when it comes to tightening up slack wire. My plan is to take a strong stick, make a loop in the wire and twist it around the upright stake until the wire is as taut as desirable. The end of the stick then is either stapled or wired to the wire in the fence. Any time after that that the

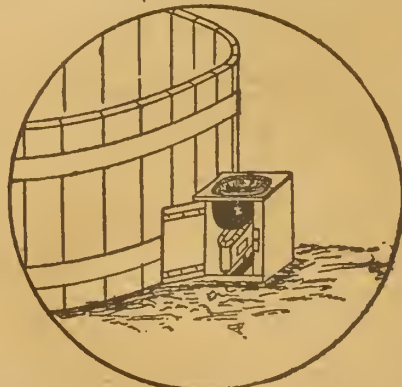

wire becomes loose the stick may be given another twist around the stay and your wire is tightened with but little trouble. With a stay every now and then in a fence the wires may be kept taut with very little trouble if this plan is put into practice."

A great many people make the mistake in hanging windows in barns and other places, where these openings are almost as much for the purpose of ventilation as for letting in light, of hanging them at the top rather than at the bottom. The window should always be hinged on

the lower side so that in opening it, it will swing from the top. Robt. Woodruff, C. E., of Utah, comments on this fact and states that a system of ventilation will be greatly improved if the windows are hung in this manner. Likewise, there will be much less danger of a draft over the stock and through the buildings. As the air comes in from the top of the window it strikes the wall and is diffused throughout the room, where if it comes in at the bottom it strikes direct on the stock which are near by.

And still the hints for keeping hog waterers from freezing pour in, and from among the many good ones we select one which W. H. W., of Henry, Ill., describes as follows: "The hog waterer is an ordinary patented cup affair and is attached to a large supply tank at a distance from the ground where the hogs can drink from it readily. Below the waterer the

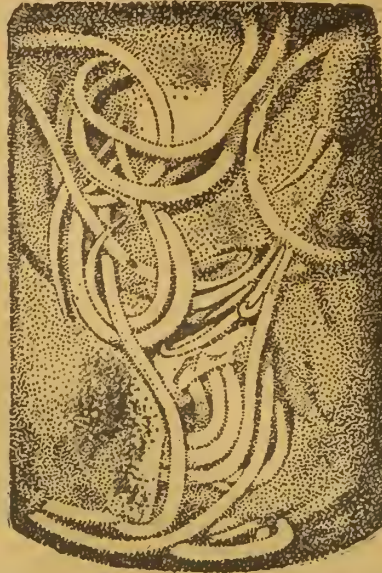

ground is dug out deep enough to allow a small coal-oil camp stove to be set under the waterer. The whole affair, hog waterer and camp stove, is boxed in on the sides and a top piece is fitted to the box so that it encloses all but the drinking place. On one side of the box there is a hinged door through which the camp stove may be tended. The waterer can be kept at any temperature that is desired, and I think this is a very simple, yet satisfactory manner of solving the question of keeping the herd supplied with warm water during cold weather."

### Hen's Eggs Wanted.

We've always had the "pie habit;" now we're coming into the limelight as egg eaters. Each year 80,000,000 hungry Yankees want more "hen fruit" than sufficed for the previous year. It's really getting to be quite a serious question how we're going to get 'em fried, poached and scrambled in quantities sufficient to satisfy us. Supply doesn't seem to keep pace with demand, which fact accounts for the other fact, that lots of times we don't get any eggs at all.

## Chief Cause of Hog Losses

This exposure shows stomach and intestines taken from a twenty-five pound shoat, full of intestinal worms.

This shows liver of same shoat, with worm in Bile Bladder, X mark showing location. The duct through which worm has come was split with a knife to show the worm.

### To Whom It May Concern:

During the month of August, 1906, my shoats got sick, and a number of them died. On August 27th, Mr. Deal, representing the Iowa Stock Food Company, called at my place and told me my hogs were dying on account of worm trouble. In order to make sure of this, we killed one pig. On examination we found the stomach and a portion of the small intestines full of intestinal worms. Some of the worms had worked their way through the bile duct and into the bile bladder and liver.

The jar that Mr. Deal carries with him contains the liver, stomach, intestines and worms taken from this shoat. If anyone doubts this and will write me, I will, if necessary, go before any notary public and make oath to the above fact.

I fed Iowa Worm Powder to the balance of my pigs. It cleaned them of worms, and I had no more losses. Iowa Worm Powder will accomplish all that is claimed for it. I never saw anything that would remove the worms so effectively. I also consider Iowa Stock Food the best appetizer and conditioner I ever fed. The feeding of these products has saved me my crop of pigs. Anyone can be convinced of their value by using them.

Very truly,  
G. L. POULSON.

**FREE!** To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing. Address Dept. A

**IOWA STOCK FOOD CO.,** Jefferson, Iowa

Now, if you travel about the country and keep your eyes open, you will be convinced that there are hens enough in sight to give every man his "two soft" seven mornings in the week, if each hen did her full duty. Which observation brings us right square to the point where the "screw is loose"—they don't do it. No fault of the hens, either. The real trouble is, the henman doesn't know his business, or else he neglects it. He doesn't treat his hens in the way self-interest would seem to dictate. You can't expect a lot of hens confined in a closed house or yard, with no systematic or rational effort to supply what they would get in a natural state to make a profit for the owner! Now, if you are planning to make your whole living, or even your "pin money," out of hens, there are two or three things you should certainly remember: First, don't be satisfied with scrub hens; second, and here is the real point) don't attempt to keep them without giving a regular daily ration of a good tonic. Nothing in hen culture gives so large a return as this one thing, and the only tonic to use is Dr. Hess Poultry Pan-a-ce-a, prepared by Dr. Hess & Clark, of Ashland, Ohio, and sold by all dealers. This has been the experience of all successful poultrymen. This preparation is not a stimulant, like pepper or something of the kind that excites unnatural production for a time. Dr. Hess Poultry Pan-a-ce-a does its work in a different way by assisting the hen to fully digest her food and send each element to its proper part in the hen economy. Thus, a daily feed makes bone, flesh, feathers and eggs, each to the extent of proper elements in the food. Dr. Hess tells us that Poultry Pan-a-ce-a is a true scientific preparation. It is the result of painstaking experiment in his own yards. So certain are Dr. Hess and Clark of the wonderful value of Poultry Pan-a-ce-a and Instant Louse Killer, that they cheerfully give a written guarantee that it will do all they say. If it doesn't, you get your money back. Considering cost of ingredients and care taken in manufacture, these goods are remarkably cheap. It costs but a penny a day to feed thirty hens.

### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

### CHEAP ONE-WAY RATES.

Every Tuesday during March and April, the Minneapolis & St. Louis R. R. will sell cheap one-way excursion tickets to points in Minnesota, North and South Dakota and the Canadian Northwest. Rate is \$14 to most North Dakota points. Buy tickets at 512 Walnut St., or Union Station. For further information write W. K. Adams, Dist. Pass. Agent, Des Moines, Iowa.

The Homestead and the Homemaker  
\$1.25 per year.

## PATENTS

If you have a new device which can be patented, it may make you a fortune if properly protected. Send sketch or model of your device for free opinion as to patentability. Among our clients who have made money out of their patents we refer you to the following: Wm. F. Gould, Des Moines, Ia.; Wm. H. George, Dexter, Ia.; H. H. Munson, Truro, Ia.; Franz J. Wood, Des Moines, Ia.; Gould Balance Valve Company, Kellogg, Ia.; P. H. Van Gorp, Pella, Ia.; Stocking & Mendenhall, Audubon, Ia.; Wm. W. Robinson, Des Moines, Ia.; Victor Landholm, West Point, Neb.; Samuel G. Scholz, Billings, Mo.; Benjamin F. Booth, Indianapolis, Ia., and many others we will name on request. Upon examination of your device we can tell you whether or not you can secure a patent. We have the largest and best equipped patent offices in the west. We also have Washington offices. As reference we can give you The Homestead and many other papers, any bank in Des Moines, a large number of manufacturing concerns throughout the west, and other clients. If you have an idea, write us for full information as to how to protect it fully.

**ORWIG & LANE,**  
408 Crocker Bldg., Des Moines, Ia.

## PATENT YOUR IDEAS

\$100,000 for one invention; another \$8,500. Book "How to Obtain a Patent" & "What to Invent" sent free. Send rough sketch for free report as to patentability. We advertise your patent for sale at our expense. Patent Obtained or Fee Returned. **CHANDLER & CHANDLER, Patent Att'ys,** 956 F. Street, Washington, D. C.

## The "STAY THERE"

**Aluminum Ear Makers** are the best. Being made of aluminum they are brighter, lighter, stronger and more durable than any other. Let any part of the ear. Nothing to catch on feed trough or other obstacle. Your name, address and any series of numbers on each tag. Sample tag, catalogue and prices mailed free. Ask for them. Address **WILCOX & HARVEY MFG. CO.,** 107 Lake St., Chicago, Ill.

## MACK'S LUMP JAW CURE

Oldest Remedy on the Market. One bottle cures three to six head. \$2.00 per Bottle. **MACK BROS. & CO.,** Spencer, Ia.

## MAKE MONEY

pulling stumps, grobs, etc., and clearing land for yourself and others. Hercules Stump Puller is the best. Catalog FREE. **Hercules Mfg. Co.,** Dept. B70, Centerville, Ind.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### DOCTOR'S CHARGES.

A Subscriber, Lincoln, Iowa.—I was sick for some time. My regular home doctor came regularly every week to see me professionally. As he was on his way to visit me one day, he telephoned me that a doctor from a neighboring town was there, and if I had no objection, he would bring him along, just to see what he would say about me, so he came and examined me, but did not prescribe or give any medicine. I did not employ him, nor authorize my home doctor to do so. He has recently sent me a bill for a full fee. Can he compel me to pay the bill?

Answer.—He cannot collect the bill by law. He was not employed by you, nor asked to come. He has no lawful claim upon you, so refuse to pay the bill.

#### VETERINARY PRACTICE—BAD DEBT.

A Subscriber, Eddyville, Iowa.—A is a student of a veterinary correspondence college, but is not a graduate. (1) Has he a right to practice as a veterinary in Iowa? (2) If not, and he should practice, nevertheless, what would be the penalty? (3) What is required of him in order that he may practice? (4) What is the cost of obtaining license or authority to practice? (5) A is standing a stallion for B, on shares. C has a judgment against A. Can C stop payment of B's share of the service fees in satisfaction of such judgment? (6) How will C collect his judgment from A when A has no property, his wife owning all of it?

Answer.—(1) He has not. (2) Fine not less than \$25 nor more than \$100, or imprisonment in county jail not more than thirty days, for every offense. (3) To be a graduate of a legally chartered and recognized veterinary college, or veterinary department of a university or agricultural college, and also to pass the examination of the state board of veterinary medical examiners. (4) Fifteen dollar. We do not see how a student of a veterinary correspondence college, without other means of education, could ever become a competent horse doctor—could a fellow learn to swim by correspondence? (5) He cannot. (6) When you find out how to get blood out of a

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

## "The Encyclopedia of Iowa Law."

"No work like this has ever been published in the English language." From The Homestead.

"Your book is the only one I have seen on which I can place any reliance." The Hon. H. E. Deemer, Judge of Supreme Court.

"I would not take one hundred dollars for it if I could not get another." W. W. Hagin, R. F. D., Union, Ia.

"No fifty volumes, and I might safely say, not even a hundred volumes in my library could be selected that would be to me of so much practical use what the law is in Iowa on a given question, or advising others as to the law." Judge C. B. Bradshaw.

"The laws of Iowa need no longer be a sealed book to the people of Iowa." Register and Farmer.

## This is Huttig

Yes, sir, — I can afford to stand back of my roofing because, it stands back of me, and makes my word good as gold. I want you to read every word of this advertisement. I wrote it myself, and you can take it from me that whatever Huttig tells you about roofing is so.

*H. W. Huttig*

President Huttig Manufacturing Co., 707 East Second St., Muscatine, Ia.

# I Stand back of Huttig's Rubber Roofing

With a Written and Personally Signed, Legally Binding Guarantee

MY roofing,—known far and wide as HUTTIG'S RUBBER ROOFING—is a "money-back" roofing in FACT as well as in NAME. I give you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt. That's why! That's the secret of my success with roofing.

Asphalt comes from the famous Asphalt Lake in the Island of Trinidad. About 100,000 tons are brought to this country every year, and a large part of this is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad Asphalt, which protects every particle of the fiber.

Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

Other rubber roofings, which have to de-

pend on Texas and California Asphalts (products of petroleum oil), crack in the winter and "run" in summer.

Test it for yourself. Send for sample of HUTTIG'S RUBBER ROOFING and the others—then do this—Get a small quantity of sulphuric acid from your druggist. Put in the sample of HUTTIG'S and the other roofings. Let 'em soak for 24 hours, and note results.

Remember, that the very gases that constitute sulphuric acid are found in the atmosphere, and it is their chemical action that causes roofings to decay.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc., to lay it.

It can be laid on a flat or sloping roof, across or with the slant of the roof; or on the sides of a building it makes an excellent storm protection.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have use for roofing this season, you want the best, which is the cheapest in the long run.

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad, I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it

Anyway, write for a big, free sample of my roofing and let me send you Booklet B, and special Iron-clad Roofing Guarantee. Write me personally, and do it to-day.

turnip that has no blood in it, we will tell you how to collect a judgment from a man who has no property.

#### TRESPASSING HOG.

A Subscriber, London Mills, Ill.—A and B are neighbors, and own adjoining farms. C owns land adjoining both farms. A's hog broke through C's fence and went from there over a corner of C's land and got into B's field. B tried to get the hog back upon A's land and the hog got overheated by exertion and died. Who is liable for the loss of the hog?

Answer.—B had a legal right to try to get the hog back home on A's land, by either driving it, or by any other reasonable means, and if he did this without negligence or carelessness, as a prudent humane man would do, he is not liable, and the loss must fall upon A, the owner. If, however, B was unnecessarily violent, cruel or careless in getting the hog back, he may be liable.

#### WILLOWS ALONG ROAD.

An Iowa Subscriber.—On the north side of my farm dividing my field from the public road there is a willow row planted about twenty years ago. I use the willows for a windbreak for my fields, and for wood. There is a three-wire (barbed) fence on this line, the wires being fastened to willows which were topped off. Beyond this line in the roadway is another row of willows planted more than twenty years ago. Both rows were started before the road was established. No one ever objected to the willow rows. I have owned the farm eleven years. Nine or ten years ago I cut down both rows of willows and used the wood, and cleared all brush from the road. I have received notice from the township trustees to cut down all the willows standing in the road and take them away, and to trim the willow hedge along the road within sixty days. (1) Can the willow row on the line between my field and the road be legally considered a hedge? (2) Can the township trustees compel me to trim the willows? (3) After once cutting down and removing the willows growing on the roadway can I be compelled to do so again? (4) In case I cut the willows in the road and take the wood, am I required to clear the brush from the road?

Answer.—(1) Being used as a fence, the row of willows between your field and the road would undoubtedly be considered a hedge within the meaning of the section of the code requiring hedges to be trimmed back. (2) Section 1570 of the code provides that owners of any hedge fence along the public road, unless the same shall be used as a windbreak for orchards or feed lots, shall keep the same trimmed by cutting back within five feet of the ground at least once in every two years, and burn or remove the trimmings from the road, and on failure to do so within sixty days after written notice, the supervisor may do so and make returns to the clerk of the township and the cost is added to the

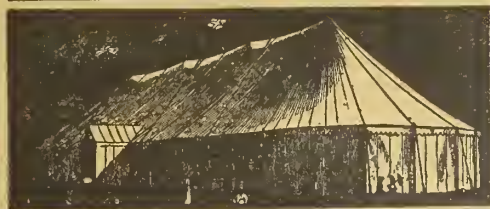

## THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills. TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog.

TONIC STOCK FOOD CO. ELGIN, ILL.

owner's taxes and collected the same as other taxes. (3) You cannot, unless you want to use the willows for wood. If you do not claim them for such purpose, it is the duty of the road authorities to clear the road. (4) you are.

#### SALE OF A BULL.

A Subscriber, Galva, Iowa.—In December, 1905, I sold a bull calf a year and a half old to a purchaser at public sale. No guarantee was made of the animal at the sale. I took a promissory note for the price of the calf. Afterwards the purchaser came back and claimed that the calf was injured. After some talk about it I offered to allow him \$10 off the price, but he was dissatisfied and now refuses to pay the note when due, and says I will have to sue for the price. What can I do about the matter?

Answer.—If you made no false representations about the bull calf when he was sold, and gave no guarantee about him, the purchaser is liable to you for the full amount of the note and you can sue him and recover judgment for the full amount.

## BOWSHER

(Sold with or without elevator) CRUSH ear corn (with or without shucks) and GRIND all kinds of small grain. Use Conical Shape Grinders. Different from all others.

## LIGHTEST RUNNING.

Handy to Operate. 7 Sizes—2 to 25 h. p. One size for wind-wheel use.

## HARDY SWEET CHESTNUT TREE FREE

**Reserved 10,000 Trees**

for this free advertising distribution and if you want one of them write at once as they will go quickly. Our catalog containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens etc., with a mine of valuable information for fruit-growers is free for the asking. Write today.

The Gardner Nursery Co., Box 702, Osage, Ia.

## SEED CORN

The Iowa corn crop is worth more money than all the mines in the United States. Will it pay you to spend 50c per acre to increase your yield 25 bu.? It will.

We can furnish you seed corn that has breeding back of it. "Why?" "Because."

We have been breeding the best varieties for years.

We have a \$14,000 equipment for handling it. We have experts to grade it and select the best. We have 1,200 acres of the best land in Page county devoted to its growth.

We have graduates of Agricultural Colleges in

our employ who have conducted an Experiment Station.

We have made frequent shipments to the Department of Agriculture at Washington, D. C.; which proves our ability to produce the best type of seed; in fact we have spared neither time nor money to make the seed the best that can be produced.

Send for our 1907 illustrated catalog which gives full information as to our method of handling seeds of all kinds. Send for it today. IT IS FREE.

A. A. BERRY SEED CO., Box 52, CLARINDA, IA.

## KHERSON SEED OATS.

THE NEW KHERSON OATS were originally imported from Russia by the Nebraska State Experiment Station, and have proven one of the surest croppers and largest yielders, as well as best sorts ever introduced into this country. THEY DO NOT RUST OR LODGE as many other sorts do, and are fully two weeks earlier than others. In addition to these we have the New Sensation, Early Champion, Lincoln, Texas Red-Rust proof and other extra early sorts. Prices 50 to 75c per bushel, bags included. Write for our Big Illustrated FREE Catalog. A postal will bring it. Address,

RATEKIN'S SEED HOUSE

SHERANDOAH, IOWA

## WE BUY OLD BAGS

Send your grain, feed or cottonseed meal sacks to us and receive highest prices. We are paying some customers from \$10 to \$20 a month for second-hand sacks. Tell us what you have and we will gladly quote prices. Write today.

ST. LOUIS BAG & BURLAP CO., 303 N. Main St., St. Louis, Mo

## SELECT GARDEN SEEDS

Send us 5 two-cent stamps and we will send you 5 full sized packets of Garden Seeds that have been tested—any varieties you may select. We will also send our large new Catalog for 1907 telling you how you can get one acre of pure bred seed corn free, or how you can get 5 packets of garden seeds free.

Write today. We will do exactly as we agree to,

Box 12 NISHNA VALLEY SEED CO. Hamburg, Iowa.

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16 W. W. VAN SANT & SONS Farragut, Iowa.

## BURPEE'S "Seeds that Grow"

are proved the Best Seeds that can be grown. We do the testing.—You run no risk! If you garden either for pleasure or profit you should study "The Leading American Seed Catalog." A postal card will bring you a copy, by return mail.

W. ATLEE BURPEE & CO., Seed Growers, Philadelphia, Penna.

## WRAGG TREES GUARANTEED

WE PAY FREIGHT. We Grow Our Own Stock and Guarantee it to be the best on the market. We have a full line of TREES, SHRUBS, ROSES and EVERGREENS, etc. which we will ship you on approval, freight prepaid.

Why not order Evergreens, of which we make a specialty, for a wind break for your home? We guarantee lowest prices on everything in our line. Write for free cut-rate price list.

M. J. Wragg Nursery Co., 330 Good Block DES MOINES, IOWA

## SEED CORN

NEW GOLDEN WEST and all the best varieties of choice, selected, thoroughly tested seed corn, which have yielded 75 to 216 bushels per acre. Costs Only 25 cents Per Acre for Seed. Large, descriptive catalog of Seed Corn and all kinds of Farm and Garden Seed mailed free if you mention this paper.

IOWA SEED CO., DES MOINES, IOWA

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### How to Make a Good Lawn.

To the Editor of The Homestead:

"How shall I make a good lawn?" "When?" "Can I make it myself?" are questions heard continually. For the benefit of those who cannot have the work done by some competent man I will briefly describe the method that gives the best satisfaction.

Seeding is the plan usually adopted, and the one recommended by all good landscape gardeners. The turfing of large lawns is seldom resorted to now. It is too expensive and it is a difficult thing to obtain good turf. When practicable, the preparation of the soil for the lawn should be made in the fall. After the necessary grading has been done and a general level formation of surface established, let it be again thoroughly plowed, harrowed and well pulverized and then raked smooth, even surface and as fine as possible. Have it as nearly alike all over as possible—that is, make it as compact in one place as another to prevent unequal settling. Spread a coating of well-rotted and thoroughly-pulverized manure over the ground, if the soil is somewhat poor. Do this in the fall if you prepare your lawn at that season. In the spring go over the ground with a fine-toothed iron rake and work the manure into the soil.

Now sow the seed, and always use a liberal quantity. The cost of the seed is a very small item of the expense of making a lawn, and it is always desirable to have a thick, close turf as soon as possible, therefore sow seed thickly. With thick seeding we can accomplish in one season what it may take several seasons to bring about from thin seeding. It is estimated by those who have had large experience in the making of lawns that it is advisable to sow at the rate of four bushels to the acre, or a little over one bushel to 100 feet square, in order to secure the thickest and most satisfactory results. Finish off by rolling the ground with a moderately heavy iron roller. If the ground is prepared this fall and seed is sown in April or May, next spring you can have a nice, velvety lawn by August. If the turf is thin in spots, scatter more seed there, raking it in lightly.

If the soil be poor, it will be necessary to enrich it each year by scattering fine manure over the sward in the fall. If it is not very fine, the rake should be used in the spring to remove the large portions which would seriously interfere with the working of a mower. If neglected it will show it at once. A much thicker, better turf is secured by mowing at least once a week through the season.

Mrs. A. F. Sorensen.

Howard county, Neb.

### Small Fruits on the Farm.

Strawberry plants should be set every eighteen inches in rows three and one-half feet apart. Uncover in the spring after the frost is out and before the plants heat and mold. Leave the mulch between the rows until after picking is over. Immediately after the last picking mow the field and burn or haul off the litter, and commence cultivation, and continue as before until frost comes. There is some tedious work connected with the renewing of the field for each succeeding crop, so that one must sit down to rest and refresh himself. The victory lies in the getting up and continuing again.

Currants and gooseberries should be planted three feet by six feet and black and red raspberries, and blackberries three feet by seven feet. They require little or no pruning the first season, except pruning off the tips of the black raspberries and blackberries at two and a half feet. The following spring, the old wood is removed from the raspberries and blackberries and laterals cut back, making a neat bush. By cutting the weak growth to one foot and strong ones to one and one-half feet it induces large berries.

At this time a support is given them by setting posts each side of the row and bracing the ends. Then staple a No. 14 wire about twenty-two inches from the ground twenty-eight inches for blackberries. This support is quickly made, not particularly expensive and lasts a number of years. In giving the sup-

## .. A PERFECT STAND ..

That is what those who use Delany's Seed Corn Sorter get.

You can easily estimate what that means in dollars and cents.

The time saved in planting alone will more than pay for the device.

It is cheap, easy to operate and has large capacity.

It holds the corn until the separation is perfect and does not fall over good seed as continuous flow machines do.

It also removes all dirt, chaff and irregular shaped kernels which tend to clog the planter.

Used and recommended by hundreds of farmers.

Send for free Seed Corn Booklet C, showing our line of Sorters. Get your orders in early.

J. F. DELANY, : COLONA, ILL.

### Berry Boxes and Baskets

Fruit and Vegetable Packages of every kind. Send for catalog E.

New Albany Box & Basket Co., New Albany, Ind.

Some farmers sow 50 to 100 acres every year and it produces immense crops. Sample and large, illustrated catalog of farm and garden seeds free if you mention this paper.

**IOWA SEED CO., Des Moines, Iowa.**

and hold moisture better. During the season pinch the tips out of the new sprouts. Watch very closely and go over them several times and as soon as the black raspberries get up three feet and blackberries three and a half feet, cut them off that day. If the sprout is left growing till it gets four or five feet it seems to stunt the growth, and a weak plant is the result. In taking out this tip it induces several branches rather than the single whip-like sprout. The object is to get more fruit-producing surface. A dust mulch is maintained during the picking season if it is very dry.

Red raspberries should be trimmed in the spring. The old wood and weak, fine wood is removed. The tops of the new wood cut back to three feet.

The old wood in currants and gooseberries does not die each year as in the other berries, so they don't need as much trimming. The oldest wood is only removed to throw more strength into the remainder of the bush and to let in the sunlight.

The enemy of the currant and gooseberry is the currant worm. This is easily controlled with the Bordeaux mixtures, same strength as for spraying apples. Spray before the worms come and prevent any injury. They will surely come. The anthracnose is the enemy of the raspberry. The only sure method of preventing its spread in the field is to dig out the whole bush and destroy it. In the blackberry is the rust, a new disease or affection with us, and we want some information as to prevention and eradication. There is also a small worm resembling the currant worm, that eats the leaves off the young sprouts of the blackberries. It may be that we will have to spray the blackberries to insure a crop.

Grapes should be planted under the same condition as mentioned before, set twelve feet each way. After the second year they should be trained on a trellis six feet high, using four wires. Grapes need plenty of sunlight to prevent mildew. Trim the new wood back to two buds and induce and save the new sprouts from the ground to replace the old above. Spray just as the growth starts in the spring with Bordeaux mixture and continue each week or ten days until the fruit is the size of a pea.—(W. R. Soverhill in Illinois Horticultural Manual.)

#### Starting Young Cedars.

To the Editor of The Homestead:

Regarding an inquiry from one of your subscribers about how to make cedar berries grow, will say that they must pass through a fowl of some kind. My neighbor gathered the seed or berry from the tree and fed the same to some turkeys he had shut up for that purpose. He then cleaned the coop and planted a bed in the garden and raised a nice bed of young cedar trees.

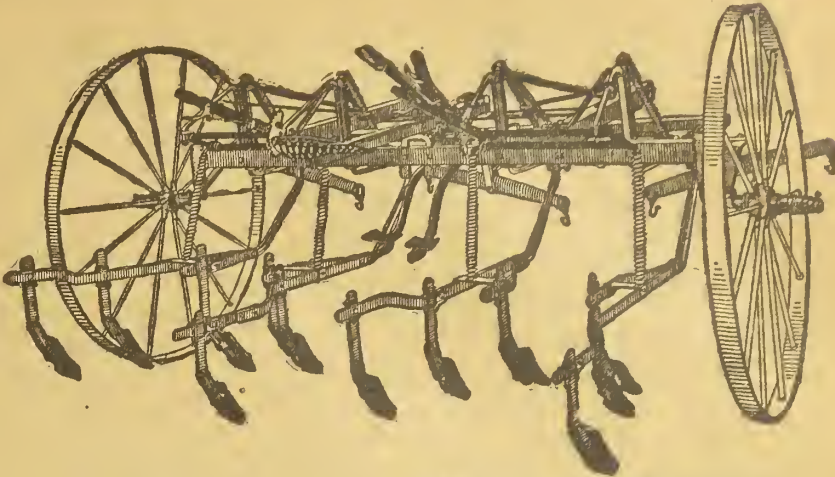

Boone county, Iowa. D. O. W.

#### Ornamenting the Lawn.

To the Editor of The Homestead:

All walks and drives on small lots should be direct. The planting of trees and shrubs or the placing of the fountains and flag poles in the course of a walk which will cause the traveler to deviate unduly from his natural course, is a common but objectionable arrangement. On small areas, walks and drives should be straight unless there be good reason, because of the contour of the surface, for making them curved. In more extensive areas, where the grouping of shrubs becomes an important factor in the construction of the place, curved walks and drives are most pleasing and effective.

With trees, shrubs, vines and herbaceous bedding plants, pleasing contrasts can be produced. Each plant or group of plants has an expression peculiarly its own, and when used with suitable surroundings the effect is pleasing. While each of the plants possess an intrinsic decorative value, this value is enhanced in proportion to the perfection of the greensward in which it is set. Green grass is not only useful as a covering for the earth, but it is of itself beautiful. It forms the canvas for our picture. A perfect lawn is one of the rarest possessions of either public or private establishments. A good lawn demands great skill and judgment in its making as well as in its maintenance. The difficulties of lawn-making becomes more accentuated as the heavy clays and clay loams of the North and West are replaced by the light, sandy soil of the South. The superb Kentucky bluegrass,

## A Boy and Three Horses Can do the Work of Two Men and Four Horses

When your corn needs cultivating it needs it bad and you know that you lose money every day it is left uncultivated.

It is true that with plenty of help it is no difficult matter to cultivate every acre at just the right time.

But—

When you need help the very worst way it is scarce and—you know how hired help cuts into your profits.

We have just issued a book on the Midland Cultivator. Those who have seen it say it is one of the most interesting and instructive books ever issued for corn growers.

There are ten articles, each one written by an expert in his particular line. Some of the writers are: O. L. CENTER, Professor of Agriculture Illinois University, A. F. WIANCKO, of the Lafayette Experimental Station, O. E. YOUNG, Secretary Michigan Corn Improvement Ass'n and F. W. TAYLOR.

### "MIDLAND" TWO ROW CULTIVATOR

Now, if you knew of a cultivator that would enable you to get on with less help you would be interested, wouldn't you?

Such a machine would pay for itself in one year.

Any young boy with three horses on a Midland Two Row Cultivator can cultivate as much corn as two men and two teams using one row cultivators.

That's the kind of cultivator you want, isn't it?

Chief of Departments of Agriculture and Horticulture, World's Fair, St. Louis

This book is FREE to every corn grower who is using one row cultivators and will write and tell us so.

Better send for a copy today. Learn more about the Midland and read the most interesting articles every written on corn growing

**MIDLAND MFG. CO.**

102 Main St. TARKIO, MO.

which produces such perfect lawns in regions with heavy soils and abundant rainfall must be supplemented by white clover as the soils become light and sandy.

The chief charm of a lawn consists in an even stand of grass of uniform color kept closely mown. In order to secure this a pure grass, such as Kentucky bluegrass, must be used, or the mixture must be so perfectly made from grasses of like habit of growth and coloring that a mottled effect will be avoided. For permanence a greensward consisting of a blend of grasses is superior to one made of a single sort. For this reason, therefore, lawn mixtures usually consist of a number of different species. The great difficulty, however, lies in securing good germination from such mixtures, with uniform lawns as a result. The fescues all grow in stools or bunches, the rye grasses are lighter in color, coarser in leaf and of more rapid growth than the blue grasses. Most satisfactory combinations, both as regards beauty and permanence, comes from mixing red-top and bluegrass.

In general, trees should stand either as single specimens in isolated positions or in irregular groups rather than in long rows. Under certain conditions long avenues of trees regularly disposed on either side of a prominent drive or vista may contribute a very pleasing and imposing effect to a large place. The general rule for trees also applies to shrubs, except that their use should be chiefly in groups or belts rather than as specimen plants, although specimen plants are of value in formal plantations. Few shrubs possess a sufficiently graceful and characteristic habit of growth to make them pleasing objects when grown singly upon the lawn, but where a number of specimens of varying habit are brought together in a single group, the differences are emphasized by contrast and the variety produces a pleasing effect, particularly if the rate and habit of growth, as well as the color and character of the foliage be somewhat different. Pleasing results in groups of shrubs do not come from large numbers of the same variety in mass, but from a harmonious arrangement of different genera, species and varieties. In order to secure the greatest pleasure from shrubs in groups, each group should represent some idea either of spirit or of rest, and always of beauty. These effects come from the habit of growth of

son for occupying the particular spot it  
does.—Bruno Nehrling in Illinois Horti-  
cultural Report.

#### Some Advice on Ginseng.

To the Editor of The Homestead:

It is a well-known fact that ginseng  
is a native of the forest and must be  
grown under conditions as nearly sim-  
ilar as those that prevail in the forest.  
The fact that the forest supply has  
been hunted so close that it has nearly  
been exhausted, has led many to at-  
tempt its cultivation. The system that  
this company has followed has proved  
very successful.

Ginseng can only be propagated from  
the seed. It has been found that it  
takes eighteen months to germinate, and  
during all of that time the seed should  
never be allowed to become dry. When  
the young plant does appear it looks  
somewhat like sprouting beans. It has  
three leaves at the top of the stem,  
rising two or three inches from the  
ground. The next year's growth is dif-  
ferent in appearance. From the last  
week in April until the middle of May  
the plant will shoot up its stem from  
four to six inches, with two branches  
and five leaves on each branch, in the  
shape of a whorl. The third year's  
growth has three branches of five leaves,  
fifteen leaves to each plant; the third  
year's growth bears seed. In July it  
produces a cluster of small, yellowish-  
green flowers, which are later followed  
with fruit resembling flattened berries.  
The color is green until in August, when  
it changes to a bright scarlet and ripens  
in September.

These berries are about the size of  
peas and produce one, two and three  
seeds in each. The root is a perennial,  
but the plant above ground is an annual;  
that is, it dies down in the fall and  
springs up again the next spring. The  
root somewhat resembles the horse-  
radish root. Being a native of the for-  
est, the plant requires shade. It must  
be protected from the sun during the  
whole summer. With us no shade has  
proved so satisfactory as lattice-work.  
This can be made of lath one-half inch  
apart at the top, while the sides are left  
open to admit the free circulation of air.  
The covering may be six feet above the  
ground on the top of posts eight feet  
apart each way, so a person can pass  
under it.

The soil selected for a ginseng garden  
should be a moist, cool one. The ground  
should be rich and mellow with some  
woods earth mixed in, and we prefer  
north or east slope. Above all, the  
drainage should be good. If planted on  
level land you should underdrain with  
tile, as ginseng will not stand wet feet.

It takes about five years to come to  
maturity; that is, to get its growth from  
the time the seed was planted. Some  
dig the root at the end of the fourth  
year, but it is best to wait until five  
or seven years, then dig carefully so  
as not to cut them and wash them thor-  
oughly. To dry the roots, spread them  
out thinly and put them where they  
will have full exposure to the sun and  
air. It generally takes three pounds of  
green roots to make one of dry. The  
root is shipped to China where it is  
used for medicine. The Chinese believe  
that it will cure all diseases, both of  
body and mind.

The large roots, somewhat resembling  
the human body shape, command the  
best price in the Orient. Many times  
these roots will sell for their weight in  
gold. The average price of the root in  
America is about six dollars per pound.  
You will find it quoted in any of the  
standard daily market reports.

Ginseng is a small plant, so that two  
hundred thousand plants can be set on  
an acre. A plant three years old will  
produce about twenty seed, while plants  
five and six years old will bear from  
fifty to one hundred seed. The present  
market price for seed is from seventy-  
five to eighty dollars per pound. It  
takes 8,000 seed to make a pound. It  
is said that one acre of ginseng is worth  
\$40,000, and we consider this estimate  
very conservative.

from the time Col. O. L. Mossman opened  
the sale until he had sold the last one of  
the fifty-eight head. Every number that was  
consigned in the sale was of either early or  
late farrow of 1906. The fact that an aver-  
age of \$38.75 was made on an offering of so  
great a size, and especially on one that was  
of Mr. Mack's own breeding, should be a  
high recommendation for the work of this  
breeder. The sale was topped by Mr. H. H.  
Kinghorn, of Dows, Iowa, at \$51 and a close  
second to that number was Mr. E. Burt, of  
Clarion, who secured one of the good ones at  
\$50. We are unable to print a list of the  
other purchasers, but are informed that the  
bidding was strong throughout and the offer-  
ing was a very uniform one. Mr. Mack is  
to be complimented on his success.

#### WORST FORM OF ECZEMA.

**Black Splotches All Over the Face—Af-  
fected Parts Now Clear as Ever—  
Cured by the Cuticura Remedies.**

"About four years ago I was afflicted  
with black splotches all over my face  
and a few covering my body, which pro-  
duced a severe itching irritation, and  
which caused me a great deal of annoy-  
ance and suffering, to such an extent  
that I was forced to call in two of the  
leading physicians of my town. After a  
thorough examination of the dreaded  
complaint they announced it to be skin  
eczema in its worst form. They treated  
me for the same for the length of one  
year, but the treatment did me no good.  
Finally my husband purchased a set of  
the Cuticura Remedies, and after using  
the contents of the first bottle of Cuti-  
cura Resolvent in connection with the  
Cuticura Soap and Ointment, the break-  
ing out entirely stopped. I continued the  
use of the Cuticura Remedies for six  
months, and after that every splotch  
was entirely gone and the affected parts  
were left as clear as ever. The Cuti-  
cura Remedies not only cured me of that  
dreadful disease, eczema, but other com-  
plicated troubles as well. Lizzie E.  
Sledge, 540 Jones Ave., Selma, Ala., Oct.  
28, 1905."

## Why we make 50,000 miles of fence every month.

Every year since wire fence came into use, we have made and sold more wire fence than all other fence-makers combined. With the largest output at all times during the remarkable growth of the wire fence industry, we always bid highest for fence brains. These master minds of steel-wire-making have never stopped working on wire-fence improvements.

And we make 50,000 miles of fence every month—enough to go twice around the world—because the discerning American farmer demands that much

# AMERICAN FENCE

That's over 80% of *all* the wire fence sold, which means that four out of five farmers demand American Fence.

Now, four out of five American farmers are not *wrong* on this fence question. They know that whenever they need fence, they can always be sure that American Fence is the best fence ever produced up to that hour and minute.

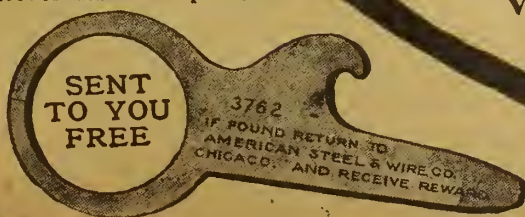

Recent improvements in galvanizing make American Fence longer lived, make it cost you less per rod per year's wear, though the price remains the same.

**NOTE**—I want to send you the combination key-ring, shown in the corner, *with our compliments*, as a continual reminder of American Fence. We register your name and number on our books, and return keys, without cost, if found and sent us.

Frank Baackes, Vice-Pres. and Gen. Sales Agent  
American Steel & Wire Co.  
Chicago, U. S. A.

Drop me a postal and tell me how much fence you will need this year.

I will write you a personal letter about American Fence and send you this combination key-ring, screw-driver and bottle-opener.

KIRKWOOD, MO.

## BIG MONEY IN POULTRY.

Our big Poultry Book with many new illustrations tells how to make it; also how to feed, breed, grow and market Poultry for best results. Plans for houses and a great mass of useful information. Tells how to start small and grow big. Illustrates and describes the largest pure bred Poultry Farm in the world; tells about our many varieties, quotes lowest prices on Fowls, Eggs, Incubators and Brooders. Mailed for 4c.  
FRANK FOY, BOX D, DES MOINES, IOWA.

## 125 Egg Incubator and Brooder Both \$10

If ordered together we send both for \$10 and pay freight. Hot water, copper tanks, double walls, double glass doors. Our free catalog describes them.  
Wisconsin Incubator Co., Box 71, Racine, Wis.

## SHOEMAKER'S BOOK ON POULTRY

and Almanac for 1907 contains 220 pages, with many fine colored plates of fowls true to life. It tells all about chickens, their care, diseases and remedies. All about incubators and how to operate them. All about poultry houses and how to build them. It's really an encyclopedia of chickendom. You need it. Price only 16c.  
C. C. SHOEMAKER, Box 1215 FREEPORT, ILL.

## Hatch 'Em Easily

Don't waste eggs on hens, put 'em in a Poultry Leader Incubator and get chicks in plenty. It is Guaranteed. Glad to send free my handsome, new, illustrated catalog. Write now to Emil Ochsner, Box 17, Sutton, Neb.

A Hundred Per Cent  
Petaltuma Incubators

They are the oldest and most reliable machines on the market. Results are uniform and always high. Redwood and copper materials. Devices purely automatic and sure. Write us for free catalogue.  
PETALUMA INCUBATOR CO., Box 2, Petaluma, Cal. Box 2, Indianapolis, Ind.

## POULTRY PAYS

Our Book, "Poultry Pays" showing 35 best paying varieties, mailed for 10 cents.  
Delavan Poultry Farm, F. E. R. Goetz, Manager, Box 35, Delavan, Wis.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

## ARE GEESE PROFITABLE TO RAISE?

That depends upon circumstances. Given plenty of grazing room, there is little doubt that they can be made to yield a good profit. They seldom die of disease, which is a big factor in their favor. Lice never trouble them, and roup never attacks them. They are easily kept within bounds, as a fence three feet high will confine them. They improve with age, as they are useful as breeders for ten or twelve years. An open shed is all the shelter they require, so expensive houses may be left out of the question. While they enjoy a pond or lake, a tub sunk in the ground may be made to answer their purpose.

Geese grow very rapidly, reaching ten or twelve pounds when ten weeks old, at which age they bring a good price in many markets as green geese. When full grown they bring large prices which have materially increased with the price of other kinds of poultry.

As long as grass is plentiful and with in their reach they need no grain, and even in the winter a moderate amount of grain will keep them in excellent breeding condition. The feathers are an important item, bringing at present prices more than enough to pay for their keeping in the non-laying season. The goslings will grow if allowed nothing but grass, but for the best results in size and vigor some grain should be fed.

One experienced breeder gives seven reasons why he considers geese more profitable than chickens or turkeys: First, no lice; second, no roup; third, no diarrhea; fourth, no houses to clean; fifth, no expensive yards; sixth, no expensive buildings; seventh, can be kept on land good for nothing else.

The breeding of geese requires common sense, a liking for the business, patience, perseverance and grit. With less outlay in the way of equipment required, and the necessary qualification that make for success in any pursuit, good money may be made in the rearing of geese.

## POULTRY PARAGRAPHS.

In packing dressed poultry for shipment, turn the head of the bird back under the wing.

The broiler weight in March is one and one-quarter pounds each; April, one and a half pounds; May, one and a quarter to two pounds.

Experiments tried by the writer show that a fowl will consume about three ounces of the morning mash, two ounces of grain at noon, and four ounces of grain at night.

Success in poultry culture, like success in all vocations, depends upon the quality and quantity of brain work put in the enterprise.

Cockerels with spurs are classed with old fowls in market. Pullets, as broilers, having large combs (like the Leghorn) are cut in price, as it gives them an older look.

Busy fowls are always healthy. When a hen droops, gets up into a fence or house corner, or hugs the roost in day time, there is something wrong. Better look into it.

The so-called "Philadelphia" broilers, roasters and capons, are not a product of Philadelphia at all. They come from the state of New Jersey and Pennsylvania—principally the former.

For a general poultry farm, where eggs, broilers and roasters are to be produced, three breeds should be kept: Mediterranean for summer eggs; American for small roasters, broilers and winter eggs; and Asiatic for large roasters and winter eggs.

In marketing, quality counts: poor stuff goes a-begging. The head must remain on dressed carcasses. Market chickens of uniform grade, color and size, small, poor, scraggy birds, half-dressed, always meet with poor returns. A "large roaster" means a plump, soft chicken of four or five pounds weight. Old cock birds have a special classifica-

From a practical standpoint hens are simply egg machines. They take the feed, convert it, and lay the eggs. But like every other kind of machine, to do the most work, the hen must be in perfect order. The digestive apparatus is the important factor in egg production. Many poultrymen feed an abundance of good albuminous food such as should produce a profitable egg yield, but if the digestion is impaired and the egg-organs dormant, no amount of food will produce the desired results. But give the fowls a tonic to increase the digestion, a little iron for the blood, and regulate the system generally, toning up the egg-organs and you are certain to get eggs even in the coldest weather.

DR. HESS  
Poultry PAN-A-CE-A

the prescription of Dr. Hess (M. D., D. V. S.), contains all these principles to increase egg production and cure cholera, roup, indigestion, etc. It has the indorsement of leading poultry associations of the United States and Canada, costs but a penny a day for about 30 fowls and is sold on a written guarantee.

tion, and do not come under the head of "large roasting fowls."

Too-fat is no disease, but it is an unhealthy condition. Many diseases and troubles can be laid to overfeeding.

Can any one give a good reason why the farm flocks of the country should not yield many times the eggs they do? While we would not force the breeders; they cannot help laying some eggs if kept warm and properly fed. One great point lies in securing a variety of food. They will not lay on corn alone, nor any other grain alone. They need animal food of some kind, green or vegetable food as well as grain. Warm housing at night is also necessary. Water in abundance helps to fill the egg basket. Incidentally, this means filling the pocket book also. Hens left to shiver in the trees when the temperature hovers about the zero point or below, cannot

## GREIDER'S FINE CATALOG 1907

tells all about pure-bred poultry and describes 60 varieties. 10 beautiful natural color plates. Gives reasonable prices for stock and eggs; how to cure diseases, kill lice, make money. This valuable book only 10c. B. H. Greider, Rheims, Pa.

lay eggs. It takes every bit of energy to keep alive. Treat the hens well, and see how royally they will repay your efforts in their behalf.

It is best to dry-pick the legs before scalding. Do not allow the heads or feet to get in the water, or the former will have a sickly look, and the latter will lose their bright color. Have the water

as near boiling point as possible, without boiling.

A teaspoonful of fenugreek in the mash for ten fowls is highly recommended for indigestion. There is fenugreek in all condition powders.

The weight of hen's eggs range from fifteen to twenty-four ounces per dozen. A weight of twenty-two and a half ounces may be taken as a fair average for good-sized eggs, although a weight of four ounces is not unknown for single specimens.

Commonly speaking, what would be considered the dose for a child is about right for a fowl. A two weeks' old chicken will need as much medicine in a day as a six months old child. At six weeks it would require the same-sized dose as would be given a year-old child; a half-grown fowl as much as a two-year-old child, and an adult bird as much as a four-year-old child.

Some of the drinking fountains, especially those made of stoneware, are so constructed that it is difficult to clean them out. The best way that we have found is to use hot, scalding water and a large handful of shot. Shake the vessel briskly, so the shot will scrape along the bottom and sides of the fountains. This will remove the scum, and leave the fountains clean and sweet.

How many eggs can a hen lay in succession? Some years ago the writer sent that inquiry out to a score or more of prominent poultrymen, and among the replies received were the following: H. S. Babcock said he knew a Bolton Gray to lay 135 eggs in 135 days. I. K. Felch said 159 in as many days was claimed for a pet White Leghorn in 1859. James Rankin said he once owned a Creeper hen that laid 200 eggs in succession.

There is more or less difficulty in neatly chopping off the head of a fowl, as very often at the critical moment the hen will draw in her head. Loop a string to the fowl's head, and then have someone stretch the cord a little so as to bring the neck full over the block. The executioner should hold the legs and tips of the wings with the left hand, and with a sharp hatchet in the right, quickly cut off the head. Then hold the bird firmly until life is extinct.

Did you ever use rosin in dressing fowls? We never did, but here is some advice that is highly recommended by a party who has adopted it: First dip the fowls in cold water and let them drip. Then apply finely pulverized rosin to the feathers, using a dredging box for convenience. Then scald in the usual manner. The rosin sticks the feathers

together so that the pin feathers come out with the others, saving much trouble. Use the common crude article, and apply about a half teaspoonful to a fowl.

#### POINTERS.

Mr. R. M. Noble, of Riceville, Iowa, has choice White Plymouth Rock eggs for sale as per advertisement on page 16.

—On page 16 of The Homestead is inserted the new advertisement of Mrs. Ella Tharp, of Mt. Sterling, Iowa, offering Rose Comb Brown Leghorn cockerels and eggs for sale.

—Mr. Nick Loewen, of Lawler, Iowa, breeds pure-bred Single Comb Black Minorcas. He has eggs for sale at prices named in his advertisement on page 16. He guarantees satisfaction.

—Mr. O. M. Healy, of Bedford, Iowa, is advertising Silver Laced Wyandotte eggs for sale in his advertisement on page 16. Mr. Healy has been a breeder of this variety of chickens for the past twenty years.

—Mrs. C. F. McLochlin, of Gray, Iowa, calls our attention to the fact that her White Holland toms weigh from seventeen to twenty-four pounds instead of eighteen to twenty pounds as was stated in a pointer in our last issue.

—Mrs. J. J. Rink & Son, of Shelby, Iowa, breed Buff Plymouth Rocks exclusively. They are offering eggs for sale in their advertisement on page 16. They have a fine flock that have the run of the farm, insuring the fertility of the eggs.

—Mrs. Lola Schae, of Farmington, Iowa, is offering Embden goose eggs for sale in her advertisement that appears on page 16. These geese are easily raised and grow the finest of feathers. Those wanting eggs, write Mrs. Schae for prices.

—Mr. H. G. Smith, of De Soto, Iowa, has some choice Silver Laced Wyandotte cockerels that he says will be sure to please, for which he is making a very low price in his advertisement on page 16 of The Homestead. He is also quoting prices on eggs.

—Mrs. John Erickson, of Manilla, Iowa, can furnish Homestead readers with Single Comb Brown Leghorn eggs at prices which she names in her advertisement found on page 16. Mrs. Erickson writes that she has not missed getting eggs a day this winter.

—Mr. A. E. Goodman, of Indianola, Iowa, is offering Buff Wyandotte eggs from two different pens, in his advertisement that appears on page 16 of The Homestead. The eggs he has for sale are from prize-winning stock at the Iowa City, Winterset and Indianola shows.

—Mrs. O. J. Early, of Bristow, Iowa, can furnish Homestead readers with White Plymouth Rock eggs of the Fishel strain. Her advertisement quoting prices appears on page 16 of The Homestead. Mrs. Early has an extra good flock that score as high as 94 points.

—Mrs. A. Kitson, of Audubon, Iowa, in ordering us to re-insert her advertisement found on page 16, writes that she still has some Mammoth Bronze turkey toms that she would like to dispose of and that in order to do so quickly she will quote very reasonable prices.

—Mrs. F. H. Jewell, of Bristow, Iowa, writing in regard to her Black Langshan cockerels, which she is offering for sale in her advertisement on page 16, says: "I have good chickens, scoring as high as 96½, and would like to sell them at once, as I need the room."

—Mrs. E. F. Escher, of Manning, Iowa, is offering Barred Plymouth Rock eggs for sale from two different pens, also from flock having farm range. The prices at which she can furnish them per setting or in 100 lots are named in the advertisement that appears on page 16.

—Any of our readers who intend to buy Plymouth Rock eggs of the Barred and Buff varieties will find Mr. L. T. Calhoun, of Indianola, Iowa, fully prepared to meet their wants. Write him for prices and description of anything you might desire in this line. See advertisement on page 16.

—Mr. R. R. Stewart, of Charles City, Iowa, is offering Rose Comb Brown Leghorn eggs for sale at very attractive prices considering the high scoring of his stock, in his advertisement that appears on page 16. Mr. Stewart breeds Rose Comb Brown Leghorns exclusively and the quality is of the best.

—Mr. George B. Price, of Indianola, Iowa, is offering some high-scoring Leghorns of the Single Comb Brown and White varieties for sale. He has also a supply of choice eggs on hand. Send for his circular, after reading the advertisement on page 16. Kindly mention The Homestead when doing so.

—Mr. A. L. Anderson, of Indianola, Iowa, advises our readers on page 16 that he is prepared to furnish them with Wyandotte eggs, either of the Buff, Golden or the Silver Laced variety. He is guaranteeing each and every sitting and makes a proposition to buyers which is certainly fair and square in every respect. Write him for prices.

—Mr. E. S. Dyas, of Bellevue, Iowa, has a new advertisement on page 16 of The Homestead. He writes: "We will sell eggs from the different varieties named in our advertisement as low as anyone can and furnish a really good, high-class article. We wish those wanting eggs would write us now and we will try to supply them at the time needed."

—In the advertisement of Messrs. C. C. Drake & Son, of LaHarpe, Ill., that appears on page 16, they are quoting prices on Barred Plymouth Rock eggs from stock the parents of which came direct from Messrs. Bradley Bros. and W. H. Nelbert. The males and females are barred to the hide and score from 92 to 91 points, respectively. Write them for full particulars.

—Mrs. L. L. White, of Hartwick, Iowa, breeder of Barred Plymouth Rocks, writes: "We still have some nice Barred Plymouth Rock cockerels for sale that score from 89 to 90½ points. They will be sold cheap, quality considered. Those desiring same should come quick, as they will not last long

## HATCH ALL Incubators Will Hatch Your Eggs

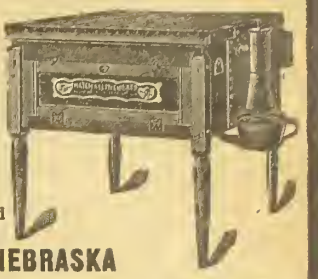

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

HEBRON INCUBATOR CO., Box 8, HEBRON, NEBRASKA

## Incubator Book

The Best That Was Ever Written

If you wish to buy an incubator wisely, read this book. It will tell you the facts that you need to know. It is written by a man who has spent 25 years in perfecting an ideal incubator. It tells of the mistakes that he made and that others are making—and how to avoid them. It tells you his experience with all sorts of incubators—the good points and the weaknesses of all. It tells you how he has perfected the Racine Incubator—in 25 years—until it includes all the good points that any man has discovered. The book is interesting—fascinating—and it is written by a man who knows most about incubators. You will know which incubator you want when you read it—and the book is free. Write today for it. We Pay the Freight. Address

Racine Hatcher Co., Box 135, Racine, Wis.

We have Warehouses at Detroit, Mich., Buffalo, N. Y., Kansas City, Mo. and St. Paul, Minn.

at the bargain price I am asking for them." Mrs. White's advertisement appears on page 16.

Anyone wanting Rose Comb White Leghorn cockerels should write to Mrs. U. G. Davidson, of Manson, Iowa. She has about twenty of these for sale and is offering them at \$1 each or six for \$5. Write her at once if you want White Leghorn cockerels.

—Mr. J. W. Wagner, of Monroe, Iowa, breeder of Plymouth Rocks, in furnishing copy for his advertisement found on page 16 of The Homestead, writes: "I have two dozen Barred Plymouth Rock pullets yet for sale and a number of extra good, large cockerels. They are large-boned fellows and nicely marked. I have some yet that are good, large, dark fellows that would be good for cockerels breeders."

—Miss Nettie Crane, of Blencoe, Iowa, writes that she has only a few Single Comb Brown Leghorn cockerels left, but she is very anxious to sell them. She writes they are from the best of stock and that her breeders scored, males 92½ to 93½ and females to 93 points. The cockerels that she is advertising for sale show their good breeding and those who will write her will be answered cheerfully and promptly and she will quote them real bargains.

—Mr. J. S. K. Campbell, of Morning Sun, Iowa, proprietor of the Forest Grove Poultry Farm, breeds White Plymouth Rocks exclusively. He keeps no other poultry on the farm. In his advertisement which appears on page 16 of this issue Mr. Campbell is quoting a very reasonable price for White Plymouth Rock eggs. Not only is his price reasonable, but he guarantees a hatch of eleven eggs or will replace a sitting at half price. He is now ready to book orders for future delivery.

—On the poultry farm of Messrs. Parker Bros., of Indianola, Iowa, will be found some very good specimens of the Single Comb White Leghorns, the Rose and Single Comb Brown Leghorns and Barred Plymouth Rocks. At present these gentlemen are offering eggs of the above breeds from choice stock. Further, they guarantee 65 per cent of these eggs fertile. This is certainly an attractive proposition. Their prices are moderate and may be learned by referring to their advertisement on page 16.

—Mr. S. M. Compton, of Newton, Iowa, in ordering a change in his advertisement, writes that he has had a splendid trade this winter from his advertisement in The Homestead, having already sold over \$225 worth of stock and has eight White Rock cockerels and about three dozen hens and pullets to spare. Turkeys and ducks all sold except three toms and one drake. Mr. Compton says he has not heard from a dissatisfied customer this winter, but has heard from lots of them that were well pleased.

—We desire to call the attention of our readers to the new advertisement on page 16 of Mr. W. J. Smith, of Campbell, Iowa, who breeds Barred Plymouth Rocks, White Wyandottes and Mammoth Bronze turkeys. Mr. Smith has now for sale some choice Mammoth Bronze turkeys sired by a son of Kansas Traveler. He can furnish our readers with White Wyandotte cockerels and Barred Plymouth Rock pullets. His stock is all first-class and prices will be made right. He can supply eggs in season. He also has

## WRITE TO US BEFORE YOU BUY AN INCUBATOR

We Can Save You Money Only \$7.90

We buy material to the best advantage. We manufacture at least expense. Victor machines give you most for your money as our free books will show. Just say on postal "Send Victor Book" and tell us the size machine you want and let us give you our special prices. Geo. Ertel Co., Quincy, Ill.

a 220-egg Cyphers' incubator and brooder in first-class condition for sale.

—Mrs. Laura Mather, of Clarksville, Iowa, in furnishing copy for her new advertisement that appears on page 16 of The Homestead, writes: "I have a beautiful flock of excellent Rose Comb Brown Leghorn fowls that are of a fine laying strain. They are of good size and have full range of the farm. They will give good satisfaction. Write me for prices on large orders."

—Mrs. H. J. Hess, of Waterloo, Iowa, writes: "I still have three very fine Mammoth Bronze turkey toms for sale that weigh twenty-eight to thirty pounds, finely marked. Also, fine Mammoth Bronze pullets that weigh fifteen to nineteen pounds, at prices that are right. Some extra fine White Wyandotte cockerels with fine low rose combs, yellow beaks and legs, and pure white plumage, at prices that are very low, and Rose Comb Brown Leghorn cockerels that are good ones, prices very reasonable. Some choice pullets and yearling hens in dozen lots. They are a heavy laying strain and will be priced reasonable, quality considered."

—On page 16 our readers will find a very interesting announcement made by Mr. W. A. Hartman, of Winterset, Iowa, regarding prize-winning birds and eggs of the Barred Plymouth Rock breed. Mr. Hartman has been in the business for twelve years, and has always believed that there was a great future for his breed of fowls. His sixteen-acre farm near Winterset has every convenience for raising poultry and it has always been a very profitable institution. The colony plan of breeding is in practice and flocks are kept separated to insure a high degree of health and vigor. Most of the prize winners at the Winterset Poultry Show have been from this flock. Mr. Hartman has been honored as president of the association and under his administration the organization has done much to further the interests of poultry breeders.

—Readers wanting eggs from Barred Plymouth Rocks, Mammoth Bronze turkeys, Pekin ducks and Toulouse geese, can do no better than to write Mr. S. V. Latcham, of Montezuma, Iowa. Mr. Latcham writes that he is better prepared than ever to supply customers with eggs for hatching. He says: "I have spared no money nor pains in getting the very best that can be produced. My Barred Rocks are of the Hawkins, Thompson, Bright and Bradley Bros. strains, which have won at New York, Boston and St. Louis World Fairs. My breeding males score 92 to 94 and weigh as high as fourteen pounds. Have refused some tempting offers for some of my birds. They are grand in size and bone, as well as markings, which is the result of many years of successful breeding of the Barred Rocks and I feel confident that I am offering eggs from the choicest of stock and my egg customers will

## Free Book For Men

A handsome illustrated book which explains all about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Piles, Kidney and Bladder Troubles, Etc. not be dissatisfied when chicks are grown. I guarantee good hatch and safe delivery. Parties intending to order eggs will do well to write for my free catalog. See advertisement on this page.

Messrs. Peterson Bros., of Indianola, Iowa, breeders of choice poultry, have chosen this issue of The Homestead to announce that they have some very good things to offer poultry breeders. This is one of the flocks that have been winning first prizes at the Iowa State Fair. There will be found on this farm some very choice specimens of the Golden, Silver and Buff Wyandottes, Barred Plymouth Rocks and White Leghorns. There will also be eggs for sale, and any of our readers who desire to buy any of this kind of stock will do well to write for description and prices. See advertisement on this page.

#### A BIT OF INCUBATOR HISTORY.

The above is the heading of a very interesting chapter in the late catalog of the Petaluma Incubator Company, of Petaluma, Cal. Anyone reading it will learn something which, very likely, he did not know before, namely, that the Petaluma Incubator was one of the very first incubators that proved a success and was offered to the poultry raisers of the country in a commercial way. The Petaluma was at the first, and has always remained, a business incubator. It has always had men behind it who were enthusiasts and eminently successful in the poultry business. They chose the redwood of California for their wood material. There is nothing known to the lumber trade that is any better for the purpose. The plan and the devices are of the best. Their nice control of the heat and ventilation have always been the wonder of poultrymen. It is claimed that in holding to a uniform temperature under all conditions it stands among the very first of all incubators. The results are uniformly high, which, of course, is the highest test of any incubator. The Petaluma company maintains an eastern branch at Indianapolis, to facilitate distribution of their machines. They pay freight all over the country. No one need be deterred from getting the famous Petaluma on account of freight charges. The catalog reveals the fact that the price is not greater than other leading incubators and brooders, and those prices mean for the goods delivered at the buyer's station. Write to the company, either at the Petaluma or Indianapolis address if you are interested in incubators or early incubator history. The advertisement on page 14 gives particulars of address.

#### POULTRY.

#### 219 Egg Strain Barred Plymouth Rocks

If you want stock and eggs from winners I have them. With twenty entries at two shows won 16 prizes. Eggs from my best pens \$1.50 for 15, \$2.50 for 30, \$3.50 for 50.

### Echoes From a Kansas Farm

By Henry Hatch

It doesn't pay to lend or borrow tools. Either leads to trouble, and trouble doesn't make neighbors.

The auctioneers have reaped a rich harvest this winter. We know of some very common workers in this line to net \$1,000 in February. That beats poultry raising, even.

On the day when Weather Prophet Hicks was going to have a "terrific blizzard sweep the plains," we put in the whole time plowing, and have been plowing ever since. It is safer to predict a storm after it's all over.

There is no hanging back from field work this spring, except by the usual few. We have learned a lesson down this way, which is, put in every day of fine weather, working in the fields. The bad weather may come later on.

Some folks imagine the all-purpose horse should weigh about 950 pounds. There is no purpose at all about such a horse, except to travel on the roads a little, and he is not much good there unless roadster bred. Coming right down to the full meaning, there are very, very few all-purpose horses.

One of our neighbors believes that a farmer cannot afford to raise horses and sell them, when ready to go into work, for \$100. We believe he is more than half right. A little spindle-shank, "yaller" four-year-old costs as much to raise as the big, blocky drafter, and the drafter is what calls for over \$150, at present prices.

Every year we threaten to have something done to the corn stubble, before plowing, but we are going ahead in the same old way, without cutting them down. Harvester companies have made an attachment called a stub cutter, which is attached to the corn binder, and cuts the stubs close to the ground,

after the fodder has been cut. Not one horse in a hundred will walk straddle of a stub row.

Here with us where our soil works just a little tough, if not frozen deep a few times during the winter, four horses on a sixteen-inch sulky plow do not go bad. Four will walk a plow along all day, doing better than three acres, and you do not feel timid about getting down deep enough. All implement dealers now sell four-horse eveners that work well on sulks, placing one horse in the furrow and three on the unplowed land.

One of the standard plow companies recommends using a strung-out hitch for four horses. They make an even which is claimed to compel both lead and tongue team to do an equal share. The only advantage of this arrangement would be in hot weather. Four abreast makes it hot work for the center team. We imagine a fellow would have just a little fun breaking in a "foxy" team for leaders, when plowing around bends along the creek and crossing little ditches.

We wonder if any reader of this paper still has in commission the old style two-wheeled plow, of the "Gilpin" type. A neighbor used one up to about two years ago. The plow set about a rod behind the driver's seat, and a fellow, in looking to see if the plow was scouring, as a fellow unintentionally does, could strike out a land about as straight as some of the elections of United States senators. The man who says there has been no improvement in machinery making does not know what he is talking about.

A plow should be sold with two shares, the same as a mowing machine with two sickles. A fellow doesn't like to run to the shop every little while, right in the rush of spring plowing, to get a share sharpened. With two shares, he can often send one in by a neighbor, while he goes right on plowing, or he can plow until both are dull before making the trip to the shop. We are not much on going to town. Once a month is often enough for us. Many spend one whole day out of each week in town.

Some of the local merchants have just caught onto a way to compete with the mail order houses. They sell for cash, and cash only, and keep from one to three teams on the road all the time, delivering goods to the farmers' door-yard and taking the produce. Very often just one of the teams on the road will do a larger amount of trading in a day than the store in town does. The telephone from the farm to the town helps to complete the chain. There is no use in trying to blackguard the mail order house. The more the local merchants do this the greater the trade that goes out of the country.

#### J. W. & J. C. Robison's Sale of Percheron Stallions and Mares.

The sixth annual sale of Percheron stallions and mares from the White Water Stock Farm held at the new sale pavilion at Wichita, Kan., by Messrs. J. W. & J. C. Robison, of Towanda, Kan., was attended by breeders from every state in the union. The new sale pavilion was taxed to its utmost capacity. Casino (45462) 27830, at the head of White Water Falls Stock Farm stud, was greatly admired by everyone present. He was winner of first prize and reserve senior champion at the World's Fair in 1904, and among many other prizes was the gold medal awarded him at the recent American Royal at Kansas City, Mo. The offering was an excellent one and good prices ruled, as will be noted by list below. Col. J. W. Robison, senior member of the J. W. & J. C. Robison firm, made a few remarks before the opening of the sale. His remarks in regard to the breeding of Percherons for the coming generation, being a breeder of them for the past fifty years, was listened to very attentively. The sale, as a whole, was a grand success. No. 28 of the catalog, Hyatt 41024, black, foaled July 15, 1903, sired by Cadix 24670 (44497), dam Queen (41022), a young stallion of extraordinary size and quality, and a promising one, brought \$1,600, which was the top price of the sale. He was purchased by Mr. Leon Magette, of Braman, Okla. Mr. M. P. Early, of Harveyville, Kan., paid \$1,500 for the second highest, No. 24 of the catalog—a three-year-old stallion by Clunney 24444 (43773) out of Corinne II. 14111; was a prize winner at the Kansas State Fair in 1904. Casino Jr. 41398 sired by Casino 27830 (45462), dam Rosa Bonheur 11324 (10382), champion of France for two years, goes to Denver, Colo., for \$1,250, the present owner being Mr. M. J. Dunlevy. Colonels Harriman, Sparks, Brady and Arnold did the work in a very satisfactory manner. Below you will find a full list of sales:

Lot.	Name	Price.
1	Morton Bros., Nebraska City, Neb.	\$ 900
2	F. H. Foster, Lyons, Kan.	600
3	John Brindle, Garrison, Kan.	655
4	Petty Bros., Sedalia, Mo.	505
5	R. J. Northwell, Fort Morgan, Colo.	785
6	W. P. Tabor, Chillicothe, Texas.	750

## Are You Up-to-Date on Paint?

The way to *profit by progress* is to keep in step with it. There is no more reason for mixing paint in the old-fashioned hard, hand way than there is for plowing with a stick, reaping with a cradle, or driving to town for your letters when there is a rural mail box on your gatepost.

Untiring, unerring machinery does the work for you now—far better and surer than human hands could ever do it.

## Lowe Brothers

### "High Standard" Paint

#### Gives Best Results

It is always uniform—one gallon like another—each fresh brushful like the last—the best paint-making materials, combined in the proven "High Standard" proportions, and ground superfine. Don't figure your paint cost on price per gallon, but on square feet covered, and total cost, divided by number of years of service. Judged in this way, "High Standard" Paint is by far the *cheapest*. "High Standard" will cover one-third more square feet to the gallon, and last two to three years longer than ordinary paint. There is a Lowe Brothers Paint for every requirement about farm and home—Barn Paint, Implement Paint, etc., etc. Use "Little Blue Flag" Varnish—the best.

The best handbook on the paint subject is our booklet, "Paint and Painting," which tells you how to select paints; how to prepare surfaces for painting; how to choose brushes, how to use them, etc., etc. This valuable booklet will be mailed *free* if you will write for "Paint and Painting," and we will tell you who is your nearest "High Standard" agent. Address today.

**The Lowe Brothers Company, 450-456 Third St., Dayton, O.**

New York Chicago Kansas City

## Buy Wright's Stock Feeder Before April 1st.

It saves a great amount of feed and labor, and helps develop a more uniform lot of pigs. Everybody who has tried it says a good word for it, experiment stations, hog raisers, sheep men, etc. Many of them say it more than pays for itself every year. No wasted feed. No runs when the feeder is used. Every pig has his place and gets his share of the feed; and the best of it is it doesn't cost much. I really ought to have more money for it, but have been able to make favorable arrangements for material and therefore have decided to give my patrons the benefit, and on all orders mailed me on or before April 1, 1907,

### The Old Price of \$10.00, Freight Prepaid,

still holds good. This includes the right to manufacture other feeders for your own use; worth this amount in itself. Positively no orders filled at this price after April 1st. Order at once if you want the feeder. You'll never regret the investment. Booklet illustrating and describing the feeders if you want it. Address all correspondence and orders to **C. A. WRIGHT, Rosendale, Mo.**

This is it—Invaluable for Feeding Pigs, Sheep and Calves  
Also breeder of registered Duroc Jersey Hogs.

#### C. W. Huff's Sow Sale.

On February 13th Mr. C. W. Huff, of Mondamin, Iowa, made a very successful Duroc Jersey sow sale. He had a good crowd and bidding was spirited throughout—sold forty-five head in about one and one-half hours. Several breeders were in attendance and took some of the good ones. The local buyers were also very much in evidence and helped materially in the success of the sale. The top price was \$53 for No. 1 of the catalog, going to Mr. M. S. Ellis, of Missouri Valley, Iowa, he also buying several other good ones. But three head sold under \$25; forty-five head averaged \$33.66. Those selling for \$30 and over are as follows:

Lot.	Name	Price.
1	M. S. Ellis, Missouri Valley, Ia.	\$53.00
2	Same	52.00
3	Same	38.00
4	A. H. Tannis, Sioux City, Iowa.	45.00
5	Art Alton, Modale, Iowa.	41.00
6	M. S. Ellis	39.50
7	Same	35.50
8	F. Swintz, Blencoe, Iowa.	34.50
9	Jas. Weldon, Mondamin, Iowa.	34.00
10	F. E. Hicks, Missouri Valley, Ia.	39.00
11	Geo. Weaver, Blencoe, Iowa.	41.00
12	F. Swintz	40.00
13	Same	41.50
14	E. B. Ryan, Neola, Iowa.	48.00
15	W. L. Hull, Moorhead, Iowa.	48.00
16	Same	38.00
17	F. E. Hicks	32.00
18	M. Noyes, Mondamin, Iowa.	30.00
19	G. L. Gamet, Mondamin, Iowa.	32.00
20	F. Heinz, Modale, Iowa.	31.00
